

# Vine Co. Pioneer.

W. P. GOTTRY, Publisher.

PINE CITY, MINN.

M. MELIER, the French premier, proposes to encourage large families in France by giving preference to families containing more than three children in distributing government scholarships and posts, and by regulating pronouncements and allowances according to the number of children.

It is said that the kaiser may not be able to attend Queen Victoria's jubilee celebration. He has method in this, as his grandmother might seize the opportunity to have a pleasant talk with him about some of the pressing agitating of family ties. It is said that William II is afraid of his august relative.

France's the most remarkable art exhibit in the world is that of the lunatics in Ville-Evrard asylum in Paris. Most of the patients in the asylum have been painters or designers, and the pieces in charge are magnified in a "salon" of their work. The taste on the minds of the patients is said to be excellent.

It has been a source of interest and wonder to Arctic explorers to find such quantities of singing birds within the Arctic circle. They are almost beyond belief. But there are scores of cranes, crows, starlings and cloudberries that ripen in the northern swampcountry for the presence of the birds.

Mrs. MARIA LLOYD STEELE, who died the other day in Ann Arbor, Mich., in her 92d year, was a daughter of Francis Scott Key, the author of "The Star-Spangled Banner." She was born in the old Key home at Blenheim, formerly Bladensburg. She was a descendant of Gov. Lloyd of Maryland, and a niece of Chief Justice Taney.

NORTHERN can exceed the power of the voice of a perfect orator. Edward Everett, whose own utterance was such an entrancing spell, declared that Webster's voice was the best he had ever heard. But Webster's voice was like Henry Clay's voice was called a band of music. Beecher's voice was a trumpet or a lute at will. George William Curtis' voice was "a harp of a thousand strings."

STAGES propelled by motors are soon to be introduced on Fifth Avenue, New York. The stages are now drawn by horses, which move at a rapid pace in these piping days of rapid transit. The directors of the Fifth Avenue Stage company, therefore, have concluded to experiment with motors, and if the scheme works well they will equip the 50 stages of the company in that way.

A special official notification has been issued by the prince of Wales, recommending that the schemes on the part of the people destined to celebrate in a fitting manner the sixtieth anniversary of the queen's reign should be planned so as to show the form of "works of mercy among the sick and suffering and of enterprises that may tend to brighten and ameliorate the condition of the poorer subjects of her majesty."

THIRK is a hamlet in Hancock county, Maine, known as Green Lake, but it was never a lake, and it got its name from a species of frog. The Elsworth enterprise, however, reports that Mr. Lavan Franklin had occasion to put a lump of lime into his pocket, and when he came to Thirk a day or two later he found 250 frogs, most of them dead, evidently killed by the lime. He continued his search, and, taking the wall down, found 25 to 30 more.

The big ocean gryphon will soon be equipped with lifeboats harnessed to balloons, so as to be practically unsinkable. Cylinders filled with compressed gas will be placed beneath the bottom of the lifeboat and from the balloons, which will be harnessed with cords to a hollow mast connected with the cylinders, is inflated. The mast, which is iron tubing, is adjustable. The company's boat will doubtless prove of the greatest service in saving people far out at sea.

MANY people have a genuine curiosity to know what the human body contains, as they would fain be human voyagers. An easy way to put the matter to a test is to stand before the ordinary mirror that turns in its frame, and, after closing your eyes slowly and tightly at first, gradually opening them while you look fixedly at your own reflection. If you feel no effect whatever from it, the chances are that you can stand an ordinary sea voyage without any qualm.

THE Engineering and Mining Journal, an excellent authority, makes the world's output of gold during the year 1896 \$2,000,000, against \$2,000,000 in 1895. Gold experts predict that the actual return for 1897 will reach \$2,000,000. The United States is at the head of the list of gold producers, with \$57,000,000, followed by Australia, \$35,000,000; South Africa comes next, with a small increase. The bulk of the increase is in the United States.

In Durban alone during last year nearly one hundred tons of amber were turned to the smelter's purpose in pipes and cigarette holders. This, of course, is another of the familiar yellowish resinous substances, and the other hand, shows a wonderful variety of tints, from ruby red to turquoise blue, as may be seen in the private collection of Arthur Bunnell, an American of Boston, who has made colored amber his hobby. He has written a book about them and has recently been on a visit to London, carrying with him a number of his finest specimens.

## REFORMS FOR CUBA.

Royal Decree Signed by the Queen Regent of Spain.

Insurgents Will Not Accept—Minister De Lome Gives His Views—Treaty with Wever.

Madrid, Feb. 5.—It is announced that the royal decree promulgating the scheme of reform in Cuba, which has been prepared by Premier Canovas and Sanz, and approved by the Spanish cabinet, has been signed by the queen regent. The document covers several pages of the official gazette, and additional details of its provisions were disclosed by a representative of the press who showed the following provisions of the scheme:

One of the principal features of the scheme is that the civil service of the United States will be composed of men who will be known as the council of administration.

The body will be composed of 30 popular vote and six by the leading municipal and provincial corporations.

The leading magistrate, a university professor, an independent delegate and five ex-members of the cabinet, and members of municipal and provincial councils which will appear to the government, the council can appear to the colonial government.

The municipal and provincial councils

will nominate the municipal judges and the budget and draw up customs tariff under the provision that a protective margin of 40 per cent. will be maintained.

The customs against foreign goods.

The municipal and provincial councils will be responsible for the maintenance of roads, bridges, etc., and the expenses must be covered by the municipalities.

The municipal and provincial councils

will nominate the municipal judges and the budget and draw up customs tariff under the provision that a protective margin of 40 per cent. will be maintained.

## THE CIVIL SERVICE.

Annual Report on the Condition to the President.

Washington, Feb. 9.—The annual report of the civil service commission to the president shows that at the beginning of the year there were about 92,000 places included in the classified service. This report embodies the work of the commission for the past two years as the report for 1895 was not issued owing to the reorganization of the commission deferred its report for that year so as to include the thousands of positions placed under the classified service during that period. The total number of positions of the classified service is 57,107, of which 57,000 are in the classified service and 107 are in the unclassified service.

The aggregate compensation paid in the executive civil service of the United States during the last fiscal year was approximately \$100,000,000.

Of those in the classified service 84,292 are in the classed compensation and salary examination or registration, 30 are appointed by the president, 731 are excepted by the Senate, 5,570 are Indians in the service, 5,200 are deemed best for the service, 483 are appointed by the Senate, 8,554 are employed as laborers or workmen, 1,000 are classified as clerks, 1,200 are not classified, 6,725 are postmen of the fourth-class. The classifiable but unclassified group will be transferred to the classified service by the end of the year, as far as possible, in the case of the custom house because as many as five, and in the post office service when a post office becomes a free delivery office.

**PURITAN IS UNSEAWORTHY.**

SULLY Another Vessel in the Navy.

NEW YORK, Feb. 5.—Still another vessel in the United States navy has been found unseaworthy. It is the monitor Puritan, the last one added to the list of vessels that have been built in Cuba and not one of them in favor of the cause of independence.

"There is not the slightest possibility of it. No American should place any faith in the word of the Spaniard," says the admiral.

"There is no guarantee that the Spaniard is not a spy, and he may be a traitor to us."

The government of the island is empowered to appoint the high officials.

The municipal and provincial councils will nominate the municipal judges and the budget and draw up customs tariff under the provision that a protective margin of 40 per cent. will be maintained.

The municipal and provincial councils

## OUR LAWMAKERS.

The Closing Session of the Fifty-Fourth Congress.

Measures of Interest Presented in Both the Senate and House.

A Daily Summary of the Proceedings.

Washington, Feb. 5.—The feature of the senate yesterday was a very spirited debate on the immigration bill, but no action was taken.

Miss and Schwarz, cotton factors at Selma, Ala., failed for \$300,000.

A large portion of the business part of Sheldonrock, La., was destroyed by fire.

The Moscow (Idaho) national bank closed its doors with liabilities of \$100,000.

Fire destroyed property on Fifth avenue in Pittsburgh, Pa., valued at \$100,000.

A state savings bank at Atlanta, Ga., closed its doors with liabilities of \$100,000.

A six-day bicycle race started at Grand Central park in Pittsburgh, Pa.

Washington, Feb. 4.—After a brief parliamentary struggle in the senate yesterday the friends of the Nicaragua canal bill were unable to hold a quorum and the bill was rejected.

Washington, Feb. 5.—The senate yesterday voted to prohibit the sale of intoxicating liquors in the capital.

Washington, Feb. 5.—The senate yesterday voted to prohibit the sale of intoxicating liquors in the capital.

Washington, Feb. 5.—The senate yesterday voted to prohibit the sale of intoxicating liquors in the capital.

## PINE COUNTY PIONEER

**S. C. GOTTRY** Editor and Prop.

TERMS: \$1.50 A YEAR IN ADVANCE

Received at the Pine City Post Office as Second  
Class Matter.

PINE CITY, MINN., FEBRUARY 12, 1897.

MINNEAPOLIS has another mysterious murder sensation.

DULUTH is in the throes of a municipal boodle investigation. Duluth may not be as large as Minneapolis, but she has got just as much style about her.

IT WILL take a large force of men over six weeks to put a new hull on the cruiser Brooklyn, which struck a pebble while slowly working her way down stream last week, and narrowly escaped sinking.

THE Stockwell bill for the abolition of capital punishment in Minnesota was defeated in the house on Tuesday by a vote of 73 to 23. However, humanity is progressing, and it is a matter of only a few years now when this blot on our civilization will be erased.

THE Pine City editors of a paper published in a neighboring village occasionally get considerably aggravated at the PIONEER for the sentiments it has seen fit to express. Blaze away, brethren; your opinions forced upon an unwilling public through the columns of our contemporary, do nobly any harm and assist the editor in filling up his columns.

WE ACKNOWLEDGE receipt of the second booklet from Franklyn W. Lee, of the Rush City Post, entitled "Lenten Verses." The book contains several of the author's rhymes, grave and gay, suited for the Lenten season, upon which we will enter shortly. This booklet is to be followed soon by one of dialect rhymes under the title of "A Bundle of Rushes." These books can be purchased at the author at retail for 25 cents.

THE St. Paul Pioneer Press claimors editorially for the enactment and enforcement of a "snow law" in that city, the sidewalk in many places being decidedly dangerous. In this respect at least, Pine City resembles St. Paul. The sidewalks in front of some of our principal business blocks, with their icy accumulations, are a menace to life and limb. If the ice can not be removed, it might at least be covered with sand or ashes.

THE Sandstone Courier is trying to start anew the old scheme of changing the name of Pine county, claiming that the name is misleading and consequently damaging to its best interests. There used to be several of the same opinion here, but the passing of Bryan and his free-silver phantasy seems to have taken their minds completely away from matters of local character, and the question has not been discussed in this locality for many months.

THE PIONEER has received the statement of the Work, Condition and needs of the State Normal Schools of Minnesota," which contains much valuable information. The organization of Normal schools was the first step toward the establishment of our present public school system. They have always struggled under a condition of limited resources, since the revenues of the schools have never increased in proportion to their growth and the demands upon them for trained teachers, while the expense of the curricula has greatly advanced. The schools were never so limited in proportion to their work as at present. In view of these facts the increase in the number of graduates in service from 1,063 in '93 to 1,577 in '96 is remarkable, and not less so is the fact that the number of Normal trained teachers has increased in ten years from 1,000 to nearly 3,200, nearly one half of the whole number of the teachers in service. In view of these facts it is believed that the state cannot increase its work of training teachers more profitably and economically than by increasing the facilities of the Normal schools which have made so creditable a record. It is now proposed that the normal schools hereafter remain in continuous session, maintaining the regular courses in four quarters of twelve weeks each per year, to sup-

ply opportunities for graded, continuous and progressive courses of study, which the summer schools cannot attempt to apply. The plan meets with the approval of a great many prominent educators, and its adoption would be a boon to many a struggling teacher.

### HERE AND THERE:

A new paper is to be started at Taylors Falls, although the field is already well filled.

Warden Wolfer, of the penitentiary at Stillwater, is an advocate of the abolition of capital punishment.

THE Anderson bill, to make effective the Anderson law of 1893 taxing railroad lands, is to be reported favorably.

A St. Paul plumber was robbed in that city last Wednesday night. The papers did not state whether the thieves carried off the booty in a wheelbarrow of a furniture van.

GOV. Clough has appointed E. J. Bell of St. Paul, as commissioner from Minnesota to the Tennessee Centennial Exposition, to be held in Nashville in May.

A Prof. Williams, a Washington phonologist lectured in the halls of the house of representatives, yesterday, on his pet hobby, for the delegation of the legislators and their friends.

A convention of those opposed to secret societies will be held at Wilmar next month. Members of the Masons, Odd Fellows, K. of P., et al., do not seem to be much alarmed however.

It is flatly denied that Mr. Cleveland is going to start on a tour of the world at the expiration of his term of office. It is now generally believed that he will go on a hunting expedition.

The house and senate met in joint session on Wednesday and officially declared McKinley and Hobart elected. The following was the vote, as officially announced: McKinley, 271; electors, Bryan, 176; Hobart, 271; Seward, 149; Watson, 27.

THE New York World, describing a locomotive, said it had four six-foot drivers and that the driving wheel base was fifteen feet six inches, thus putting twenty-four-foot in fifteen feet six inches. This is a method of condensing space in a newspaper unknown to practical engineers.

THE grand Bradley-Martin \$300,000 ball was celebrated in New York last Wednesday evening, and is said to have been the grandest affair of its kind in the history of the nation. How good this wealth would do if expended in proper channels cannot be calculated. While the moneyed aristocrats doubtless have a perfect right to dispose of their wealth as they please, such criminal extravagance only widens the breach between the common people and the self constituted aristocracy, and brings so much closer the great day of reckoning.

### THE ENGINEERING MAGAZINE.

THE Engineering Magazine, New York, for February, gives an interesting high light to the year 1896, which was set by the "Progressive Year" of January last, and satisfies the keen expectations of those who widely noted its issue. "The Early Progress of American Manufacturing," is a subject which is especially pertinent in view of the awakening interest evinced by the country in shipbuilding. The author of this article has given a clear and pointed review of the schools which are set up for our countrymen, both in America and abroad, as far as the educational system goes.

"Col. G. E. Waring, Jr., handles a topic on which he is the acknowledged American authority, the Relations of Good, Fair and Honest Business to the Engineering Profession."

"Prof. H. M. Atchison's article on "The Advantages of Modern Management" is a clear and pointed review of the entire organization of our former supremacy, both in America and abroad, as far as the educational system goes.

"Prof. H. M. Atchison's article on "The Advantages of Modern Management" is a clear and pointed review of the entire organization of our former supremacy, both in America and abroad, as far as the educational system goes.

"Prof. H. M. Atchison's article on "The Advantages of Modern Management" is a clear and pointed review of the entire organization of our former supremacy, both in America and abroad, as far as the educational system goes.

## PINE COUNTY PIONEER.

PINE CITY, MINN., FEBRUARY 12, 1897.

### CHIPS AND SHAVINGS.

*Local Chops Picked up Around Town and Shavings Clipped from Our Exchanges.*

— Masks at the Drug Store, in endless varieties.

— Band boys' masquerade Feb. 22. Tickets, \$1.50.

— The logs, piling, ties and cordwood still continue to come in at a lively rate.

— Make your arrangements so as to take in the masquerade Washington's birthday.

— Burger Bros. saw mill is running full blast every day and is doing first class work.

— We are selling Mufflers and Muffs below cost. G. A. CARLSON, Rush City, Minn.

— The Minneapolis Bargain Store, at Rush City, is closing out stock at 50 cents below the dollar.

— For Sale—A span of horses, and young cow. For particulars call on or address Sticha & Petricka.

— Remember, you buy for one dollar, two dollars worth of goods, at the Minneapolis Bargain Store, Rush City.

— Will Butterick, station agent at Sturgeon Lake, was a county seat caller between trains on Wednesdays afternoon.

— There will be ice out here this season than ever before, and is as solid as can be and from 24 to 28 inches thick.

— Mrs. Atkinson, of Hamline, arrived here on Monday, and will remain until Friday, and in spite of her parents, Rev. and Mrs. Taylor.

— Misses Lizzie and Maggie O'Brien took in the "Poverty Party" at Sandstone on Friday evening of last week. They report having had a fine time.

— The Riverside Circle met at the residence of Mrs. S. G. L. Roberts on Friday, and in spite of the bad weather, a goodly number were in attendance.

— Mrs. Darwin Bartlett's brother, wife and little daughter, arrived in this place on Monday from New York to spend a couple of weeks visiting at the head of Pokegama lake.

— There was four car loads shipped to Pine City on Monday, one of cordwood, one of iron pots, and two of piling. Every day there is from two to five cars shipped from this station.

— We are sorry to relate that George Cunningham is not improving as rapidly as we would like, but we hope that he will be only a short time before he is as active as ever in his business life.

— Wm. O'Brien, the popular lumberman of the northern part of the county was in town the latter part of last week on business. Billy is always a welcome visitor in the tropics of Pine county.

— We won't agree to pay your fare to Pine City if you expect dollars worth of goods to us, but do agree to sell goods so cheap that you will save more than enough, G. A. CARLSON, Rush City, Minn.

— Services in the M. E. church Sunday as follows: Morning, 10:30 a.m.; subject "Dependence and Guidance." Evening, 7:30, subject "Christ's Character Described." All are invited.

— We are informed that new hotel is to be opened up in this village at no distant day. The party coming we are told, had had considerable experience in other towns, and will run a strictly first-class house.

— The masquerade ball to be given by the band boys on the twenty-second promises to be a grand affair. The boys will spare no pains in making this the best dance ever given in this place, if good music and first class order will it.

— From the streets of this village, one day this week, a brown clasp pocket book, containing articles of value. The owner can have the same by calling at the Central meat market, proving property and paying for this notice.

— Quite a number of our young people drove up to the residence of Mr. Ourand, on the government road, on Saturday evening and tripped the light fantastic toe to the music of Frank Jelenik. They all report having had a good time.

— Jon W. Neubauer wishes to state to the citizens of Pine City and vicinity that he will be prepared to furnish every thing kept in first-class meat market after tomorrow (Saturday, Feb. 13), and would respectfully ask for a share of their patronage.

— On account of the recent spell of cold weather, the Minneapolis Bargain Store, at Rush City, will continue its closing out sale for the next twenty days in order to dispose of the balance of the stock. Call and look at the big bargains they are offering.

— Mr. and Mrs. J. W. Axtell, who have been visiting in New London, and other places in Wisconsin for the past six weeks returned home on Saturday last, in good time, but say that there has been a great many changes since they left there about eight years ago.

— From everywhere comes words of praise for Chamberlain's Conch Romeo. "Allow me to congratulate you on the merits of your Romeo. It cured me of chronic rheumatism which the doctors could do nothing for. Call on C. H. Bigard, Tolosa, O." For sale by Breckenridge, the Druggist, Pine City.

— H. J. Rath is to be found every night in his office in the court house checking up files. Ling's book in which persons are accounted for the number of feet bought to the mill and the number of feet bought. On Saturday Henry has no trouble settling with the farmers and others for what he has bought during the week, as he pays cash every Saturday night.

— Royal and Mrs. Knight, of Rock Creek, passed through here on their way to Sandstone, where Royal had some business to look after and visit with his sister Mrs. Geo. Limmark. They returned on Tuesday afternoon and spent Tuesday night and Wednesday morning in the rooms of Mr. W. P. Gottschall. They returned home Wednesday afternoon.

— A few months ago, Mr. Bryon Every, of Woodstock, Minn., was badly afflicted with rheumatism. His right leg was swollen the full extent of the joint and gave him great trouble. He was advised to try Chamberlain's Pain Balm. The first bottle of it helped him considerably, and the second bottle effected a cure. The 25 and 50 cent sizes are for sale by Breckenridge, the Druggist, Pine City.

— J. Y. Breckenridge, our popular village president came up from Minneapolis, where he is attending an institution of Pharmacy and Chemistry. On Friday's limited, to be present at council meeting in regard to the grain mill. Mr. J. Y. and H. J. Rath are the ones who were instrumental in getting the gentleman here and in showing him the advantages of this place as a site for a flour mill.

— Wm. Humphrey, of Gary, Dauphin and George, proprietors of this place, arrived here the morning of last week, to spend a few days visiting with his brother, and look up a point to locate. If he can secure a house, he will move here. When he got off the train he went to the depot and laid down a fine coonskin overcoat and went out to look for his brother, the train pulled out, and so did the overcoat, at least when he went to look for the coat it was gone, and he has not yet seen any trace of it. He left on Monday.

— Mr. Ward L. Smith, of Fredericktown, Mo., was troubled with chronic diarrhoea for over thirty years. He had become fully satisfied that it was only a question of a short time until he would have to give up the world, but called upon one of the best physicians in Europe and America, but got no permanent relief. One day he picked up a newspaper, and chanced to read an advertisement of Chamberlain's Cold, Cholera and Diarrhoea Remedy. He had a bottle of it, the first dose helped him, and its contents used cured him. For sale by Breckenridge, the Druggist.

— Do not forget to turn out on Tuesday the 19th and cast your vote for the issuance of bonds for the grist mill and electric light plant, the plan as adopted by our council will not come on the tax-payer at once, as described in another column of this issue. It is for your interest as well as that of the tax-payers that the tax-payers will be protected. The gentleman who asks for the bonds has put up mills elsewhere and more than lived up to his contract, as was stated by parties living in the village with him, and one that the burden will not come on the tax-payer at once, as described in another column of this issue.

The gentleman who asks for the bonds has put up mills elsewhere and more than lived up to his contract, as was stated by parties living in the village with him, and one that the burden will not come on the tax-payer at once, as described in another column of this issue.

— DEAR GEORGE—Please send a bottle of Chamberlain's Conch Romeo. I would not fail to tell them that this valuable remedy in the hands of a genuine, honest, and upright man, will not fail to bring about a cure.

— BERTHA STEPHAN, Teacher.

— MARIE HOONEY, Teacher.

— MAY JORDAN, Teacher.

— GRAMMAR DEPARTMENT.

— Number of pupils enrolled..... 47

Number of days taught..... 100%

Average daily attendance..... 40

— ELIA S. GOLD, Principal.

— A GOOD SELLER.

From the Clerk of the District Court

FREDERICKSBURG, Pa., Feb. 13, 1897.

MR. J. GEORGE SUHREK, Druggist, City.

DEAR GEORGE—Please send a bottle of Chamberlain's Conch Romeo. I would not fail to tell them that this valuable remedy in the hands of a genuine, honest, and upright man, will not fail to bring about a cure.

— H. J. RATH, Teacher.

— J. Y. BRECKENRIDGE, Teacher.

— G. A. CARLSON, Rush City, Minn.

— F. J. RYBAK, Proprietor.

— J. Y. BRECKENRIDGE, the Druggist, Pine City, Minn.

— Sold by J. Y. Breckenridge, the Druggist, Pine City, Minn.

— DEMAND FOR CHESTER WHITES

— A brother of Chester White, who reported that he finds business better at present than it has been in a long time, says a Chester County (Pa.) exchange. A few mornings ago he had an order for 22 packages, and that same evening he had another for 22 packages, though he yields very ready to this demand. I con-sequently recommend it for crop and odds in children. Yours respectfully, ERIC F. WOLFF.

— Sold by J. Y. Breckenridge, the Druggist, Pine City, Minn.

— DEAR MR. BRECKENRIDGE,

— I DINE AT

Neverka's

I DON'T!

— I DINE AT

Neverka's

## AGRICULTURAL HINTS

### STACKING FODDER.

An Ohio Farmer Describes an Apparently Excellent Method.

My way of stacking fodder is as follows: I lay the stack in a long line, which is about as thick as a man's shoulder, that is, by stacking bundles almost perpendicularly on the ground, butts down and tops pressed together. I continue in this way, placing the bundles close together, until the shock, or prairie stack, is built up to about 10 feet in diameter at the base (ground). This usually requires 50 or 60 shocks.

Next, instead of getting up on this shock, or stack bottom, and having some one pitch the top, which will be 10 or 12 feet from horizontally, as is usually done, I remain on the ground, and continue these till the last bundle is placed, when a ladder is leaned against the stack and the top erected.

I then lay the stack on the ground, a bundle with both hands and lifting it say three feet from the ground, laying, or more properly speaking,

STACK OF CORNFODDER.

standing it on one of the bundles of the last or outside course of shock or stack bottom. I continue in this way, laying another shock and tiering them around to the starting place. This completes the first elevated course. The butts of this course being about three feet from the ground, brings them to a point about two feet from the bundles underneath and so forth.

The bundles for the next or second elevated course are placed in order by means of a two-tined pitchfork. The butts of this course are about six feet from the ground, and so forth, till the third elevated course, come to about the middle of the bundles underneath.

The butts of the third or last course, consisting of say eight or ten bundles, are placed about nine feet from the ground. This makes a stack about 12 feet high.

When the last course is placed in order the top of the stack is securely tied in two places—one within a foot or two of the ground, and the other near the middle of the butts of the top course.

Two men are required to put up this kind of a stack. I built ten such stacks this year myself without any assistance. One man says he puts about one hundred in a stack. I put about 120.

In stacking in this way there are no bundles lying down with butts sticking outward, as in stacks as usually built. They stand up in an almost perpendicular position, and do not drop. The bundles having so much "pitch" they shed the water perfectly.

In feeding from such a stack I begin with the ground course, as the bundles may be easily pulled out. The top tier must be taken off and the last thus leaving no part of the stack exposed to the weather.

I adopted this plan three or four years ago and like it quite well. Its advantages are: (1) That it takes so many more shocks, saving the labor considerably. (2) In feeding therefore the bottom bundles are fed first and the top left to protect the stack till the last. (3) One can take the bundles from the wagon and construct such a stack without assistance.—Frank Lester.

**POULTRY HOUSE RAKE.**  
Homemade Contrivance That Answers Well for Its Purpose.

The winter poultry quarters should have four or five inches of loam or road dust on the floor for the fowls to scratch in and dust themselves in, but this soon becomes covered with feathers

POULTRY HOUSE RAKE.

and masses of droppings. A fine-toothed rake is serviceable in raking over the pens, thus collecting all feathers, etc., when they can be put into barrels with straw. An ordinary garden rake with a pointed head too coarse for this purpose. The sketch shows a good homemade rake that answers well for this work. Wire mesh, driven very close together, form the teeth. A strip of hard wood should be used for the handle, while an old hay rake handle can be pressed into service for the handle.—Orange Dill Farmer.

**FACTS FOR FARMERS.**  
If you have grave need near you, improve your highways.  
Don't feed rats unless you mix poison with the food.  
Exterminate the rat. Both poison and cats are cheap.  
Paint your chimney if needed. It is more well expended.  
Wide tires on hard roads act as rollers and improve the road.  
Chopping firewood in midwinter is a mighty unpleasant business.  
Save the hay. Substitute corn fodder and good straw to some extent.  
Do as well as your neighbor does on all lines. What can we do like you likely can.

Be an idealist. Set your mark even higher than you can reach, but reach as high as you can.

Lawyers will be necessary as long as there are mis understandings among men. They are an expensive necessity.

One man thinks that the opening of new farms in the west is evidence that farming is profitable. Another thinks that logic would indicate that the kind of business is profitable.—Western Farmer.

**A Dakota Farmer's Remedy.**  
Frank Wilson, a Yankton county (S.D.) farmer, after losing 150 out of 200 hogs, has succeeded in stopping the ravages of the lung trouble in his flock by a remedy he found in Europe. When his hogs began dying at the rate of 100 a day he piled their carcasses in heaps and set fire to them. When only blackened and charred remains were left he buried them in his hogs, with the result that the disease did not run in the neighborhood, and in some instances 15 hogs have died in one day in pen.—Farmers' Voice.

### PROTECTING QUEENS.

#### How to Rescue Them—What They Should Be Fed.

When a queen is baited you'll find a bunch of bees as big as a hickory nut or larger than seem to cling together in a very solid manner. You can't pull the bees apart, and you may roll the ball over and over, but the queen is still there. A strange queen is thrown into a hive she is usually baited, and, as nearly as we can make out, the process is something like this: The bees seize the queen at various times till she is entirely surrounded, then they begin to seize the ones that have hold of the queen, and in this position they remain fixed for hours, until the queen is dead. If a strange worker is thrown into the hive she is baited, and, as far as we can tell, the queen and nothing but a queen is baited. The worker may be bitten or stung, but never baited.

The baiting bees generally make a hissing sound, unlike the noise they make at any other time. Whether the process comes from anger or what, we do not know.

Sometimes bees will harm their own queen, usually for the sake of protecting her from other bees. If you catch one of your bees, it certainly seems she ought to be safe from foes. You cannot pull the bees apart so as to free the queen, and if you should succeed in getting some of the bees away, or should manage to get the queen away, the bees will immediately seize her again. Perhaps the quickest way to get the queen free is to throw the ball into cold water. The little miscreants will scramble to get out of the water as quickly as they can, and at once seem to form all about the queen, leaving her to her own fate.

Water is not always at hand, and you can blow smoke upon the ball. If you blow hot smoke upon the ball, as usually you do, the bees will not escape enough, you will attempt to catch them, and for the bees will promptly sting her; but if you hold the smoke at a distance and keep up a strong stream of cool smoke, the bees will soon conclude they want to find some place with a purer atmosphere.—Southern Cultivator.

### INEXCUSABLE WASTE.

#### Why Some Poultry Men Do Not Make More Money.

One cannot fully realize the extent of loss entailed from making any sort of pretense to poultry raising, until the various grades of it are examined in the great markets and a selection is made of the best. The market is a reasonably well established field. Next, where the critical test is made of the sort of care the poultry has received from time of incubation until properly dressed and packed ready for shipment, is the market.

The market, which is the standard of quality, involving the discrimination which rendered into the different poultry raisers that which belongs to the slothful, and unto the systematic careless producers. Packages stand side by side in every commission house.

Chicago, amounting to thousands of cases, and some are of the best quality, while others are of the poorest.

The little miscreants will not mind the hints we have given the reader.

The soil mulch, or dust blanket, is best obtained by the use of a springtooth harrow or cultivator, with points of the teeth directed forward—not for the sake of slanting, but set flat with the points directed forward and downward, so as to cut under the surface soil.

The soil grain and flax must be drilled and cultivaed.

The drills of such crops should be from 18 to 22 inches apart.

Small grain and flax are in the market for doing such work.

The Burlington Rake is ever reliable.

The Burlington rake is the general market rake, and the one used by the state of Nebraska to the state university of Nebraska, and tests made to determine the per cent of moisture.

A feature will be kept up before the farmers, at the conclusion of the experiment, a complete and exhaustive report will be published.

The Burlington Rake is ever reliable.

The interest of the agent who stands

for the manufacturer, and the

agent who is a son with his thoughts

entirely surrounded by the deepest soul.

MILITARY COOK BOOK Given Away.

There is one large house in this country that has taken the lead in giving away books on the "righteous life."

To the signs of better times and to the best interests of the world, the author is devoting all his energies to a valuable publication known as THE CHARLES A. VOIGEL'S CONFORT AND HEALTH, which contains very choice information on the subject of cookery, health, hygiene, and the preparation of substantial and dainty dishes, prepared especially for invalids. Many cases have been taken in its publication. Many cases have been taken in its publication, and the results are most gratifying.

## HE SAVED HIS BACON.

Bruin Not Only Stole a Pig, But Gave Its Owner a Bath.

**Flash Plunge Down Open Well—Voice from the Depths—Half-Frozen Fugitive Rescued by Friends of Pain and Fright**

(Copyright, 1897)

"I'll do it!"  
Jack Birch, the speaker, a stocky built boy of 15, faced the fireplace. He was looking at a long rifle which hung on a couple of iron hooks above the mantel. His father and his mother belonged to him; and since his death, had rested undisturbed in its place.

Jack took down the gun, standing on a chair to do it. He wiped off the coating of dust and dropped the ramrod into the barrel. The rifle was an old-fashioned musket, and had cost considerable money in its time.

Jack's father had taught him to use the gun; but some sentiment had led Mrs. Birch to ask Jack not to disturb the pieces, and it was with many doubts that he had put down the weapon now. But he had no other gun, and a gun he must have to carry out the plan which he had formed.

A bear had come down into the valley from the mountains. It was rarely that such a thing happened; but by this time the animals' bears were hibernating, but in some ways this animal had escaped the hunting parties which were made up to capture it, and was dealing death and destruction among the pigs and sheep of the farms round about. It was a large, very rocky place of underbrush, and so impenetrable was the growth surrounding its newly-found den, that the farmers had failed to drive it out. The pig-pen belonging to the Birch's had been raided, and the sow, and two fat porkers taken. This was a calamity to the family, and meant just so much less meat for the winter. It was about the beginning of November, and too early to slaughter the remaining pigs and salt down the bacon. Jack's mother planned what to do. She knew that he must expect more visits from the bear, sooner or later. But when? That was the question. His neighbors had tried the plan of watching their pig-pens and sheepfolds over night, but the bear seemed to have a sense of premonition, and the bear seemed to be posted with regard to such movements, and was never seen by the watchers at close enough range to make a shot worth the trying.

Jack felt that there was but one way to save his possessions, and he carried the rifle up to his room, with the old-fashioned powder-horn and bullet pouch, cleaned and loaded the piece. His mother had gone over to the house of a neighbor whose wife was sick; she had waited outside and felt a greater responsibility in consequence.

A slight snow had fallen during the day, but the clouds had disappeared and about eight o'clock the moon, which was nearly full, gave out a pale light, and flamed the white fields with light. Jack, as soon as the sun went down, had taken his station in the window of the haymow over the stable. From perch he had a clear view of the path leading to the house, and all approaches to it, and he felt confident of getting a bullet into the beast at such short range, if it should appear.

But two hours passed, and there was no sign of the bear. Jack was beginning to get very impatient, and lay cold and numb and shivering. His feet were growing numb, and he was afraid to get up and stamp them, or even to withdraw to the mow itself and walk around, lest possibly he might scare off the marauder before he found him. So he sat in the shadow of the window, his legs hanging outside the sill, and resolved to stand the cold just as long as he could. It was disheartening work, though, and his determination not to move grew less and less, until the minute he moved from his feet to his legs and arms. At last he could bear with it no longer, and thinking that even if he remained motionless where he was, his hands would soon be too stiff to manipulate the gun, he scrambled out of the window, and up the ladder and made his way out of the stable door, which he latched after him.

It was a beautiful night, and the white snow made the smallest objects indistinguishable. Jack stood still for a moment, listening and looking for him, and kept for the space of a score of a second or in a tall poplar close to the house, no sound broke the quiet. There seemed to be nothing moving. The lights had been put out in the nearest house, a mile away, and the boy could see the constellations never seemed so lonely before. But he had no fear, partly because he was naturally courageous, and partly because he had made up his mind to put a stop to the bear's depredations, if it lay within his power. He had crept along the hollow of one arm and stepped lightly off in a direction away from the house, having no particular object in view except to keep warm. The exercise soon set his blood dancing, and he tramped on, going farther and farther, at first slowly, and then more rapidly, looking back and throwing a searching glance toward the pigpen. He could see the pen quite plainly, and he had no intention of letting Bruin steal a march on him in the rear.

Presently he stopped on the edge of a fringe of trees, and had started to retreat his steps when his eyes fell upon the ground close at hand. For an instant he remained motionless; then, giving a quick look about him, he bent down and examined the ground more closely. Bright white, even crust was big marks—marks which resembled the prints of human feet, but which were broader and heavier. Jack had never before seen a bear's track, but he knew them at once.

The trail led in a direction at right

angles to the course which the bear had been pursuing, and the trail passed out of sight again, so was seen by the clear impressions left by the animal's feet, entirely free from the snow dust that the wind quickly swept into all hollows. Jack stood debating with himself what he should do.

The trail led to the tail of the animal, and indicated that it was making for some other pigpen than that of the Birch's. Jack, therefore, felt no apprehensions for the safety of his pigs. He had no enemies excepting the general goat. But Jack had come out to meet the bear as well as to protect his pigs, and the excitement infused into him by the sight of the bear's tracks, and the animal's head and start off after the animal. He did not consider what an ugly thing it would be if he should come upon the beast without a place of refuge near at hand. He wanted a sight of the bear, and he kept right on, telling himself that he might get a chance to shoot the animal yet.

The trail in the snow was readily traced and Jack followed the marks at

angles to the course which the bear had entered, being far to the left or southward of the ordinary trail made only by the wind's madness. Catching sight of the boy, whom, for the moment, it seemed to have forgotten, the great brute suddenly scrambled to its feet and charged at him.

"When I found the bear was gaining upon me, I dodged around the stable," he concluded. "I just popped into the opening. I didn't see where I was going, exactly, and I would have turned right down, head first. But, suddenly, I saw a rope hanging from my hands, as I fell forward. I hung on to it for all I was worth. I went down fast enough, as it was, and, in a twinkling, I found myself in the bottom in water up to my waist. It was terribly cold, and I felt it all the way down. I made a knot in the rope, and managed to pull my legs through the loop. That's the way I spent the night. It was tough; but I stuck it out, hoping some one would find me in the morning. I couldn't have lasted much longer."

The Birch's were never troubled with the bear again. Whether it had fully satisfied its appetite with that last pig, or was more than satisfied by Jack's bullet, certain it is that it was never seen after that night, when the terrified boy led it such a race around the village.

FRANCIS CHURCHILL WILLIAMS.

KISSING BABY'S FACE.

A Habit Which Is Responsible for Many Accidents and Deaths.

Great care should be taken to secure air that is pure for a baby to breathe. It should not be confined in any way, even in a mother's bosom. Air that has been drawn into the lungs and forced out again contains not only impure gases, but a pernicious waste substance resembling snake poison. Sufficient quantities of these impurities are often found dead in the stomach of children. So let the mother turn her face away, keeping the baby within reach of her comforting maternal hand, but out of the reach of all waves of exhaled air from her own lungs. One enterprising woman with a husband who had a bad case of asthma, and a clothes basket with a hair mattress and appropriate furnishings, and suspended it between the middle and foot of the bed, and drew it up and down by means of pulleys as occasion required. The result was a marked improvement in health and economy of space. Impure air first excluded from the lungs because it is warm, and when cooled falls to the lower part of the room. The most poisonous region is toward the floor. Charles Kinnaird says, "The air comes from the ceiling of our very poor in England." Let them sell their mattresses if they will, but not the bedstead that holds them up above the polluted atmosphere of the floor."

Like a dash, he rounded the well-house, catching on the edge with one hand to keep his footing. But the bear had changed its mind, and had decided that a supper of bacon was preferable to one of mutton or lamb. Jack halted in the doorway, and, as he did so, he saw that what this change of course might mean, he wheeled about and started off on a dog-trot toward the house. A thin grove of small trees presently interrupted his path, and he moved through these, making his way to the rear of the house. He had heard the bear's roar, and met with here at close quarters. As he pushed his way through the last of the trees, a sound came to his ears that made him drawl forward, cocking his rifle as he ran. It was a wild, sharp bark, like that of a squirrel, half a dozen yards and more away. In the quiet of the night it sounded as if the four pigs were all being slaughtered at once.

The next morning at an early hour,

## DROPPED ON ONE KNEE AND TOOK A BEAD ON THE ANIMAL.

that he could never reach the protection of the stable as matters were. The bear would overtake him by the time he had covered 50 yards more. The animal was not more nor less than the same number of feet in the rear.

He had no time to lose, and he slipped and skinned a large wall from which the family drew their water. Then he reached the stable, and hoped that the bear had changed its mind, and had decided that a supper of bacon was preferable to one of mutton or lamb. Jack halted in the doorway, and, as he did so, he saw that what this change of course might mean, he wheeled about and started off on a dog-trot toward the house. The next morning at an early hour,

that he could never reach the protection of the stable as matters were. The bear would overtake him by the time he had covered 50 yards more. The animal was not more nor less than the same number of feet in the rear.

He had no time to lose, and he slipped and skinned a large wall from which the family drew their water. Then he reached the stable, and hoped that the bear had changed its mind, and had decided that a supper of bacon was preferable to one of mutton or lamb. Jack halted in the doorway, and, as he did so, he saw that what this change of course might mean, he wheeled about and started off on a dog-trot toward the house. A thin grove of small trees presently interrupted his path, and he moved through these, making his way to the rear of the house. He had heard the bear's roar, and met with here at close quarters. As he pushed his way through the last of the trees, a sound came to his ears that made him drawl forward, cocking his rifle as he ran. It was a wild, sharp bark, like that of a squirrel, half a dozen yards and more away. In the quiet of the night it sounded as if the four pigs were all being slaughtered at once.
