A FORFEIT GAME.

Branch Players Refuse to Continue Playing and Forfeit to Locals.

Last Game of Season Wrought With Wrangling Galore. A Continual Round of Rag Chewing and Discontent on the Part of the North Branch Players in Sunday's Game. Tommy Nason, of Rutledge, Decides in Favor of Pine City After Everything Had Been Done to Get the Visitors Back Into the Game. Ending 9 to 0.

A case of pure and unadulterated baby play is what was dished up to fans of Pine City and other localities last Sunday afternoon after they had paid their good hard cash and had been provided with seats on the shady side of a bunch of damp-clouds. It had been reported previous to the game that North Branch would be a hard ticket to combat against on account of their wrangling ability and their tendency to do the coracle act, and the game had been going but a very short time before this was only too plainly seen and heard. It was kick, kick and kick, and some more kick. If the "umps" did not favor their pettish views they would at once rush for their bench, and have to be humored into returning to their respective positions. This does not mean that all of the players made the grand rush, but the majority.

They seemed to be particularly aggressive to Robt. Wilcox, who had been requested to umpire. If a ball went into the plate and Wilcox called a ball on one of the Pine City players, it would mean a warty disperse of a minute or two, and these little things intermingled with the worst kind of soldiering and off-hand playing, dragged the game along so that it would have been impossible to finish a nine inning game within their time limit which was 4:15.

Wilcox's work as umpire would have been entirely satisfactory to any other but a lot of infants who try to win games by the "beef route." The climax of this rancid storming came in the second inning when Smith hit a fly out to left field directly back of short stop. Jack Lambert, who covers that territory like a veteran, made an elegant sprunt and scooped the ball in just as it was about to hit the ground. Wilcox naturally called Smith out, and here is where Herrell's followers showed their disgustingly aggressive spirit. They made several threats to quit the game, go right home, never come back, and none of these awful threats could be dispelled until they had received their little hearts desire, that is, a new umpire.

Big "Jack" Nason was on the grounds and it was agreeable to both teams that he be put in as supreme exponent of balls and strikes, likewise all other plays. This almost dangerous undertaking he very reluctantly accepted.

The claim made by the North Branch players, after what they said was a base ball game, was that they had defeated their old time opponent, Pine City, by a score of 6 to 3. This, however, was not so as is shown in the following paragraph.

In the last of the eighth inning with the score standing 6 to 3 in favor of the hostelry (youngsters?) from below, Pine City went to bat with Corbett up first. He hit safe and stoles second, Ben Hurley next showed an easy one along the first base line which was fumbled by Smith, and Hurley landed safe. As the Branchites up to this time had been having it all their own way in the decisions they thought they could work a little play, whereby they would be sure of the game, so with Corbett on third base and Hurley on second, Cook started to walk off the diamond followed by his team mates and is royal "tighness, the ump, who wanted to see what the next step of these unruly (spoiled) boys) would be. They pleaded that it was raining too hard to continue

playing. Umpire Nason decided that they play out the inning, and while the two teams were having a regular "Old Maids' Convention" both Corbett and Hurley made the grand circuit and scored, making the standing 6 to 3. Nason never called the game and hasn't to this day, but did decide the game in favor of Pine City on account of the North Branch players' refusal to continue the game after two men were on bases and because our boys had an opportunity to tie or perhaps win out if said play had continued.

If the team, claiming to be from North Branch, cannot come to Pine City and meet in friendly combat with a lot of good whole-souled players such as we have, without making a talking match out of it, we would recommend them to remain at home long enough to receive a few points on good behavior.

The following is the way the score stood before the game was decided 9 to 0 in favor of Pine City:

THE FAIR.

In last week's issue we stated that we would give further details of the exhibits at the fair, but we are at sea as much now as at that time, for there are at the present time a number of the premiums that have not been paid and until they are, we cannot give a complete list of those who secured prizes. If you took a premium call on D. Greeley who will give you an order for the amount which will be paid by the treasurer, Otto Kowalke.

Friday was devoted to horse racing. There were five entries in the running race. S. D. Wells carried off first prize, Dr. Wiseman, second, and Jas. Connaquer, third. In the trotting race but two entries were made, which were Jas. Carroon's black stallion, Donabar, and L. H. McKusick's bay mare, Jasper. The latter won the race in 3:10, the best time ever made on the track at this place. Quite a large crowd was in attendance at the fair on the second day and just about the time the races were over, rain commenced to fall and continued until—well, it only stopped on Tuesday.

Saturday there was not much of anything doing, except the awarding of premiums and the removal of the different exhibits. A larger attendance even than was expected on account of the bad weather, viewed the different attractions with great interest. The stock display never was better and the exhibition showed that each year the farmers were improving the grade of their stock.

The fair will be under new management within another year and everybody can expect to see a record breaker for 1904. During the past three years the fair association has been tied up, hand and foot, with a debt on the grounds, and this year they will nearly clear themselves from this drawback. The organization will be reestablished, and new shares sold. Some of the stockholders are giving shares to new settlers, so as to get them interested in the fair, and at an early date there will be a meeting called and the affairs of the association put on a good sound business foundation and hereafter one of the best fairs in the northwest can be looked for at Pine City. The grounds will be fixed up and there will be no need of complaint by the exhibitors as to the condition of the sheds and buildings. All those who want a good fair should come in on the date set for the annual meeting and take shares provided they have none and learn just how we stand. The helping hand will receive the benefit.

TURKS KEEP UP THE SLAUGHTER

Bulgarian Reports Tell of Another Wholesale Massacre.

SIXTY THOUSAND MORE SLAIN

Indications Point to Mobilization of Bulgarian Army - Latest Solution of Trouble Cannot Long Be Delayed.

Sofia, Sept. 14.—Courier dispatches received here by the Antomonye say the Bulgarians, acting under direct orders from the sultan, have engaged in a general massacre of Bulgarians in the districts of Okrida and Resen. One report says that 60,000 persons have been slaughtered in the district of Leren alone, which is purely Bulgarian. Other reports affirm that the sultan has ordered the Christian quarters in three towns, Florina, Okrida and Resen. According to information brought by a courier to the revolutionary paper Antomonye, a force of Albanians, assisted by Turkish regular forces acting under orders direct from the Yildiz Kiosk, massacred the entire Bulgarian Christian population of the districts of Leren districts. Fearful descriptions are given of the sights seen there, the soldiers slaughtering men, women and children in every direction, and leaving a barbarian never before witnessed.

Official circles are so far without information regarding the reported massacre, but in view of the character of the latest advices from Macedonia, it is feared the news is only too true. If so, no doubt exists that the government will be forced to order the mobilization of the army at once. Rumors are current that at a council of the ministers to-day it was decided to mobilize immediately the first and second army divisions. This is officially denied, but well-informed persons do not doubt that the cabinet, which is meeting in council daily, is seriously considering such a measure. A deputation of leading professors and representatives of the professional classes waited upon the ministers and urged the government to order immediate mobilization. Premier Petroff replied to the delegation that the ministry was unable to admit the necessity for such a step at the present moment.

The Turkish government is believed to have at the present moment no less than 60,000 soldiers in the district of Adrianople, large bodies of them within 10 to 15 kilometers of the Bulgarian frontier. Confronted with such a situation it is argued that the government is amply justified in mobilizing the first and second army divisions, the headquarters of which are at Sofia and Philippopolis, and in sending Christian forces nearest the Turkish frontier. The government seems to be firmly resolved to avoid giving Turkey the slightest pretext for declaring hostilities, and is doing its utmost to restrain the war fever. The situation, however, is rapidly becoming more serious and popular excitement is increasing. Telegrams from Burgas say the Bulgarian population is fast disappearing from the district of Lozengrad, and that everyone unable to escape to the Bulgarian frontier is killed. Five hundred fugitives have arrived at Burgas from Tolosana.

Canon Long Be Delayed.

London, Sept. 14.—Rumor from Vienna and elsewhere is very busy regarding the Balkan crisis, and it is impossible to confirm the more sensational statements there is accumulation of evidence that some violent solution cannot long be delayed.

A dispatch from Constantinople to the Standard says large forces are being collected to the north and west of Constantinople, where, in the event of war, the first fighting is expected to occur.

Will Not Send Warships.

Constantinople, Sept. 14.—Calm continues at Beirut, but trade is at a standstill. Reshid Pasha, the dismissed viceroy, left Beirut Saturday for Constantinople. The other powers have now abandoned their intention of sending warships to Beirut. The Christian refugees camped in the mountain refuse to return to Beirut in spite of the promise of the authorities to protect them.

Damage by a Tornado.

Guthrie, Okla., Sept. 14.—A tornado struck the vicinity of Bloomington, Okla., destroyed the houses of Mrs. Sarah Carter, was destroyed, the son and her eldest daughter being injured. Two children were blown across a bar-wire fence into a pasture. Buildings on the farm were destroyed, and a horse and William Herndon were also destroyed. A severe hail storm followed the tornado and did great damage to crops.

Assassinated.

Opotona, La., Sept. 14.—Dr. A. H. Harrison shot and killed Charles McCall Sunday morning, using a Winchester rifle. McCall was passing on the street when the fatal shot was fired. He being unarmed, Dr. Harrison returned to the place where he shot McCall. McCall is the author of several anonymous letters attacking the reputation of members of his family. McCall was given a post-mortem and was pronounced to be Dr. Harrison.

Struck by Lightning.

Winfield, Ill., Sept. 14.—The top of the massive tower at the front of the Winfield mansion was struck by lightning at about 4:30 o'clock Sunday afternoon. The tower was struck by lightning, and a terrific one was seen to fall from the tower.

CONGRESS TO MEET NOV. 9

Date of Opening of the Special Session Is Announced.

Suggestion That It Be Held in October Is Abandoned—Will Discuss Financial Legislation.

October Day, N. Y., Sept. 14.—The extraordinary session of congress which will be called for the enactment of legislation making operative the Cuban reciprocity treaty will be convened on Monday, November 9. That is learned on good authority. The president, it is said, has abandoned the idea which was suggested several weeks ago of calling a special session early in October. It is not expected that the formal call for the session will be issued until after the president has returned to Washington.

Notwithstanding the fact that the suggestion of an October session of congress came from prominent senators who warmly advocated the Cuban proposition was not received with favor by members of congress generally. The idea of a session in October was opposed particularly by the majority of senators and representatives to leave their states and districts in the midst of a campaign which to many of them and to their party was of vital importance. Indeed, it is not certain that an agreement has been reached as to the character of the financial legislation which may be enacted at the approaching session of congress. It is not certain that an agreement can be reached between the two branches of congress whereby any special legislation can be enacted. It may be that a solution of the problem, which is alike complex and perplexing, will be reached before the convening of the extraordinary session, but even that is by no means assured.

DIE ON THE OLYMPIA.

Explosion Kills Corporal and Seaman and Master at Arms Is Missing.

Norfolk, Va., Sept. 14.—The explosion of a barrel of alcohol on the superstructure deck of the cruiser Olympia, in dry dock at the Norfolk navy yard, killed two men, severely injured several others and set fire to the ship. The master at arms of the vessel is missing. The dead are Corporal Yates, United States marine corps, and Seaman White. The damage by fire was confined to the deck of the vessel and involved only the canvas awnings and their fixtures. The decks, however, were seriously injured, and immediately after the explosion fire breakers were sounded and the crew, navy yard fire department and a detachment of the 1st Cavalry, Capt. Boots soon put out the flames.

The explosion, according to reports from eye-witnesses, followed the theft of a barrel of alcohol containing several gallons by a party of sailors. This barrel, it is said, was taken from one of the storerooms of the yard and removed to the deck near the superstructure. The explosion, detected by the officers and summoned the ship's master at arms. A search of the storerooms revealed the barrel, which was taken aboard the Olympia and placed on the hurricane deck. With the exception of some small quantities, which had been consumed, it was intact. Yerkies and the unknown sailor went to the barrel and one of them struck a match. An explosion instantly occurred and both men were enveloped in the flaming liquid. They perished before a hand could be raised to save them.

Diastrophic Fire.

San Francisco, Sept. 14.—A fire which started at the corner of Broadway and a section of the Southern Pacific railway's freight warehouse on Townsend street and burned a score of freight cars. The cause of the fire is a mystery and the firemen are unable to explain the rapidly with which it spread. James McConchie, the night watchman, was fired at the building and had a narrow escape.

To Investigate Lynching.

St. Louis, Sept. 14.—The September grand jury will be empaneled in Belleville, Ill., to-day and will make a thorough investigation of the lynching of the negro school teacher, David S. Wyatt, on June 8. Wyatt, who shot a school doctor, but did not kill him, was trampled on the public square by a mob.

Thousands Die of Yellow Fever.

El Paso, Tex., Sept. 14.—News has just reached here of an epidemic of yellow fever in Linares, Mexico. It is reported that one-fourth of the population has died, and that 5,000 are lying in bed. At Bawer, Monterey, and Linares a shotgun quarantine prevails. The people are panic stricken.

Acid Men Killed.

Springfield, O., Sept. 14.—Jacob Curtis and John Toan, two aged residents of this city, while on their way home from the country, were struck and instantly killed by the crossing of a freight train on the Pennsylvania railway by a freight engine Sunday night.

Is Not True.

Belgrade, Sept. 14.—The report that King Peter had sent a message to the sultan to beg him to reconsider his attitude toward the Serbian officers, which the king regarded as purely the basis of a new revolt in the army, is officially denied.

Clashed Mount Washington.

Mount Washington, N. H., Sept. 14.—A severe storm of rain, wind, and snow, which was the first since Sunday, was the first since Sunday. The snow was the first since Sunday. The snow was the first since Sunday.

ADULTS ANOTHER MAN

Oldfield's Big Machine Finds Second Victim Within a Week.

DISASTER AT MILWAUKEE FAIR

Frank Day, a Chauffeur, Loses Control of the "Red Devil," and Meets Death While Trying for a Five-Mile Record.

Milwaukee, Sept. 14.—Frank Day, the chauffeur on Barney Oldfield's auto, "Red Devil," was killed at the state fair park while trying for a five-mile record Saturday afternoon. Day was a machinist, and took the place of Edward Huff, who would not ride on the truck on account of the turn which caused Day's death. Day was on his fourth mile, and was rounding the north end of the track. The turn coming into the home stretch is rather sharp, and the track at that place was said to be soft, which allows the machines to slew too much. It was the discovery of this which prevented Huff from riding. As Day swung into the home stretch it was seen something was the matter. Instead of keeping close to the fence, as before, he went farther out. Before a remark could be made, a plunger, strike its nose on the ground, and amid groans of horror sprang high in the air, turned over end, and came down on the nose of the car, grinding him into the ground, an unrecognizable mass. The machine then turned over again, and fell on its side. Women screamed and fainted and men sank down nerveless. Before the machine had stopped there was a rush for the machine, and it died within 15 minutes, never regaining consciousness. He lived in Columbus, O., and was the son of James B. Day, insurance company.

This is the second man the "Red Devil" has killed within a week. The first was a Detroit race man, who lost his life and Oldfield was sent to the hospital.

Placed Into the Canal.

Syracuse, N. Y., Sept. 14.—A 20-horse power automobile owned by Dr. John Grant Lyman, a wealthy clubman of New York, while running at the rate of 15 miles an hour, went through an open bridge into the Erie canal this Sunday. With Mr. Lyman at the time of the accident were Arnold W. Brand and W. F. Nyland, also well known in metropolitan club circles, and the chauffeur. Mr. Brand jumped and landed on the ground, fracturing his leg. At the moment when the car struck the bridge it was bound into the canal. The other members of the party went into the water with the machine, but quickly swam to the shore unharmed. Mr. Brand's injured leg prevented him from swimming and he was rescued by his friends.

TOWN IS RAIDED.

Robbers Hold Up Residents of Valley Springs, 41 Bank Looted of \$10,000.

Sloux Falls, S. D., Sept. 14.—Valley Springs, 13 miles east of Sloux Falls, was the scene of a regular Jesse James raid between two and three o'clock Saturday night. Residents of the town were aroused by a series of nine explosions. When they appeared on the street to ascertain the cause they discovered that the place was picketed by seven or eight armed men, who drove them from their homes on pain of instant death if they attempted to interfere with the robbers. The Minneapolis county bank was the object of attack by the desperados, who stole the safe and carried off \$10,000 in cash. The vault was not molested. During the raid one of the pickets fired at a citizen, but owing to a shortage of firearms the residents were compelled to keep in the background until the robbers had completed their work and left town.

STORM LOSS IS HEAVY.

Wind, Rain and Snow Cause Damage Over Wide Area of Northwest.

Minneapolis, Sept. 14.—One of the heaviest storms in years prevailed over a wide area of the northwest and a terrific wind, heavy rain and alternate snow fell for this season of the year, resulting in serious loss to the farmers in many localities. In Montana eight inches of snow fell in Colorado and in the north of the state heavy killing snow fell. In Minnesota, the Dakotas and Manitoba the loss to farmers is very heavy, the chief damage being to the wheat crop. The reports say the farmers fear the worst, as thousands of acres of grain are yet uncut, and only a little of that already cut has been stacked or threshed. PINE COUNTY PIONEER.

ED. C. GOTTRY, Editor and Prop.

Entered in the Post Office at Pine City as Second Class Matter.

PINE CITY, MINN., Sept. 18, 1903.

That Servian affair will be all over - when the Servians are all dead.

Come to think about it, didn't we have a yacht race a few days ago?

Those naval maneuvers were a great thing, likewise the cost of repairs to the vessels.

The Alaskan boundary arbitration commission gives some evidence of agreeing to disagree.

Mr Thomas Lipton will now label his groceries with a shamrock, they will find a ready sale, even in this country.

Some of the monthly magazines have been saying nice things of late about the "captains of industry." But who is going to say a good word for the privates.

All successful business men have discovered that advertising is necessary to their success, and have been shrewd enough to make practical use of the knowledge.

The report comes from Minot, N. Dakota, that two feet of snow had fallen there last week. That rather (chilly) country would be a good refuge for hay fever sufferers. It is now up to the railroads for cut rates.

The sultan is becoming Americanized. He has appointed a press agent in the United States, and it is presumed the gentleman will lose no time in informing the people of this country that his imperial master is a great and good man.

Ralph Wheelock, in the Minneapolis Tribune, states that we can at least console ourselves with the thought that the next time the world is to be destroyed it will be by fire and not water. Ralph must be somewhat of a bible student, Eh?

U. S. SENATOR KNUTE NELSON, from his home at Fertile, Minn., writes a communication to the Minneapolis Journal, advising farmers to hold their wheat for better prices. He says that dollar wheat in local markets will surely be realized if the farmers will wait. Knute is a practical farmer as well as a politician, and his suggestion should have some weight. (Herald, St. Peter, Minn.)

Some over-anxious newspapers have been indulging in criticisms of the cost of the joint army and navy maneuvers on the Atlantic coast. The criticisms are entirely out of place. Our navy has cost an immense sum of money and unless the men and officers who man it are competent it is of no value to us. And unless they can have a reasonable amount of practice, there is no possibility of their maintaining a degree of efficiency that is necessary in protecting the interests of the country.

The agricultural department at Washington is studying the mango, with a view to making it popular in this country. But it will hardly be successful. When the American troops were in Cuba and Porto Rico they made several attempts to eat the fruit in the absence of anything better, but found it only about as palatable as persimmon. The mango is peculiarly a fruit for the warmer climate and will not become popular with us. Climatic conditions are against it.

The town of Lansboro, Minn., offers a bonus of \$2,000 to any manufacturing concern that will go to the town and agree to employ not less than twenty people for at least three years. It is a good idea, and one which other towns might emulate with advantage. We are too much in the habit of sitting still and waiting for industries to come to us. If we were alive to our own interests, and reached out for such a town as Lansboro does, we might in three or four years have an evidence of thrift and business activity that would revolutionize our town in a few years. There is business to be had in plenty, but these are the days that it goes to the man who reaches out after it. It never comes of its own accord.

The summer vacation of the business man is fast becoming an established institution in this country. Not only is this so, but every employe has his two weeks in the year. But where does the farmer come in? He toils from morning until night every day in the year, and his work is never ended. Oftentimes it runs into the night and he is up the next morning before day, and this is invariably the case in harvest time. If there is any man on earth who really needs a vacation it is the farmer and the farmer's wife and children.

Sir THOMAS LIPTON has made his third attempt to lift the American cup, and has failed. In these three attempts he is credited with spending about \$3,000,000. But has that enormous expenditure been in vain? We hardly think so. Sir Thomas has a string of grocery stores extending from one end of Great Britain to the other, and national pride will induce many a man to spend his coin with the man who has made so valiant a fight for yachting supremacy in the seas. It has made him one of the foremost men in the empire, and has called to his side hundreds of thousands of patriotic Englishmen and Irishmen who admire true grit wherever found. These men all have money to spend, and the coffers of Sir Thomas Lipton will find a share of them. It has been a great, but unique, advertisement for the great groceryman and tea dealer.

The wet disagreeable weather of the past two weeks has caused no end of fearful foreboding in the minds of the farmers and merchants who are sure to be the heavy losers by a series of rains that have been the means of baffling the memories of those old timers who, we are sure, would like to come out with the story that, "this is nothing in comparison to, say, etc." All over this state, Wisconsin, Iowa and North Dakota, rain storms bordering on cloud bursts, have been the daily routine of the weather outlook, and the city dailies are devoting numerous columns to the reports from the different places in the several states named above. Montana has come to the front with eight inches of snow, and we don't doubt but what tobogganing is the sportive pastime of that climate at the present time. One death is reported in that far western state as the cause of the sudden snow storm. Even in our own "Bread and Butter State" one prosperous farmer has committed suicide rather than witness the destruction of his hard labors of the past year. It is at least to be hoped that the crops are not quite as badly damaged as the reports would have it.

The Pleasure of Eating. Persons suffering from indigestion, dyspepsia or other stomach trouble will find that Kodol Dyspepsia Cure digests what you eat and makes the stomach sweet. This remedy is an ever-failing cure for indigestion and all complaints affecting the glands or membranes of the stomach or digestive tract. When you take Kodol Dyspepsia Cure everything you eat is digested, and every bit of the nutriment that your food contains is assimilated and appropriated by the blood and tissues. Sold by J. V. Breckenridge.

MARCONI WIRELESS TELEGRAPHY. For a Few Days You Can Secure a \$100 Share for \$80. Thousands of people have a little money laid aside drawing perhaps 3 per cent in savings banks. If you want an investment which will pay you bigger returns, send me a check for \$80 payable to the order of the Merchants National Bank, St. Paul, and twenty \$5 certificates of the Continental Trust Company of New York representing a \$100 share of stock in the Marconi Wireless Telegraph Company of America, will be sent to you by return mail. One hundred dollars in the Edison Electric Light Company advanced to \$4,000 in one year \$100 in the Bell Telephone Company advanced to \$200,000 in twenty-five years. We do not promise great dividends, because the earning power of \$80 could not produce any thing enormous, but multiplied by the opportunities which a new and wonderful scientific invention offers for commercial development, the returns will be greater than you would believe if stated in cold figures. It is because the system is new that this offer is made. It is liable to be withdrawn any day. Send for literature. H. P. HALL, 646 Endicott Bldg., St. Paul, Minn.

Distress after Eating Cured. Judge W. T. Holland of Greensboro, La., who is well and favorably known, says: "Two years ago I suffered greatly from indigestion. After eating, great distress would invariably result, lasting for an hour or so and my nights were restless. I concluded to try Kodol Dyspepsia Cure and it cured me entirely. Now my sleep is refreshing and digestion perfect." Sold by J. V. Breckenridge.

JEWEL STEEL RANGES. Image of a stove.

ARE THE BEST AND CHEAPEST TO BUY.

- 1st: Because they are made by the Detroit Stove Works, who have been making stoves for 40 years, and have a reputation to sustain.
2nd: Every little "Cheap John" concern in the country is making and putting on the market what they call a "Steel Range." You can buy them all the way from \$15.00 to \$30.00. The "Steel" in them consists mostly in getting your money.
3rd: Will it pay you to throw your money away on stoves of this kind when you can buy a JEWEL that will last a life time, always bake well, and save enough fuel in a few years to pay for itself?

WE HAVE THEM IN ALL STYLES AND SIZES. SMITH, THE HARDWARE MAN, PINE CITY, MINN.

READY FOR YOU WITH A BIG LINE OF

HARDWARE JEWELRY FURNITURE AND UNDERTAKING SUPPLIES. We now have a complete line for you to select from and will be pleased to have you come in and inspect our up to date hardware store. Everything in the hardware line.

NOTICE

Heretofore all matter for publication and copy for advertisements must reach this office by Thursday morning.

By your school stationery at the Big Store.

Every glass of Osee Kola is a sparkling fountain of health.

Mrs. Warren, of Hinckley, made a pleasant call on Wednesday.

Miss Anna Wescott visited with her parents at Rock Creek a few days of this and last week.

Arthur Brandes came up from Harris on Friday of last week and attended the fair, returning on the Sunday limited.

The past week of wet weather has stopped thrashing and put the fall work away behind, and the farmers are feeling pretty blue.

John Patrick, of the firm of Noble & Patrick of Hinckley, spent Friday here in this village on business.

John is accompanied by his son Frankie. John is always a welcome visitor here.

If you want a business to advertise, the only way to get it is to advertise your business. In other words, if you would have your business grow you must encourage its growth.

Miss Susa Shearer departed on Tuesday for Buffalo, N. Y., where she will spend a month visiting relatives. Miss Shearer is just taking the trip won by her in the St. Paul Globe contest this spring.

Louis Cronk, who has been at Cambridge for the past few months clerking in a hotel, arrived in this village on Tuesday and will visit for a few days with his old friends. Louis is always a welcome visitor to our little city.

On Wednesday, Frank Saumers of the town of Royalton, shipped a large quantity of honey to St. Paul where it has a ready market.

Mr. Saumers has graded his bees until now he has a large number of swarms which produce the very best quality of honey.

Tom O'Brien came down from Skibo, St. Louis county, on the early morning train Monday. About the first of next month Mrs. O'Brien will join him at Skibo where they will go to housekeeping. Tom, accompanied by James Connor, returned on Thursday.

The Grand Jury has been in session all of this week, and it is not known as yet what indictments were found. The petit jury will convene on Tuesday next. There is quite a large number of cases this term, and the list can be found in another column of this issue.

Wm. McKusick had the misfortune to fall from the porch onto the sidewalk at his home on Monday afternoon breaking the ligaments in his ankle. It will be some time before he will be able to be about again as the doctor in charge states that the nature of the break makes it worse than a fracture.

W. H. Nason, an old time Pine City boy who is now employed as foreman for the Rutledge Lumber Co. at Rutledge, came down last Saturday and spent Sunday among his friends. "Jack" is as much of a base ball crank as ever and can make as much noise on the diamond now as when he used to catch for the "Old Reliables."

One of our residents came into this office on Tuesday and asked us the following question: "If we want anything real bad wouldn't the best way to get it be to advertise for it?" He was answered in the affirmative, and then asked us to advertise for good weather, and thought that might break the spell of weather we have had for the past week—or summer.

J. E. Norstrom came in this office on Wednesday of this week with a fine sample of apples that had been presented to him by G. P. Norton of the town of Royalton. We acknowledge two of the best apples from Mr. Norstrom. Mr. Norton, who is sometimes called Gust, Peterson, has one of the largest and finest orchards in this part of the country and he has made a study of the best kinds of fruits to grow here. He takes pride in showing his orchard and well he might for it is well worth seeing.

What kind of weather is this? We are from Missouri.

Refuse all substitutes for Osee Kola. There is no drink so good.

For school shoes bring the children to the Big Store.

M. E. Vaughan was a Pine City visitor last Sunday.

The Bothania Mineral Springs Co. are the exclusive bottlers of Osee Kola.

Fall Clothing for men, youth and boys are being displayed at the Big Store.

Mr. and Mrs. Ira Wescott, of Rock Creek, spent Thursday at the Albright residence.

Mrs. Lawrence Pifer is visiting with relatives and friends at her old home in Arlington.

Go to the Big Store and see the new line of Swaters for men, youths and boys. Just opened.

Martin Hurley has decided to study law instead of taking an engineering course at the state "U."

John Parish, of Barnum, greeted old friends in this village Monday forenoon while on his way to the Hamline "U."

It has been suggested that it would not be a bad idea for someone to commence the erection of an ark—if it did not stop raining.

The supper given by the ladies of the M. E. church at the residence of Mrs. Ed. Madden on Wednesday evening was well attended and a neat sum cleared.

The Misses Rybak, who were guests of their brother, Frank J. Rybak and family for the past month, returned to their home in New Prague on Monday.

On Wednesday evening of next week there will be work in the first degree at Pokesama lodge, No. 77. All Knights are requested to be present at 8 o'clock, p. m.

Emily Exstrand, of White Bear, is operating at the Minn. Mutual Telephone Co's office in place of Miss Allie McKusick, who has been under the weather for some time.

James Hurley, who has had charge of the wholesale liquor house of Hurley Bros. in St. Paul for the past month, returned home on Wednesday.

His brother, William, has assumed his duties as manager of the House.

Every evening can be heard the cheers and shouts of the merry makers, the dull thud of the balls, and the sharp ring of the pins as they are scattered in every direction, at the bowling alleys of this place.

The season is now in full swing and large numbers of men and boys, and a number of ladies are taking advantage of this clean sport for recreation.

An elegant watch for sale has been offered as a prize to the one rolling the highest score in Rath's alley for the month of October, and the competition should be very keen as there are a number of expert bowlers in this village.

On Wednesday of this week M. S. Watt, of Rush City, and Mr. Young, of Superior, were in this village.

Mr. Watt closed a deal whereby he rents Jos. Veverka's bakery and restaurant and will take charge in a very short time. Mr. Watt has an expert baker engaged and will supply Pine City and surrounding towns with bread, etc.

The sleeping apartments will be fitted up in a first-class manner, and the restaurant run up to the standard of city style. The landlady will do all in his power to cater for the patronage of the traveling public, and there is no doubt but what he will receive his share of patronage.

A letter received this week from Dr. J. C. Currier, Asst. Supt. State Farmers Institute, stating that the petition sent in from here had been received and that the institute was coming here at a date to be set as soon as the counties are all heard from. He urges that the farmers should be ready to turn out at this time and learn all they can to better know how to farm to the best advantage.

You will receive instructions in every branch of farming from instructors who have made a life study of their different subjects. It costs nothing but your time, and you cannot afford to lose this opportunity to better your condition. Watch these columns for the dates and further particulars.

LIVE STOCK.

In order to produce the best results for the feeder, must be fed on good rich feed, the richer the better.

It is a daily occurrence for a farmer to tell us that he has been buying the bran and shorts made by the big mills and did not realize what he was losing by not buying that made by us, which is so much richer feed.

Our bran and shorts is worth fifty per cent. more for feeding purposes than the bran and shorts made by the big mills.

You can't get it at our Retail Department.

Master Johnnie Hurley returned to Hinckley Sunday afternoon to commence his duties in school Monday.

Mrs. W. A. Lambert is spending a few days this week in Minneapolis visiting with her mother and other friends.

St. Mary's Catholic church met with good success at their dinner and supper given in Connors building on Friday of last week, and added a neat sum to their treasury.

We were the recipients of quite a compliment from Clerk of Court H. J. Rath for the manner in which we got out the court calendar, for this time of the district court. He said that it was the best calendar that he had ever seen. Thanks Henry! All we do is, first class work.

M. E. Church Services. There will be services in the M. E. church Sunday as follows: Preaching by the pastor at 10:30 a. m., Sunday school immediately following; Junior League at 3 p. m. led by Mrs. A. W. Piper, Epworth League at 7:00, followed by preaching at 7:45. All are cordially invited.

W. E. LOOMS, Pastor.

COURT IN SESSION. The September term of the district court convened on Tuesday of this week with Judge Crosby presiding. The whole week has been devoted to the grand jury which has been in session all of the time. Next Tuesday the petit jury will convene. The cases were called and the following disposition made of them:

September 22nd, cases No. 21, 23, 2, 3, Sept. 23rd, Nos. 7, 18, 11; and Sept. 24th, Nos. 9, 12, 13 and 19 will be up for trial.

For Sale. A house, barn and fourteen lots in the village of Pine City, on the bank of Cross Lake, for sale at a bargain. Inquire at the property. 41-3 Mrs. A. C. Burora.

A Promising Strike. During the latter part of February and the first part of March, work ON THE MARE-MARILLA PROPERTY consisted in pushing a drift along vein No. 2 from the point where the working tunnel cuts through the vein. IN DRIVING THIS DRIFT FOR FORTY-THREE FEET, THE VEIN MATTER WIDENED FROM EIGHT A FEET TO THREE FEET, AND BECAME HEAVILY MINERALIZED.

ORE, RUNNING \$250.00, IN SILVER ALONE, TO THE TON, was encountered across the face of the tunnel. This simply demonstrates the theory that, as depth is attained, the ORE BODIES WIDEN AND BECOME RICHER. The most encouraging reports may be expected from time to time.

SMILES IN THE RAIN.

The weakest may smile
When there's sun all the while—
It's braver to smile when it rains—
The weakest may cry
When there's naught to smile
It's stronger who smiles through his pain
And then when there's sun, when there's
When gloom puts down and discour-
agement fies.
What need has the world
Of the mouth corners curled
In the cheeks, stans, when the fields
Are smiling so broadly that nobody sees
The wit of brightness you're giving
But days when it rains there's need
For your smile.

A Daughter of the Sioux

By GEN. CHARLES KING.

CHAPTER XV.

Woman's intuition often far outstrips the loftiest mental process of the other sex. The mother who goes to see a beloved daughter's silent suffering, well-knowing another girl to be, however indirectly, the cause of it, sees all manner of other qualities in that other girl. Kind, charitable and gentle as Mrs. Dade, a wise mother, too, as well as most loving, but she could look with neither kindness nor charity on Miss Flower. She had had her peace allowed no word of censure or criticism to escape her when the women were discussing that young lady; but all the more vehement was her distrust, because thus pent up and repressed. With the swiftness of feminine thought, for she had not yet suspected, she fathomed the secret of the trader's sudden going; and, carried away by the excitement of the moment and the belief that none but her husband could hear, she made that startling announcement. And her intuition was unerring. Nanette Flower was indeed going.

Yet for nearly an hour she stood alone in her conviction. Her husband came quickly gliding in, and, going forth, gave instructions to the couriers that sent them speeding for the Rawlins road. But at seven o'clock Mrs. Hay returned, and asked to see the general, who was taking at the moment his accustomed brace, tonic and stimulant. "He only kind he was ever known to use—a cold bath. So it was to Mrs. Dade, in all apparent frankness and sincerity, the trader's wife began her tale. Every one at Fray's well knew that her anxiety as to the outcome of the battle on the Elk had well-nigh ruined that of her husband, and she heard within the garbison. While her niece, after the first day's excitement, kept to her room, the aunt went fitting from room to room, full of sympathy and suggestion, but obviously more deeply concerned than they had ever seen her. Now, she seemed worried, and now, at the thought of her husband's having to go just at this time. It was mainly on Nanette's account, she said. Only last night, with the mail from Larra, had come a letter, posted in San Francisco the week before, telling Miss Flower that for four years at school, who had been on an extended blind tour, would pass through Rawlins, eastward bound, on Friday's train, and begging Nanette to meet her and go as far as at least as Cheyenne. Her husband, it seems, had been hurriedly packing up his things, and there was no help for it. Nanette had expected to join her, and now all the way east in late October or early November had she been promised, in fact, for she was vastly excited by the news, and despite headache and lassitude that had oppressed her for two days past, she decided to go. So, with only a small trunk, hastily packed, of her belongings, and an "old-bound chest" of her husband's, she had started before dawn in Uncle Bill's stout buckboard, behind his famous four-mile team, with Pete to drive, and two strong ranchmen as outriders, hoping to reach the Medicine Bow by late afternoon, and rest at Brenner's ranch. Confidentally, Mrs. Hay told Mrs. Dade that her husband was glad of the excuse to take the route up the Platte instead of the old, rough trail southeastward over the mountains to Rock creek, for he had a large sum of money to get to the bank, and there were desperadoes along the mountain route who well knew he would have

to send that money in, and were afraid the location of his money in the bank. Ever since they had two or three good characters had been hanging about the store, and Hay suspected they were waiting for some opportunity with the intention of getting word to their comrades in crime the moment he started, and it was almost as much to steal a march on them as to oblige Nanette, he so willingly left before he had a chance for assassination. Of course, said Mrs. Hay, if her husband loved the Blatte valley all the way to Brenner's, and, once there, he would follow the road, and the road would trail around through gulch, ravine and forest most of the distance, affording many a chance for assassination. Of course, said Mrs. Hay, if her husband had for a moment supposed the general would wish to see him, he would not have gone, adding, with just a little touch of horror, while arid, that on the general's previous visits he had never seemed to care whether he saw Mr. Hay or not.

All this Mrs. Dade accepted with courteous, yet guarded, interest. She had a letter in her little parlour, talking in low tones; but, with unfailing tact, Mrs. Hay had asked for it, and she addressed the envelope on hearing of her being un-nerved by the excitement through which she had passed. "I'll tell you," she said, "the Field's serious condition had not a little to do with poor Easther's prostration, but that was known to all important informants now that the Sioux were at war, and that Ralph Moran had turned out from Webb. His departure, however, first they would consult Mrs. Dade. They had done so the very evening of his departure, and Mrs. Dade, long miles away, was telling Kennedy his Irish heart was safe from the designs

Scouts and flankers reported finding "travels" and pony tracks leading westward from the scene of Ray's fierce battle, in which the Indians had carried their dead and wounded into the fastnesses of the southern slopes of the mountains. Among the chiefs killed or seriously wounded was Captain Blake and Hay thought might be certain of the men, however, who had seen Red Fox at that time expressed doubt. Lieut. Field, said Mrs. Hay, had seen and could probably say.

Over this dispatch the general pondered gravely. "From what I know of Red Fox," he said, "I should think him a leader of the Sitting Bull type—a shrewd, intriguing, mischief-making, happy-go-lucky, but not a battle leader, and according to Blake and Hay this new man was a leader."

Then Mrs. Dade came out and bore the general off to breakfast, and during breakfast the chief was much preoccupied by his staff officer. The general exchanged an occasional word with the chief, and finally surprised neither of them when breakfast was over and he had consumed the last of his glass of hot whisky, saying to his staff officer: "I should like to see Mrs. Hay a few minutes, if possible. We'll walk round here in the heat of the team ready at ten o'clock."

TWO SECRETS.

Pathetic Little Tale of Two Found Old Hearts That Suffered in Silence for Each Other.

"How's business, Eben?"

"The old man was washing at the sink after his work, relates Youth's Companion.

"Fine, Marthy, fine!"

"Yes, but I'm not so sure about the red geranium in the window? Land, how I'd like to see it with the sun shining in! How does Eben did not answer for a moment, when he did his voice shook a bit. The store's never been the same since you left."

A faint little flush came into Martha's withered cheek. Is a wife ever true? to be moved by her husband's flattery?

For years Eben and Martha had kept a tiny notion store; then Martha fell sick and she had to go to the hospital. That was months ago. She was out now, but she would never be strong—never be partner in their little store. She had a little money, but she had to live on it. She had a little money, but she had to live on it. She had a little money, but she had to live on it.

"DELIVERED IN PERSON TO MISS FLOWER, WHO MET HIM AT THE TRADER'S GATE."

of one blood-thirsty Sioux; and Mrs. Dade had agreed with them that Nanette's letter should be sent to her forthwith, and that, as Capt. Blake had brought it in, the duty of returning the letter devolved upon his wife. And so, after much thought and consultation, a little note was written, saying nothing about the other matter, but saying that she was Miss Flower; it read, "The enclosed was found by Capt. Blake some time this morning. He had no time to deliver it to assist her, yours sincerely, N. B. Blake."

Note and enclosure were sent first thing next morning by the trusty hand of Master Sanford Hay himself, and by him delivered in person to Miss Flower, who met him at the trader's gate. She took it, he said, and smiled, and thanked him charmingly before she opened it. She was coming out for her customary walk at the hour of guest mounting, but the next thing he knew she had "scoted" indoors again.

And from that moment Miss Flower had not been seen.

All this Mrs. Dade revolving in the side of the troubled woman, only vaguely attempting to get the few words. They had thought to be admitted to the little room in which this wretched officer lay, but they were tipped into the wide airy hall and looked over the long vista of pink-streaked coverlets in the big ward where the doctor's men appeared at the entrance and barred the way.

"Is there nothing we can do?" asked Mrs. Dade, with tears in her voice. "It is—so much worse."

"Nothing can be done just now," answered Waller, gravely. "He has had high fever during the night—has been wakeful and slightly again. I—should rather no one entered just now."

And then they noted that even the Field was now hovering about the door of the dispensary and that only Dr. Waller remained within the room.

"I'm hoping to see him to-day, and he is mending there will be a host of things for you both to do."

But that smiling seemed many a day off, and Mrs. Hay, poor woman, had graver cares of her own before the setting sun. Avoiding the possibility of meeting the general just now, and finding Mrs. Dade's heart and constrained at mention of her niece's name, the trader's wife went straight toward the door of the hospital, and did not see the post commander hurrying from his office, with an open dispatch in his hand. By this time the chief and his faithful aide were out on the veranda, surrounded by anxious wives and daughters, many of whom had been earnestly beseeching the doctor to let them see their husbands to break fast. Dade much wished them away, though the news brought in by night riders was of a stirring and cheery nature. The Indians had killed away from the Indians' front, and he counted on

WON BY A BLACK LOOK.

Defendant in Murder Case Tries by the Insignificance of the Case (Cassius M. Clay).

The late Gen. Cassius M. Clay was a lawyer of great address in his earlier days, and he was consulted in many important cases, both civil and criminal, during his career at the bar, says a southern exchange.

"Always the great 'I'm so afraid I'm a man who once being tried for murder and his case looked hopeless, indeed. He had, without any seeming provocation, strangled one of his neighbors in cold blood. Not a lawyer in the county would touch the case. It looked bad enough to ruin the reputation of any barrister."

The man, as a last extremity, appealed to Mr. Clay to take the case for him. Everyone thought that Clay would certainly refuse. But when the celebrated lawyer looked into the matter his fighting blood was aroused, and to the great surprise of all, he accepted.

Then came a trial the like of which has seldom been seen. Clay slowly carried with a form of evidence more and more hopeless. The only ground of defense the prisoner had was that the murdered man had looked at him with such a fierce, murderous look that out of self-defense he had struck first. A ripple passed through the jury at this evidence.

The time came for Clay to make his defense. It was settled in the minds of the jurors that the man was guilty of murder in the first degree. Clay calmly proceeded and laid all the proof before them in a masterly way. Then, just as he was about to conclude, he played his last and master card.

"Gentlemen of the jury," he said, assuming the form of a blackest look and carrying the most undying hatred in it ever seen—"gentlemen, if a man should look at you like this, what would you do?"

That was all he said, but that was enough. The jury was startled and some even quailed in their seats. The judge moved uneasily in his bench. After about 15 minutes the jury filed slowly back with a "Not guilty, your honor."

When Clay was congratulated on his easy victory he said: "It was not so easy as you think. I spent days and days in my room before the mirror practicing that look."

FEARED A SEPARATION.

The Dear Little Lamb He Was Afraid Her Father Would Be Put with the Goats.

Her father had read her the parable of the sheep and the goats at the day of judgment, and he had told her that she would be put with the goats if she was not good. She was a very good girl, and she was very much afraid of her father's wrath.

"Always the great 'I'm so afraid I'm a man who once being tried for murder and his case looked hopeless, indeed. He had, without any seeming provocation, strangled one of his neighbors in cold blood. Not a lawyer in the county would touch the case. It looked bad enough to ruin the reputation of any barrister."

DIGESTION OF THE CAT.

From It May Be Drawn Some Valuable Suggestions for the Human Race.

For some time past a professor in Harvard university has been studying the process of digestion as revealed by the Roentgen ray sent through the stomach of divers and sundry cats. The results are instructive, remarkable and somewhat surprising.

There are several cats employed in the experiments, but only one at a time and mostly of the ginger sex, as the other cats are either too fat or too thin and irregular digestive processes. The subject was kept hungry for ten hours and then so fed that after a preliminary meal he ate nothing but oatmeal by sleep. In that position it was strapped between the lens and the screen of the apparatus, and the X-ray beam stretched out on the luminous screen. A little bit of milk was mixed with the bread and milk of the cat's food to darken the X-ray.

The food lay at first in the upper and larger part of the pear-shaped stomach. Then a series of wavelike motions began from the greater end of the stomach and was continued with clocklike regularity, the shadows of the food top passed from the stomach at the top to the bottom, at ten second intervals.

Two important facts were observed, and to them attention is particularly called. For regularity of the digestion and process a condition of calmness was necessary. The moment pusy became excited at anything the wavelike motions ceased and were only resumed when she regained placidity or temper. That is why Thomas cats and other nervous subjects. They rest their temper too often, and the churn in the lower half of the stomach quick. It was also found that when a cat was very excited and was returned to the outlet of the stomach it was returned to be worked over again, this process continuing until it had been dissolved by the gastric juice that it scarcely cast a shadow.

These, therefore, are the two lessons of the cat's stomach to man at table and after. Thoroughly masticate your food that the churning process may not be prolonged beyond the proper time. Refrain from anger or worry after meals until the food is completely digested.

NEW YORK ALEP.

New York is never entirely asleep, but only 3,000,000 of its inhabitants do so part of the night. "We're out of sleep," says the process is very gradual. Early infancy and senile old age are the chief exceptions. The young of youth and middle age make a hot pace till midnight, then slowly the pulse begins to grow feebly. By one nearly all honest folk are in bed, leaving the city to the numbers. Mrs. at long intervals. Now and then a carriage gives a flutter. Imagine 3,000,000 persons lying on the "dead level" for hours, and you can see some on pillows, some on cushions, some on the ground, some on the star-shaped blue quilt of heaven. Quicker figures make, to be sure.—N. Y. Press.

BLACK-NECKED GOATS

A Breed That is Indisputably One of the Strongest and Healthiest in Existence.

The black-necked Valaisian goat is especially attractive because of its peculiar coloring, says American Sheep Breeder. The head and fore parts are black, while the rear parts are snow white.

Seen from a distance this breed resembles somewhat of the Angora.

A VALAISIAN DOE.

Seen from a distance this breed resembles somewhat of the Angora.

The black-necked Valaisian of medium size, her height at the withers being 30 or 35 centimeters. She attains her full maturity only at the age of four or five years.

The horns are broad, back straight, of a curve gently sloping and well developed.

The loins are broad, back straight, of a curve gently sloping and well developed.

The neck is short and well coupled with the shoulders.

HOW TO HANDLE HOGS.

Much of the Farmer's Success Lies in Proper Driving and Loading in Summer.

In hot weather a fat hog cannot make much progress, so it is best to take advantage of the cool evenings and mornings for driving.

The one who has a drove of such to drive will find it to his interest to drive them nearly half the distance the evening before, even if he is put to the trouble of hauling their feed.

The trouble of hauling their feed. The killing of one hog will lose you more money than the worth of several days' work, and it is the fattest ones, usually, that are killed.
