We represent some of  
the best flouring mills  
in Minnesota and can  
always supply you with  
the very best goods on  
earth at right prices.

We have all kinds of Ground Feed and Coarse Grain.  
Salt of all kinds. Oatmeal, Cornmeal, etc. always on  
hand; and we are cash buyers of all kinds of products  
and Live Stock.

FARMERS' EXCHANGE J. J. Madden, PROP.

### WASHINGTON LETTER.

(From Our Regular Correspondent.)

WASHINGTON, February 23rd, 1903.

After a serious deadlock in the Senate, it is believed that a compromise on the Statehood bill will be effected and will be followed by the ratification of the Panama Canal treaty. The details of the compromise have not been made public but your correspondent is in a position to say that it will be on the bases of the "two state" bill previously proposed with some modifications providing for separate statehood for Arizona and New Mexico when they shall have fulfilled certain prescribed conditions. This arrangement has received the sanction of Senators Quay, Elkins and Gallinger, all of whom are for statehood, and only the attitude of the democratic remains to be ascertained.

† † †

The President has advised various members of the Senate that in the event of either of the treaties failing of ratification he will call an extra session of the Senate. It had been supposed that with the anti-trust program completed and the Alaskan and Panama treaties ratified Mr. Roosevelt would be satisfied but that such is not the case he has stated in unequivocal terms. There is little hope that the Cuban treaty can be ratified before the 4th of March so that an extra session of the Senate is considered almost inevitable but it is believed it will be of short duration.

† † †

The House has been devoting its attention chiefly to appropriation bills and has passed a majority of the regular measures. Leading members say that they could complete all the remaining essential business in a period even more brief than that remaining in this Congress. The Fowler currency bill has been made the regular order and Mr. Fowler tells your correspondent that he believes that it will pass both houses but he is the only representative thus far found who holds that opinion. It is generally believed that the Aldrich bill will become a law and it will in a great measure supply the relief for which the Fowler bill is intended.

† † †

The last Cabinet meeting was participated in by Mr. George B. Cortelyou who has been sworn in as Secretary of Commerce and Labor, his accession adding one more to the lawyers in the Cabinet there now being six lawyers out of nine members. Mr. Cortelyou never practised law but is a graduate of Georgetown Law School, and has received the degree of master of laws. Secretary Cortelyou is now engaged in preparing an estimate of expenses for the new department and it is understood that he will recommend that an appropriation be made at this session of Congress for a building for the accommodation of his department.

† † †

No answer has been received to the cablegram of Attorney General Knox accepting the offer of the Panama Canal Co., subject to the ratification of the treaty which has been signed by representatives of the United States and Colombia. It is known, however, that correspondence by cable has been in progress between the directors of the French company and their legal representatives in Washington and that the former are disposed to reject Mr. Knox's offer unless some definite date be set for the acceptance of the offer. It is alleged that the French company is under constant expense in maintaining the work already performed on the canal and has moreover a force of men engaged on the Isthmus and the directors think the United States should make some provision for reimbursing them for such expense as they may incur after the expiration of the present option. It is also claimed that certain European capitalists are prepared to furnish the funds for com-

pleting the canal if the United States fails to purchase.

† † †

The President and Mrs. Roosevelt are both suffering from ill health although in neither instance it is believed that their indisposition is serious. Mrs. Roosevelt dined at a recent state dinner and was at once ordered by her physician to abstain from further participation in social affairs for a brief period. She has since recovered somewhat and gave a musical last week. The President is suffering from an attack of laryngitis and is under the care of a physician but it is believed that he will soon recover. Unless an extra session of the Senate or of Congress interferes, Mr. Roosevelt, accompanied by Secretary Root, will leave for Colorado about the middle of March for a brief hunting trip. His long anticipated western trip will not be taken until about the first of May.

† † †

A report has reached leading officers of the Marine corps to the effect that Secretary Root is anxious to effect a transfer of the Corps from the Navy to the War Department. This proposition has been considered by the naval general board and both Admiral Dewey and Rear Admiral Taylor have condemned it. These gentlemen hold that the Marine Corps is fast becoming a most important adjunct to the navy, furnishing landing parties on almost instant notice and they do not hesitate to predict that, while the army will in time become a mere police body for the maintenance of order and peace within the limits of the United States and its possessions, the Marine Corps will acquire all the glory growing out of any disturbance on foreign shores.

† † †

On Saturday was laid the cornerstone of the new Army War College at what are known as the Washington Barracks. The corner stone was laid by the President who, notwithstanding his indisposition, insisted in participating in the exercises and the oration of the day was delivered by Secretary Root. The establishment of the War College has long been the aim of leading army officers as it will furnish to those officers in the army, who demonstrate at the special service school an especial proficiency, an opportunity to perfect their military education under the most favorable circumstances. The location is in the City of Washington at the junction of the eastern and western branches of the Potomac River and the new post is destined to become one of the finest in the United States if not in the world.

#### LIST OF PATENTS

Granted to Minnesota inventors this week, reported by C. A. Snow & Co.

R. J. Brothman, Hendrum drill, J. C. Corey, Minneapolis, soap lock; O. M. Aarseth, Echo, mail box; P. J. Grady, Turtle River, draft equalizer; C. P. Jensen, Clark's Grove, pneumatic stacker; A. Pederson, equalizing device for furrow opening disks.

For copy of any of above patents

send ten cents in postage stamps

with date of this paper to C. A.

## WAYS OF LONG AGO.

Last night I dreamed I was awake. Then, waking up, I dreamed. My mind just went without a break. To the right, the road led off, And dipped down beside the root. I saw the willows trail. And the path led where I knew. I saw the tree-trail. And heard the hootay call, and call. And heard the rushing water. In curves below the waterfall. An' heard the robin sing.

And I was just a boy, and walked The ways o' long ago. The country was green and民主 Just like I used to know. And in the orchard loaded down With heavy fruit, I saw the sun And in the cool of sober bower The thrush its matins sang. And heard the birds, the ringing grain In leaf and to and fro. And I was just a boy again. In ways of long ago.

Oh, welcome dreams that take us back To other days, other days! A scene so well-remembered track In pleasant woodland ways! Oh, welcome dreams that take us back To other days, other days! That bring us back the orchard knolls And the sun that warms the eyes. When summer comes to sing. —J. M. Lewis, in Houston Post.

### CHAPTER IV.

#### AT THE MERTONS.

It was a long and wearisome ride. There had been a protracted season of drought, and beyond the city the fields lay scorched and bare, while a white coating of dust covered everything. The dead leaves of the trees, motionless in the sultry air, seemed burnt and lifeless. Overhead hung a blazing sun. As they plodded forward, the horses became unable to move faster than a walk, and the heavy load, clung to our shoulders above them. The very atmosphere was permeated with floating particles, and the distance was blurr'd and vague.

For nine miles the road ascended gradually, past the time following the centre of the abandoned Suamico canal, part of the time in close proximity to the track of the Sunapee and Eastern railway. There was little conversation. Occasionally one of the young men near the driver or the cook would stop to rest, but in a sulky, hopeless fashion, and there was a rare interchange of chaff between these same young men and a lone yoked shouting from a farm-yard by the highway. Once or twice a pugnacious sheep dog rushed out and barked at them, but no one gave heed to the impaled olive.

It was nearing five o'clock when they reached the shabby town of Hintonburg. Very few houses still stood there, the too weak to reward their part in the tiresome journey, and struck into a wider way. Everyone forgot, for instant, the heat and the discomfort, and became animalish in their desire to get rid of the excitement of the moment and rose partly from his seat as the wagon approached a large, white farm-house set midway in a spacious yard. In front were several tall iron-bound trunks, and on the western side stood the house, the hop-sieve with its queer ventilator upon the top, and various other outbuildings. Beyond, there appeared to be a garden and orchard, which directly opposite was a small, simple house. As they entered the yard a robust, smooth-shaven man came out upon the plaza at the side of the house, closely followed by two women. The man, who was in shirt sleeves and wore a ribbonless wide-brimmed hat, was smiling broadly, and his hands upon his hips, and his feet spread wide, and surveyed the wagonload. The women, sisters evidently, slender, kindly faced, and rather short of stature, shaded their eyes and examined the newcomers with curiosity and interest.

"There's Mr. and Mrs. Merton," said Mrs. Beckett to Jim. "That's Mrs. Merton this way; the other's her sister, Mrs. Pardee, who lives with 'em. They're a daughter, but I don't see her."

"All right, Jack?" asked Mr. Merton, descending the porch steps. "Yes, sir right," returned Pardee, leaping from his perch and riding him off.

"Just 'at's had a pretty warm an' dusty ride."

"I guess we'll be all right after this," she answered, "but it's mostly dust."

Mrs. Beckett had been welding a large, loosely jointed fire, energetic and bright, and when it was made they lay traversed, and well-winked in a state of collapse. A little fill of perspiration was making its way down her exalted face just as

front of each ear. There was a ring of heat about both of her eyes, and she was a bit tired.

"I don't know I'd care to go on many more miles like this," she said, "but I guess we'll all be glad to get there."

Some of the young men were anxious to pause for a drink of beer, but the driver informed them that if they did so they would have to follow on, as he could not wait, consequently not quitted the wagon. As they left Bintonville behind the ground began to rise in a long slope, for instead of pursuing their way along the valley in which the town nestled, they turned to the left toward the lofty range of hills. The sun was slowly westerling, and beyond the brooding vale where the winding Oskonemo flowed, on the crown of the first abrupt rise Rosister saw the slanting rays kindling the women and girls disappear in Mrs. Merriam's right-hand man led them along the driveway to the rear of the house, where he struck into a path which traversed a small orchard that was separated by a high picket fence from one much more extensive. At the lower eastern corner of the lessened orchard, and within the shadow of the farm-houses there was a long, rather low one-story building.

"Now that I'm so near," he thought, his eyes still upon the spire and the trees that hid the other college buildings, "I must walk over some Sunday and have a look at the old college chapel." At the sight of the swaying wind-indicator one of his student pranks flashed into his mind, a thing that had dropped from his memory—for years—how in the lazy spring afternoons he had strolled about in deep shadow of his bedroom, and, having lowered the upper hatch, peeped away with his revolver at the veering arrow.

"Here's your sleepin'-quarters," said Jack Pardee, throwing open the door and revealing a double row of six beds, "you'll have to do your washin' up in the barn. I'll show you after you pick your place and stow your traps," and there with left them.

The floor was scrupulously clean; there was mosquito-netting at all of the windows; and there were three lamps with reflectors, for lighting the room. Rosister and the two Be-

ckets secured coats at the farther end of the apartment, and then, having made ready for bed, and their equipment at the barn, went to the large kitchen, which had been cleared for an eating-room, to a plentiful supper.

"Well, what do you think of it?" asked Joe Beckett, as he and Rosister strolled, smoking, down the road in the afternoon, having a good time. "I'll tell you what I think of it. It's a mighty good' un!" the pain do the hops now?" of the prospective pickers inquired. "They ain't goin' to grow any more, be they?"

"It'll cool the air an' keep 'em from moulderin'. I've been mighty scort of 'em for a day or two," an' the driver. "Such a spell of late rains thunder with 'em some times."

Several hop fields had already been passed, and there was now a yard upon either side of the road. Everyone began to regard the vines with a certain interest, and there was a rare interchange of chaff between these same young men and a lone yoked shouting from a farm-yard by the highway. Once or twice a pugnacious sheep dog rushed out and barked at them, but no one gave heed to the impaled olive.

"There's the house!" cried one. "I can see the hop-kiln!" exclaimed another, and in spite of the uncertain motion of the wagon over the stony road several mountaineers, who had been following the vines for the purpose of obtaining a better pickin', stopped to look.

"Yes," Jack Pardee remarked, "we're about there, and I reckon supper'll be ready."

This announcement was hailed with various comments of satisfaction. The jaded teamster, who had been too weary to do more than a nod, was the first to give a hearty cheer, and the others joined in with a shout of "Hooray!"

"I'm real quick on it," said Rosister, with a touch of Joe's enthusiasm.

"Let's see, what do we get?"

"Thirty-five cents a box an' grub!" If you borrowed yourself, you'd probably get 50. They usually have a lot of people who come to the mill for a meal, and when we stand in the doorway, having a good time, the mill field is always means slender appetites.

"I say it's the stillest thing I've ever struck, by long odds."

"I don't fancy we shall find much to complain of, unless it's the hop-picking. What's that like?"

"Oh, that's a hard job, I'm no work about it. All you do is just to strip the vines from the vines, that some chap called a 'pole-puller' brings you an' chuck 'em into your box. You must put many leaves in, though. They don't like that."

"It does sound difficult."

"I think it's well, but I can tell you it's quite a trick to pick so that you can turn out your three boxes a day. They used to allow you to put some leaves in, an' then a fellow could manage four or five, but now it's different. They're damn particular."

"Let's see, what do we get?"

"Oh, that's a hard job, I'm no work about it. All you do is just to strip the vines from the vines, that some chap called a 'pole-puller' brings you an' chuck 'em into your box. You must put many leaves in, though. They don't like that."

## MAKE RELIGION AN UMBRELLA.

Breter's Ready Wit Rebukes  
Who Enter Church to Escape  
a Shower.

When the bishop of Colorado, Dr. Sanford Olmsted, was rector of the Church of St. Asaph, at Bala, Pa., his ready wit made him a favorite with the people of the town and the people of the neighborhood, says the New York Tribune.

The two diminutive gold and riding scabbards at Bala, with grounds that adjoin those of the little church, are well known on a certain Sunday morning. Dr. Olmsted, holding a special service, that a number of gadding clergymen were caught in a drenching shower, and hurried for shelter into the church.

They entered with a great clatter of their gold scabbards, and a general outburst of splashing and hard breathing. Their noise and their gay sporting attire made a jarring note in the quiet church. Dr. Olmsted paid no heed to them till the end of his sermon. Then he said, with a smile:

"We have heard of people who make a cloak of religion. Now we know that there are others who make of religion an umbrella."

### Just In Time.

Broadland, So. Dak., Feb. 2nd.—Beadle county has never been so worked up as during the last few weeks. Every one is talking about it. I read in the "Daily Gray" of Broadland, the particulars of which were best told in the following statement which Mr. Beadle made:

"I was dying. I had given up all hope. I was prostate and as helpless as a little child. I had been ill for many years, and finally turned to Bright's disease. All medicine had failed and I was nearly dead."

"I ordered one box of Dadd's Kidney Pills and this first box helped me out of bed. I continued the treatment till the 1st of April, when I decided to use Dadd's Kidney Pills."

"Everybody expected that Mr. Gray would die, but he did not. He got well again, as little short of a miracle by all who knew how very little he was. Dadd's Kidney Pills are certainly a wonderful remedy."

### One for the Pickpocket.

Where Mr. Isaac H. Hopper, the well known traveler, was lost in the United States had at least one funny experience. She was riding in a car in Chicago, and felt her pocket being pulled. She stopped the car and got out. Presently along came the conductor to collect his fares. When he reached Mrs. Hopper she said, "Wait a minute, my man, turning to the thief, "will pay. He has my purse."—N. Y. Herald.

### Business Chances.

The M. K. & T. Ry. has well established Inter-State Department stores in the selection of sites and locations for industries of all kinds along its lines. Write if you are interested. We will send book, "Business Chances," and other information wanted. Address James Barker, Genl. Pass. Agent, M. K. & T. Ry., 204 Woodward Avenue, St. Louis.

### In the Gallery.

Jimmy—I'd like to have an opdy glass some time.

Tommy—Oh, I dunno! I guess some guy down here. The scope looks better without one, Judge.

"Perhaps," ventured the unsuccessful contributor, "you didn't consider my little old true to life?" "Oh, it was true enough," replied the editor. "I assure you there was more truth than poetry in what you said."—Philadelphia Press.

### An Ideal Woman's Medicine.

So says Mrs. Josie Irwin, of 225 So. College St., Nashville, Tenn., of Lydia E. Pinkham's Vegetable Compound.

Never in history has medicine had the fame or popularity of similar remedies for female diseases equalled that attained by Lydia E. Pinkham's Vegetable Compound, and no doubt the fame of some of the wonderful medicine has the demand for it been so great as it is to-day.

From the Atlantic to the Pacific, and throughout the length and breadth of this great continent come the glad tidings of woman's sufferings relieved by an army thousands strong. Letters from all over the land from grateful women saying that it will and positively does cure the worst forms of female complaints.

Mrs. Josie Irwin invites all women who are puzzled about their health to write her at Lynn, Mass., for advice. Such correspondence is seen by women only, and no charge is made.

Add the stiff beaten whites of three eggs and pour into a ring mold. When time to serve fill the center with chilled and whipped cream.—Hortense Glorie.

### EFFECTIVE HOTBED.

Minnesota Gardener Describes a Heating Plan That Has Proved Quite Satisfaction.

The hotbed that must depend on fermenting manure for its heat is not always satisfactory. Not only is it difficult to regulate the temperature, but the heat sometimes becomes extreme when the plants are ready to be transplanted.

I made an excavation five or six feet on the surface, and about a foot deep. Lengthwise along this space were laid three rows of tiles, one along the center, and one about a foot from each side. The tiles were four inches wide measure, and one foot long. These were placed end to end, so as to close-

the heated hotbed complete.

Ly. and earth was pressed around them so as to hold every piece exactly in place. Then the excavated space filled with rich soil until level with the surface. When the soil was laid, the ends of the tiles were left bare for a few inches. The board frame, 5 by 15 feet, was next put in place, so as to leave six inches of each row of tiles projecting beyond the walls of the frame, as shown in smaller cut.

At the east ends of the bed, a hole was dug three by four feet on surface, a crude fireplace was made of loose brick, and the flue was connected with the three ends of projecting tile.

At the west end of the frame a brick chamber was made into which the three tiles

entered, giving them a common flue outlet. On the top of the chamber was a circular opening through which a six-inch circular hole, into which a single length of stovepipe was fitted. A sliding door was hung over the fireplace cavity to keep out rain; and the earth was raised high enough to prevent surface water from getting to the hole. The pipe was placed through the frame and the glass sash put in place. It took six ashes 29 by 9 inches, to cover the frame, and I happened to have on hand six old storm window sashes of that size. Of course the sashes sloped to the south, so that the smoke from the fireplace could escape freely from the stovepipe. The tiles were covered with soil to a depth of about six inches. With a good fire, I could quickly warm up the earth on the coldest days of spring. And when once well heated the earth and tiles held the heat a long time, and the draft was checked. Unlike beds heated with manure, the heat supply could here be regulated to suit the demand of the prevailing weather.—C. L. Hill, in Farm and Home.

### SOIL FOR POTATOES.

It Should Be Light so That It Will Offer But Slight Resistance to Rapid Growth.

Potatoes may be grown on a variety of soils; but the most important factor in growing them successfully is the selection of tubers for seed.

The selection of the kind of soil best adapted to them. Soil in a pulverized state, so light that it will offer but small resistance to the growth of the tubers, should be used. The ground should be well drained, and the amount of organic matter sufficient to keep it in a state of moisture, which is necessary to the normal growth of the potato.

Plowing under green crops and adding well rotted farm manure will render almost any kind of soil suitable for potato culture.

Soil that is too heavy will not be suited to the potato; as the soil is in a mechanically favorable state to its growth, and has a liberal supply of organic matter, which causes ill cultivation. The potato is a crop of much importance; so that its natural fertility and artificial fertilization will, to a great extent, supply the deficiency of this organic quality, if the soil is in a condition to furnish the plant with a sufficient amount of food.

Soil that is too light will not be suitable for potato culture, as the soil is in a mechanically favorable state to its growth, and has a liberal supply of organic matter, which causes ill cultivation.

Soil that is too light will not be suitable for potato culture, as the soil is in a mechanically favorable state to its growth, and has a liberal supply of organic matter, which causes ill cultivation.

### ORCHARD MANAGEMENT.

Where Dogs and Poultry Are Allowed to Run, Wormy Fruit Will Be Hard to Find.

The subject of spraying, using moth traps and any other means to produce better fruit, is being discussed more and more. There are now over several hundred trees which will soon be bearing. I have been observing and learning everything possible on the subject, and have come to the following conclusion: Spraying intelligently done is the best method to pursue in order to have fruit free from worms, scale, etc. In fact, root, because it is done right it is work and time well spent.

I made an excavation five or six feet on the surface, and about a foot deep. Lengthwise along this space were laid three rows of tiles, one along the center, and one about a foot from each side.

The tiles were four inches wide measure, and one foot long. These were placed end to end, so as to close-

the heated hotbed complete.

Heated hotbed complete.

Ly. and earth was pressed around them so as to hold every piece exactly in place. Then the excavated space filled with rich soil until level with the surface.

When the soil was laid, the ends of the tiles were left bare for a few inches. The board frame, 5 by 15 feet, was next put in place, so as to leave six inches of each row of tiles projecting beyond the walls of the frame, as shown in smaller cut.

At the east ends of the bed, a hole was dug three by four feet on surface, a crude fireplace was made of loose brick, and the flue was connected with the three ends of projecting tile.

At the west end of the frame a brick chamber was made into which the three tiles

entered, giving them a common flue outlet. On the top of the chamber was a circular opening through which a six-inch circular hole, into which a single length of stovepipe was fitted. A sliding door was hung over the fireplace cavity to keep out rain; and the earth was raised high enough to prevent surface water from getting to the hole. The pipe was placed through the frame and the glass sash put in place. It took six ashes 29 by 9 inches, to cover the frame, and I happened to have on hand six old storm window sashes of that size. Of course the sashes sloped to the south, so that the smoke from the fireplace could escape freely from the stovepipe.

The tiles were covered with soil to a depth of about six inches. With a good fire, I could quickly warm up the earth on the coldest days of spring.

And when once well heated the earth and tiles held the heat a long time, and the draft was checked.

Unlike beds heated with manure, the heat supply could here be regulated to suit the demand of the prevailing weather.—C. L. Hill, in Farm and Home.

### COVER FOR SAP PAUL.

The One Here Described, Although Very Simple, Will Be Found Very Effective.

During rainy and stormy weather in sugar season there is always a great deal of trouble from rain in the sap. Some farmers have covers for their buckets which dispense with any de-

ferred, giving them a common flue outlet. The tiles were covered with soil to a depth of about six inches. With a good fire, I could quickly warm up the earth on the coldest days of spring. And when once well heated the earth and tiles held the heat a long time, and the draft was checked.

Unlike beds heated with manure, the heat supply could here be regulated to suit the demand of the prevailing weather.—C. L. Hill, in Farm and Home.

### COVER FOR SAP BUCKET.

which may be suggested. Among the many ways suggested the following is the best: Take a piece of board or shingle about 14 inches long and one-fourth inch thick; round one end out to fit the roundness of the tree. This may be done with a knife or scamp. Cut a hole in the board, one-half inch in diameter, and fasten wire at the end and around the board. Bend the wire so that it will hold tight to the tree. This will afford adequate shelter.

Rating Ginseng for Export.

Ginseng farming is to be tried in India by a company that has just incorporated.

The promoters think there is a great field for business.

The export is now more than 600,000 pounds a year.

The ginseng is raised in China, where it all goes to Chima, where it is a specific for all manner of ills.

It is to the effect that millions of pounds more are raised in India than in China.

The Indian ginseng is raised in a

mechanically favorable state to its growth, and has a liberal supply of organic matter, which causes ill cultivation.

Soil that is too light will not be suitable for potato culture, as the soil is in a mechanically favorable state to its growth, and has a liberal supply of organic matter, which causes ill cultivation.

ED. C GOTTRY, Editor and Prop.

Entered in the Post Office at Pine City as  
Second Class Matter.

PINE CITY, MINN., Feb. 27, 1903.

The Hon. "Gas" Addicks is still  
gassing in Delaware.

SENATOR Quay is the IT of the  
United States Senate.

The Kansas legislature requires  
300 doorkeepers to look after three  
or four doors.

If public sentiment means any-  
thing the trusts had better go slow.  
The people are mighty when aroused.

A Chicago embittered was recently  
asked as to the nature of his busi-  
ness. He replied that he "followed  
the medical profession."

CARRIE Nation says she is a lineal  
descendant of Alexander Campbell,  
Duke of Argyl. The poor duke never  
knew what he missed.

The proportion of homes owned in  
the western states is far greater in  
proportion to population than in  
any other section of the country.

A number of Frenchmen are going  
to South Africa to marry the Boer  
widows and orphans to prevent the  
extinction of the race. How touch-  
ing!

Hillsboro, Tex., ministers have  
decided not to marry people in buggies  
or on horseback. Why not  
have an eye to the "needy" and  
double the fee?

PRESIDENT Roosevelt declares that  
he will call an extra session of con-  
gress unless something is done by the  
present congress in the Cuban  
matter and trust legislation.

COLE Younger seems to be right  
in it since his release from the state.  
The Kansas City World is said to  
have offered him a position on its  
editorial staff at a large salary.

Some of the pension sharks are al-  
ready working the former slaves to  
the tune of a dollar a piece on the  
ground of incensing Congress to  
pass that silly bill of Senator Han-  
na's.

IF THE President would politely  
order Germany to remove its war-  
ships to its own side of the ocean the  
Kaiser might speedily discover some-  
thing to arbitrate—Stevens Point  
(Wis.) Gazette.

THREE Chicago politicians went to  
Milwaukee a few days ago on a jum-  
king expedition after light on the  
municipal question. They were  
promptly clapped in jail by the Mil-  
waukee police on suspicion of being  
crooks.

A MONTANA legislator has intro-  
duced a bill in the general assembly  
fixing a scale of charges to be made  
by physicians. The bill should also  
provide that in case the patient dies  
the money should be returned to him.

A SINGLE locomotive works contin-  
ues to turn out six locomotives daily,  
and yet there are not locomotives  
enough to move all the freight. No  
wonder Americans have come to  
think their country is the greatest  
on earth.

The addition of the Department  
of Commerce and Industry to the  
cabinet is a step in the right direc-  
tion, and the appointment of the  
Hon. George B. Cortelyou to be the  
secretary gives general satisfaction.  
It is to be hoped that in the dis-  
charge of his duties, Mr. Cortelyou  
will be able to do something in the  
way of curbing the power of the  
trusts.

WHILE Congress is making appropri-  
ations for one thing and another,  
the subject of good roads should not  
be overlooked or even recognized  
to the year. Our public highways are  
not in as good condition as the pros-  
perity of the country would warrant.  
Good roads legislation of course  
effectually helps them directly  
more than any other class of prop-  
erty. But then who is more deserving of  
recognition?

THE war cloud in the Balkans may  
prove a good thing for this country,  
if the clouds will only open and let

out a few showers of shot and shell.  
The unspeakable Turk is massing  
240,000 troops on the frontier and is  
preparing for a campaign of exter-  
mination against the christians.  
This campaign is inevitable, and  
once it is genuinely launched all  
Europe will be involved in one way  
or another. And these vast armies  
must all be fed, and the great source  
of supply will be the United States.  
If war must come, let it do so. We  
can feed all—so long as they have  
the money to pay for it. Then when  
their resources are exhausted per-  
haps they will realize the folly of  
war except in cases of the gravest  
character.

### That Rockefeller Telegram.

John D. Rockefeller, the Standard  
Oil magnate, sent a telegram to cer-  
tain senators in Washington de-  
manding that the senate keep its  
hands on the trust question. Here  
is the way his audacious dispatch  
was received by the press of the  
country, irrespective of political af-  
filiations:

The Standard Oil magnate is sur-  
facing from an attack of mon-  
opoly striking in to the brain—New  
Britain (Conn.) Herald.

It is a beautiful illustration of the  
Greek proverb "whom the gods  
would destroy they first made mad."  
—Arkansas City (Kan.) Leader.

Now they say it was Mr. Rocke-  
feller's son who sent the telegram  
opposing the anti-trust bill. Won-  
der if it is the son that preaches?  
Springfield (Mo.) Republican.

Of course, Mr. Rockefeller and  
others of his kidney will try to blind  
the public to the real issue even but  
he has made the mistake of first  
opening the eyes of the public very  
wide, indeed.—Tacoma (Wash.) Leder-

It is a humiliating admission to  
make, but the truth must have forced  
itself upon the minds of the peo-  
ple long ago that when Rockefeller  
tells congress not to do a thing he  
has a way of enforcing his demand.  
—Sugarcanea (O.) Leader.

If the president of the Standard  
Oil Company really wrote or caused  
to be sent the telegrams which bear  
his signature he could hardly have  
done anything that would have been  
better calculated to promote the  
very legislation to which he says he  
is opposed.—Cleveland (O.) Leader.

He exhibited a monstrous folly  
and took the one sure road to assiting  
in the passage of the pending bills.—Cincinnati (O.) Tribune.

The instant efforts to throttle  
anti-trust legislation is the best pos-  
sible argument in favor of such leg-  
islation.—Joliet (Ill.) News.

## News of the Week.

Chips Picked up Around Town and Vicinity.

### NOTICE

Hereafter all matter for publication and copy for advertisement must reach this office by Thursday morning.

Buy your flour and feed at the flour mill and get the best goods at the lowest prices.

Some bargains on that 10-cent counter in dishes and glassware at the Drug Store.

A. J. Remondino, of Galesville, Wis., spent Sunday with Mr. and Mrs. J. B. Kirch. Mr. Remondino being a brother of Mrs. Kirch. We acknowledge a pleasant call on Monday forenoon.

Waited by a middle aged lady, a place with a farmer with a small family, not later than April 1st. For particulars call at this office.

P. S. Murray came down on Thursday to spend a couple of days with his family.

For Sale—A 60-acre farm 5 miles southeast of Pine City on the Government road, one-half mile from the Swedish Lutheran church and school house. For particulars, apply at this office or at Chas. Lundblad, on the Government road.

Get pure buck wheat flour at Madden's.

Albert Hartley has purchased the household furniture of H. E. Smith, night agent at the depot at this place. We understand that Mr. Smith intends to go to North Branch to take charge of the station at that place. Here's success H. E.

Buy an Iowa Dairy Cream Separator. It will facilitate your labors.

Aesculapins is the best medicine the world has ever known for headaches, at J. Y. Breckenridge's Drug Store.

Mrs. Whitmore, nee Pangerl, departed on Thursday for Hibbing where she goes to meet her husband who is in business at that place.

For Rent—I have for rent two cottages. Inquire of Mrs. Breckenridge.

E. Falk, who runs a meat market at Eveleth, came down the latter part of last week and spent Sunday with his family in this place. While here he made arrangements to move his family up on the iron range who expect to go in about two weeks. We are sorry to lose Mr. Falk and family but wish them success no matter where they may go.

Well, well, that Golden Link flour still sells. Madden.

J. Y. Breckenridge informs us that on his last trip to St. Paul he met representatives of soda fountains from Chicago, and bought a fine new soda fountain to install in the Drug store April 1st. It is a 20th Century sanitary fountain, solid Onyx body, large mirror, electric light fixtures, new ice cream cabinet and working counter. All the very latest, which will improve the store and service and enable them to serve the very best of drinks.

Lower—a saddle blanket, between this village and Beuron. Finder please leave at livery barn and receive reward.

If you want to see a hot game of ten pins don't fail to see the Rush City firemen and the locals at Radley alley on next Wednesday evening, March 4th.

Reserved seat tickets are on sale at A. W. Piper's furniture store for the entertainment to be given by the Columbia Concert Co. at the M. E. church next Tuesday evening.

Pimples faded complexion, chapped skin, red rough hands, eczema, tetter, bad blood, cured in a short time, with Rocky Mountain Tea, the great complexion restorer. J. Y. Breckenridge.

Daniel Bell, of Stillwater, came up this place on Monday, and drove home to Grantsburg. Mr. Bell had not been to this place for twenty years and said he was surprised to see such a substantial place, all built up of such substantial material as it was hard for him to believe that Pine City would be anything more than a lumber town and that as soon as lumbering died so would Pine City; this was the idea when Mr. Bell made these parts his home. He informed the reporter that he helped to build the Pioneer House in this place and also the Conger House at Mora. Mr. Bell is now a man 63 years old but hale and hearty as a most men at half that age.

## Dr. E. L. Irving, Dentist,

will be at his office in the Rybak Block, May 3-1 to 10th. Gas administered for the extraction of teeth.

Madden will open up for this season the largest and best line of seeds ever shown in this country.

Read, the glass blower, was located in the Miller building for a couple of days of the fore part of the week. He did some very nice work and it was both instructive and entertaining to listen to him talk. He did not do as well here as he had hoped to do, but just at this time when there is so much going on that it surprised us to think he did as well he did.

Baby sleeps and grows while mamma rests at Rocky Mountain tea is given. It's the greatest baby medicine ever offered loving mothers. 25¢ J. Y. Breckenridge.

The Spinster's Return, given by the Woman's Reading club on Tues day evening, was a decided success both socially and financially. Space will not permit us to go into detail, but it was fine and each one did the part assigned to them in a manner that would make professionals green with envy.

Lenten fish at the Big Store.

Seed corn enough to supply this country at Madden's, and at right prices.

The Rush City firemen's bowling team will meet a team of the local fire department on Wednesday evening of next week on the Radley alleys.

You can get your Patent Medicines as cheap at "The Drug Store," Breckenridge's Pharmacy as any place in the state. Special Prices on all 100, 50 and 25c preparations. The right place to buy your drugs and medicines, and save money, is at the Drug Store.

Rob Harte departs the first of next week to take a course in the Hess Business college at St. Paul.

You get that nice clean, flaky salt at Madden's. Always clean.

All members of Pokagonia Lodge, K. of P. are requested to be present next Wednesday evening as there is work to be done in the first degree and a full attendance is requested.

Ryan's farm for sale at a bargain, description W1 SW1 Sec. 31, T. 39 R. 20. For terms apply to T. E. Ryan, 1027 Wash. Ave. South, Minneapolis, Minnesota.

Buy your fish for Lent at the Big Store. All the finest kind.

A regular meeting of Riverine Circles, Ladies of the Grand Army of the Republic, will be held at K. of P. hall, Tuesday March 3rd at 2 o'clock sharp; last meeting b-for the Convention and a full attendance is desired.

Polaca Guerina—Ole Theobaldi Roll of Drum with imitation of a wild Brass Band. Complete accompaniment for the Violin. Violin phantom played with overwhelming success by Ole Bull in the years 1860-70.

Three Imported Short-horn Bulls For Sale, can be seen at my farm at Rock Creek. F. Noble.

Pretty Spring goods arriving every day at the Big Store.

S. SHEAKER, Sec.

Watch for Madden's seed exhibit.

Don't fail to hear the colored trumpet at the M. E. church next Tuesday.

You can get all kinds of feed at Madden's.

See the program for the concert this evening, in this issue. Cut it out and take it to the hall with you as it will be the program of the evening. Remember to be on time as no one will be allowed to enter or leave the room during the time any of the numbers are being rendered.

So if you do not want to miss some of the concert be on hand early. The concert will begin at eight o'clock.

School Notes.

Lillian J. Perkins was absent from school Tuesday afternoon.

The pupils who are going to enter the debating contest are preparing their debates.

The Latin class began to read Vivi Roman, Tuesday.

(The Literary society will render the following program Friday afternoon:

Recitation ..... Miss Wyman

Essay ..... James Hurley

Debate ..... Anna Dosey, Lizzie Pangerl, negative.

Alice Davis, Oleg Hoffman,

Reading ..... Michael Voigt

Recitation ..... Carrie Hunt

Essay ..... Emma Axtell

Paper ..... Jenius Swedenborg

## SEEDS.

We have a full line of seeds of every kind and our prices are low. Ask for a Free Catalogue.

## PRATT'S STOCK FOOD.

The original and best stock and poultry food on the market. Ask for one of our FREE DOCTOR BOOKS for treating all diseases of Farm Animals and Poultry.

## GROUND OIL SEED,

### FISH Seed Meal,

### Crushed Oyster Shells,

### Chicken Feed of all kinds,

### Feed and Corn,

### Bran and Shorts,

### FLOUR - Wheat or Rye,

In fact everything in our line.

Call and see us. - Rybak Block.

PINE CITY MILL & ELEVATOR CO.

## GRAND CONCERT TONIGHT.

## MANY PERSONS PERISHED

Flames Destroy a Flimsily-Built Hotel at Cedar Rapids, Ia., Early in the Morning.

### GUESTS AWAKE TO FIND ESCAPE CUT OFF

Many Seek Safety by Jumping from Windows, and Forty-Two Are Thus Injured—Four Dead Bodies Recovered—Five Are Still in the Ruins.

Cedar Rapids, Ia., Feb. 21.—The fire which early Friday morning destroyed the Clifton hotel, cremated many of the guests and caused injuries to the persons who were awoke or forced to jump from the windows. The fire would be on the 15th of March.

#### PRESENTS RESIGNATION.

**Justice Shiras, of Supreme Court, Retires, and Judge Day Will Be His Successor.**

Washington, Feb. 19.—Justice Shiras, of the United States supreme court, presented to the president yesterday his resignation as a member of the

district convention of the Knights of Pythias, which had registered a defeat, thus making it difficult to ascertain the number of missing persons. Forty men have been working in the rubbish all day, and will continue to dig for the remains of the burned persons. The loss is \$60,000.

#### The Victims.

The dead are: E. G. Mowery, of Waukesha; Mrs. E. G. Young, of Minneapolis; two unidentified men, bodies recovered; five bodies still in debris.

The fatally injured: Vina Burns, whose wrists were seared from third story; L. C. Burhart, Nebraska City, Neb., badly burned.

The seriously injured: Sinda Williams, waitress, face badly burned, leg injured; Lizzie Kelly, waitress, burned; F. C. Outting, Center Point, left arm split; Mrs. Anna Smith, waitress; H. W. Bremer, Lynn, Ia.; F. R. Moore, Chicago; Berice Netolicky, Shueyville, Ia.; J. W. Winniger, Waterloo, Ia., face burned and wrist sprained; J. E. Anderson, Chicago, back sprained; A. S. Farrow, Hobson, Ia.; F. G. Gandy, Cedar Rapids; F. Taylor, Davenport, Ia., head injured and elbow fractured, leg injured and burned about body; Louis Thompson, Cedar Rapids, badly burned; A. M. Larson, Ia., face injured and lungs hurt; C. W. Blane, Cedar Rapids; L. O. Vernon, Delta, Ia., cut on side injured; May Red, Waterloo, Ia., badly burned; M. P. Hoover, Tama, Ia.; T. J. Zally, Canton, Ill.; J. A. Flear, Davenport; Benedict, body burned; G. P. Hayes, Davenport; G. E. Redmond, mail clerk, Tama, Ia.; N. O. Templeton, Monticello, Ia.; George George, St. Paul, hands and face burned; James Lewis, colored porter; F. M. Gardner, Woodburn, Ia.; D. S. Taylor, Davenport; J. B. Dunbar, Monticello; John W. L. Johnson, Cedar Rapids; Dr. S. C. Grove, Cedar Rapids, terribly burned while hanging to fire escape, probably fatal; P. E. Strickland, Clinton, Ia., jumped from third story window, leg broken and injured internally, probably fatal; Clara Williams, waitress, badly burned; H. H. Hause, C. Leroy, Minn., limbs badly burned; C. M. Connelly, Aurora, Ia., hands and feet burned; O. J. Lamb, Center Point, Ia., seriously burned; G. F. Kaezer, Waller, Ia., face and hands burned; C. A. Hosman, Independence, Ia., legs and arms sprained by jumping from top floor, struck wires and landed in a snow bank; F. A. Chase, hands injured.

#### Victims Forced to Jump.

The victims were literally driven by the flames to jump. Nearly every one of them lingered to the last moment, urged by the people helping to wait as long as possible in the hope of assistance. Then a cry would tell that the fire had reached them, or the smoke made it impossible to breathe, and one after another jumped, shouting and some, more fortunate, to the roof of buildings adjoining. In a short space of time the street was filled with men and women bruised, battered, broken-limbed and half crazed. All were in their night garments.

#### Hotel Firetrap.

The hotel, a three-story brick veneer structure, is said to have been a veritable firetrap. The flames started in a pile of rubbish in the basement, presumably ignited by defective electric light wires.

#### Starred to Death.

Lincoln, Neb., Feb. 20.—Charles E. Waite, custodian of the courthouses, died here Thursday, aged 52 years. He had eaten nothing for 23 days. In December he fell from the balcony of the courthouses, sustaining injuries about the head, and since then he has refused to eat.

#### Tillman Refused Bail.

Columbia, S. C., Feb. 20.—Former Lt. Gov. Tillman was Thursday afternoon refused bail at the conclusion of the hearing of his application for release on bond. Mr. Tillman is held on the charge of murdering Editor Gonzales.

#### Hits Enterprise.

Washington, Feb. 24.—The express court of the United States has decided that congress has the power to prohibit the sending of lottery tickets from one state to another by other means than the United States mails.

#### Justice Shiras Retires.

Washington, Feb. 24.—In accordance with the terms of his letter of resignation of Justice Shiras yesterday resigned from his office as an associate justice of the United States supreme court.

## REFUSES GERMANY'S DEMAND.

Minister Bowen Declines Request for Immediate Payment of £5,500 by Venezuela.

## SCHOOL CHILDREN KILLED.

Ten Lose Their Lives in a Trolley Car Accident at a Crossing in New Jersey.

### NEARLY ALL OF VICTIMS WERE GIRLS.

**Car Was Struck by an Engine of an Express Train—Over Sixty Students in the Train Whom Will Die—Trucks Prevented the Motor from Stopping.**

Newark, N. J., Feb. 20.—Ten pupils of the Clifton high school, eight of them girls, were apparently killed yesterday in a trolley car accident struck by a Delaware, Lackawanna & Western express train at the Clifton crossing in this city. Nearly a score of others were injured, and of these five were killed, whose bodies lay ground under the wheels of the locomotive and scattered along the track for a great distance.

It was a grade crossing, largely due to weather conditions and the natural conformation of the locality. From the south came the trolley car on a down grade that culminated in the railroad track. From the west came the

## CORNER STONE LAID.
