WASHINGTON LETTER.

(From Our Regular Correspondent.)
WASHINGTON, Aug. 25th, 1902

While it has become almost trite to apply the word, "strenuous" to the present administration, few people realize the extent to which that quality has entered into the execution of the law in Washington, nor the marked improvement which, what westerners are wont to describe as "hustle" has made in the executive departments. There is no better exponent of this quality in Washington than the Secretary of the Treasury, Mr. Shaw. Coming fresh from the breezy prairies of Iowa with an experience as a western banker, Mr. Shaw was agnostic at the outset as to which the work of the government was performed, and at the lack of genuine energy displayed by the employees of Uncle Sam's great counting house. No immediate change was made, however, by the new Secretary, and his subordinates began to congratulate themselves upon having found an "easy" employer but, the Secretary was merely getting his bearings. Having gotten them, he inaugurated a gradual course of reform. Newspaper reading during business hours was prohibited. Gossiping in the corridors of the Department was forbidden to the host of genial and entertaining old ladies who constitute a considerable portion of the working force. Chiefs were incited to greater effort and prompter returns from auditors and disbursing clerks were required. Finally, and that quite recently, an order, which was regarded as almost revolutionary by the older employees, was promulgated. It stated that all inquiries addressed to the Treasury Department or any officer thereof must be answered, or at least acknowledged, on the day of their receipt. The consternation which greeted the order has, however, changed to admiration for the more businesslike methods which now prevail. Accurate and rapid clerks are receiving merited promotion. The public is getting better service than ever before and there is little likelihood that the Treasury Department will ever again slip back into the slow and unbusinesslike methods which have, in the past, excited the disgust of every business man who came into contact with it.

Another Department which has felt the benefit of a young and forceful chief is the Navy Department. Mr. Moody is an eastern man, but he is a business man and a fearless one. Long familiarity with the workings of the department, gained in his position of chairman of the House committee on naval affairs, enabled him to inaugurate changes without waiting as long as did Secretary Shaw to secure a grasp on the situation. Shattering old traditions with a ruthlessness which caused the old employees to shudder, the new Secretary has put in force reforms which from his former position he knew ought to be made. Officers who regarded their influence all sufficient to secure for them during the course of their naval careers a pleasant berth in the capital of the nation have been ordered to sea and the end is not yet. Mr. Moody even directed to replace a number of bureau chiefs who are trained officers, with civilians, so that the officers may be free to render to their country the special service for which they have been educated by the government at great expense. Perhaps the most startling reform with which Mr. Moody threatens the legends and traditions of the service is the systematic effort which he is making to secure a modification of the laws, which will facilitate the promotion of non-commissioned officers into the line. The difficulty which is met to secure recruits for the navy, the Secretary has traced to the fact that it is more easy for a sailor to pass through this needle's eye than for an enlisted man to secure a commission. Such promotions the officers regard as a violation

of the aristocratic tenets of the navy. They say that only "gentlemen" should be made officers and those will not be found among the enlisted men. But Mr. Moody says that if promotion is made as easy of attainment as it is in the army, there will be many gentlemen who will enlist and prepare themselves for the examinations which should be open to every seaman and that those who earn their promotions will prove as well qualified to command as the graduates of Annapolis.

To a considerable extent the same spirit has infused the Department of Agriculture. Secretary Wilson, who returned from the west last Friday, told your correspondent that he had secured perfect organization in his Department, and that, as a result he was prepared to meet promptly and effectively a new problem which had been presented for his consideration in the northwest. The Secretary during his western trip, inspected a large area of land in Wisconsin, Michigan and Minnesota, which has been denuded of its pine forests by the lumbermen and burned over by fire. This land is now being settled by farmers, Americans, Swedes and Danes, and the Secretary will immediately order the experts of his department to examine the district, ascertain the best varieties of grains, grasses and legumes for that particular climate and soil and will render every assistance to the new settlers in making a great agricultural country out of what is now a desolate stamp land.

Word has been sent out from Republican headquarters to the effect that the voters must be waked up. It is said that in off years it is customary for the Democrats to poll 30 per cent of their vote while the Republicans poll but 70 per cent. In many localities, conditions are not favorable to a republican victory and the leaders realize that every available vote must be mustered in order to maintain the Republican strength in the House. The officials at Democratic headquarters are inclined to laugh at this warning. They say the Republicans have been resting in a sublime confidence which they have only recently begun to realize is a "fools' paradise" and that now they are frightened but that it is too late, that the Democratic organization is perfect in almost every district and that it will be impossible for the Republicans to retain control of the House. Intense interest is displayed in the trip of the President and his every utterance will be carefully analyzed by the leaders of both parties. A less confident man than Mr. Roosevelt could not but feel somewhat nervous at the knowledge that so much of vital importance to himself and his party rests on his words but from all reports the President will say what he thinks without stopping long to consider the consequences. If he errs, however, the clever men who are managing Democratic affairs will not fail to take advantage of his mistakes.

LIST OF PATENTS
Granted to Minnesota inventors this week, reported by C. A. Snow & Co., W. D. Bell, Clayton, weight motor; J. Benner Merriam Park, car seat; F. W. Cooley Minneapolis, fireproof building; W. Jordan, Wisconsin, box fastener; H. H. Keyser, Minneapolis, cylinder snowplow; G. Lession, Lake City, washbowl; O. Radt, West Duluth, power shaft coupling; W. Sautrey, stillwater, lumber loading device; E. E. Thomas St. Paul twin saw shifter machine.

For copy of any of above patents send ten cents in postage stamps with date of this paper to C. A. Snow & Co., Washington, D. C.

PERFECT SATISFACTION
is something that we are bound to give. Last January some people were longing for some of this warm weather. Now they want just the opposite. They can have it—

AT OUR SODA FOUNTAIN.

There is a strong suggestion of January's coldest day in the delicious and refreshing beverages we are now serving. Our Soda Fountain Motto is, "PLENTY OF ICE." No objection to your adopting it for your own during this hot weather if you will kindly remember our

FOUNTAIN.

BRECKENRIDGE'S Pharmacy
Main St. - - Pine City, Minn.

THERE IS MONEY FOR YOU
IN EVERY SACK OF PINE CITY FLOUR.

Pine county land has been fertilized by nature ever since Creation, and produces the Best Wheat in the World. We buy this wheat direct from the farmers and make into flour in a modern, up-to-date plant. Bread from this flour is more wholesome than that made from prairie wheat. It retains moisture longer and makes more bread from the same amount of flour. If your dealer tells you he has a flour that is as good or better than ours, you can know that he is trying to make money out of some other flour.

We employ Pine City labor, buy Pine City land, and grind Pine City grain. Don't you think it would pay you to use our flour? Give it a trial anyway. We guarantee it.

PINE CITY, MINN., Aug. 29, 1902

REPUBLICAN STATE TICKET.

For Governor
SAMUEL R. VAN SANT,
of Winona.

For Lieutenant Governor
RAY W. JONES,
of Hennepin County.

For Secretary of State
PETER E. HANSON,
of Litchfield.

For State Auditor
SAMUEL G. IVERSON,
of Fillmore County.

For State Treasurer
J. H. BLOCK,
of St. Peter.

For Attorney General
W. B. DOUGLAS,
of Clay County.

For Clerk of the Supreme Court
C. A. PIDGON,
of Wright County.

For Railroad Commissioner
C. F. STAPLES,
of Dakota County.

Congressional.

For Member of Congress—8th Dist.
J. ADAM BEDE,
of Pine City.

Legislative.

For the Senate,
L. H. MCKUSICK,
of Pine City.

For the Legislature,
JOHN L. OLESON,
of North Branch.
FRANK W. ROWE,
of Lindstrom.

County Treasurer.

I hereby announce myself as a candidate for the office of County Treasurer of Pine County subject to the approval of the Democratic primaries to be held on Tuesday, Sept. 16, A. D. 1902. Gentlemen, I respectfully ask for your support.
JOHN W. CHALUPSKY,
Beroun, Minn.

County Treasurer.

I hereby respectfully announce that I am a candidate for the office of Treasurer of Pine County, subject to the decision of the voters at the Democratic Primary Election, Sept. 16th, and I ask voters to give my claims fair consideration and such as my qualifications and experience may justify merit. I have lived in Pine City seven years and have been a member of the village council five years. My record is well known. If I am deemed worthy and fit I shall appreciate the support of the people.
Yours Truly,
J. VEJVANKA.

County Attorney.

I hereby announce myself as a candidate for the Democratic nomination for County Attorney of Pine County, subject to the decision of the primaries to be held Sept. 16th, 1902.
Yours Respectfully,
J. J. MURPHY,
Attorney at Law,
Hinckley, Minn.

Judge of Probate.

I hereby announce my candidacy for the Democratic nomination for Judge of Probate of Pine County, subject to the decision of the primaries to be held Sept. 16th, 1902.
Yours Respectfully,
HENRY WILCOX.

Judge of Probate.

I hereby announce that I am a candidate for the office of Judge of Probate, subject to the will of the Democratic voters at the primaries to be held Sept. 16, 1902. I have been before the people of Pine County for the past twenty years, and you all know my record. I solicit your suffrage.
JUDOR E. VEKHOVEN.

County Coroner.

I hereby announce to the Republic that I am a candidate for the office of Coroner, subject to your vote at the primaries on the 16th of Sept., 1902. I ask for your support.
Dr. H. H. WISNASKA

County Treasurer.

I hereby announce myself a candidate for the office of county treasurer on the Republican ticket, subject to the votes of the party at the primaries to be held September 16, 1902. I solicit your support.
Respectfully,
F. W. KYRAN.

Every voter in the county should turn out at the primaries on the 16th of September and see to it that the best men for the several offices in both the Republican and Democratic parties are placed in nomination.

The above is a picture of J. L. Olsson, of North Branch, a candidate for the Legislature and a running mate of L. H. McKusick and W. E. Rowe. Mr. Olsson is one of the foremost men of our sister county and a man that, if he is sent to the Legislature, will be heard from. At the primaries be sure that you place your cross after the names of L. H. McKusick, J. L. Olsson and W. F. Rowe for the Legislature.

At the primaries on the 16th of next month be sure that you place a cross after the name of J. Adam Bede, of Pine county, for Congress. J. Adam has been before the voters of this Congressional district for the past eight or ten years, and is one who will be a credit to the people of this district on the floor of Congress. He is a fluent talker and a deep thinker. The worst that his enemies can say against him is that he is apt to make his points by ridicule, as he did in his debate with Chas. A. Towne at Barnum some four years ago, when he was the cause of the defeat of the champion of free silver and the election of Page Morris. But with all his ridicule there is always a deep thought to be thought out or a point to make, and because a man has the power by his wit and humor to make his point or make his thoughts plain to his audience, is it a crime? There are very few men that have the faculty with which Mr. Bede is endowed.

The Republicans of Pine County are in the midst of a political broil for the office of State Senator. One of the candidates that will be before the voter will be L. H. McKusick of this place, an old life-long Republican, one who has served his party in a great many ways. A man that is conceded by his enemies one of the best attorneys in the state; a man that can get up at any time and make a speech on any subject without a moment's warning; a deep thinker, a shrewd politician, one that is quite liable to get whatever he goes after as his colleagues in the Senate very well know; a man who on the floor of the Senate chamber, is welcomed as a friend of any measure and dreaded as a foe.

The other is Dr. D. W. Cowan, of Sandstone. The doctor joined the Republican party at the time of the free silver craze, leaving the democratic party to get onto the G. O. P. band wagon. He has not as yet held any position where he has been before the people so has no record to refer to. Voters, which would you rather have if you wanted to draw a heavy load, an old work horse, one that knew how to settle down in the harness and pull for every pound that was in him, or a young, untried colt?

THE EDITORS OUTING.

An Eight Days Trip on Lakes Superior and Huron.

It was a jolly party of about one hundred editors, their wives, sons, daughters and some sweet-hearts, that boarded the Eastern Minnesota train in St. Paul on Tuesday morning August 12th 1902, for an outing of ten days on the beautiful Lakes Superior and Huron.

The party arrived in Duluth on schedule time and at once embarked on the steamer "Feronie" one of the Northwestern Navigation company of Ontario Canada's, fine boats that runs between Duluth and Sarnia. The boat is a beauty and the voyage a pleasant one. Boreate the party stopped for a few hours at Port Arthur. It was just day light on the second day when we arrived at the Soo, passing through the Canadian locks, we landed on the Canadian side and a few hours was spent by those who were out of bed, looking over the town, our next stop was at Mackinac Island the famous summer resort of Michigan, here there was a sight of six guns fired by a Revenue

cuter. After landing we were taken in carriages and driven to all the principal points of interest including Avoit took the old forts and Sugar Loaf. The island is covered with a thick growth of cedar, and dotted here and there are the beautiful homes of people who go there to spend the hot summer months. In the evening the boat proceeded on its way to Sarnia arriving there at 10 a. m. on the 15th, we at once disembarked and took up our headquarters at the Dame hotel. Lunch was served and at two o'clock the party was taken in charge by a committee from the Grand Trunk railroad and the Commercial Club and taken by special train to the tunnel, where the party took the open cars that were in waiting and went through the famous St. Clair Tunnel. The following will give our readers an idea of the magnitude of this piece of engineering.

The St. Clair tunnel was commenced in Sept. 1888 and completed for passenger service in Dec. 1891. Length of the tunnel proper is 6025 ft. Length of the open approaches 5693 ft. or more than two miles in length. It is the longest submarine Tunnel in the world. The tunnel is an iron tube 19 feet 10 in diameter. Total weight of iron in this tunnel is 50,000,000 lbs. The tunnel cost \$2,700,000. 4000 cars can be hauled through it in one day. It is termed the link that binds two great nations. Over the Tunnel flows the waters of the Great Lakes which tumble over Niagara Falls and eventually reach the Atlantic as a majestic St. Lawrence. The Tunnel engines have ten drivers and weigh nearly 200,000 lbs. The boilers are 74 inches in diameter. The fire boxes are 12-1/2 by 42-1/2 inches. The cylinders are 22 inches in diameter with 28 inch stroke.

Arriving in Port Huron the party was taken on the street cars and given a ride around the city, and then to the ferry landing when after crossing the river we were again in Sarnia, the ballance of the day was spent in sight seeing and promptly at 3 p. m. the "United Empire" sailed out of the harbor on the return trip.

During the voyage going there was scarcely a ripple on the water, but a short time before we started homeward we heard an old sailor say "the thought we would have some rough water before seven o'clock" and when we were pretty well out in the lake a large number of the party, in fact all but about twelve or fifteen were feeding the fishes, one gentleman of our party offered one thousand dollars for four foot square of dry ground and he swore that the D-boat was going around and around, along about midnight the sea quieted down and all awoke in the morning feeling in fine spirits but having no desire to put in another night like the one just passed. We arrived at the Soo Michigan on the 16th and as we disembarked there was a delegation of the press club met us and took the party in carriages to the points of interest in their beautiful city, among them being the fort, the public building and the great water power which has just been completed at an enormous expense, and the power house has over 150 water turbine wheels that will supply all the power necessary to make this beautiful city one of the largest and best. In the evening we were taken to the Canadian side in a ferry boat and there shown the great steel plant where rails are turned out at

the rate of 90 feet every two minutes; this was a great sight for most of us. They took us from where the raw iron went into the furnace to where the rails were laid out to cool and, through the courtesy of the management, every detail was explained so as to make it plain. We were shown a portion of the old canal which the Hudson Bay E. Co. built and operated over 250 years ago. This canal was destroyed by the Americans in 1812 and later the Canadians discovered where it was and a portion of it was excavated and preserved as a relic.

The next stop was at Port Arthur and Fort William where we remained for 23 hours, making us one day late into Duluth. All of the time we had at the last two named places was put in, in a drizzling rain which made it anything but pleasant. Arriving at Duluth at about 10 o'clock on Tuesday the 19th we took dinner at the St. Louis, and promptly at 1:30 took the Duluth & Iron Range railroad, accompanied by Joseph Miller, State railroad and warehouse commissioner, and a delegation of the Commercial Club, of Duluth, and went to Two Harbors where we were met by the Commercial Club, Mayor and Council, of that flourishing city and shown the ore docks, the largest in the world, where the ore from the Iron Range is shipped to the eastern market, where in 1901 there was 5,010,344 gross tons shipped, it was carried in 1,083 cargoes with an average of 4,626 tons to the cargo, the water loading frontage of the dock is over two miles. The gentlemen were banqueted at the Commercial Club, and the ladies entertained at the residence of Mr. Cogswell. The return trip was made to Duluth in the evening and a banquet was tendered the party by the Commercial club in the dining room of the St. Louis hotel where speeches were made by a large number of the Duluth and the editorial party. On Wednesday morning at 8:30 the train was again taken and a trip to Eveleth, the Iron City, was made. After arriving there the party was taken in charge by a delegation of the citizens and shown the mines and the apparatus used in mining which was greatly enjoyed by the whole party. The return trip was made to Duluth in the evening, arriving there at about 7:30. The evening was spent in going where the editors saw fit until 11:10 when the party left for St. Paul and from there to their different homes.

The outing was one of the best the editors ever took for it was a restful one, and the manner in which they were treated by all including the captain and crew of the steamer was royal, and not one thing happened to mar the pleasure of the trip.

Contest Notice.

Department of the Interior, United States Land Office, St. Cloud, Minn., August 1st, 1902.
A sufficient contest affidavit having been filed in this office by John Perry contestant against Charles Irvin entry No. 1960, made December 24th 1892, for S. W. 1/4 of N. E. 1/4 of N. W. 1/4 and S. W. 1/4 of S. W. 1/4 Section 10, Township 51, Range 10, by Charles Irvin Contestee, in which it is alleged that Charles Irvin never built nor improved said claim in any way and never made actual settlement thereon but that he well, abandoned, sold, claim, and said abandonment is not due to his estate but that he or his heirs or assigns or agents touching said allegation, at 10 o'clock a. m. on September 1st, 1902, before Clerk of District Court, of Pine County, at his office at Pine City, Minn., and that final hearing, will be held at 10 o'clock a. m. on September 2nd, 1902, before the Register and Receiver at the United States Land Office in St. Cloud.
The said contestant having a proper affidavit filed August 1, 1902, set forth facts which show that the said claim, if personal, notice of this notice can not be made, it is hereby empowered and directed that said notice be given by due and proper publication.
A. T. YORR, Register.

THE STORY TELLER

POOR OLD DAD.

Ye kin see pick up a paper
"Ah! 'tis 'poor' corner, 'sret,
"Oft' 'tis 'poor' on'y one night,
"But the mother, saintly, sweet
"But ye'll have a little 'sret-thin-
"Eyes will be crackin' 'bout
"Kiss 'till ye're over the hill
"Write about the poor old dad

No, it isn't 'till in 'em-
"Them that write of mother dear,
"That's 'till in 'em, 'till in 'em,
"Of her old man settin' 'near,
"No, 'tis never 'till in 'em,
"But 'tis 'till in 'em,
"Not a blous for pore old dad
"True, our mother watched above us
"Till her dear ole eyes wad ache,
"But ole dad, he turned to 'till in 'em,
"Till his back wad nearly break,
"Mother crouched above the cradle,
"Gave devotion all she had,
"Still, that wadn't any 'sret,
"All this time for pore old dad

Do not take one line from mother
"When ye writ the soul-wad son,
"But if there's a word for father
"Now and then, it won't be wrong,
"Poor ole soul! 'tis 'till in 'em,
"An' I know 'till in 'em,
"If, while ye are praisin' mother,
"Someb'is 'sret for pore old dad
—Cincinnati Commercial-Tribune.

A WOMAN'S GLORY.

BY GERTRUDE DONALDSON.

An important function at the country house was just concluded, a dinner party had been given by its owner, Gen. Calhoun, to introduce his future bride to some of the country families and a few more of his intimate friends who were staying at the house. His engagement had unexpectedly been announced, but Gen. Calhoun had no objection in presenting Debonnaire Sanley as his choice, for she was tall, slender and beautiful, graceful and fascinating, a fiancée of whom he might well be proud.

A married sister had undertaken to act as hostess and chaperon on the occasion, and some of the guests were driving away from under the portico, whilst others were making their way over the lawn to the staircase, having murmured the usual pleasant words of congratulation on the success of the evening to their host before they left.

Gen. Calhoun turned toward his lady love, whom he addressed in low tones.

"I want to speak to you in the library before we say good-night. I have something to show you. If you go on, I will join you there in a minute."

Debonnaire turned toward the door and moved along the passage, glancing over her shoulder to see if her lover were following her as she entered the library.

The French windows were wide open, and the sweet scents of a summer's night filled the air with delicious odors.

Debonnaire crossed the room and stood looking out into the semi-darkness to where mysterious shadows stirred beneath a fine old cedar tree. Suddenly an arm passed round her waist, and with a little sigh of relief she exclaimed:

"Oh, Bertram, how glad I am that's over. It is really a dreadful ordeal for such an inexperienced, quiet individual as I am to have to run the gauntlet of criticism at the hands of all these grand and pompous people whom I met to-night."

"I fear no criticism of you, darling," he said, drawing her close to him and kissing her lightly on the lips. "This has been a proud moment in my life; the proudest will be when I can call you wife. And now let me show you what I have brought you here to see."

He went to a small cabinet and from an inner drawer took out some precious cases which evidently contained jewelry. These he placed upon a table near her, and opening them one by one, displayed the contents.

A blaze of diamonds flashed into her eyes from three splendid sets of tiaras and necklets, which lay upon the satin lining, sparkling and glistening as the light fell upon the stones.

Choose which of these you would like best to wear upon my wedding day. I brought them down from town with me this morning, and the rejected ones must be returned to-morrow. That's why I bothered you to-night, and I'm sure you must be tired."

"How lovely! How good you are to me," she cried.

"Nothing is too good to crown your loveliness, my queen," he answered, taking up one of the coronets and placing it upon her hair.

She had really been called in warty masses behind her head, and the precious stones flashed their brilliance above her white, smooth forehead and her dark, blue eyes.

"I can't imagine what you see to admire in this red wig of mine," she said smiling, while he gazed lovingly at her. "As a child it was always a source of grief to me, for it gave me so many nicknames."

"Glorious hair!" he answered, "I love it. Do you know, Bonnie, I think you are the most beautiful woman I have ever seen."

A vivid flush rose to the girl's cheeks, and she courted low to him.

"I thank you, sir. I don't pretend

I am not pleased to hear a compliment like that from you."

At last the selection of an ornate, ornate movement closed the drawers, looked it, and put the key into his pocket.

Then he blew out the candle, and with a snuffing of the flame and his revolver in the other, went towards the door.

"I've got my pal below there," he said, nodding his head to where the open window was, "and if you make one sound, as sure as your alive he'll put up and strangle you. And with this ominous noise he disappeared.

Debonnaire was in darkness and a prisoner. Who would she be to alarm the house? Should the burglar find his way into Gen. Calhoun's room he might easily be awakened. No doubt the diamonds were lying in their cases close beside him on his dressing table. But her lover would not relinquish them without a struggle, and this man was armed. She knew where Gen. Calhoun's room was, for he had taken her all around the mansion that afternoon, and she remembered that the one she occupied was a short passage from the main corridor and ran far from the back stairs. If only she were free, she thought, she would have the courage to descend by these, make a cautious route on the first floor, returning up the front stairs near the other end of the house.

She tapped at her door with all her might hoping to loosen it and drag it out through the interstice by main force, regardless of the pain it caused her. But her efforts seemed only to tighten the knot, and time was precious.

Could she reach her scissors on the dressing table? It would be a sad sacrifice, but that was the only way. With all her strength she pulled herself forward. Thank heaven, the drawers moved, making but little sound over the thick carpet. One more effort, and she was free, and her fingers touched the table; a last final effort and the scissors were in her hand.

"Glorious hair! I love it!" The thought flashed through her mind as the shears did their work of destruction. Some minutes she sat crouching, standing upright and free once more.

Then she gathered her gown more closely round her. Wily bare feet and noiseless tread, and arms outstretched in front of her, with ears sharpened to catch the slightest sound, she was outside the room, and creeping as quietly as she dared towards the friendly staircase.

That day it was downward, how hollow the empty passages, how every crack resounded upon the boards, and how her limbs shook as she began to ascend one step.

At last the corridor was reached, and there was no glimmer of light nor sound of movement; so far she was safe. The man was in some room, evidently seeking for the treasure. A few yards more and she would reach the door.

As that instant the merest flash illuminated the end of the passage; she was only just in time.

The lights glared the handle; thank God, the door was not locked. With two steps she was beside the bed and was shaking the sleeping man by his shoulder.

"Bertram, Bertram, get up!" she whispered.

"Good Lord, Bonnie, what are you doing here?"

"Hush, hush, it's a burglar, and I have a revolver. For heaven's sake, take 'em!"

Then, having accomplished her mission, from womanly weakness her nerves gave way, she staggered backwards with a little cry, and sank in a heap on the floor.

"A shot fired from Gen. Calhoun's window had awakened the burglar, and he had just discovered. Excited women rushed about inside, whilst enterprising visitors and merchants led by Gen. Calhoun searched the gardens and avenues outside; but the thieves had made off and got clear away with some costly jewels removed from some of the guests' rooms while Debonnaire was struggling to free her tresses from the tolls.

The diamonds, however, were quite safe. A few weeks later they served to crown a radiant bride.

But as Debonnaire stood before a mirror in the drawing-room upon her wedding day she surveyed her shortened curly locks regretfully, sighing as her husband touched them lovingly.

"A woman's glory," they say, "Alas, the pity of it. Mine has gone!"

"The woman is the glory of the man," he answered, "and you are mine forever love."—Chicago Tribune.

She Was Always Contrary.

Men and women are much the same the world over. The peasantry of the south of Russia have an amusing story the moral of which ought to appeal to the husband whose wife one said: "There is only one thing on which my husband and I agree—apples to have his own way and so do I." According to the Russian story, the cantankerous wife of a long-suffering moujik fell into a rapid-rising river and was swept away. On hearing of his loss the agitated husband set off to search for the body of his wife, but was apparently so deranged by the calamity that he started to go upstream instead of down. Some of his neighbors had formed a search party to help him, and they tried to persuade him that the body had been carried the opposite direction he wished to go. "No, no, no," he said, "Marrie was always so contrary when she was alive she must have floated up the river."—Chicago Chronicle.

HORTICULTURE

STORING OF CELERY.

Two Methods Approved by Successful Growers, Described and Illustrated in Detail.

Provision should be early made for the storing of celery. When the crop is about to be gathered it is frequently too late to make suitable provision, with the result that any expedient is adopted at the last moment. We call attention to a number of the most popular methods of storing.

One method that may do for a time is that of banking. The earth is piled quite high around the bases of the plants, and the tops may be covered with straw in the fall.

Another method is to store in trenches. Light frosts are common. If the quantity is small this may prove very serviceable, as the dirt and straw can be removed as the celery is used. It is not so desirable in this condition until the ground freezes, as the celery will then be inaccessible.

Another method of storing celery in trenches is shown in the accompanying figure. A trench is dug to a depth of two feet, and is three feet wide. The bottom is thoroughly loosened, or surface soil is thrown in.

CURRENT TOPICS.

Deston is building three new theaters. Chicago stationmen have recently organized. The Suez canal was begun in 1859 and completed in 1869.

There were 13,000,000 acres of land in New Mexico open to entry. St. Louis is the center of the stick candy trade of the United States.

There is a great demand for skilled laborers of all kinds at Ogden, Utah. Joseph Jacques Tissot, the artist, is instructor of the "Life of Christ," in Detroit.

Northern crops for the present year promise to be the greatest on record. It is proposed to establish a Japanese Monte Carlo on an island in Tokyo Bay.

Two coal mines are now in successful operation in Alaska. They produce good steam coal. A calf with two tongues is the property of Farmer William Sykes, of Harper county, Kan.

There are by careful computation about 300,000,000 coconut palms in the world in full bearing. The prince of Wales, though a sailor by training, is very fond of horses and delights in riding to hounds.

The most expensive and remotest railway station in the world is that of the Peninsular railway at Bombay. The latest returns of the population of Japan, including Formosa and the Pescadores, give a total of 46,444,624.

The total valuation of Canada's mineral production in 1900 reached over \$63,000,000, or \$12 a head of the population. Hard times in Germany are said to have caused a large diminution in the consumption of wine and spirits of all kinds.

There are no less than 3,252 different species of fish inhabiting the waters of America north of the isthmus of Panama. Within the last ten years more new methods have been devised for dealing with consumption than any other human ailment.

Mayor Jones, of Toledo, O., is a somewhat late but most zealous convert to golf. He plays daily and is fast becoming an expert. The total number of frames in Alabama is given at 23,220, of which 129,219 are operated by white farmers and 94,083 by colored farmers.

A white badger, which is almost as great a rarity as a white blackbird, was killed recently by the Axe Valde (English) badger hounds. President Leubet has promised to visit Algeria, which has not seen a chief magistrate since 1865. The visit will probably be paid next Easter.

In Portugal the wife publishes literary works without the husband's consent, the law frees him at once from all his matrimonial obligations. Russian officials are discussing the advisability of following the example of France, and making the sale of tobacco in every form a government monopoly.

By order of the German war office the fortress walls around Mainz are to be pulled down. The ground they occupy, some 465 acres, is to be given to the town. Two classes of the population of St. Petersburg are especially addicted to eating horse meat, the Tartars, because they like it, the students, because it is cheap.

Miss Y. Yone Yamagawa, of Japan, is LL. B. of the University of California and an M. D. of the Affiliated Colleges of San Francisco. She is four feet ten and pretty. The many operating and packing companies of Mississippi, Louisiana and Alabama have combined and will control all the fish and canning business of the three states.

A man occasionally takes a day off to celebrate his anniversary by bringing the woman a present. Here she usually takes a year off—Chicago Daily News. Many a young engine has a big whistle—Kam's Horn.

ABSOLUTE SECURITY. Genuine Carter's Little Liver Pills. Must Bear Signature of Scott's Emulsion. Cure Sick Headache.

MINNESOTA NEWS.

John Krisko, six-year-old son of Mr. and Mrs. Michael Krisko, living at Columbia Heights, near Minneapolis, was accidentally shot and killed on Co. P's rifle range, near his home.

The unfortunate shot was fired by Pvt. W. H. Smith, captain of Co. P of the national guard. The militia squad consisted of nine men, including Capt. Walton. First Lieut. Stele Smith and Corp. Irving Gould. Seven men had shot ten rounds each at the 200-yard target. When the eighth man came up to shoot there were two men in the target pit and seven at the shooting mark.

The eighth man had a new rifle with an ivory sight which he wished to try, and he did try it. Then he handed the rifle to Capt. Walton, with the request that he try it also.

Capt. Walton examined the rifle carefully, but said that he would not shoot at the target, as the rifle was too powerful. Suddenly he averted around to the left, and said: "Look here, I will fire at that newspaper there."

He leveled the rifle to his shoulder, took careful sight, while his six comrades stood back of him watching the mark, and then he fired.

His aim was too true. As soon as the bullet struck a small boy jumped up and they fell back.

It took but an instant for the horrible truth to demonstrate itself to the young soldier. Instead of firing at a newspaper, Capt. Walton had fired at a human target.

Board of Equalization. Governor Van Sant has appointed the following to the state board of equalization. Six are new and three have served before. The appointments are from the old numbered judicial districts as follows:

First District—F. I. Johnson of Leona, succeeding Charles Detcher of Leona. Third—J. G. Lawrence of Wabasha, reappointed.

Fifth—George S. Brainerd of Bloomington, succeeding A. G. Leick of Owatonna. Seventh—C. M. Sprague of Sank Center, reappointed.

Ninth—Thomas Hodgson of Nicollet, succeeding Joseph Diepolder of New Ulm. Eleventh—J. E. Cooley of Duluth, succeeding J. C. Mitchell of Duluth. Thirteenth—Henry M. Palm, Worthington, reappointed.

Fifteenth—M. M. Shook, Aitken, succeeding J. N. Marr Aitken. Seventeenth—Alex Fiddes, Jackson, succeeding C. N. Peterson of Fairmont.

Evening Entertainments. For this year's evening entertainments, the State Fair management has secured a first-class pyrotechnical success, "War in China." This fireworks spectacle is based on recent military operations in China and the siege of Peking by troops of the allied powers. It is Peking's greatest effort, undoubtedly the finest pyrotechnical display ever staged. Besides the fireworks there will be running and chariot races under electric light and a sensational automobile ride by the latest international fame, high wire walking and an extremely sensational combination act by Schreyer, the aerial cyclist. Schreyer rides a wheel about 500 feet inclined at the bottom makes an eighty-foot jump, landing in an immense tank of water, placed opposite the inclined plane. It is the most thrilling specialty act ever seen in the west.

The State Fair opens Sept. 1st and continues until the 15th. Half-fare rates are made on all railroads.

Convicted Persons Arrested. E. A. Fraser, alias E. A. Bryant, formerly a Minneapolis street car conductor, and Edward Brown, were arrested at Brown's home, St. Paul, charged with counterfeiting. Later in the day the men were arraigned in court and were held in \$3,000 bail.

On the present Lincoln was found a complete counterfeiting outfit, consisting of dies, moulds and all the necessary tools for the manufacture of coin. In an attic almost a peck of new nickels and several quarters, half dollars and dollars were found.

Online is Dead. Online, the great pacing stallion owned by M. W. Savage of the International Stock Foot company, died at the company's barn at the Minnehaha driving park of colic.

Online at the time of his death held the 4-year-old stallion pacing record of 2:04. The performance was made at Sioux City, Iowa, Oct. 12, 1894, and stands as the world's record today.

News in Brief. While playing in the railroad yards at Monticello Harry Street was run over and killed. Deputy Marshal J. T. Sheehan went to Foley and arrested Jennie Walbridge on a warrant charging her with forging the name of Mrs. D. Della Lake to a postal money order for \$10, which she cashed at the Foley post office on Jan. 9. She was taken to St. Paul for a hearing.

One of the most pleasant social events of the season was the celebration of the golden wedding of Judge and Mrs. E. A. Mott. About 100 friends participated, many of them having come from other states for the purpose.

THE NEWS IN BRIEF.

For the Week Ending Aug. 29. A five million dollar boom making campaign is planned. Five persons dropped dead of heart disease in Chicago Sunday.

The first national bank to be robbed by burglars of \$250,000 was the First National bank at Aberdeen, S. D., which was robbed by burglars of \$250,000. The burglar was killed and his partner escaped.

The salary of Taylor ordered that all demands of the United States be satisfied. Official checkers stationer show a total deficit of \$1,000,000,000 and 1,000,000 deaths.

The doors of the Elmer (old) bank, a private institution, closed with liabilities of \$100,000. Field Marshal Lord Wolsey reiterated his recent statement that the American army is the best.

Boer generals at Brussels have unanimously selected Gen. Broese as future leader of the Boers. The war department has decided to limit the term of service for officers in the Philippines to three years.

Hughes Torrey, chief civil engineer of the Michigan Central railway, died at a hospital in Detroit, Mich. Grace Julia Wheeler Mayo, each aged 71, were drowned near Kalamazoo, Mich., by the capsizing of a boat.

Gen. O. S. McDowell, of Franklin, Pa., and his 12-year-old daughter Laura were drowned in Clearmont lake. In a race riot at Haverhill, Ind., between 20 negroes and other half a dozen persons were badly injured.

Henry Smith of Milwaukee has been elected to congress by the democrats of the Fifth Wisconsin district. Jacob Smith, one of the best known residents of central Illinois, died at his home in Chicago, Ill., Sunday.

The annual convention of the national fraternal congress, embracing 62 societies and 60,000 members, is in Denver. Lawyer William B. Forrest, of Chicago, was elected to the Illinois bar to prepare a law to stop murder trials by newspapers.

Bryant Schick dreamed his wife was dead and woke up to find she had killed herself and two children with gas. The National Fraternal Congress, composed of 67 orders and representing 6,000,000 persons, met in annual convention at Des Moines, Iowa.

Thomas Jones, a negro charged with the murder of Mrs. William Smith near Seven Springs, N. C., was lynched by a mob. The marriage of Vivian May Sartoris, granddaughter of Gen. Grant, and Frederick Roosevelt Scovel, took place at Cuba, O., Sunday.

The census report shows that 5 per cent of the city population is illiterate as compared with 10 per cent of residents of country districts. The royal German commission has been delegated by Emperor William to come to the United States to discuss topics with Mr. Morgan.

The treasury department report shows that the world has 170 submarine telegraph cables, having a total length of nearly 5,000,000 miles. Figures show that the Sunday attendance of adults at churches of churches is 2,000,000, which is 12.7 per cent of the 15,800,000.

Chas. A. Frank, police judge of Springfield, O., who admitted a shortage of \$3,000, committed suicide at Springfield, Mo., by taking poison. Gen. Frederick Funston, commanding the department of California, has issued an order that all enlisted men must attend regular drills.

Near Emporia, Kan., hundreds of farmers fled from the waters of the Cottonwood river, leaving behind their farms and loaded homes. The joint mobilization of regular troops and militia to take place at Fort Riley, Kan., in September, may be reviewed by President Roosevelt.

Howard, the ten-year-old son of Washington Sharp of Virginia, Ill., while playing with a rifle, accidentally shot and killed Miss Clara Jung, aged 60. Secretary Shaw ordered the dismissal of a clerk who used his connection with the treasury department in advertising a scheme to play the races.

There is a growing demand in Europe for immediate action on the part of the powers, especially the United States, to stop the trouble in Venezuela. The head of the Colombian revolution issued a proclamation urging that the war go on so that the Panama Canal company will not obtain time extensions.

Lauber P. Priestley, alderman from the thirteenth ward, Chicago, has sent in his resignation, because he is elected too many appeals for free transportation. The principal part of Ruskin, Ga., the town which was formerly the home of the Russian commonwealth colony of socialists, has been burned, has been destroyed.

Peter S. Hon, one of the original members of the firm of H. Hon & Co., manufacturers of printing presses in New York City, died in Montclair, N. J., aged 83 years. The first testifying in a railroad case at Manila, declared that former insurgent leaders, apostate, honest and straightforward.

Gen. Samuel L. Casey, aged 81, died in St. Joseph, Mo. He was a member of congress from Kentucky during the war and supported President Lincoln. The College Gazette urged intervention by interested powers in the civil war of Venezuela in the form of a commission to control customs receipts to bondholders.

DAMAGING DISCLOSURE.

The Men's Honor of a Political Candidate for Office to Beat His Opponent. The two candidates for the legislature were... My fellow citizens, said the candidate with the long black mustache, rising to speak in aid of my side...

My fellow citizens, said the candidate with the long black mustache, rising to speak in aid of my side... I will make the by-words that has just addressed you. At a table at the banquet you have a right to know what manner of man he is. Will you be treated at the banquet...

Here the speaker paused to take a drink of water. Then he slowly turned his head, looked over his shoulder at the other candidate with a glance of concentrated scorn, and said: "I have pardoned the ball."

A high pitched laugh, he exclaimed, in a voice of thunder, "I will give him some of the common people! He goes around shaking hands with everybody! Do you know why he does it? I will tell you. He does it to deceive you. Fellow citizens, he is no hard-boiled son of a trol! Those children in the palm of his hands were never popular with me. He never gave a day's work in his life. Those callous are worn in the chief office of the Treasury. Works in the palm of his hands! Let him draw it off, my friends!"

The other candidate couldn't deny it, and it cost him the election. PERSONAL PRACTICES OF THE MAN WHO CAN TELL HIS ABENT HOW TO SUCCEED IN LIFE.

"Ah, poor fellow!" said the magazine editor after a satirical, middle-aged man had whistled out, relates the Chicago Record-Herald. "I'm glad you gave him some thing. If I had a tired you might regard it as an impertinence. I would give him a little change myself. What a poor, broken-down man! He never gave a day's work in his life. Those callous are worn in the chief office of the Treasury. Works in the palm of his hands! Let him draw it off, my friends!"

Oh, I don't quite understand what you're referring to. Why that poor fellow who is here just now. I saw you give him some money. He's the man who tells our department on how to succeed. I give him my money in dollars to make it last through six months. You'll probably see him lying at the bottom of the stairs in my living accommodations when you go out."

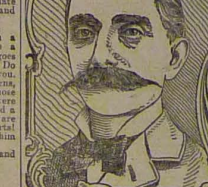

Her Expertise. "Is your typewriter an expert?" "Well, rather," she said, "she has the office in a turn more than half the time." "Why is that an indication of an expert typewriter?" "Oh, I didn't say she was an expert typewriter. She's a capital first-class typewriter."

AN ITALIAN CAPTAIN

Cured by Pe-ru-na of Catarrh of the Stomach After Doctors Failed. The following letter from Congressman Benjin Simpson, Congress, House of Representatives, is a true and reliable testimonial of the curative qualities of Pe-ru-na.

Hon. J. D. Bohn, Congressman from Kansas, writes an interesting letter. Dr. B. B. Hartman, Columbus, O. My Dear Doctor—It gives me pleasure to testify to the curative qualities of your medicine—Pe-ru-na. I have been afflicted more or less for a quarter of a century with catarrh of the stomach and indigestion. A residence in Washington on the increased disease troubles.

CAPTAIN O. BERTOLOTTO. Captain O. Bertolotto of the Italian Brigade "Lincelles," in a recent letter from the chief office of the Italian Brigade Lincelles, Pennsylvania, writes: "I have suffered for several years with chronic catarrh of the stomach. The doctors prescribed for me without my receiving the least benefit. Through one of your pamphlets I began the use of Pe-ru-na, and two bottles have entirely cured me. I recommend Pe-ru-na to all my friends."—O. Bertolotto.

In catarrh of the stomach, as well as catarrh of any part of the body, Pe-ru-na is the remedy. As has been often said, Pe-ru-na will cure catarrh of one part, but will cure catarrh of any other part of the body.

Catarrh is catarrh wherever located, and the remedy that will cure it anywhere will cure it everywhere. Captain O. Bertolotto, President of the Italian Brigade, Columbus, O.

Minneapolis Journal Building.

The Minneapolis Journal Building on the Fair Grounds is the finest and most centrally located of any of the twin city dailies, and is the only Minneapolis newspaper building on the grounds. This year the Journal will not attempt to make any special exhibit, but will use the building for the benefit of its friends, and will endeavor to act for their pleasure in carrying out the following details.

The Journal Building will be placed entirely at the convenience of its friends; its large porches and rooms will afford a convenient resting place; the attendants in charge will endeavor to give any information possible to callers.

Free use of the Twin City telephone to any point reached on the grounds, and for urgent messages, outside.

Will send free urgent telegrams of parties registering at the Journal Building.

Will maintain a postoffice department, so that people visiting the fair can have their mail addressed to them "The Journal Building," State Fair Grounds, and can obtain the same any time during the week of the Fair.

A register, which everyone is requested to sign, keeping names separate, so that any person can easily find out just who is visiting the Fair from his town, and his address while in town.

A file of all the daily and weekly papers in the state, so that visitors can call for their home papers and keep posted on the home news.

A bulletin board, on which will be posted any important news, and also a baseball score book, showing the scores by innings of the American Baseball Association.

A Lost and Found department, where articles lost can be bulletined, and articles found can be left, to be returned to the owner on satisfactory identification.

Display of the original drawings of cartoons by "Bart" and Wing, of the Journal.

Cards of invitation will be distributed to those desiring them, which will entitle them to inspect the Journal plant, and its new \$100,000 press room equipment, showing his battery of three four-deck Goss presses, each one capable of printing and folding 48,000 Journals an hour.

To add to the pleasure and inter-

est of those registering, the Journal will give as a prize to the one guessing the harvest to the total PAID attendees at the Fair a handsome gold watch and chain, valued at \$100, either ladies' or gentlemen's, according to which wins. In case of the guesser, the prize will be awarded to the first one registering the correct number, or the nearest thereto. Registers for Minneapolis and St. Paul will not be kept, so people from these cities cannot compete in guessing contest.

Poisoning the System.

It is through the bowels that the body is cleansed of impurities. Constipation keeps these poisons in the system, causing headache, dizziness and melancholia at first, then unsightly eruptions and finally serious illness unless remedied in a timely way. Dr. Witt's Little Early Risers prevent this trouble by stimulating the liver and promote easy, healthy action of the bowels. These little pills do not act violently but by strengthening the bowels enable them to perform their own work. Never gripe or distress. J. Y. Breckenridge.

Kodol Dyspepsia Cure
Digests what you eat.

Prepared only by E. O. DeWitt & Co., Chicago. The 81c bottle contains 2 1/2 times the 50c strength.
