VOL. XIII.

PINE CITY, PINE COUNTY, MINNESOTA, FRIDAY, MARCH 18, 1898.

NO. 14.

CORRESPONDENCE

Gleaned for our Readers From All Sections of the County.

HISTORICAL POKEGAMA.

The town board held an adjourned meeting last Tuesday, qualifying newly elected officers and transacting other business.

The month of March this year has been pregnant with accidents and ills to man and beast, in some parts of our grand and famous town.

Last Saturday afternoon Emma Shultz, who has been at Pine City for some time, accompanied her brother Anton home for a visit over Sunday. She returned to Pine City on Monday.

On day last week as Andrew Feury was on the Pokegama road, less than half a mile above the lake, being on his way back from Brook Park, where he had been after a wagon load of mixed personal property, animate and otherwise, consisting of three calves, some feed etc. for a new corner from Dakota, Mr. Feury stopped at Thomas Hady's and left his team in the road untied while he called at the house. His team soon discovered they had the lines and the open road before them. They started on one of their habitual spurts, apparently bent on beating all their past dashing records of speed. As a result the calves were thrown out, but fortunately they were not hurt. One of the singletrees broke, wagon box splintered, reach broken, and in passing over a large oak stump the end of the reach attached to the hind wheels was socked into the stump so deep and solid that the combined efforts of three men, pulling and wigging, failed to extract the reach, and they had to use other appliances. The horses cleared themselves, and were caught at the head of the lake, not very seriously hurt.

Last Saturday afternoon Otto Shultz was chopping down a tree not far from his house. A younger brother of his, named Leonard, came from the house and ran to the tree, to push it on, so it would fall in the desired direction. Leonard passed up unobserved by Otto, who was chopping, coming under the swing of the ax, which struck a full blow the whole width of the butt, cutting him on the outside of the leg above the knee. The boy was carried to the house. Mrs. Shultz, who was sick in bed at the time, was overwhelmed by the accident. She realized, as only mothers will, that something must be done. She got up and did all she could to stop the flow of blood. From excitement and alarm, and over-exertion in her physically weak condition, she fell to the floor in a dead faint. Mr. Shultz was not at home, having just gone down to the school house to meet with the town board. He was sent for at once and neighbors called to render such assistance as they could. Mrs. Shultz recovered from her prostration, and the boy is reported as doing fairly well, and says he is going to school again pretty soon.

The school board of District No. 22 held a meeting a week ago Saturday evening. Among other business transacted, the job was let to John Anderson to finish the school house on the west side of Pokegama lake. Mr. Anderson went right at the work, and it is now finished, at an expense to the district of \$12, and \$5 before to the same carpenter, making altogether \$17 the district has assumed in order to bring to a finish the work so long delayed, and so much needed. This delay has all been caused, inasmuch as all the settlers directly interested in getting a school there jointly and mutually agreed with the school board of the district at a special meeting called for that purpose last fall, that if the district would furnish the material they, the settlers, would build and furnish said house at their own expense, for the sake of getting a frame house, instead of a building of

logs, as some of them at first had planned. For the sake of pleasing all and getting a good frame building, the school board agreed to said proposed change, and immediately bought the material, and shipped it up on the Stowe. The school board of this district has acted in good faith and on the square in this matter, which is more than some on the west side of the lake have done, and they directly interested in the projected school at that. A very few did their share and more, while the most did little or nothing. The house was to be built and finished last fall without any unnecessary delay, and a winter term of three months school held therein, which intention has not as yet been realized, by reason of causes herein set forth. It is a well known fact that the members of a common school board, if they conduct the business of the district on such principles and rules as are laid down plainly for their guidance, in our statutory provisions, are deserving of thanks at the close of their terms of office rather than censure, inasmuch as the compensation of both the clerk and treasurer are but nominal, while as a matter of official duties pertaining to a district director, they are the most responsible, requiring more time and travel than either of the other officers—for all which he has no compensation. In attending to business in behalf of the district, a member of the board not infrequently spends his own money for a meal or two and a night's lodging, when away from home and outside of his district, in order to look after the interests and business of his district in all its varied conditions, as will eventually produce the best results in relation to his own district as a whole, and certain localities at times in particular, to the end that his district may stand square on an acceptable business understanding with all parties with whom the district has any deal, agreement, or obligation, in order that justice and equity may prevail, and his district may be distinguished from such as promise much and do little.

ROCK CREEK.

Geo. L. Stevens is loading two cars with potatoes to be shipped to Raymond, N. H.

John Doran and Robt. Axell left here on the early morning train Monday, for Hildreth, Oregon.

Geo. Foster was in town Wednesday, and shook hands with the boys who were all glad to see him.

Messrs. Dunn & Marcia have returned from their southern trip, and report having had a delightful time.

S. A. Nebel, the enterprising merchant, of Danewood, was here Wednesday in the interests of the "North-eastern Telephone company," and enough stock has been subscribed among our business men to have the system extended from Rush City to this station.

Tickets to St. Paul and Minneapolis will be on sale at one fare for the round trip at this station on March 21 and 22, good until the 25th. The occasion for this low fare is the Convention of the Republican League Clubs, to be held in Minneapolis on the two first named dates.

The social at the residence of Mrs. H. L. Bassett last Friday night, was a success. The out of town visitors were: Rev. J. J. Parish, of Rush City, Mr. and Mrs. Geo. Sherwood, Mr. and Mrs. R. White, Mrs. A. H. Lambert, and Misses Daisy Russell and Edna Peterson, of Pine City. The receipts of the evening were \$17.00.

The Rock Creek correspondent of the Rush City Post, is a peculiar individual, he has the special faculty of getting news items "wrong end to." Last week he said it was voted to bond the town. The fact is the question of bond issue was voted down. He also said the social was to be held in the school house—it is a wonder he didn't say it was to be held in the moon.

S. A. Nebel and John Gilman were in Pine City Tuesday, trying to interest the business men there in the building of a telephone line between there and Rock Creek, but true to his name—for some one has said that Pine City is one hundred years behind the times—they refused to do anything at all toward getting the enterprise started. No. No. Phone or electric light for Pine City, seems to be their motto.

MEADOW LAWN.

J. A. Hathaway had the misfortune of losing one of his horses last Saturday.

Miss Jennie Kilgore, who has been attending school in Pine City, arrived in Meadow Lawn, to spend Sunday with parents and friends.

TO THE BARD OF THE LOWER SEASIDE. Respectfully dedicated to the Hustletown poet.

A Hustletown poet
To have you all know
Of me late contriving
His talent to show
Matrimony and love—
This was his theme;
But no one could fathom
The depth of his scheme
His words were created
In elegant style,
Consisting of make-ups,
And also couplets.

Now the Hustletown girl,
With pretty brown curls,
In many respects complete;
But walking they go
Through rains, mud or snow,
For they have such wondrous large feet.

Now Meadow Lawn City,
You need not to pity,
For we have of damaged a score,
And if we had not,
We just tell you what—
We'd locate in your town for more.

A RURAL MEAD.

There's Mr. Erv Heller, a bright young man,
Who catches a city wherever he can.
He has run ashore in Meadow Lawn town,
And of late has been roving the country around.
He said when he left he had one girl in view,
For Siskier would give him his chance he well knew.
He'd get away, and come back the same day—
He just went to town we suppose,
But the last time he went, a week he has spent—
We surmise he has gone to propose.

Now dear readers do let us hear from you,
For we have no greater delight
So we eagerly wait for the edict of fate—
For the news coming next Friday night.

[The following items were received too late for publication last week: Hotel headquarters at J. McAdam's for a short time.

A pair of horses for sale. Call on S. Kilgore for particulars.

J. Hathaway is engaged in hauling for J. Heller this week.

Charles Holt leaves here today for Iowa, where he will spend the summer.

Charles Franklin is home from the pines, and is visiting his wife, at R. E. Smith's.

Several species of coon have been captured here the past week. Ask Ernest Holler about it.

A party from here attended the dance at Beroun Saturday evening. A good time was reported.

Mr. Davis and family have rented the Netser farm in Hustletown, and moved on to the same Thursday.

HUSTLETOWN.

H. H. Kruse was in Pine City on business Monday.

Nick Perkins, of Pine City, spent a part of last week in Hustletown. John Workman, of Howard Lake, is visiting at the home of Chas. Glanville here.

Chas. Glanville took a load of household goods from here to North Branch for J. E. Netser last Friday.

Misses Ella and Sarah Glanville returned to their home on Friday, after a few days spent in Pine City.

Mr. Davis, of Meadow Lawn, who has rented the Netser farm, moved his family up last week, and is now comfortably settled in the new home.

Unless Mr. Siskier succeeds in selling his cottage here, it will be rented all furnished to the Hustletown club. Although some changes will be made, nothing will be done to disturb the dainty modern furnishings.

Mr. Siskier entertained a number of the young folks on Friday evening, at what was to have been a candy-pull. All had a good time, playing games and otherwise enjoying themselves; the only thing lacking was the candy.

The L. O. F. O. H. Club met on Wednesday evening at the Kruse club room. Two new members, Miss Sarah Glanville and John Workman were initiated into the mysteries of the order. Another member will be added next week. After the regular business, games were indulged in till an early hour.

WEST POKEGAMA.

Mrs. Thos. Quinn was a Pine City caller last Friday.

Mr. Fred Jackson spent a few days with his parents at Stanchfield.

Mr. Frank Peters has been on the sick list, but is able to be about again.

Ed. Thompson has sold his farm here to Fred Perska and is expected here soon to straighten up his Pine County land deal.

Tarvis' school house is nearing completion at last. Mr. Anderson will be done with the carpenter work about the 15th, when it will be ready for the furniture.

Rev. Mr. Woodward has been staying with Fred Jackson for a few nights. There is nothing slow about the minister, for after his meetings he walks from Mr. Norstrom's to Oak Lawn, Fred's summer residence.

Pine City Roller Mills.

TAKE CARE OF THE

DIME

And the dollar will take care of itself. We commend that proverb to you as a purchaser. It is the little foxes that spoil the grapes; the little leaks that sink the ship; the little extravagances that dribble away the earnings.

Save That Dime,

and you are on the highway to comfort. Don't desire the dollars and despise the dime. You can't have the dollar without the dime, any more than you can have the pound without the ounce, or the yard without the inch.

We Will Help You Save a Dime

On every dollar you spend in trade. This is no empty boast. We mean that we will give the goods that equal any others, and will sell them one dime on the dollar less than any other merchant.

HOW CAN YOU MAKE MONEY EASIER THAN THAT?

Are you too prejudiced to want to give us a trial, and see if we can save you money? We can do it. We want you to remember that every other dollar that you lay out at any other store is a clear loss to you of

BARNEY H. HARRIS,
Rush City, Minn.

RUSSIA'S SECOND CZAR.

He Is Gen. Kriagoff, Prefect of St. Petersburg.

His Position Is One of Great Responsibility, and His Powers Are Autocratic—Securing a Permit for a Lecture.

Of course Nicholas II. is the real czar of St. Petersburg, as he is of all the Russia, but there is a man representing him in the city government who has such comprehensive powers that, for ordinary people, who cannot get near the emperor himself, he is the only czar they ever personally know or have any dealings with, says a writer in the New York Tribune.

What distinguishes him from the ordinary governor of a town is that he is vested mainly with the police; being their chief throughout the city limits. The governors of smaller towns are annually also to be found in the local police forces, but they have under their officials called masters, who are supposed to relieve them of the more burdensome duties, the gradual growth of St. Petersburg, on the other hand, supercedes nearly every department of this branch of the city government, and as one can hardly do anything in Russia, good or bad, without coming in contact with the police sooner or later, it is not difficult to understand how far-reaching his powers may be. Formerly he is said to have had even greater authority.

Generally he is a military officer as well, and the present incumbent has the rank of general. He wears a military uniform, and is saluted by soldiers as well as by his policemen. A man gets the position of gradonachalnik on account of the great military ability, and it is expected that he shall have had experience in the police organizations of other cities. Gen. Kriagoff, the present incumbent, was in the work in the police force of Warsaw before getting to St. Petersburg, and the fact that the position involves more or

SECRET SERVICE CHIEF.

Chicago Newspaper Man Appointed to the Position.

John E. Wilkie, of Chicago, has been chosen for chief of the federal secret service, and upon his shoulders will rest the responsibility for the detection of the counterfeiters of the silver certificates. He will succeed W. B. Haren, of Cincinnati. His appointment marks a distinct new departure in the methods of the treasury department. Mr. Wilkie's training has all been in the line of newspaper work. This sort of a career was the very one to please the secretary of the treasury. He was in this country here gained greater distinction than Mrs. Louise Reed Stowell, now of Washington.

From the beginning of her career Mrs. Stowell has been the recipient of distinguished honors from the scientific world. She was appointed a member of the faculty of the Woodrow Wilson expedition, and was the first American woman elected a member of the Royal Microscopical Society of London, but she once has enjoyed a like honor.

On account of the great amount of her original microscope work she has also been made an honorary member of the Michigan Pharmaceutical association, although women are not admitted as members. For several years she has been president of the Northwestern Collegiate association, and in 1905 was sent as delegate to the international congress of women.

The name of Mrs. Stowell is also well known in scientific literature, says the Cincinnati Commercial, as she has for years acted both as editor and contributor to the best-known publications of a purely scientific character. To her credit it attains she also has the reputation of an artist in crayon, charcoal and pen and ink, and illustrates her articles in a manner at the same time admirably accurate and charmingly artistic.

Her most valuable accomplishment, as the apparatus for photographing from the microscope is rather elaborate and very costly. Mrs. Stowell works at the University of Michigan lay along the lines usually considered the driest and most unattractive in the whole realm of sciences.

The new chief is 37 years old and has lived in Chicago practically all his life. His father, Frank B. Wilkie, was for years a member of the editorial staff of the Chicago Times, in that paper's prime days under Wilbur B. Storey, and the son began his newspaper work on the same paper.

He started in as a night police reporter and remained on that job for about two years, and then became a police reporter on the Tribune. He served as city editor, and subsequently as commercial editor, till 1899, and then went to London as representative of an American banking and steamship office.

Since his return from London three years ago he has acted as advertising manager for the Chicago Conservatory and has done considerable magazine and newspaper work.

He has also done work for the government secret service, but this was unknown to most of his friends, who were not aware that he was a candidate for the position of chief of the bureau.

Most of his magazine contributions have been on his London experiences and on commercial subjects.

RETURNED TO POWER.

Arthur Sturgis Hardy, Premier of the Province of Ontario.

Hon. Arthur Sturgis Hardy, the man who has been returned to power by the people of Ontario as the premier of that province, has long been a political factor in the affairs of that part of the Dominion of Canada in which he has lived. He is the successor of Sir Oliver Mowat, and although the manner of his victory which triumphs is not so large as in former years.

There is one experience with the prefect which I have to relate, and it is the only one I know of which shows when he had to go to his superiors for consultation and advice. I tell it both for this reason and because it is a delicious illustration. An article of mine was to be gone through before one can give a public lecture in Russia for which tickets are sold. I had been asked to give a talk to a group of men, studies among tramps and criminals for the benefit of a charity, and had gladly consented.

Under ordinary circumstances the prefect gives the permits for lectures, and the tickets can be printed only when he has done so, but the ticket was "tramping with a woman and children," rather frightened him, and he said that he must consult with the minister of the interior before it could be given. This gentleman desired that I write out a synopsis of what I was going to say, so that he could judge more intelligently whether it would be harmful or not. The word "criminals" gave both him and the prefect pause, and they wanted to be sure that I was not going to launch out into any sensational language. An article of mine was sent to the minister, and he finally decided that he had nothing against it, save given, but that for formality's sake, the programme must go to the chief of the secret police.

This official, after about ten days of waiting, concluded that he also had no serious objection to make except that it might be just as well if I did not refer to my experience in Russia. Again, however, for formality's sake, he advised that the programme be sent to the minister of education, which it was. It remained with him a week, when he very graciously returned it to the prefect with a written statement that he could discover nothing likely to be harmful.

Then, ordered that the prefect should see it, and it was sent to the gentleman having the matter in hand, in the police station of the district, in which he lived. He had a preliminary call at his door one day and left the precious document which I now keep as a relic.

Women's Etic Hens. A well known woman writes us that in the male world, men have larger hearts. The average heart of a man weighs from two to three ounces, while the heart of a hen weighs only one to two ounces less. Nevertheless, in proportion to the whole weight of the body, the woman's heart is greater, for in the normal condition it weighs 1.145 as much as all the rest of her, while the man's heart is but 1.165 of his total weight.

A WOMAN MICROSCOPIST.

Favorably Known in Scientific Circles Everywhere.

Mrs. Louise Reed Stowell has gained distinction in a line which seems to be peculiarly fitted for her sex.

It seems strange that more women have not turned their attention to microscopic work, as being peculiarly adapted to their abilities. Among the few that have done so, the only one in this country here gained greater distinction than Mrs. Louise Reed Stowell, now of Washington.

From the beginning of her career Mrs. Stowell has been the recipient of distinguished honors from the scientific world. She was appointed a member of the faculty of the Woodrow Wilson expedition, and was the first American woman elected a member of the Royal Microscopical Society of London, but she once has enjoyed a like honor.

On account of the great amount of her original microscope work she has also been made an honorary member of the Michigan Pharmaceutical association, although women are not admitted as members. For several years she has been president of the Northwestern Collegiate association, and in 1905 was sent as delegate to the international congress of women.

The name of Mrs. Stowell is also well known in scientific literature, says the Cincinnati Commercial, as she has for years acted both as editor and contributor to the best-known publications of a purely scientific character. To her credit it attains she also has the reputation of an artist in crayon, charcoal and pen and ink, and illustrates her articles in a manner at the same time admirably accurate and charmingly artistic.

Her most valuable accomplishment, as the apparatus for photographing from the microscope is rather elaborate and very costly. Mrs. Stowell works at the University of Michigan lay along the lines usually considered the driest and most unattractive in the whole realm of sciences.

The new chief is 37 years old and has lived in Chicago practically all his life. His father, Frank B. Wilkie, was for years a member of the editorial staff of the Chicago Times, in that paper's prime days under Wilbur B. Storey, and the son began his newspaper work on the same paper.

He started in as a night police reporter and remained on that job for about two years, and then became a police reporter on the Tribune. He has also done work for the government secret service, but this was unknown to most of his friends, who were not aware that he was a candidate for the position of chief of the bureau.

Most of his magazine contributions have been on his London experiences and on commercial subjects.

MRS. LOUISE R. STOWELL.

(Microscopical Expert of the U. S. Agricultural Department.)

as it was almost pharmaceutical in character, and had to do chiefly with the study of drugs and their active herbs. She managed, however, to invest these very unpropitious subjects with a living, vital interest, and during this period wrote a series of articles upon the microscopic structure of wheat and flour that drew widespread attention to the brilliant quality of her work.

She has also done work for the government secret service, but this was unknown to most of his friends, who were not aware that he was a candidate for the position of chief of the bureau.

Most of his magazine contributions have been on his London experiences and on commercial subjects.

The new chief is 37 years old and has lived in Chicago practically all his life. His father, Frank B. Wilkie, was for years a member of the editorial staff of the Chicago Times, in that paper's prime days under Wilbur B. Storey, and the son began his newspaper work on the same paper.

Most of his magazine contributions have been on his London experiences and on commercial subjects.

EMILE ZOLA'S CELL.

It Certainly Does Not Look Like the Prisoner's Domicile.

Emile Zola, the great French novelist, whose defense of Capt. Dreyfus has ended in a penal sentence, is much admired by Americans. His remarkable plea in the face of the opposition from the French government and army, has earned for him the gratitude of liberty-loving people everywhere. A picture will appear in the next 12 months, has recently appeared in the newspapers. It is a funny picture, and has led Roswell M. Field to make the following sarcastic remarks in the Chicago Evening Post:

Our attention has been called to a picture of the cell in which M. Zola will serve his sentence. It looks like a comfortable, cheery place. The bed is rather small and the chair is hardly of the imperial style of Louis Quatorze, but there is a nice Turkish rug on the floor and a general air of modest luxury pervades the apartment. The room seems to be plentifully supplied with tables for all purposes, and there are shelves for books and necessities of the cabinet. On one of the tables we are somewhat disturbed to note a bottle and a glass. Of course we have no means of determining the nature of the contents, but it may be champagne or a sauce of stimulating yet harmless quality. But we fear it has a more suspicious intent, and our thoughts instinctively turn to absinthe, brandy and other ardent promoters of the Gallic Henry quality. We are the photographer had removed the bottle, for we prefer to think of Zola in his cell devoting his energies to the higher life, unimpeded, every night. And we are the more distressed since it is at once apparent that if Zola drinks at all he must drink alone, and who is likely to share the awful fate that awaits the silent drinker? We hope that M. Zola will take up the cry of his persecutors, "conspire" or "ba" the bottle, we are not particular which.

Princess Stephanie.

Her illness recalls one of the Czar's great tragedies.

Princess Stephanie, who now is critically ill, is widow of the late crown prince of Austria and daughter of the house of Hapsburg.

She was first married to the late prince in 1889. From the first the marriage was unfortunate. Immediately after the wedding gossip set itself busy saying that the union was for reasons of state and not for love. This, however, was not remarkable in a royal marriage. Rudolph, himself the prince, committed suicide under the most remarkable conditions in 1889. Great efforts were made to convince the public that the prince

was killed by her agency than that of the high bridge at St. Paul on Oct. 18, 1897, were found floating in the river just a few days after the prince's death. He was playing on the ice and saw a body floating in the water, gave down the body, fastening the pieces together. The body was identified as that of Amos by his name on the collar.

A Heavy Fine.

One of the largest fines ever imposed on a man for game law enforcement in the northwest was levied in Duluth against a man named Kingston, a prominent commission man of Lower St. Louis county. He was caught with 803 partridges in his possession, and the state compromised with him on a basis of 100 birds, making his fine \$1, which with the costs, made the grand total \$1,109.90.

Woman Held Up.

Miss Lou Dillon, in the employ of H. H. Flower, a well known merchant at Cleveland, was held up and robbed of \$87. She had closed up the store, and was on her way to her home across the street to the residence of her employer, when a man jumped from behind the building and grabbed it from her. A man named Sam Davis has been arrested for the crime.

Additional Commissioners.

Gov. Clough has appointed as additional members of the Minnesota commission to prepare an exhibition for the Omaha Fair-Mississippi exposition W. H. Garlock and C. M. Youmans of Minn., and George T. Harr, of Manitoba.

News in Brief.

One Rasmusen fell under a Great Northern train at Greokston and his leg cut off.

Plans have just about reached a point when it can be said definitely that St. Paul will be included in the national meeting circuit of the I. A. W.

Gov. Clough has appointed Samuel A. Nelson upon his staff, giving the appointee the rank of major. Mr. Nelson is from Lamabore.

Mary Risk, 14 years old, was drowned at St. Paul. She was gathering chips from the ice, which gave way and precipitated her into the river.

Fish That Wear Clothes. The ocean contains several fish which clothe and adorn themselves. The most conspicuous of them is the antennularian, a small fish frequenting the Sargassum sea, which literally clothes itself with seaweed, fastening the pieces together with sticky, gelatinous strings, and then, as it were, holding the garment up by its fore fins.

Gray Horses Live Longest. Gray horses are the longest lived and most healthy of all the breeds, being unable to stand very warm weather.

A FAST RECORD.

The Government Recorder Set Across the Continent in Six Days.

St. Paul, Minn., March 8.—Six days, including all stops, is the record of the two trains carrying the tender belonging to the government's Alaskan relief expedition in their flying journey across the continent. Last Tuesday evening at 6 o'clock the first train pulled out of the Pennsylvania railroad depot at Jersey City, and after fifteen minutes later by the second one, and both arrived in Chicago, 913 miles, within the minimum of each other.

The Milwaukee road delivered them to the Great Northern in this city, 419 miles, running as sections of Chicago and St. Paul passenger train No. 3. After a stop of several hours at the Minnesota Transfer, Great Northern engines were attached and the journey was resumed on the Seattle steamer docks at 5:30 o'clock last night, 1317 miles, in about eighty hours, the two trains arriving within minutes of each other. The train runs 3,193 miles, and the actual running time 139 hours, or nearly 58 miles an hour, making it the record-breaking feat for freight trains from ocean to ocean.

There was no hitch or mishap from start to finish, and the government officials in charge of the expedition expressed themselves well pleased at the successful carrying out of the plans of the war department, and said no mistake had been made in the selection of routes. Other lines made lower bids.

There were 35 cars in the outfit, divided into two sections of 19 cars each, 25 containing the deer, dehorned, otherwise they would have filled a hundred cars. The outfit included 116 men, Finns and Norwegians, with their belongings, including 3 cars of mules for the deer, filled 10 cars. The crowd numbered 12 men, and Mada Bachir, land, and still have a long trip ahead.

MINNESOTA STATE NEWS.

Killed by Gasoline.

Mrs. Ida Peterson, Gregory C. Peterson, aged 30 months, and Mada Bachir, 14 years old, were burned to death in Minneapolis by a gasoline explosion. Mrs. Peterson attempted to fill the tank of a gasoline stove before the flames had been extinguished.

Without warning, there was a deafening roar from the kitchen, and the room was filled with smoke and flames. Mrs. Peterson's clothes were covered with burning gasoline. Her frantic agony she rushed to the front room, where she met her sister. The latter tried to beat out the flames, but in so doing she herself became ignited. Still they both attempted to extinguish the flames, but without success. Further than this they could do nothing.

A Peacemaker.

Chris Bristol, a farmer, committed suicide at Chaska. He had been summoned as a jurymen and was among those called to sit on a case. During the trial he became so impatient with the jurors, one of the lawyers became furious and poked fun at Bristol. He was finally consumed, with several marks on his face, and was hurried to the hospital, where he died.

Large Purses.

At the annual meeting of the Minnesota State Agricultural society it was decided to offer a combined purse of \$5,000 for the most valuable exhibit of the year. This is the largest amount yet offered in the west, the most heretofore being \$2,500. After it had been definitely ascertained that Minneapolis and St. Paul would each give \$3,000 for trotting events, the association was not slow to double the amount.

The Bodies of Jacob H. Amos and Henry Hergenrother, who were killed when he jumped 300 feet to death from the high bridge at St. Paul on Oct. 18, 1897, were found floating in the river just a few days after the prince's death.

He was playing on the ice and saw a body floating in the water, gave down the body, fastening the pieces together. The body was identified as that of Amos by his name on the collar.

A Heavy Fine.

One of the largest fines ever imposed on a man for game law enforcement in the northwest was levied in Duluth against a man named Kingston, a prominent commission man of Lower St. Louis county. He was caught with 803 partridges in his possession, and the state compromised with him on a basis of 100 birds, making his fine \$1, which with the costs, made the grand total \$1,109.90.

Woman Held Up.

Miss Lou Dillon, in the employ of H. H. Flower, a well known merchant at Cleveland, was held up and robbed of \$87. She had closed up the store, and was on her way to her home across the street to the residence of her employer, when a man jumped from behind the building and grabbed it from her. A man named Sam Davis has been arrested for the crime.

Additional Commissioners.

Gov. Clough has appointed as additional members of the Minnesota commission to prepare an exhibition for the Omaha Fair-Mississippi exposition W. H. Garlock and C. M. Youmans of Minn., and George T. Harr, of Manitoba.

News in Brief.

One Rasmusen fell under a Great Northern train at Greokston and his leg cut off.

Plans have just about reached a point when it can be said definitely that St. Paul will be included in the national meeting circuit of the I. A. W.

Gov. Clough has appointed Samuel A. Nelson upon his staff, giving the appointee the rank of major. Mr. Nelson is from Lamabore.

Mary Risk, 14 years old, was drowned at St. Paul. She was gathering chips from the ice, which gave way and precipitated her into the river.

DEATH OF ROSECRANS.

The Great Union General Passes to the Life Beyond at His Home in California.

Los Angeles, Cal., March 12.—Gen. W. S. Rosecrans died Friday morning at seven o'clock at his home near Redondo. William Stark Rosecrans was born in Kingston, Delaware county, N. Y., September 3, 1818. His parents were a farmer and a school teacher. He was educated at the public schools, then clerked in a store, and in 1837 applied to the secretary of war for appointment to West Point military academy. He was appointed and graduated in 1842.

At the beginning of the war Gen. Rosecrans was a private in the 11th Ohio. It became evident that military operations must become necessary, and Gen. Rosecrans offered his services to Gen. Dennison, of Ohio, and he was requested to act as an engineer and lay out Fort Dennison.

His first important action was at Rich Mountain, which was won. Gen. Rosecrans succeeded Gen. McClellan in the department of Ohio. He participated in the battle of Corinth, and afterward took command of the army of the Mississippi. He

was made commander of the department of the Cumberland, which post he held from October 27, 1862, to October 19, 1863. Gen. Rosecrans was promoted to Major General, and assigned to the department of the Tennessee. He was elected to the volunteer service in January, 1862, and resigned from the army in March, 1867. He had been twice married. He was appointed minister to Mexico in July, 1868, and held the office until 1870. He moved to Mexico and manufactured powder in San Francisco. He was elected to congress from California in 1881 and served four years. He then settled on a ranch near Redondo, Los Angeles county, Cal., and spent the last years of his life quietly. He wife, the daughter of Judge Heganman of New York, died in 1873. Three children, Carl Rosecrans, Mrs. K. T. Tuley, of Helena, Mont., and Miss Anna Rosecrans, survive him.

SHOWING IS EXCELLENT.

No Industry or Branch of Business Throughout the Country Shows Any Restriction.

New York, March 12.—R. G. Dun & Co. in their weekly review of trade say: "It is most gratifying that no industry or branch of business shows any restriction or hindrance, but some have been rapidly gaining for the past week and month. The railways are gaining even while speculators are selling their securities and demand for products for all the great industries is increasing. Many of the great manufacturing concerns that are needed, \$1,000,000 having been ordered during the past week, and money markets are in a state of unusual activity, though reasonably more cautious."

The country's resources are beyond the reach of any foreign power, and that his honor and foreign interests are in the hands of the United States. The greatest of all industries is sending forward at a rate of \$2,000,000 per day the supply. Wheat exports have been 477,000 bushels, four hundred and thirty-eight last year, and two weeks 2,627,720 bushels, against 2,000,000 last year. The increase in spite of smaller yields have been 7,704,484 bushels in two weeks, against 7,000,000 last year, when they far surpassed all records; wheat declined an eighth. Exports of principal products in February were \$10,000,000 in value, with increase over last year of about 50 per cent in breadstuffs in the aggregate.

Age of Stage-coach Driver Dead.

St. Louis, March 11.—E. R. Evans, who was the oldest stage-coach driver in the west, was buried in East St. Louis Saturday. He had been known for years to hundreds of persons on both sides of the river. Until old age crept on him he was overseer of the national stage yards. He was 91 years old and leaves a widow and two sons.

Will Go to England.

London, March 15.—Senator Domingo Gaitan, the Chilian minister at Washington, has been appointed minister plenipotentiary to the court of St. James.

WOMAN'S FATE.

From the Record, Bushell, Ill. No woman is better able to speak to others regarding "woman's fate" than Mrs. J. M. Weaver, of Bushell, Ill., wife of ex-Gov. Marshall Weaver. She has not only covered from the illness which kept her bed for many years, but she has also lived in Bushell nearly thirty years. She is of unquestionable vitality and unblemished reputation. The story of her recovery is interesting.

I suffered for six years with the pain that comes to women at the time of their menses, and in Milwaukee, but much of the time to do my own work, and suffered beyond my power to describe. I took many different medicines in fact I took medicine all the time, but it seemed to do me any good.

I read about Dr. Williams' Pink Pills for Pale People, and some of my friends recommended them highly. I made up my mind to try them. I bought the first box, early in 1897, and was benefited. I had a box and a half, and I am now completely well, and I am no longer troubled with the pain which has been bothering me for so long. I began taking the pills about the first of August.

"I have recommended the pills to many women who are suffering as I suffered. They are the only pills I have known in the trial that comes to so many women at my age. Mrs. J. M. Weaver, 1897. Subscribed and sworn to before me this 23rd day of October, 1897. O. C. HICKS, Notary Public.

When woman is passing beyond the age of motherhood, it is a crisis. Her vitality then, if ever, proper attention to hygiene should be exercised. Her nervous system will disappear and buoyant health will follow. Dr. Williams' Pink Pills are used. They contain in a condensed form all the elements necessary to its proper condition to the blood.

Preparing for Trouble. "Have you de ring, Mistah, Johnnie?" "No, sah, I ain't got no ring. Fac 'is, Pabson, I done every thing I could do with my credit, an' I put up de ring fac 'is crits so's I wouldn't be no trouble on my pusion. I spec 'ill be 'bout a week in de locker. Tackin' onto her finger two a hole in de locker. Tackin' onto, 'n—Cleveland Plain Dealer.

The Land of Christ. Under this title the Passenger Department of the Chicago, St. Paul & Northern Pacific has issued a splendid series of views made by the latest process from photographs taken in the Holy Land. The subjects embrace the scenery and cities, as they exist today in that famous country. Each picture is published in sixteen parts, each containing from five to fifteen views. Each picture is fully explained by descriptive reading matter. The complete set will be sent to any address on receipt of two cents in postage. The complete set will be forwarded, postage paid, on receipt of five cents. Postage stamps will not be received for the full set, but remittance must be made to the undersigned by draft, postal order, express money order, or registered letter. This is a rare chance to see more than two hundred views of the Land of Christ for less than one dollar. Address: Geo. P. Lyman, G. P. A., C. B. & N. P. R. St. Paul, Minn.

Uncle—It's been a very hard year, and I've had to contract a lot of debts. "Nephew—Why, that's too bad, uncle, for I had a lot of ready-made debts that I could have turned over to you!—Humorist's Blatier.

All Things as Advertised. By comparing lines show a progressive spirit, but some of the lines that are alleged to be new have been in constant daily use for years past. The Chicago, St. Paul & Northern Pacific Electric Lighted (with berth reading-lamp), Ventilated train (with Chicago, Milwaukee & St. Paul Railway better than any other), and Chicago, St. Paul & Northern Pacific, as thousands upon thousands of our passengers can fully testify. The Chicago, Milwaukee & St. Paul Railway always maintains its superiority with the traveling public by always being the first to utilize every mechanical device and improvement which can be of any value to those who ride on its magnificent steam trains.

Ostratation. First Klondiker—What ostratation? Second Klondiker—Particularly that roll paper ostratation!—Detroit Journal.

No "All Canadian Route." President Wallace, of the Chicago, St. Paul & Northern Pacific, operating a tramway from Dyer to Lake Umbagog has concluded a contract with the Canadian authorities to carry over 100 tons for the mounted police at Dyer, Que. City. He says the Dominion officials informed him further orders for hauling crates would be given him later. This would indicate that the Canadian government does not know of any "all Canadian route."

"I have realized all along what a great task this is, but I think it can be accomplished. Our petition cannot be ignored by the legislature, when it is signed by all the members before it is presented. It takes a mere politician to deny his own signature. We who ride only on the highways are competent to judge of what is needed. We propose to give dollar for dollar with the state, and shame the commonwealth into an act of civilized progress. The design I have made is for use on the backs of envelopes, and we want all the members of the legislature to begin using these designs, even if we have to present them with their stationery. We do not expect to do more than this about this matter, except where it will promote the project. What we need more than anything else is a little action."—Cor. Cycling Gazette.

BAKER'S CHOCOLATE. Celebrated for more than a century as a delicious, nutritious, and flesh-forming beverage. Has our well-known YELLOW LABEL on the front of every package, and our trade-mark "La Belle Chocolatiere" on the back. NONE OTHER GENUINE. Made only by WALTER BAKER & CO., Ltd., DORCHESTER, MASS. ESTABLISHED 1780.

AGRICULTURAL HINTS

ORGANIZED EFFORT.

Good Roads Agitation in Wisconsin Assumes Practical Form. The Wisconsin division of the Century Road Club of America has sprung a sensation. Ever since the publication of the fact that the Wisconsin Road Club members were going to change the great state of Wisconsin into building better roads, there has been a real interest manifested in the project. This new-born activity is now confined to Milwaukee, but extends throughout the state, as wide publicity has been given to the plan of building better highways.

Dues credit should be given State Centurion H. L. Marshall, whose untiring energy is responsible for the new movement. Mr. Marshall has outlined the work in an ingeniously constructed circular addressed to local centurions. It is proposed to petition the state legislature to appropriate the sum of \$300,000 for road improvements. For every dollar given by the state, another dollar will be contributed by riders of wheels.

The wide arrangement is exceedingly comprehensive. For the purpose of obtaining signatures to the petition, the state is divided into districts, co-extensive with the political divisions set apart for the election of state assemblies. Each of these districts will be in charge of a captain, who will see to it that his lieutenants obtain the signatures of every citizen who is interested in road improvement. It is proposed to have each assembly meet in the list in his respective district, so that the legislature will simply be petitioning itself.

Every wheelman and wheelwoman who signs this petition agrees to give one dollar for road building as soon as the state has made the appropriation. When the monstrous petition is completed, it is proposed to have 1,000 wheelmen visit the state capital and present the document to the legislature in support of a good road bill. The course the local centurions in all the towns will lead their respective delegations to the capital, as usual to the enterprise. State Centurion Marshall has caused to be made a sketch of the state in outline, with the proposed roads running through it. A cut of the design is published herewith, and will be used on the backs of envelopes by all enthusiastic cyclists and their business friends. Speakers of who project, State Centurion Marshall said: "Members of the Wisconsin division have long realized that only by active work could anything be accomplished in the way of road improvements. In such an enterprise we are dealing with politicians and the only way to treat with a politician is to show him that he makes no promises. Performance is the thing, and we propose to make the politicians perform. All the talk in the world would do nothing but accomplish in the way of road improvements. What you need is sand, and perhaps gravel, not to dislodge a few rocks to help out the plan.

"I have realized all along what a great task this is, but I think it can be accomplished. Our petition cannot be ignored by the legislature, when it is signed by all the members before it is presented. It takes a mere politician to deny his own signature. We who ride only on the highways are competent to judge of what is needed. We propose to give dollar for dollar with the state, and shame the commonwealth into an act of civilized progress. The design I have made is for use on the backs of envelopes, and we want all the members of the legislature to begin using these designs, even if we have to present them with their stationery. We do not expect to do more than this about this matter, except where it will promote the project. What we need more than anything else is a little action."—Cor. Cycling Gazette.

HINTS FOR DAIRYMEN. When the spring comes remember that there is not much nutrition in the new grass. It will keep piled on top of the ground if you will cover it deep enough with saw dust. A kicking cow and a swearing milker make a bigger nuisance than a skunk under the barn. Better pay a good price for a good cow than a small price for a poor one. In fact a poor cow is not worth having. A subscriber has two cows that give bloody milk and are causing this. It is caused by blow or contusion of the udder. A subscriber has two cows that give bloody milk and are causing this. It is caused by blow or contusion of the udder. A subscriber has two cows that give bloody milk and are causing this. It is caused by blow or contusion of the udder.

How to Test Paris Green. Paris green is particularly favored as an arsenical poison by entomologists in Louisiana to Louisiana because it is of more even composition and is tested. Pure Paris green when dropped into common ammonia will entirely dissolve, leaving a clear, dark blue liquid, not green, like the color of the powder. If any sediment remains, this is some form of adulteration, and therefore represents an impurity. Chromic iron, which might be used to adulterate Paris green, will give the liquid a bright yellow sediment in its solution at the vital. London purple is just as effective, provided it is of good quality. Its quality can only be determined by a chemical analysis.—Farm and Fireside.

TRAINING RASPBERRY VINES. A piece of plank two feet in length and saw a notch close to each end of the upper edge. In these notches firmly stretch No. 10 wires and brace back the end posts. The accompanying illustration makes perfectly clear this simple and effective way of doing the job. The advantages of keeping raspberry and blackberry vines from sprawling all over the lot will be appreciated by those who have tried this method.—Farm and Home.

How to Keep Them from Spraying. All Over the Lot. My way is to firmly drive four-foot stakes one rod apart and nail to each, 30 inches above the ground, a short

DESTRUCTIVE FUNGUS.

How to Treat Hives-Hot on Plants with Considerable Effect.

It is generally necessary to repeat the general remarks on treatment for fungus diseases published in several previous issues. But concerning brown rot (Monilia fructigena) we may say that only the most persistent effort can hold this fungus in check. All growers who have observed the decayed fruit from the twigs and grass over winter. It is from these in the early days of spring that an abundant crop of spores is blown from the petals of the flowers, young leaves, and even many branches, are attacked. These minute fruits also hang on all summer and continue to produce spores. Hence by the time the fruits become half-grown or begin to mature, the infecting spores may come from the old decayed fruits of the previous year or from more recent infection on the young growth of the current year. Whenever the fruit has become badly attacked treatment is quite useless.

The proper plan is to remove all decayed fruit from the orchard when the trees are free from orchard, as it can be easily seen at this time, before the buds swell in the spring, wash the trees thoroughly with a solution of concentrated lye or of sulphate of copper. The first solution should be made by dissolving eight cans of lye in 50 gallons of water, and the copper sulphate (blue) solution in 50 gallons of water. I consider the lye preferable to the latter may be somewhat pleasanter to handle. This washing is very important, and perhaps does as much real good as all other work.

The later washings should be given as follows: Weak Bordeaux just as repeated soon as bloom has fallen. If the work is well done to this point very little infection will have survived. Concerning value of later sprayings I much in doubt. If the early washings are not well done, I have almost no faith in later treatment. All spraying or treatment of orchards should be done with a spray nozzle. Poor, half work is usually a dead loss.—William B. Alvord, in Bulletin Virginia Experiment Station.

BEST SOIL FOR PEARS.

Grow Nicely on Clayey Ground and on a Hillside. Clay soil is considered best for pear culture, and still it should not be too tenacious and sticky. A pear orchard will not thrive so well, says Green's Fruit Grower, on any soil that has not a clay subsoil. Next to a clay soil, a gravel loam is most desirable. A light, sandy soil is the least desirable of any, and yet pears can be grown in sandy soil. Standard pears are planted 20 to 30 feet apart, according to circumstances and habits of growth. If planted 30 feet apart, dwarf pears can be planted between the rows, such as I prefer a standard pear for general orchard culture, for the reason that they require less fertility and cultivation, and for the further reason that they are longer lived and make larger and more permanent trees. When the question came up for a vote, however, before the Western New York Horticultural society, we found that the dwarf pear was the favorite for orchard planting or for garden. Dwarf pears have the advantage of coming into bearing sooner. The dwarf pear is not short lived. It requires more pruning and more attention than the standard pear. Many varieties do better on the clay soil than on the standard. I should not locate a pear orchard or any other orchard in a low piece of ground. I should locate it on a hillside. The pear is easily transplanted. I transplant several thousand every spring, and they will come on an average one out of one hundred trees. Pear trees come into bearing earlier than the apple.

How to Keep Them from Spraying. All Over the Lot. My way is to firmly drive four-foot stakes one rod apart and nail to each, 30 inches above the ground, a short

How to Test Paris Green. Paris green is particularly favored as an arsenical poison by entomologists in Louisiana to Louisiana because it is of more even composition and is tested. Pure Paris green when dropped into common ammonia will entirely dissolve, leaving a clear, dark blue liquid, not green, like the color of the powder. If any sediment remains, this is some form of adulteration, and therefore represents an impurity. Chromic iron, which might be used to adulterate Paris green, will give the liquid a bright yellow sediment in its solution at the vital. London purple is just as effective, provided it is of good quality. Its quality can only be determined by a chemical analysis.—Farm and Fireside.

TRAINING RASPBERRY VINES. A piece of plank two feet in length and saw a notch close to each end of the upper edge. In these notches firmly stretch No. 10 wires and brace back the end posts. The accompanying illustration makes perfectly clear this simple and effective way of doing the job. The advantages of keeping raspberry and blackberry vines from sprawling all over the lot will be appreciated by those who have tried this method.—Farm and Home.

America's Greatest Medicine

The following is a characteristic Hood's Sarsaparilla testimonial. Vets like these have made Hood's Sarsaparilla America's Greatest Medicine and ordered it to thousands of homes scattered all over this broad land.

"We like to tell what Hood's Sarsaparilla has done for us. Our four children had diphtheria. From the first our little boy Ralph, then seven years old,

was very sick and for several days seemed as if he would never be any better. After awhile he began to improve, and in a few weeks was able to go out, although weak and miserable. Then, gradually

All Strength in His Limbs. The physicians told us it was paralytic, which sometimes follows an attack of diphtheria. We did everything for him, but he grew worse until he was in a pitiful condition. He suffered terribly at night and complained continually of his head, and in what little sleep he was able to get, moaned incessantly at his stomach all the time. After we had tried many different remedies and had about given up all hope we commenced giving him Hood's Sarsaparilla.

In a short time he ceased to complain, his appetite improved and at the end of three months he was able to attend a school a part of the time. Now he is well and quite a strong and rugged boy.

You are at liberty to use this testimonial if you desire, as we feel we cannot say too much in praise of Hood's Sarsaparilla as a blood purifier and building up medicine." Mrs. A. E. Anderson, Cumberland, Maine.

Economy is also a characteristic of Hood's Sarsaparilla. Every bottle contains 100 doses, and hence there is a solid fact conclusively stated in the familiar line, 100 Doses One Dollar.

Hood's Sarsaparilla

Is America's Greatest Medicine because it accomplishes wonderful cures when all other medicines fail. Sold by all druggists. Price, six for \$1. Prepared only by C. I. Hood & Co., Apothecaries, Lowell, Mass.

\$400 For New Names! The Sarsaparilla is the most suitable name for their French hair and White Out product. You can win this \$400 easily. Catalogue tells all about it. Send postcard only \$1.50 a barrel. \$500 in prizes.

Notice—If I felt so queer last night after I went to bed, my head was spinning around awfully. Well, it was probably slept like a top."—Boston Transcript.

Fits stopped and permanently cured. No fits after first day's use of Dr. Kline's Great Nerve Restorer. Free 21 trial bottles. Write for it. Dr. Kline, 1635 Arch St., Philadelphia, Pa.

The upper ten is composed of the winning nine and the umpire—Chicago News. Cold weather aggravates rheumatic pains. But St. Jacobs Oil cures—any time.

One advantage about onions, they can't spoil.—Washington Democrat. Rupture. Surecure. Book free. Write for it. Dr. J. C. Williams, Specialist, 117 West 19th St., New York, N.Y.

Save life, or so great a sin as self-forgetting."—N. Y. Weekly. Never trifle with pain. It may fool you. St. Jacobs Oil never fails; it cures.

Swallow your trouble and hold it down.—Burling Year Book. Isn't a new year born? Yes; and St. Jacobs Oil is a cure.

WORKING WOMEN WHO SUFFER.

Should Get Mrs. Pinkham's Advice—The Whole Truth can be Told to her Because she is a Woman.

The suffering and pain endured by some working women is almost past belief. Here is a letter from one of the multitudes of women who have been restored to health and usefulness by Mrs. Pinkham's advice and medicine. DEAR MRS. PINKHAM—I feel that your advice had lifted me from the grave. I must have been very near it. I suffered awfully at times of menstruation, was constantly troubled with cold hands and feet, was extremely nervous, could not sleep well, was troubled with frightened dreams, had heart trouble and a feeling as though my heart was going. I had to stop, but had leucorrhoea. I tried to get help but all remedies failed, until I wrote to you. I cannot thank you enough for your kind advice, and I wish to tell every one the good your remedies have done me.—TAMMA C. HUNTER, Wolfville, Md.

Lyla E. Pinkham's Vegetable Compound for a quarter of a century has been the best remedy for women who are troubled with female complaints.

"DEAR MRS. PINKHAM—I must write and tell what your medicine has done for me. I am a working girl and have to stay at my work all day. I suffered greatly with bearing-down pains and backache. I was advised by a friend to try your Vegetable Compound. I did so and can say positively I am cured. I have recommended your medicine to all my lady friends, and would advise any of my sex suffering from female weakness to give Lyla E. Pinkham's Compound a trial, for I know it will cure."

Mrs. Pinkham invites all women troubled about their health to write to her at Lynn, Mass., and secure her advice free of all charge. All such letters are seen and answered by women.
