the County.

### MISSION ISLAND.

Fishing still continues good.  
Pearl-bearing clams have been  
discovered on the flats in this vicinity.

As soon as the season opens there  
will be some fine shooting in this vicinity.

John D. Vaughan spent several  
days here this week, and caught a  
number of fine fish.

A small fortune in saw-logs peace-  
fully reposed on the island, awaiting  
the erection of a dam.

The Misses Gertrude Edgerton  
and Helen Pennington were visitors.

The ladies of Mission Island are  
busily engaged in stitching a new  
flag for the cruiser, Helen Blazès.

Prof. Blankenhip and John  
Faulkner were the guests of Commandor  
Hurley for a few minutes Sunday  
evening.

Will Heywood, of barber shop  
fame, spent several days in camp  
this week, and caught several fine  
fish and a bad cold.

Commodore Mike Holley took an  
unexpected trip Wednesday forenoon  
by accidentally falling into the  
channel with his uniform on.

The attention of the proper auth-  
orities is called to the needless  
slaughter of dog-fish. But then, got  
what earthly use is a dog-fish, anyway?

Mrs. Sophia Reinbolds and Net-  
Cochran and Misses Coons and  
"Mug" Brades came in from town  
Thursday. They brought up a  
freezer of ice cream and took supper  
with the campers.

A terrific storm, Sunday evening,  
moved the Helen Blazès several feet  
from her moorings, and knocked off  
the bow and the stern of her boat.  
An expert diver recovered the pipe,  
which rested in three feet of water,  
and the H. B. is again in first-class  
shape.

One of our campers attempted to  
ascend Mission Creek the other day.  
He had not gone far when he got  
the bow and the stern of his boat  
badly mixed up, and it now lies a  
lonely wreck in the mud that adorns  
the shores of the stream. What we  
need up here is a little more water  
and less mud.

There was a heavy bombardment  
in the rear of Mission Creek last  
night, the engagement begin-  
ning at about 10 o'clock. Jack  
Lambert manned the 6-inch rapid-  
fire gun. Billy Thomas was struck  
by a charge of scraped and badly  
wounded. He was sent to Pine City  
Thursday.

One of our campers, who has been  
prospecting in the interior of the  
island, thinks he has discovered cop-  
per in paying quantities. Another  
has found outcroppings on the high-  
est point of the island which leads  
him to believe that he has struck  
the original bed of the first gold  
claim that was staked out in Rion-  
dike.

While Captain-General George  
Russell was entertaining a party of  
friends in Moon Castle, on Friday  
evening, a vigorous specimen of  
the renowned Mephitis Americanus  
engaged in an altercation with Cap-  
tain Russell's faithful watch-dog.  
The dog argued with his adversary  
to the best of his ability, but the  
skirmish ended in a draw, and  
immediately the social party adjourned  
immediately.

A meeting was held here on Tues-  
day evening, to see what steps could  
be taken toward hiding from sight  
the unrighteous bands of the  
Snake River.

It was the opinion of the people present  
that the Chengwatawa dam should  
be rebuilt. We people would rather  
live on an island than on a peninsula.  
A bill of resolutions was adopted  
which will be published in the PIONEER next week.

Mr. H. Schultz has reconstructed  
his house by raising the main part  
to one and a half story and adding a  
frame L to the same.

Mr. J. Armstrong has completed  
a neat little house, on his land near  
the border a place, and is now clean-  
ing it up.

Henry Anderson has built his res-  
idence as heretofore mentioned, and  
has occupied same for some time.

G. H. Cunningham has sold his  
threshing machine. He intends to  
get a larger one.

Monday will be a holiday in the  
Cathedral and Castle. Two hundred  
persons came in from the west.

Mrs. L. A. Brown and Miss Eva  
Wood, of Willow River, spent Sat-  
urday and Sunday, as the guest of  
Mrs. Kyle.

School in District No. 19 opened  
Monday, with Miss Hattie Taylor  
of Pine City as teacher. Fourteen  
scholars have been enrolled thus far.

Mr. Chan Upgreen departed Tues-  
day, for Glencoo, Minn. He has  
come to help harvest in that place,  
and intends to be away until Novem-  
ber.

Rev. H. A. Leaty, of Willys River,  
with a number of his friends,  
spent a few days fishing at Long  
Lake. Among them was Miss Nora  
Wilkes, of this place.

Preaching services will be held in  
the Lutheran church, Sunday p. m. at  
5 o'clock; also in the evening at  
7:30. There will be no preaching in the  
other church.

### HISTORICAL POKEGAMA.

For some time this neck of the  
country has not reported good, or  
adventurous to the northward marching.  
The Pioneer of last week contained  
a notice of a meeting which was  
held at the head of Pokegama Lake a  
week ago last Wednesday evening.  
In relation to the effects caused by  
the high water raised by reason of  
the opening of the dam, not only in  
the town of Pokegama, but in a  
large section of our state, running  
into three counties, via Pine  
Kanabec and Isanti, strumming  
bottom lands in the following  
named towns and villages and other  
parts of the country, villages of Pine  
City, Pine Town, Mission, Pine  
Lake, Brook Park, Raytown,  
Grass Lake, Comfort, Brunswick,  
and, reaching four to five miles  
into Isanti county, up Rice creek  
and above Rice Lake, overflowing  
several miles throughout this region  
all the way down to the Mississippi.  
One hundred acres and more,  
no wonder that public sentiment is  
all one way in relation to this matter  
and that sentiment is anti-dam  
without compromise, from now for  
ever. This is the most encouraging  
feature pointing to a strong and effect-  
ive movement in this affair among  
the people.

The attention of the proper auth-  
orities is called to the needless  
slaughter of dog-fish. But then, got  
what earthly use is a dog-fish, anyway?

Mrs. Sophia Reinbolds and Net-  
Cochran and Misses Coons and  
"Mug" Brades came in from town  
Thursday. They brought up a  
freezer of ice cream and took supper  
with the campers.

A terrific storm, Sunday evening,  
moved the Helen Blazès several feet  
from her moorings, and knocked off  
the bow and the stern of her boat.  
An expert diver recovered the pipe,  
which rested in three feet of water,  
and the H. B. is again in first-class  
shape.

One of our campers attempted to  
ascend Mission Creek the other day.  
He had not gone far when he got  
the bow and the stern of his boat  
badly mixed up, and it now lies a  
lonely wreck in the mud that adorns  
the shores of the stream. What we  
need up here is a little more water  
and less mud.

There was a heavy bombardment  
in the rear of Mission Creek last  
night, the engagement begin-  
ning at about 10 o'clock. Jack  
Lambert manned the 6-inch rapid-  
fire gun. Billy Thomas was struck  
by a charge of scraped and badly  
wounded. He was sent to Pine City  
Thursday.

One of our campers, who has been  
prospecting in the interior of the  
island, thinks he has discovered cop-  
per in paying quantities. Another  
has found outcroppings on the high-  
est point of the island which leads  
him to believe that he has struck  
the original bed of the first gold  
claim that was staked out in Rion-  
dike.

While Captain-General George  
Russell was entertaining a party of  
friends in Moon Castle, on Friday  
evening, a vigorous specimen of  
the renowned Mephitis Americanus  
engaged in an altercation with Cap-  
tain Russell's faithful watch-dog.  
The dog argued with his adversary  
to the best of his ability, but the  
skirmish ended in a draw, and  
immediately the social party adjourned  
immediately.

### WASHINGTON LETTER.

From Our Regular Correspondent.

WASHINGTON, D. C., Aug. 15, 1898.

No record country ever did, and it  
is not likely that any other country  
ever will, in the short space of three  
months and a half fight such a  
remarkable war as the United States  
has just fought to a successful close.  
It was one line of successes, without  
even a single set-back, from Dewey's  
victory in Manila Bay to the accept-  
ance of the terms of peace by the French  
Ambassador, authorized to act for Spain.  
Without detracting in the slightest degree  
from the honors a grateful country are  
paying the heroes who participated in  
the conflict, it is well to call attention  
to the man who is responsible for this  
success. That man is William McKinley,  
the man who has shown himself  
so worthy to hold the highest office  
of the greatest and greatest nation.  
That the world has ever seen by  
gaining the admiration, love and confi-  
dence of our own people, and the  
respect of the entire civilized world.  
He has raised the United States to  
a position that it has never occupied  
before, and it is to him that the  
world looks for leadership.

He is today as unobtrusive as  
he was when serving in the House,  
and has no pride other than that  
which every man has who conscient-  
iously performs his duty. Every  
American is proud with pride to  
President McKinley, and with pride  
for the favoritism shown to the  
favored nations: This is the sort of  
man that a free country produces at  
need.

The members of the military com-  
missions, that are to act with Spanish  
commissioners, at San Juan,  
Porto Rico, are now being arraigned  
for the evacuation of Porto Rico  
and Cuba by the Spanish troops.  
A trial date will be selected this week, but there  
is no special hurry about selecting  
the five peace commissioners that are  
to negotiate the formal treaty of  
peace between the U. S. and Spain,  
as the Commission will not meet  
until Oct. 1st, at Paris, and the  
President wishes time to select the  
very best men to be had.

All of the revenue cutters that were  
transferred from the Treasury  
Department to the Navy Department  
at the beginning of the war have  
been ordered back into the  
Treasury Service, and they will, as  
fast as possible resume their peace-  
ful avocation of watching for viola-  
tors of the tariff laws.

President McKinley took occasion  
in a letter writing an invitation  
from Gov. Breckinridge to the regular  
troops at Chickamauga park because  
of his inability to get away  
from Washington, to say a few  
words that do much to soften  
the bitter disappointment of thousands  
of volunteers who had no opportunity to do any fighting.  
These words were: "The highest  
tribute that can be paid to the sol-  
dier is to say that he performed his  
duty." The soldiers were dis-  
minded by his government, and when  
ever that chance to be in the place  
of honor. All have helped in the  
great cause, whether in camp or  
battle, and when peace comes all  
will be those entitled to the nation's  
gratitude."

Gov. Otero, of New Mexico, who  
is visiting in Washington, said:  
"President McKinley's administra-  
tion is the most thoroughly  
successful, in managing fishes of  
various sizes and kinds, while his  
wife enjoys boat rides and also  
leads a successful hand at con-  
versation." They are staying at  
the head of the lake, and Capt. Hinckley  
and lady are seriously considering  
locating permanently at the lake  
for their health. We hope they will  
return to the city to stay during the  
winter, as the development of  
beautiful Lake vicinity, and undoubt-  
edly many more good people from  
Old Kentucky would follow  
suit and settle here.

Potato crop is looking fine. All  
farm crops promise well this season.  
Even the grass, on bottom lands  
and hillsides, is growing well, two  
to three feet high, and thick enough  
to yield several tons to the acre.

Mr. H. Schultz has reconstructed  
his house by raising the main part  
to one and a half story and adding a  
frame L to the same.

Mr. J. Armstrong has completed  
a neat little house, on his land near  
the border a place, and is now clean-  
ing it up.

Henry Anderson has built his res-  
idence as heretofore mentioned, and  
has occupied same for some time.

G. H. Cunningham has sold his  
threshing machine. He intends to  
get a larger one.

Monday will be a holiday in the  
Cathedral and Castle. Two hundred  
persons came in from the west.

Mrs. L. A. Brown and Miss Eva  
Wood, of Willow River, spent Sat-  
urday and Sunday, as the guest of  
Mrs. Kyle.

The emperor, Francis Joseph, of Austria, in order to provide a residence nearer Vienna for his daughter, the Archduchess Valerie, and her children, has bought the Prussian chateau, Lower Austria, in which the Count de Cramond lived from 1868 till his death in 1888.

The tail of a true swan, carefully made by native workmen, is a piece of red-hot charcoal upon it, which leaves a singed round spot. If the charcoal is one of the first quality the singed wool can be brushed off with the hand without the heat trace of the burn being afterward discernible.

The smallest salary he has had of late is to a young man in Brazil is for running errands. He at first worked for nothing, but grumbled until a weekly stipend was agreed upon. He now receives 1 cent a week, and considers himself amply remunerated for going to the grocery store. But then he is only 7 years old.

One match of life is that ships are no match for land forces. Some \$20,000,000 were taken when a Spanish fleet at Algeciras attempted to reduce the fort. The hundreds of shots fired at Morro castle proved absolutely harmless. What might have been had the fort contained good guns and good gunners?

The regular army of China is said to consist of 325,000 men. Besides this, the empire has there is a militia of 500,000 men, who are paid about one dollar a month. The cavalry receive about three dollars a month, feed their own horses and if the horses are lost all killed are reckoned as undertaken.

MORALITY among hospital nurses is startling. It has been socertained that a healthy girl of 17, devoting herself to hospital nurses, has an average 21 years longer than a girl of the same age moving among the general population. A hospital nurse at the age of 25 has the same expectation of life as a person at the age of 35 in the ordinary community.

COMPETENT authorities expected that the Klondike output would this season amount to \$100,000,000. The total output last year was estimated at one-half this amount or about \$50,000,000 or \$12,000,000. Canada charges 10 per cent upon all gold mined in her territory. She collected up to June 1, 1898, \$1,000,000, which represents \$80,000 milled. Much gold was probably smuggled away.

Sousa, the musician, is to be made minister of war. The 6th army corps, with the rank of captain provided he can be released from duty in time to fill his final engagements. Meanwhile, the saloon on the Brooklyn, jealous of those on the New York, which is a member of the music, has written to Sousa, asking him to name a competent musician to organize a band for their ship.

Snow sight is more common in Iowa than among country folks, for the simple reason that townspersons have less need for long sight; they have fewer opportunities for exercising their sight on distant objects. Their eyes do not favor its development by training or selection, but it is not, in majority of cases, a proof of physical degeneracy, as can be seen in the case of the Germans, who are a notoriously short-sighted people.

MARINER, a butt of which wine was used to keep the soldiers warm during his imprisonment, is now awaiting trial in France for bating purposes. It takes a 100 quarts of wine for a bath, the French character of which is shown by the fact that the water is poured hot, the bath being taken cold. He was employed over again for the next bath. After 100 baths, according to the London Daily Telegraph, the malady is distilled, "and the result is a delicious brandy."

Frogs, having friends or relatives in the armies now situated in Cuban and Porto Rico seem to be much inclined as to how letters to them should be stamped. For the benefit of those interested, the postmaster general has issued a circular stating that letters addressed to soldiers or sailors in Cuba, Porto Rico or the Philippines only require the postage rates of 10 cents each. Mail sent to others than government employees must pay the regular rate as fixed by the international postal union.

One of the pastimes of the crew of the blockadeading fleet in front of Havana is to fish for sharks, in which they have been successful. The shark, which recently captured a large shark and when dissected there was found in his stomach the steersman of a United States sailor's jacket, the arteries of which sailors believe of one of the victims of the battle with Maine and when the vessel was known to have been captured, the shark was blown off and swallowed by the shark.

SLA. GEN. MERRITT is said to be a popular man for these days of large fortunes. He is not a millionaire, but an army friend of his who pretends to know rates him at \$1,000,000. The reason of this is that his mother by his own confession is in misery and in debt.

## THE WAR IS ENDED

Proclamation by the President Ordering a Cessation of Hostilities.

All Military and Naval Commanders Are Notified to Cease Their Operations.

The Blockade of Cuban and Puerto Rican Harbors Is Ordered Raised at Once.

Brief Resume of the Provisions of the Protocol Between United States and Spain.

Full Text of the Orders Sent to the American Generals and Admirals.

Washington, Aug. 13.—The president has issued the following proclamation:

"By the President of the United States of America.—A Proclamation.

I, William R. Day, secretary of state of the United States, and John C. Cameron, ambassador extraordinary and plenipotentiary of the republic of Cuba, have agreed upon the terms of peace to be observed between the United States and the government of Spain, and have, therefore, agreed upon the terms on which negotiations for the establishment of the peace between the two governments are to be undertaken; and

"Whereas, it is in said protocol agreed upon by the two governments that hostilities between the two countries shall be suspended, and that notice to that effect shall be given to the commanders of the military and naval forces;

"And whereas, William McKinley, president of the United States, do, in accordance with the provisions of the said decree and proclamation on the part of the United States a suspension of hostilities, and that the same is to be immediately given through the proper channels to the commanders of the military and naval forces of the United States, and to abstain from all acts inconsistent with this proclamation;

"And whereas I have received set in my hand and caused the seal of the United States to be affixed, Do at this date, Washington, D. C., the 13th day of the year of our Lord one thousand, eight hundred and twenty-eight, and in the presence of the United States one hundred and twenty-third."

BY THE PRESIDENT,

William R. Day, Secretary of State.

A copy of the proclamation has been cable to our army and navy commanders. Spain will cable her commanders like instructions.

### The Protocol.

The protocol provides:

That all military and naval commandants of sovereignty over and title to Cuba.

That Puerto Rico and other Spanish possessions, to be selected by the United States, shall be ceded to the latter.

That the city, bay and harbor of Manila and the entire archipelago of the Philippines, including the islands of Negros and Panay, shall be ceded to the United States.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

That the United States shall be immediately evacuated and that compensation be made for all damages sustained by the Spanish in the West Indies.

COMFORTABLE STALLS.

A System by Which Each Cow Is Protected from Possible Injury When Lying Down.

There is excellence in the plan of tying cows over the stanchion plan, as shown herewith. The cow has 3 feet in front of stall and perfect liberty and comfort of position. Because of the bar across the stall entrance, just forward of the hind feet of the standing cow, the animal has always a dry, clean bed to lie in, thus keeping her clean and comfortable in winter as though she was in a June pasture. By this system each cow is protected while lying down from bumping her teats andudder stepped on by her standing neighbor. This is one of the most pronounced preventers of injury that is known and of itself should condemn the rigid stanchion.

A closely-boarded partition about four feet high forms the front of the stall. Each cow has space 3½ feet in width. The stall is made tight, and there is no drop-in or scaling about except the thickness of one plank, which is the double floor of the stall. The style of feeding rack secures two purposes. It contains hay or roughage, and stalls are placed wide enough so the cows can turn around and clean them. Their slant forces the cow when erect to stand with her hind feet in rear of the cross-bar across the stall floor. In making the feed rack, nail a piece of two by eight inch lumber diagonally against the board partition.

## A COMFORTABLE COW STALL.

This makes the bottom of the stall and should be placed 30 inches from the door. Place the top securing about two feet from the partition. This makes the stall eight inches in width at bottom and two feet at top. In center of bottom securing fasten a ring screw to the halter to. Fasten the cow to the ring screw, the halter, she wearing the headphones at the time. The halter end of the rope has a safety snap to fasten into the ring of the halter and under the throat.

The grain and ensilage box is placed on that side of the stall opposite to the one where the cow usually lies on. The box is for grain and ensilage, and is closed by an opening in the partition. Place the box slanting and the feed will easily work down to the lower end next the cow. In placing the bar across the stall bring the cow's head square up against the feed rack when just forward of her hind feet and drive a two by three scatting. Fill the space forward of the bar with bedding, which being without waste, will last till nearly worn out.—Ex-Gov. W. D. Howard, in Farm and Home.

## DAIRY SUGGESTIONS.

The cellar in which butter and milk is kept must be dry and well ventilated.

In the cow a comfortable and satisfied as you can make her? She must be to do her best.

If the average herd of cows should be tested, one, two, three or more would be found unprofitable.

If you are making the dairy prominent on the farm, you should have, a milking house and a separator.

The best kind of cow is receiving due attention from those who intend to make the cows profitable. Endage is good and cheap.

Simply because a cow is a scrub, we say once more, is no reason to disbar her. She may be a fine cow, but she cannot be depended upon to reproduce herself.

If you have a cow, dig a hole and put the green corn into it whole. It is a slovenly way to make ensilage, but better than nothing. The ensilage must be covered.

Nothing is more important than to accustom the heifer to being handled. Handle her all over. Accustom her to the touch of the hand. It will greatly help her when she comes to calve.

Keep good cows or none. The poor cows eat feed without giving the return that a good cow would. And throw away both labor and feed with such a cow.—Western Plowman.

**Micromes as Cheese Makers.**  
Dr. Olsen, of Norway, has invented various cheeses, and has sought and cultivated their microbes; then he has reversed the process, and used his cultures to produce the various cheeses from which he started. The kinds of cheese are many, but by their combination in different proportions different results are obtained.

The milk is sterilized and healthy to 70 to 75 degrees C., and the storage room is kept guarded against foreign microbes. Those that are desired are added in the required proportion, and their vigorous growth is of itself enough to overcome the influence of accidental strays. The production of the kinds of cheese is no longer an affair of the laboratory, but Dr. Olsen will take your order for Gorgonzola, Stilton or Camembert, and will furnish the precise description required at a cost satisfactory to your pocket and his own.—Natural Science.

## THE CHEESE BUSINESS.

A Good Thing for Some, But Not for the Man Who Supplies the Factory with Milk.

There are two points about the cheese business which are worthy of notice. During about fifteen years after a long series of years of grain growing, which sooner or later impoverishes the soil and brings to want the man who indulges in the luxury of milk, and a binder at the same time. Farm Stock and Home, and has no time to milk cows. Then he turns the dairy to recoup his resources. It is a question whether he will realize in dollars and cents as much as he would if he took his milk to a creamery. But one thing is certain, the ton of cheese he makes from the milk he removes 50% fertilizer from his soil. If he takes his milk to a creamery he will have the skins of the cows to feed to calves and pigs, and thus get 100% of his investment of fertility for every ton of butter he makes when his cheese is ready for market, which is from three to six months. He is dependent upon some cheese buyer to relieve him of the accumulated product of such a period. The buyer is willing to pay for the bulk milk into storage for ripening, and at a favorable market, which may not be long, and the buyer must take into account these encumbrances when he names a price at which he will sell to the cheese market. If his dairy product is butter the market is ready to pay at ruling prices, for it goes into consumption at once. It will be, therefore, for the more western farmer to stand by the cooperative creamery, which has always brought good and quick return, left him independent of the buyer, and added fertility to his soil.

## WHEN THE COW KICKS.

A Simple Cure Which has Proven Quite Effective Wherever it Has Been Tested.

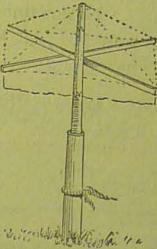

It is always the best milker that gives the most trouble in milking. This is easily caused and often remedied by theudder filled with milk making very sensitive to the touch, and it requires very careful handling not to kick the cow. The natural result is that she will kick. The best remedy is that she will not kick, and usually to do some vigorous kicking as the result of the pain they are suffering. If there is a large amount of milk thus retained it is likely to become larger and permanently spoil the cow.

Generally if the cow kicks most milkmen will either kick back, or will take a safer means by getting far enough away so that the cow cannot kick them and hold them over the back and sides. Such methods are cruel and wholly unnecessary. In ring is put in the cow's nose and her head is fastened up so that she cannot get away, and she cannot kick. Each retentive kick is met with a lowering of the head as if to rebuke the cow goes to lower her head and finds that the ring in her nose hurts her, and that at once will make her desist. It is a very simple method, and has always proven effectual when tried.—American Cultivator.

## TETHERING CALVES.

A Simple Device Which Aids Grateful Shelter Against Heat and Rain.

Calves suffer severely in summer by being hatched out in the hot sun. Some shelter ought to be provided, both to guard against heat and rain. The cut

## A SAFE TETHER.

shows an arrangement that will be found to fit this need. A hole is made in the turf with an iron bar, and the upright that is shown is driven down into the ground. This upright has a cylinder (about 1½ in. diameter) which will do as well) about its lowest end, and a hitching-ropes is tied. This prevents the rope getting wound about the post. To the upright are nailed two light strips of wood, over which some cloth is stretched, its position being indicated by the dotted lines. Make this just high enough for a calf to go under, and it can be moved about with great ease, holding a crumbler to make a new hole in the turf in each new location.—N. Y. Tribune.

**Buttermilk as a Drink.**  
One of the best refreshing drinks for hot weather is buttermilk, drawn just after the cream has been churned. It is a nutritious drink, and the slight acidity which it has, if made from ripened, that is, sour cream, makes it easier to digest than fresh milk. In some cities buttermilk is sold for a cent at restaurants, and there are many city men who were brought up in the country who create a good demand for buttermilk, even though it be not fresh from the churn. In a cool place buttermilk may be kept for four or five days.

## THE CHEESE BUSINESS.

A Good Thing for Some, But Not for the Man Who Supplies the Factory with Milk.

## Lost His Life Saving Others.

A country boy visiting New York stopped on the Hudson River to wait for a boat to pass. A number of women and children, who had been saved by him, were gathered on the deck of the steamer. People who are fatigued from a hard day's work, and who have been exposed to the sun, are always weak, and the sailors high-spirited. They are as well as others recognize this fact, and when the boy was seen to be saving lives, he was given a hearty cheer. Those who have not won the right to be called heroes, may be heroes in their own right.

**Fighting for the Cash.**  
Ladies—If you give me a check, my lawyer will require a stamp and all that. Can't you arrange another method?

Mr. J. C. (Imperial)—Let me see what I'll give you.

I'll give you my monthly note—N.Y.

Journal.

Continued from First Page.

does not wish our troops to go until cool weather.

While there is no reason to believe that the present temporary peace will not be permanent, no chances are to be taken. Every vessel in our navy now is where it can be done, is to be overhauled and put in first-class fighting condition, as fast as the work can be done.

Lumbermen's Day at Omaha.

Sept. 9, the ninth day of the ninth month, has been chosen by the lumbermen of Omaha to entertain visiting lumbermen on the Trans-Mississippi Exposition grounds. An attractive program has been prepared, specially low rates have been secured, and there is no doubt the occasion will be a notable success.

The Nebraska lumbermen will act hosts during the day, and will keep open house at the Nebraska and Minnesota buildings. Visiting lumbermen can obtain lodgings from members of the reception committee at the depot or at the Commercial Club rooms, the Nebraska building, or the Minnesota building.
