The Farmers Exchange

We represent some of the best flour mills in Minnesota. You can always be sure of getting the very best flour at our store.

We have a big stock of everything in the feed line.

We are cash buyers of Live Stock and produce, Hides, Wool, etc.

Respectfully,
J. J. Madden.

PINE CITY MERCANTILE CO.
General Department Store.

This is a short story on overcoat detail. We'll pass over all about the propriety of the styles, and the fit, and the superiority, and the variety of sizes, and the material, and so on, and come right down, or rather up, to a little **Shoulder Wisdom.** All garments made by Crouse & Brandegee, Manufacturing Tailors, Utica, New York, are made with **Concave Shoulders** and close-fitting collar. The result of this is very apparent. These overcoats show it at a glance. When you get before the mirror you will notice it even more. It doesn't look padded. Some shoulders look as though made by the upholsterer, but there is none of that in ours. It looks clean-cut, well-built and gives the shoulders an added breadth, but without attractive. The secret lies in the making. The same, too, with the entire garment. The care that's put in the shoulders is put in "all over," and thus the genuine goodness.

Copyright, 1903, Crouse & Brandegee, Utica, New York.

FOR SALE AT THE BIG STORE.

PINE CITY MERCANTILE CO.
General Department Store.

Institute for Farmers Nov. 28th.

The State Farmers Institute will be held in this village on November 28th at Rath's Hall. Secretary J. Y. Breckenridge having received word to that effect from Ass't Secy. Dr. J. C. Curryer. This is for the farmers, and you should commence now to make arrangements to spend two or three days at a school that costs you nothing, and will give you a broader and better idea of how to farm to the best advantage. The corps of instructors are the best that can be secured, therefore the instructions given you are by practical men that have made a life long study and have had the experience themselves.

Watch these columns for a list of the instructors and further notices of the meeting. Circulars will be generally distributed throughout the county.

SCHOOL NOTES.

Miss. Heneghan, after a weeks absence, has returned to her duties. Miss. Heneghan received a hearty welcome from all her pupils. The seventh and eighth grades of 1st year High School presented her with a box of beautiful cut flowers.

The High School boys have purchased a new foot ball and with a little practice the boys will soon be in good order for the real game.

Miss. Hatlie Pennington was absent from school Friday and Monday, on account of illness.

Monday evening the first of the series of entertainments for the High School was given. A large audience was in attendance and every one enjoyed Mr. Cope's humor.

Howard and Grace Ferguson have entered the second year High School.

George Sherwood departed with his uncle for Wisconsin where he will remain for the winter.

There are sixty-one pupils occupying the assembly room at the present time.

Miss Marie Kibler took charge of Miss Heneghan's classes during her absence.

Basket ball is at a stand still. Ask the boys why?

It Was Good.

The Cope entertainment given last Monday evening under the auspices of the Webster High School, was attended by a large and appreciative audience. Cope is undoubtedly one of the top notchers as an entertainer and humorist, and his work Monday night was of the very highest degree of efficiency, and indeed some of the best in his line would have to go some to cope with him.

His impersonations of different characters were especially clever, and he had an unlimited supply of humorous stories which kept the listeners in a continual uproar of laughter. Cope is good, and these who were instrumental in getting such high-class entertainment for this village, are to be congratulated.

The next number of the course will be given on the evening of Dec. 9th, when Russell's Musical Novelty Company will hold the boards. This latter entertainment is under the management of the same Lyceum Bureau as the Cope entertainments, and this along should guarantee them to be first-class.

HUNTER'S HOT SPRINGS.

It is not necessary for residents of the Northwest to go to the South and East for hot water pleasure and curative baths. Near Springdale, Mont., on the Northern Pacific, are Hunter's Hot Springs, temperature 148 degrees to 168 degrees Fahr., flowing 2000 gallons per minute, 4000 feet above the sea in the foothills of the Crazy mountains, overlooking the Yellowstone river and valley. Good hotels, cottages, bath houses, swimming pool. Rates \$2.50 per day, \$15.00 per week, including baths. Baths are good for all rheumatic, skin, liver, kidney and stomach diseases. Appointments comfortable and satisfactory. Halfway rates low. The region is a natural sanatorium. For information see J. E. McCormick, Hunter's Hot Springs, Mont., or Chas. S. Fee, G. P. & T. A., Northern Pacific Ry., St. Paul, Minn.

A Good Record.

Below we give a few figures pertaining to the work of Hurley's Bar- ringtons for the past season of base ball. Out of twenty games played they have won twelve, lost seven, and gained the decision in a forfeit game with North Branch. This makes their percentage 650, which is very good considering the hard teams they were pitted against. Only two games were played away from the home ground, one at Bra- ham June 28th, and the other at Stillwater Aug. 23. The locals have scored a total of 166 runs against their opponents, while 138 runs have been made against them. Following are the games won and lost and the scores:

CLUB	WON FROM	SCORE
Braham		9-7
Parlors, St. Paul		5-1
Hinckley		23-5
Braham		23-11
D. & S. Linnetta, St. Paul		9-6
"		8-7
K. C's., St. Paul		7-5
McKibbons, St. Paul		15-0
K. C's., St. Paul		8-6
"		5-4
Picketta, "		4-0
North Branch, (Forfeit)		9-0
W. Cycles, Minneapolis		11-1
CLUB	LOST TO	SCORE
Parlors, St. Paul		20-6
Unions, Minneapolis		9-4
H. Colts, St. Paul		13-12
McKibbons, "		8-4
Wolfs, Stillwater		22-1
Picketta, St. Paul		6-1
W. Cycles, Minneapolis		7-2

Home-Grown Humor

From Kidville.

One day this week, a teacher in one of the lower grades in our public school was questioning her pupils as to the names of the different parts of the head. She had asked them and had received correct answers to several very easy questions, and thought she would catch them by giving a harder one.

In effect she said, "Now can any of you tell me what that little circle on the very top of the head is called?"

Not a single response.

The teacher proceeded, "We all have them, can't any one think what it is?"

In an instant five or six little hands were raised, and the teacher of course asked what it was.

They needed no further invitation to express themselves, and without a bit of hesitancy they broke out in one grand exclamation—"Lice!"

School has since been called to order, and the teacher has braced herself for the next siege, while the several (wise?) little urchins are using days on their top-locks in order to save the "animals" from a worse fate than drowning.

Next!

How's This?

The following clipping from the "Ganght on the Run" column of the Monday's Duluth News Tribune, goes to show that our illustrious J. Adam Bede has a son who is just some kind of a joker himself. This will be interesting to his many friends in Pine City.

Elbert Bede, deputy customs house officer on the steamer Mabel Bradshaw, played a joke the other day on the Duluth immigration agent, Fred Lundberg, and the latter is now laying for an opportunity to get even. Mr. Bede approached the immigration agent and said:

"Mr. Lundberg, on the last trip down a male passenger got off at Fish Island whom I want to report. He got on at Port Arthur and in addition to not being able to read nor write he was helpless and totally unable to care for himself."

"What did you let him land for?"

"Well, his mother was along to look out for him and—"

"His mother? How old was he?"

"O, just a few days."

The customs officer dodged paper weights and made a hasty exit.

Teeth Dr. Morgan, dentist, will be at the Wilcox House, Pine City, on the 21, 22 and 23 of every month. Teeth pulled without pain.

The First Sign of a Cold

Our Hydrobromate Quinine Laratine Tablets are the best Remedy.

They stimulate the depressed nerves, ally fever and start the vital machinery to run with its accustomed smoothness.

A box costing 25 cents will prevent and break up a several dollar-cold.

BRECKENRIDGE'S PHARMCY
MAIN STREET, PINE CITY.

Take an equal amount of good flour and poor flour, make a baking of each and note the results.

We make good flour and it costs no more than poor flour. WHY NOT BUY IT? ? ? ? ? ? ? ? ? ?

P. S. Our mills are now grinding the finest wheat we can buy, shipped from North Dakota.

PINE CITY MILLING & ELECT. CO.

LUMBER.

If you want to buy Lumber, Lath, Shingles, or anything in the building line, let us figure with you. Our Stock is complete and our prices attractive.

P. W. McALLEN, PINE CITY.

WHY SELL YOUNG STOCK?

It Should Never Be Done Unless a Man Is Driven to It by Actual Necessity.

Have you considered whether it is your interest to sell the calves, colts or pigs at present prices, or to keep them to get the profit of the stockman—to utilize the pasture, grain fields and odds and ends that would be lost, and that can be made to enrich the farm? Would it not be better to sell your stock to stock, but to which you have been in the habit of selling unfed and so contributing to the other man's profits, and to the building up of the fertility of his land, instead of your own? The calves sell for from ten to fifteen dollars at weaning time. One year later they should weigh at least 750 pounds, which, at four cents, is \$30. Now, to make this weight very little grain is required, just make use of the odd pastures, the extra grazing of the corn and small grain fields in the summer and autumn, then the rye and wheat in winter and early spring; also the fodder and straw that was previously wasted. These little odds and ends, if used to add to your bank account. Colts, hogs or mule—sell well at weaning time, yet there is better money in keeping, breaking and making desirable work stock. Match them well, take extra pains in breaking, rub them up until they have a fancy team, then you can ask and should have a fancy price. Who knows into what class colts will develop? Pigs may be easily and cheaply kept, until the feeding period, on very little corn, by using slops, gleanings the small grain after harvest and pasturing clover. And so all along the line. Make your farm a factory of some kind—Agricultural Epitomist.

THE THERMOMETER SCALE.

How It Came to Be Divided in a Way That Appears to Be Senseless.

Why should the freezing point be marked 32 degrees and the boiling point 212 degrees on the Fahrenheit thermometer scale? Most students know that its inventor divided the space between these points into 180 degrees instead of the simpler 100 degrees used in the centigrade system, but few understand how this number came to be chosen, says the American Inventor. A writer thus explains the matter:

The thermometer was really invented by Sir Isaac Newton. He started his scale with the heat of the human body and used as his instrument a glass tube filled with laced oil. The lowest degree on the scale was the freezing point and the highest point boiling water. The starting point of his scale, as no national was the heat of the human body, which he called by the round number 12, as the duodecimal system was then in common use. He divided the space between the freezing point and the temperature of the body into 12 points, and stated that the boiling point of water would be about 20, as the temperature must be nearly three times that of the human body.

When Fahrenheit took up the subject a few years later he used the Newton instrument, but, finding the scale not fine enough, divided each degree into two parts, and so made the measure between the freezing and boiling points 24 parts instead of 12. Fahrenheit then discovered he could obtain a lower degree of cold than freezing, so he added a mixture of ice and salt for a starting point, he counted 24 points up to body heat. By this arrangement he obtained 8 for the freezing point and 32 for the boiling point. His scale now read: Zero; freezing, 8; body heat, 24; and boiling water, 32. It will be noticed that this scale is identical with that of Newton's, only starting lower and having the numbers doubled.

CHANGES ON THE FARM.

Are as Marked in Recent Years as They Are in the Towns and Cities.

"Times have greatly changed on the farm as well as in the stores and cities," recently remarked a local merchant residing in the Washington Star. "I have just come from a little vacation in a farming district in the center of Virginia. I used to work on a farm there in my boyhood days. Oh, my careful, economical father could only see how they were farming these days! It was during the civil war that I worked on my father's farm. It contained 550 acres and \$300 would have bought all the vehicles, horses and farm tools on it. We had a couple of horses, one wagon, a harrow, a plow and a cultivator. We did all the cutting of grain by hand. Some of the farmers had mules or horses, and some had neither. It is disappearing now, and I think there were one or two buggies in the neighborhood. I think a farm of that size to-day and you'll find \$2,000 or \$3,000 worth of buggies, wagons and tools on it. Then there will be six or seven horses between the farmer and himself. The old farmer himself will have a buggy. By counting the number of buggies in the wagon shed you will be able to learn the number of men who have had to stay at home to help him work the farm. As for implements, there will be several plows, a harrow, different kinds of cultivators, a mow, a reaper and binder, a seeder and a lot of other stuff that the old-time farmer never thought of. 'Are farmers more prosperous now, today?' 'Yes. More money is in circulation and the farmer gets his share of it. The farmer has to spend money now to keep his boys on the farm. Most of the sons go to the cities as soon as they get old enough to be useful, and those who don't are supplied with buggies and horses in order to do their own work on the farm. 'Then some men remain on the farm. 'Yes, but they have to work eight or ten hours a day, the farmer has got to get up-to-date implements. These implements are cheaper in the long run and the hiring of additional men who will work only a short day. As soon as it's getting time the hired man will get his grub, gets on his wheel, hurries away to the village, yet turns to go to bed about 1 a. m., and isn't fit for much work the next day. 'Yes, indeed, country life is changing just as much as city life is changing.

How a Steer Is Divided.

Taking the estimates used at a Chicago stock yards as the rule, a steer weighing 1,300 pounds will be divided as follows: Waste matter, 340 pounds; skin (300 pounds each), 660 pounds; liver, 10 pounds; heart, 4 pounds; tallow, 50 pounds; tongue, 5 pounds; hide, 84 pounds; fertilizer materials, 14 pounds; dry blood, 4 pounds; bones, 4 pounds; horns, 2 pounds; hoofs, 5 pounds; sinews, 4 pounds; tail, 2 pounds; sweetbread, 2 pounds. Some bone and waste meat go into the fertilizer materials and are included in that estimate. The condition of the animal affects the weights of the parts, a steer having more tallow than a lean one.

Exercise for Brood Sows.

The brood sow needs exercise, and that, too, in the open air. If the sow has a good pasture the exercise is attained without effort. It costs nothing, but is of immense value both to the sow and the progeny she is to produce. Brood sows are very apt to be lazy. If they are given low warm and comfortable places to lie in with an abundance of food. They should be made to work for part of their provender. Little corn should be fed the brood sow in very cold weather, as it is not desired to lay on fat—Farmer's Review.

There Is Greater Activity in the Poultry Business.

There is greater activity in the poultry business just at this time than ever before. The business is growing by leaps and bounds. The amount of fresh fruits and vegetables brought into the New York market every day; they do not see them in bulk, for the consignments are usually received at night, and by daybreak, or by noon the next day at the latest, this trade in poultry is as active as in any other business in the city. In Pearson's, Mr. Frank W. Hawthorne gives a most interesting account of the methods employed in handling the thousands of fowls worth \$1,000,000 per day, and some surprising statistics.

A PROMINENT CHURCH WORKER SAYS SHE OWES HER LIFE TO PE-RU-NA.

Mrs. Hattie LaFontaine.

HER GREAT FORTUNE.

A Woman Saved From Life-Long Misery and Made Happy and Useful.

A woman confined to the house for several years by chronic medical derangement had finally given up hope of being cured.

Her treatment had not her husband who was a poor man, hundreds of dollars. They had been obliged to deny themselves many comforts of life in order to get money enough to pay the physicians.

The woman had become weak, nervous and wretched, and scarcely able to keep out of her bed. Her children were growing up neglected and sad, because of the want of a mother's care. Her husband was becoming discouraged and broken down by a long illness.

Picking up the paper one day she happened to read an item which contained the news that Dr. Hartman would treat such cases free of charge by letter. She immediately wrote the doctor describing her case, and giving him all her symptoms.

She soon received a letter telling her exactly what to do. She bought the medicine and appliances to get. She began the treatment (the principal remedy being Peru-na) at once, and in a few weeks she was well and strong again, able to do her own work.

This offer of free home treatment to women is still open to all who may need the services of this eminent physician. All letters applying for treatment will be promptly answered, and he held strictly confidential.

Mrs. Annie Hoban, Post Pouchontas of Yemassee County of Red Men (Women's Branch), writes from 872 Eighth Ave., New York.

"Three months ago I was troubled with backache and a troublesome heaviness about the stomach. Sleep brought me no rest for it was a restless sleep. The doctor said my nervous system was out of order, but his prescriptions didn't seem to relieve me. I was told that Peru-na was good for bedding up the nervous system. After using it for two months I know now that it is. I want to say that it made a new woman of me. The torturing symptoms have all disappeared and I feel myself again. Peru-na did me more good than all the other medicines I have taken."

Mrs. Annie Hoban, Post Pouchontas of Yemassee County, Louisiana, writes.

"I sincerely believe that Peru-na is woman's best friend, for it has certainly been that to me. I had had headaches, backache and other aches every month for a long time, but shortly after I began taking Peru-na this was a thing of the past, and I have good reason to be grateful. I take a bottle every spring and fall now, and it keeps my health perfect, and I certainly am more robust now than I have been in years, and am weighing more. Do not think any one will be disappointed in the results obtained from Peru-na."

MISS MAMIE POWELL.

If you do not derive prompt and satisfactory results from the use of Peru-na, write at once to Dr. Hartman, giving full statement of your case, and he will pleasure to give you his valuable advice gratis.

Address: Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

Mrs. Hattie LaFontaine, Texas. Protected Home Circle and Catholic Ladies of Ohio, writes from Gallon, O., as follows: "After my first child was born I suffered for several months with bearing down pains accompanied by dreadful headaches. I was afraid my health was ruined for life, and felt very despondent about it. One day when a friend was visiting me she told me of Peru-na and what it had done for her when she suffered with irregular menstruation. My husband procured a bottle the same evening and I began to take it daily according to directions. Before the first bottle was used I was entirely well, and you certainly have an grateful woman's blessing. I have also advised my friends to use it."

Secretary Woman's State Federation Says: 'Pe-ru-na Does More Than is Claimed for it.'

Mrs. Julia M. Brown, Secretary of the Woman's State Federation of California writes from 121 1/2 Fifth St., Los Angeles, Cal., as follows: "I have never known of any patent medicine which did what I professed to do except Peru-na. This remedy does much more than it claims, and while I have never advocated any medicine I find that it is just justice to speak a good word for it because I have found it to be such a rare exception." JULIA M. BROWN.

Tommy's Essay on Preachers.

The following essay by a youthful boarding school boy throws quite a new and interesting light on church dignitaries. "There are three kinds of clergymen bishops, rectors and curates. The bishops tell the rectors to work and the rectors have to do it. Curate is a funny name but when he is a rector he gets the father and can preach longer sermons and becomes a good man, we should all respect a curate because sun day he may become a rector and we must always pity those who are low down in the church, any of us may become unfortunate, so we must not hit a man with a stone."—Chicago Chronicle.

Almost Human.

"The prepupa may have a desirable social position," and the boy, "he has his good points." "True," replied the boy, "but he is apt to be an awful father." "Yes," answered the boy, "he is apt to send one away with a stuck-up feeling."—Chicago Daily News.

The McBride Case Again.

St. John, Kan., Oct. 25.—Mr. and Mrs. William McBride and Jesse L. Lines, M. D., have gone before Mr. George Z. Moore, Notary Public, and have sworn and subscribed to written statements confirming the story of the awful illness and subsequent cure of the little son of Mr. and Mrs. McBride.
