WASHINGTON LETTER.

From Our Regular Correspondent.

WASHINGTON, D. C., Aug. 21, 99.—Secretary Root is giving the country a striking exhibition of what can be accomplished by hustling, even in the month of August, which has got to be so generally recognized in official circles as vacation time. He has caused everything connected with the sending of the volunteers to the Philippines to be advanced considerably from the first estimates, and it is now practically certain that the first of the first ten regiments will be landed at Manila not later than October, and arrangements have already been made by which the other ten regiments, the order for the enlisting of which was only issued several days ago, will reach Manila within a week, before or after December 1st. No troops ever took the field any where better equipped than these men will be or better provided in every respect for campaigning in the tropics. They will all be armed with the Krag-Jorgensen rifle, of which the War Department now has a full supply, and amply supplied with smokeless ammunition. When all the troops get over there will be more than 60,000 men in the Philippines. It is not believed that so many men will be needed to do the fighting, but Secretary Root intends to have them there so that every town taken from the Filipinos can be held, instead of being abandoned, as in the last campaign. If there is as much hustling at the other end as has been in Washington, the campaign will be short and decisive.

Secretary Wilson, who has just returned from a western trip all the way to the Pacific coast, upon which he went to study agricultural conditions so as to make the work of the Agricultural Department as helpful to the farmers in that section as possible, says the talk about a sentiment in the west against the Philippine policy of President McKinley is all manufactured in the east and that he did not meet a single "anti" west of Chicago, although he met hundreds of men in all stations of life. He found the farmers prosperous all through the west, and especially so in the corn belt. He says the wheat crop of that section will be a little short, but that the crop of corn and oats and other farm products are enormous. Speaking of the annexation sentiment in the west, Secretary Wilson said: "The people of the west understand this question better than do those of the east. They know that Dewey was sent to the Philippines to protect our large and growing trade with the Orient. We have labored to build up a trade with China and Japan, and when the war began Spain had a fleet in Oriental waters ready to attack and destroy our commerce. She also was ready to encourage privateers, and Dewey

went to Hongkong to be ready to protect our shipping. He destroyed the Spanish fleet as the safe way to prevent it from preying upon American merchant ships. Had the battle resulted in a victory for Spain rather than for Dewey, the Spanish fleet would have crossed the Pacific to attack our western ports. The people out west realize that Dewey's victory and the subsequent events which transferred the Philippines to the United States have given an extraordinary impetus to the commerce of this country with the Orient. At all the Pacific ports the docks are piled up with goods awaiting shipment to the Orient and we have not ships enough to carry them. The people of the west regard the Pacific as an American lake, which should be covered with ships carrying the American flag, and I don't know but they are about right. Why I went on one big ship loading at Tacoma, and I found in the cargo lumber, wheat and flour from the state of Washington; butter and eggs from Iowa and Michigan; fruit from California and Oregon; steel from Alabama, cotton goods from the Carolinas; bicycles from Chicago; notions from New England, and something from more than half the states in the Union. This cargo was bound for China and Japan, and it represented every section and nearly every branch of industry in the United States. It showed me more clearly than I had ever seen before the general interest we all have in this Oriental trade."

General Merritt, who was the first American Commander in the Philippines, has gone to Lake Champlain, at President McKinley's request, presumably to talk about Philippine affairs. This has revived the rumor that General Merritt would return to the Philippines, but no confirmation can be obtained in official circles.

The Washington committee that is collecting money for the relief of the Porto Rico hurricane sufferers has received checks for \$250 each from President McKinley, Vice President Hobart, and Secretary Root. The latter has appointed a National Committee, to take charge of the distribution of contributions, to which all local committees will report. Ex-Secretary Bliss is chairman of this committee.

"I have been using your Blood

I find it an admirable remedy for the

tating but strengthening instead."

one of America's most eminent medical au-
thorities, and has been long and successfully

**Another Case of Rheumatism Cured
by Chamberlain's Pain Balm.**
My son was afflicted with rheuma-
tism which contracted his right
limb until he was unable to walk.
After using one and a half bottles of
Chamberlain's Pain Balm he was
able to be about again. I can heart-
ily recommend it to persons suffer-
ing from rheumatism—**JOHN SNIDER,**

WHOOPING COUGH.
I had a little boy who was nearly
dead from an attack of whooping
cough. My neighbors recommended
Chamberlain's Cough Remedy. I
did not think that any medicine
would help him, but after giving
him a few doses of that remedy I
noticed an improvement, and one bot-
tle cured him entirely. It is the
best cough medicine I ever had in
the house.—**J. L. Moore,** South Ber-
