VOL. XX.

PINE CITY, PINE COUNTY, MINNESOTA, FRIDAY, JANUARY 27, 1905.

NO. 8

P. A. D. 1904. President, F. W. McAlLEN, Vice-Pres. JAMES D. HOYLE, Cashier.

FIRST STATE BANK PINE COUNTY.

(INCORPORATED)

Commercial Banking in all its Branches.

Insurance written in Reliable Companies.
 Drafts on domestic points sold cheaper than express or no-toll money orders.
 Drafts on Europe sold. Land Bought and sold.

Taxes Paid for Non-Residents.
 PINE CITY, MINNESOTA.

UP TO THE BOARD.

County Commissioners Will be Confronted With A Second Petition for the Division of Pokegama Town. Bitter Fight Probable.

Several petitioners for the division of the town of Pokegama have become very active of late in securing additional signers, and the question will be brought before the county commissioners at an early date. The above information was tendered the Pioneer this week, and means much.

This same bill, signed by about 40 Pokegamites, was presented and thoroughly discussed before and by the commissioners at a recent meeting when it was deemed not advisable to divide the town. The question is one that requires more than ordinary attention. Pokegama town consists of about forty square miles of land and is therefore an unusually large township. It has many fine farms and wood lands and is occupied by many well-to-do farmers. The acreage of tillable land, however, is not as large as the area of square miles would indicate by reason of the numerous lakes and swamp lands contained therein, and which is a strong contention in favor of the anti-petitioners. Those in favor of division assert that the town is and always was too large, and that by a fair division they can better equip the west end with roads and make greater headway in every way than with the existing condition.

One of the principle promoters of the question and an active agitator for the divisionists, states that over one hundred favorable signatures will be presented to the commissioners upon the next petition, and a strong fight is expected to ensue therefrom.

DANCE FOR A BENEFIT.

Jasper Davis, Totally Blinded by Accident, to be Tendered a Benefit Dance at Rath's Hall Saturday Evening. Operation at St. Paul Intended.

A dance, which should arouse much interest, will be given at Rath's hall tomorrow (Saturday) evening. It will be a public affair, open to all, and the proceeds will go towards defraying the expenses of Jasper Davis while in the hospital at St. Paul. The case of this unfortunate young man is not known to many but when known, is bound to provoke pity in all but the heartless.

Portland's Expo. Now Ready

For Exhibits. Montana Mineral Exhibit Shipped from St. Louis. A Most Beautiful Site.

Every traveler arriving in the city whose home is in Portland Ore., is sure in talking to acquaintances about the wonders of the Lewis and Clark Exposition, to open in that city June 1st of next year. If half they say is true, it will, in some respects, at least, eclipse the Great World's exposition just closed in St. Louis. For one thing, the exposition will have a more permanent appearance, the gardens, waterways and grounds generally having the advantage of natural beauty, different and better than that of any fair ever held in America.

From a gentleman who was in Anacosta from Portland Saturday on a business trip it is learned that everything is now in readiness to receive the exhibits, the agricultural, foreign exhibits and liberal art buildings are completed. The forestry building, probably the most interesting on the grounds, is nearly completed, the massive timbers which compose the walls and pillars

LOGS, MORE LOGS.

The Collins' Saw Mill is Ripping Logs Into Lumber Faster Than Farmers Haul. Thriving Industry.

Wednesday a Pioneer representative visited the Collins' saw mill on the bank of Cross Lake and there found a hive of industry that would give a "Weary Willie" a bad case of chills. The mill is well equipped with modern machinery and the power is furnished by a 60-horse power "Globe" steam engine.

At present thirteen men are employed about the mill but more will be put to work as soon as conditions will warrant. The average daily cut is about 15,000 feet of lumber at the present time and Mr. Collins expects his mill to turn out over 3,000,000 feet of lumber during this year.

Last year the average daily pay roll amounted to \$32.00, which will be exceeded by from \$10 to \$15 per day this year. The wheels in the lath mill will start revolving Monday morning, and the output from that department will amount to about 20,000 feet of lath each day.

This productive and money circulating industry is a good one, paying top-notch wages to its employes, many of whom are heads of families. The industry helps Pine City in more ways than one: giving farmers an opportunity to dispose of their logs, increasing shipments and the valuation of town property, enriching mercantile and other business enterprises. Although Pine City is the home of a number of prosperous industries there is room for more of a like nature that would help make the village a most thriving little city. And a Commercial Club could do much toward that end by inducing legitimate firms to locate here.

Mr. Collins, our informant, stated that a shortage of logs will occur very soon provided the farmers do not haul them in a great deal faster. He is paying a good price for logs but the poor slaughtering is evidently the reason for the scarcity of material.

School Notes.

Jack Frost creeps through the crevices at the school house these days.

Several children came to school Tuesday with cheek, nose or fingers nipped.

The appearance of the water plant has been greatly improved by painting it white.

The grades have been supplied with a set of books for nature study. They are animal stories from St. Nicholas.

A foundation has been laid for a reference library zoology, Hornaday's Natural History, and manuals of varieties and of insects have been received. Bird Neighbors and Birds that Hunt and are Hunted both handsomely illustrated with color plates, are also available. For the higher grades Ernest Thompson Seton's collections of animal stories have been provided. The zoological laboratory has also been furnished with half a dozen sets of instruments for the use of the class. With the arrival of the rest of the books ordered the department of animal study will be very satisfactorily equipped.

CREAMERIES REPORT.

Pine City.

Report of the Pine City Co-operative Creamery Co., from May 16th to Dec. 31st, 1904.

Milk received	1,088,260
Butter Fat lbs.	368,345
Butter lbs.	421,539
Average Test	3.78
Average Yield	4.00
Per Cent Over-run	7.5
Average price received for each lb. of butter	20.2
Average price paid for each lb. of butter	18.5
Received for butter	\$ 7,350.03
Received Pine City Bounties	500.00
Received Pine City Merc. Co.	50.00
Received from shares	165.00
Total	\$ 8,065.03
Butter	\$5,418.24
Salary	648.00
Ice	40.00
Wood, Dray, Labor, and Material	2,076.51
Total	\$8,218.24
Sinking Fund	475.12

Rock Creek.

The annual meeting of the Rock Creek Co-operative Creamery Co., was held Jan. 2nd, 1905, at which the following officers were elected: president and manager, O. Erickson; vice president, P. O. Backlund; secretary, W. E. Anderson (re-elected); treasurer, A. Bjork (re-elected); trustees, Peter Christenson (re-elected), John Glader (re-elected), N. M. Strandberg, F. P. Dey and John B. Saunier. J. E. Lindberg was retained as buttermaker.

The contract for putting up ice was let to C. F. Carlson and John Hundquist.

The following is the report of the Creamery Co., for eleven months ending Dec. 1st, 1904:

Milk received lbs.	2,757,846
Butterfat lbs.	1,111,080.9
Butter lbs.	1,299,899
Average test	4.02
Average yield	4.70
Per cent over-run	16.9
Average price received for each pound of butter	19.28
Average price paid per pound of butter fat	19.35

DEBITMENTS.

Cash on hand at beginning of year	\$ 1,174.26
Cash rec. for butter	24,617.04
Butter appl'd on freight	226.47
Butter appl'd on supplies	19.22
Butter sold to patrons	691.08
Dec. for 2 yrs. buttermilk	45.20
Buttermilk appl'd on work	46.80
Sinking fund	38.94
Salt etc. sold patrons	195.78
Boots etc. to butter mkr.	10.46
Interest	10.00
Total	26,990.57

At the close of the year the balance sheet shows a balance of \$1,391.70. Of this balance \$196.00 belongs to the secretary, leaving a true balance of \$1,195.70.

Respectfully submitted,
 W. E. Anderson, Sec'y.

Valentines of all kinds.

Fresh Stocks of the latest Valentines. Dainty pretty ones, expressing tender sentiments and the funniest of comics. Big variety to select from. Every kind at every price, from 1c. to \$2.50

Breckenridge's Pharmacy.
 Main Street, Pine City, Minn.

FLOUR, FEED, AND SEEDS OF ALL KINDS

We represent some of the very best flour mills in Minnesota, and can always fill your orders with the best flour that's to be had, and it is conceded by all house keepers that the best is the cheapest.

We can always supply you with all kinds of feed and coarse grains.

A full supply of seeds always on hand.

Cash Buyer of Live Stock and Produce.

The Farmers Exchange, J. J. MADDEN

LUMBER.

If you want to buy Lumber, Lath, Shingles, or anything in the building line, let us figure with you. Our Stock is complete and our prices attractive.

P. W. McAlLEN, PINE CITY.

Our flour will transport you safely across your baking troubles to good bread on the other side.

It is made from the best wheat bought direct from the farmers, carefully cleaned and is manufactured by men who understand their business in a mill equipped with the most modern machinery complete in every detail.

PINE CITY MILLING & ELECT. CO.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. Cheney & Co., Toledo, Ohio. Sold by Druggists, 75c. Take Hall's Family Pills for constipation.

Speedy Relief.

A salve that heals without a scar is De Witt's Witch Hazel Salve. No remedy effects such a speedy relief. It draws out inflammation, soothes, cools and heals all cuts, burns and

bruises. A sure cure for Piles and skin diseases. De Witt's is the only genuine Witch Hazel Salve. Beware of counterfeits, they are dangerous. Sold by J. Y. Breckenridge.

USES OF JAPANESE PAPER.

Manufactured Article in American and European Mills Can't Compete with the Oriental.

The growing use of Japanese paper for wrapping merchandise and for napkins by Americans and Europeans has familiarized both with some of the peculiarities of that product. On account of its softness and strength the Japanese article differs considerably from the papers made elsewhere. This is partly due to the material used and partly to the mode of manufacture. The former includes the bark of the mulberry tree and the fibers of other plants, and the latter involves hand work almost exclusively. The Anglo-Japanese Gazette says that one of

the most important plants whose bark is thus utilized is the kadsu. The bark is removed from tender shoots, not over a year old, and the resulting strips are cut into uniform lengths of a yard, for convenience in arranging in bundles. The strips of bark are softened in running water, and gently boiled in vats containing wood ashes. The mixture is then treated with channeled mallets on thick wooden planks. The product is twisted and turned frequently under water until it becomes a pulpy mass, which passes into the hands of the artisan who transforms it into paper. The fibers are fastened together, not with animal glue, but with a cement made of the roots of a certain plant. By using a rectangular sieve of very fine bamboo fibers, the necessary quantity of pulp is removed, and after all the water has filtered through the sieve the leaf is partly dried, after which it is ribbed with a soft instrument on a plank and exposed to the sun until com-

pletely dried, when it is easily detached from the plank. The manufactured paper in American and European mills cannot compete with the Japanese produce for the variety of uses to which it can be put. First, it replaces window glass, the manufacture of which has only recently been introduced into Japan. Fastened to a properly made lattice, it admits a gentle, uniform light to the interior of dwellings. Second, in the form of cord, it has astonishing strength. Gilt and cut into narrow strips it is used in embroidery. To it the Japanese owes their gentle brilliancy and that delicacy imparted to our medieval silks by filaments of Cyprus gold. Its incomparable constitution is closely connected with the Japanese arts of writing and painting, both of which use the soft brush where we employ the pen or pencil. The paper, rapidly absorbing India ink, enables the writer to use his brush freely and lightly on its surface.

Hearing of Insects.

The naturalists have not as yet been able to answer the burning question: "Can bees hear?" but their researches along that line have resulted in many queer discoveries. Simply because a bee has no ears on the side of its head is no sign whatever that he is wholly without some sort of auditory nerve. The last assertion is proven by the fact that grasshoppers, crickets, locusts and flies all have their ears situated in queer places—under the wings, on the middle of the body, and even on the sides of their legs. The garden slug, or shell-less snail, has his organs of hearing situated on each side of his neck, and the common grasshopper has them on each of his broad, fat thighs. In some of the smaller insects they are at the bases of the wings, and in others on the bottom of the feet.

To Gain Admiration.

You like admiration, undoubtedly. Well, people never admire a liar, a loafer, a sneak or a thief.—*Atchison Globe.*

Fry - Dr. Hess Stock Food, Poultry Panacea and Instant Louse Killer. The best preparations on the market for horses, cattle, hogs and poultry. Sold in Pine City only by "Smith the hardware man." Call and get one of Dr. Hess Stock Books—Free.

The reason that coughs and colds produce constipation and weaken the lungs is because they interfere with all digestion. That new discovery known as Kennedy's Laxative Honey and Tar cures all Coughs, Croup, Whooping cough and assists in expelling colds from the system by gently moving the bowels. It is pleasant to take and contains no opiates. Sold by J. Y. Breckenridge.

Tonic to the System.

For liver troubles and constipation there is nothing better than De Witt's Little Early Risers, the famous little Pills. They do not weaken the stomach. Their action upon the system is mild, pleasant and harmless. Sold by J. Y. Breckenridge.

Effective advertising produces desired results for the progressive business men of recent times

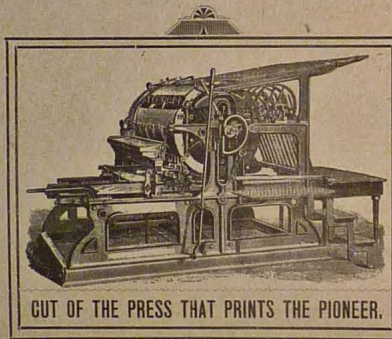

Those business men who believe their goods are so reliable that they will sell themselves, advertising or no advertising, generally wake up to the fact that some upstart rival is cutting into their business solely through the power of effective advertising

"NOW THEN"

IT IS A FACT that *The PIONEER* has the largest list of subscribers directly tributary to the capital of Pine county and therefore effective advertising judiciously placed in *Pioneer* space is bound to increase patronage; besides--giving regular customers an idea of how, when and where to buy

The Pine County Pioneer is the pioneer Pine county newspaper. It will interest you; it will keep you posted on local and other happenings. It will rejoice with you upon the arrival of an heir or heiress; shower a matrimonial venture with crysanthemums; and tender condolence in case of bereavement.

Paper is more expensive today than it was a year ago; ink has taken a raise; "help" demands better wages; and it costs more to conduct a newspaper now than ever before—but! The price of *The PIONEER* remains the same

HIS EXPERIENCE
TEACHES THEM.
That Dad's Kidney Pills Will Cure Bright's Disease—Remarkable Case of George J. Barber—Quick Recovery After Years of Suffering.

Delaware, Iowa, Jan. 23.—[Special]—The experience of George J. Barber, a well known citizen of this place, affords a fine illustration of the announcement to the world that Bright's Disease can be cured. Mr. Barber had kidney trouble, and it developed into Bright's Disease. He treated it with Dad's Kidney Pills, and today he is as well as ever.

In an interview he says:
"I got so much for Dad's Kidney Pills. I had kidney disease for fifteen years and though I doctored for it with the best doctors here and in Chicago, it developed into Bright's Disease. From I started to use Dad's Kidney Pills, and two boxes cured me completely. I think Dad's Kidney Pills are the best in the world."
"A remedy which will cure Bright's Disease will cure any other form of kidney disease." Dad's Kidney Pills are never to cure Bright's Disease.

There never was any heart truly great and generous that was not tender and compassionate.—South.

To Cure a Cold in One Day
Take Laxative Broom Quinine. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 50c.

A Wonder.
"Stranger, you advertise suburban lots 'as a stone's throw from the station.' Agent—Yes, sir. Have you seen the lots?"
"I have. I am the manager of Denmark & Gillie's shoe show, and I want to tell the man who buys the stone. He can have any salary he wants."—Cleveland Leader.

With an abundant cabbage crop confronting us in January as if we were still a long way from abating the smoke nuisance.—Indianapolis.

Says a Georgia philosopher: "Is a pity we are all more successful at digging than than we are at catching fish."—Atlanta Constitution.

A GREAT SUFFERER
LAY HELPLESS AND SPEECHLESS FOR HOURS AT A TIME.

Sinking Spells, Headaches, Rheumatism, All Caused by Poor Blood—Cured by Dr. Williams' Pink Pills.

When Mrs. Williams was asked for some details of the fearful illness from which she had so long suffered, she spoke as follows:
"Ever since I had nervous prostration, about thirteen years ago, I have had periodical spells of complete exhaustion. Any excitement or unusual activity would throw me into a state of lifelessness. At the beginning my strength would come back in a moderate time, but the period of recovery kept lengthening until at last I would lie helpless as many as three hours at a stretch."
"You were under medical treatment, of course?"

"Yes, when I became so bad that I had to give up my housework, in May of 1903, I was being treated for kidney trouble, and later the doctor thought my difficulties came from changes of life. I was not only weak, but I had dizzy feelings, palpitation of the heart, misery after eating, hot or nervous head-aches, rheumatic pains in the back and hips. The doctor did me so little good that I gave up his treatment, and really feared that my case was hopeless."
"What saved you from your state of hopelessness?"

"In July of 1903 I had a very bad spell, and my husband came in one day with a little book which told of remarkable cures effected by a remedy for the blood and the nerves, Dr. Williams' Pink Pills. He bought a box for me, and that was the beginning of my return to health. My appetite grew keen, my food no longer distressed me, my nerves were quieted, and my strength began to revive."
"How long did you take this remedy?"

"For two months only. At the end of that time I had regained my health and cheerfulness, and my friends say that I am looking better than I have done for the past fifteen years."

Mrs. Essie Williams is now living at No. 415 Cedar street, Quincy, Illinois. The pills which she praises so highly, cure all diseases that come from impoverished blood. If your system is all run down, Dr. Williams' Pink Pills are the very best remedy you can take. Any druggist can supply them.

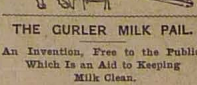

\$25.00 Separator

FOR \$25.00 YOU CAN SEPARATE 100 LBS. OF MILK INTO CREAM AND SKIM MILK IN 10 MINUTES. This separator is made of the best material and is guaranteed to last for years. It is the only separator of its kind that can be used for both cream and skim milk.

OUR OFFER. We will give you a free trial of our separator for 10 days. If you are not satisfied, we will take it back for you. This offer is good for a limited time only.

By return mail from the nearest druggist or by direct order from the SEARS, ROEBUCK & CO., CHICAGO.

THE DAIRY

THE GURLER MILK PAIL.

An Invention, Free to the Public, Which is an Aid to Keeping Milk Clean.

The Gurler milk pail, which is shown in the illustration, is a pail conceived by H. B. Gurler, of De Kalb, Ill., who has for years been making a high-class of sanitary milk for Chicago infants and invalids. It is not patented, neither does it know of anyone manufacturing it for the trade, says Dr. G. M. Twitchell, in New York Tribune Farmer. I have had a number made by a local manufacturer, at cost of \$2.25 complete, as shown, and of extra good material.

The cover is removed from one pail and the book which the gauge is attached can readily be seen. The absorbent cotton is spread between two layers of gauze, and the whole is attached to the pail by the covered spout, so that it is not opened until the milk is completed. The expense for gauze and cotton is slight, and these should be used fresh every milking. At the same time it must be distinctly understood that this is not a pail or shiftless man's pail. It is not built to relieve from any obligation resting on the dairyman, but it is one that will, to steps toward clean, sweet, pure milk.

The monthly profits per cow were \$4.00 on the vetch ration and \$4.50 on the cowpea ration.

One of the Jersey cows used in this test produced butter at a cost for food of only one and one-third cents per pound, when fed on the vetch ration.

Running cowpeas hay through a feed cutter did not decrease the waste in feeding this food.

Four and a half per cent. more butter was produced with soybean hay than with cowpea hay, if we take account of the portion of each actually eaten; however, a larger proportion of the coarse stems of the soybean hay was left uneaten.

When corn hearts was substituted for wheat bran the yield of butter was increased by eight per cent.

Why will farmers worth from \$5,000 to \$10,000 work for five cents an hour? How can a man who has had enough to make a good living for himself and family and lay up money besides, be content with such a wage even for a portion of the day? This very thing is being done every day by men who keep in the dairy cows that pay their own only five dollars a year after they have paid their board," remarks Prof. R. M. Washburn, of the Missouri Agricultural college.

There are thousands of such being kept in the state. They are those shallow bodied, long legged creatures, such as "The Money Losing Cow." This cow when put to a careful test was not able to make butter for less than 13.5 cents a pound. This is for food only and does not include care or barn rent. The cow

got all the food she could eat, but she was not able to eat enough over and above that which was required to keep her own body, to enable her to do economical work.

"Why waste labor on such an animal when the same stable and same care with a cow such as the money making cow will make a good profit. This cow made but for 4.2 cents per pound. The net profit on her in one year was \$55.17. While caring for a cow of this kind the farmer will be making about 90 cents an hour, or at the rate of nine dollars a day."

LITTLE POINTERS.
City milk inspectors report that the demand for pasteurized milk is increasing.

Poor cows in the herd rarely pay a profit. It is good business policy to weed them out.

The cows should be so fed and cared for as to keep them in full milk as long as possible.

A whitewashed stable is better in appearance and healthfulness than one that is old and weatherbeaten.

The delivery of milk in a sealed package is a help to purity, provided the milk is pure when sealed.

SOME DAIRY FEEDS.

Result of Experiments That Were Made at the Alabama Experiment Station.

A communication from the Alabama experiment station thus summarizes some experiments made:
The object of the feeding experiments herein described was to ascertain whether hay made from hairy vetch, cowpeas and soy beans could be advantageously substituted for most of the wheat bran in the ration of dairy cows. The following values per ton were used in calculating the cost of food:

Wheat bran, \$30; vetch hay, \$100; cowpea hay, \$10; cotton seed, \$12; cotton seed meal, \$20; cotton seed hulls, \$5.

Vetch hay proved fully equal in feeding value to a similar weight of wheat bran. By this substitution the cost of the food required to make a pound of butter was reduced 25 per cent which is equivalent to a monthly saving of \$22.50 in a herd of 20 cows.

With the vetch ration the cost of food for one pound of butter averaged ten cents in contrast with 13.4 cents when wheat bran was fed. The waste in feeding vetch hay was with cows about six per cent of the amount offered and with cowpea hay about 18 per cent; the latter residue, being unclean, is charged as a part of the ration.

That portion of the cowpea hay actually eaten proved fully equal in feeding value to a similar weight of wheat bran. Charging the cows with all the cowpea hay offered them, we find that cowpea hay had 56 per cent of the feeding value of wheat bran, one ton of this hay being equal to 1,720 pounds of wheat bran.

When wheat bran was worth \$20 per ton cowpea hay was worth \$17.50 and vetch hay \$20.

The monthly profits per cow were \$4.00 on the vetch ration and \$4.50 on the cowpea ration.

One of the Jersey cows used in this test produced butter at a cost for food of only one and one-third cents per pound, when fed on the vetch ration.

Running cowpeas hay through a feed cutter did not decrease the waste in feeding this food.

Four and a half per cent. more butter was produced with soybean hay than with cowpea hay, if we take account of the portion of each actually eaten; however, a larger proportion of the coarse stems of the soybean hay was left uneaten.

When corn hearts was substituted for wheat bran the yield of butter was increased by eight per cent.

WHICH KIND DO YOU KEEP?
The Two Kinds of Cows, One Makes Money for Its Owner, the Other Does Not.

"Why will farmers worth from \$5,000 to \$10,000 work for five cents an hour? How can a man who has had enough to make a good living for himself and family and lay up money besides, be content with such a wage even for a portion of the day? This very thing is being done every day by men who keep in the dairy cows that pay their own only five dollars a year after they have paid their board," remarks Prof. R. M. Washburn, of the Missouri Agricultural college.

There are thousands of such being kept in the state. They are those shallow bodied, long legged creatures, such as "The Money Losing Cow." This cow when put to a careful test was not able to make butter for less than 13.5 cents a pound. This is for food only and does not include care or barn rent. The cow

got all the food she could eat, but she was not able to eat enough over and above that which was required to keep her own body, to enable her to do economical work.

"Why waste labor on such an animal when the same stable and same care with a cow such as the money making cow will make a good profit. This cow made but for 4.2 cents per pound. The net profit on her in one year was \$55.17. While caring for a cow of this kind the farmer will be making about 90 cents an hour, or at the rate of nine dollars a day."

LITTLE POINTERS.

The delivery of milk in a sealed package is a help to purity, provided the milk is pure when sealed.

HE WAS UNCONVENTIONAL.

And Daughter "Ireany" Started In to Give Him a Few Corrective Instructions.

"I wish you wouldn't, pa," said the eldest girl.
"I wish I wouldn't what?" asked the plain citizen.
"Eat with your knife," replied the daughter. "It's so—"

"I wish you wouldn't, pa," said the eldest girl.
"I wish I wouldn't what?" asked the plain citizen.
"Eat with your knife," replied the daughter. "It's so—"

"No, look here," said the plain citizen. "I'm 60 years old and getting older every minute, but I'm not too old to learn. If you can show me any way of gettin' gravy up to my mouth with a fork I'm willing to try it. I've got to use a knife."

"You're mistaken about that. I know a heap of people that do it."

"Ireany," said the plain citizen, "you make me tired. I believe in being polite where there's sense to it. Manners is manners, and I always taught you manners when you was a young one. I wouldn't let you grab for the biggest piece of pie on the plate and I wouldn't let you spill, and when you drunk I made you drink quiet. You wasn't allowed to wipe your mouth on the napkin or speak with your mouth full. Them manners. Jers so long I keep my own knife on my own vittles I claim that it's my own business whether I put it in my mouth or not—ain't it?"

"Well, perhaps it is, but—"

"There's any 'but' about it. When I took you to the city last fall there was a feller setting at a table in the restaurant where we was dressed to kill he was, too, when he got through eating he lit a cigar—and wimmen setting right there—member that?"

"Yes, but—"

"No 'but' about it. If he'd 'en a boy o' mine I'd jerked him out of the room and taught him manners. When he was an attorney with us last summer you fussed because I sat down to the table in my shirt-sleeves. He set me down, but why ever a vent and he was all right. I think it was all right, too, but why is muddin any more proper than blue and white striped flannel, and how is a belt any better than suspenders? They're both to hold the pants up."

"Why, pa?"

"I hope you don't mean to say that you're a good education. Ireany, you talk a lot of poppycock. I'm willing to be polite, as I said, but I'm going to use common sense about it, and I'm going to wear my knife as much as I darn please and I don't want to hear any more out of you about it. Understand that, don't you, Ireany?"

"Yes," replied the daughter, meekly.

LITTLE HINTS ABOUT DRESS
Odds and Ends of Finery That Are Out of Present Filling the Feminine Eye.

Tab's finish may a bodice back. Plush is much used in smart bed-gear. Soft fabrics prevail for afternoon wear.

That French little velvet bow is being overworked. Warm colors reign supreme in the complete wardrobe.

A curious red the crushed straw-berry order is favored. Hand embroidery on tucks is daily for the debutante's frock.

The thimble fans are of racoon feathers with tortoise-shell stalks. Skirt flounces caught down at the bottom in puff effect are new—old.

Every gown has its own shoe or slipper to match and the stocking follows suit. Exquisitely lovely are the pale green art nouveau combs with jeweled floral top.

The blouse with strapped front and a long silk scarf pulled through is popular. Hats of moss, with clusters of bird berries tucked in the green, are a lovely novelty.

Velvet blouses, both simple and elaborate, are to be taken into consideration this year.

Gold and silver touches here and there set as high lights to most of the evening gowns.

A blouse that is "different" is of black tulle with a tucked chemise of white muslin.

There are brown blouses so alluring that one wants to buy a brown suit just to match them.

Fascinating things are shown in warm room gowns of elderdown, quilted satin and cashmires.

Mass creamy white roses on the back of your evening gown where they will rest against the hair.

To be chic the muff must be either big enough or little enough, between which extremes lies mediocrity.

Such a pretty little frock for a debutante is a baby blue chiffon trimmed with narrow black velvet ribbon.

Very lovely are the Louis collars of lace and ribbon embroidery, with rockery and long front tab bordered by chiffon ribbons.

Mock Cherry Pie.
These mock dishes are such a surfeit to those who have never partaken of them and a source of a great deal of guessing for the members of the family. One cupful of cranberries cut in halves, one cupful of raisins, seeded and cut in pieces, three quarters of a cupful of sugar, one tablespoonful of flour, the grated rind of a small lemon and a few bits of butter. Bake with crusta.—People's Home Journal.

CAUGHT BY THE GRIP REPEASED BY PE-RU-NA.

"The World of Medicine Recognizes Grip as Epidemic Catarrh." Medical Talk.

La Grippe is Epidemic Catarrh.
It spares no class or nationality. The cultured and the ignorant, the aristocrat and the pauper, the masses and the classes are alike subject to it. Grippe. None are exempt—men, women, children. Grip is well named. The original French term, la grippe, has been shortened by the busy American to read "grip."

Without intending to do so, a new word has been coined that exactly describes the case. As if some hideous giant with awful grip had clutched us in its fatal clasp.

Men, women, children, whole towns and cities are caught in the baneful grip of a terrible monster.

Have you the grip? Or, rather, has the grip got you? If so, read the following letters.

These testimonials speak for themselves, as to the efficacy of Peruna. In cases of la grippe or its after-effects:

A Southern Judge Cured.
Judge Horatio J. Goss, Hartwell, Ga., writes: "I am five or six years ago I had a very severe spell of grip which left me with systemic catarrh."

"A friend advised me to try your Peruna, which I did, and was immediately benefited and cured. The third bottle completed the cure."—T. J. Goss.

Cured in a Few Weeks.
Miss Jean Cowgill, Griswold Opera House, Troy, N. Y., is the leading lady with the Auburn Stock Co. She writes the following:

"During the past winter of 1901, I suffered several weeks from a severe attack of grip, which left a serious catarrhal condition of the throat and head. Some one suggested Peruna. As a last resort, after wasting much time and money on physicians, I tried the remedy faithfully, and in a few weeks was as well as ever."—Jean Cowgill.

Saved by Per-ru-na.
Hon. James R. Guillion, one of the oldest and most esteemed men of Omaha, Neb. He has done much to make it what it is, serving on public boards a number of times. He endorses Peruna in the following words:

"I am 68 years old, an hale and hearty man. Peruna has helped me attain it. Two years ago I had la grippe—my life was despaired of. Peruna saved me."—J. R. Guill.

WINCHESTER

Take-Down Repeating Shotguns
Don't spend from \$50 to \$200 for a gun, when for so much less money you can buy a Winchester Take-Down Repeating Shotgun, which will shoot out and outlast the highest-priced double-barrel gun, besides being as safe, reliable and handy. Your dealer can show you one. They are sold everywhere.

WINCHESTER REPEATING ARMS CO. NEW HAVEN, CONN.

Gold cash, what a warm-hearted companion that old—N. O. Pinyave.

Popular Line to the East.
The Pullman sleeping service of the Nickel Plate Road, the care and attention shown passengers, has made it a favorite with the non-resident, as well as those occasioned to travel. Every feature necessary to comfort and convenience of passengers, especially ladies traveling alone or accompanied by children, is provided. Colored Porters in Uniform are attendance to serve the wants of all and to take care of the luggage and baggage. Pullman Sleepers on all trains, and an excellent Dining Service, serving individual Club Cars, is a la Carte at moderate rates. When traveling East purchase your tickets via the Nickel Plate. Home All trains direct from the La Salle St. Station, Chicago. For full information regarding tickets, rates, routes, sleeping car reservations, etc., call on or address J. J. Calahan, Gen. Agt., No. 111 Adams St., Chicago, Ill.

Hope deferred hasteneth the last chapter in many a promising lifebook.

Do not believe Piso's Cure for Consumption has equal for coughs and colics.—F. Boyer, Trinity Springs, Ind., Feb. 10, 1900.

The steamhammer is always sure of an audience.—N. Y. Times.

CONSTANT ACHING.
Back aches all the time. Spells your appetite, weakens the body, worries the mind. Kidneys cause it all and Don's Kidney Pills relieve and cure it.
H. B. McCarver, of 301 Cherry St., Portland, O., writes: "I have been a sufferer of frequent back aches and other symptoms of kidney trouble which had annoyed me for months. I think a cold was responsible for the whole trouble. It seemed to settle in my kidneys. Don's Kidney Pills rooted it out. It is several months since I used them, and up to date there has been no recurrence of the trouble."
Don's Kidney Pills for sale by all dealers. Price 50 cents per box. Foster-Milburn Co., Buffalo, N. Y.

Salzer's National Oats

Greatest oat of the century. Tested in Ohio, Ill., in 1900. Yielded 100 bushels per acre. You can't beat that record in 1901.

For 10c and this notice we mail you one of our best seed samples. You can't beat that record in 1901. J. A. SALZER SEED CO. K. L. Wis.

Mixed Farming, Wheat Raising, Ranching.

Three great pursuits have again shown wonderful results on the FREE Home-stand Lands of Western Canada this year.

Magnificent climate—farmers plowing in their shirt sleeves in the middle of November.

All are loved to be more than pleased with the final results of the past season's harvest.—"Gleaner."

Coal, wood, water, hay is abundance—schools, churches, markets convenient.

SMALL GRAINS.

The Northeast Experiment Station Gives Important Information on the Subject.

The small grains, wheat, oats, barley and rye have been grown successfully at the northeast experiment station for the past six years. The yield of the different grains and quality, varied according to the season, the condition of the soil on which they were sown and the variety of seed used.

YIELD: Wheat has given an average yield of 17 bushels per acre. Its highest yield was 28 bushels and its lowest 20. These figures are to the highest and lowest yield are not the average for the whole crop for the year, but that of individual fields and varieties. Barley and winter rye has given an average yield of about 24 bushels per acre.

QUALITY: The best variety of wheat goes No. 1 hard. So far wheat has been practically free from ailments that commonly effect it in wheat growing districts. Even in this year the rust had no noticeable effect on the wheat. Oats as a general thing seems to be of better quality than farther south. The kernels fill out well and the whole plant is strong and vigorous. Our best oats this past year yielded 73 bushels per acre, that sown from the same going 2 tons per acre. Altho the ground upon which this oats grew was rich in facility there was no lodging. Quality was pronounced throughout the whole plant. Rust was quiet but in the oat crop this past year, but came on rather late in the season and did not seem to be very injurious. Barley and winter

rye have always been of standard quality. VARIETY: Blue stem has proven to be the best variety of wheat for this section out of 21 varieties tested. Its yield has been 2 bushels more per acre than any of the other varieties. Macaroni wheat is less productive than blue stem in this section. Some very good work has been done by Mr. Chapman former superintendent. Varieties were sown from Europe, Canada and various parts of the United States. Altogether 34 varieties were used covering a period of four years. From this lot seven varieties were found of superior quality, namely Improved Ligona, Lincoln, Early Gothland, Early Swedish, White Russian, and the improved Ligona was best, and for the past three years this variety has been used for field oats on the experiment farm, giving very satisfactory results. This oats may be secured for seed from the Northeast Experiment Farm, but only in 21 bushel lots, the object being to distribute the seed as widely as possible. Of 22 varieties of hard winter wheat tested the following were found to be best: Mansbury, Champion of Vermont and Houston's Golden Queen. Of these Mansbury has been used for field barley. The yield this past year was 30 bushels per acre.

Uses: There is but little demand for wheat on the market in northeastern Minnesota at the present time. All we have local flour mills and elevators the acreage must necessarily be small, its use being principally for chicken feed. Oats is by all means the better crop to grow. The lumbering industry affords a good local market, and aside from this oats is always a profitable crop for farm feed, especially for dairy cows. Not only the grain but also the straw is valuable feed. Barley like wheat has little market. Its growth should be for local use, especially for hogs. There is little necessity for sowing rye except for early spring pasture. Winter rye does very well. Our crop this past year yielded 20 bushels per acre, after being pastured for a month in the spring by sheep. One advantage of rye is that it will produce a crop on soil low in fertility. It is no relief however. Only a last resort on the way to failure for the farmer who allows his fields to become impoverished.

Next week we will take up the subject of meadows, hay and pasture.

Portland's Expo. Now Ready.

Continued from first page.

are in place. The mings and machinery festival ball, the machinery electricity and transportation palace and the Oregon building are nearly completed. The shelter pavilion, located just outside the colonnade entrance, is receiving the finishing touches, and some beautiful modeling work in decorative designs can be seen on this building and the colonnade entrance.

It is understood that the Montana mineral exhibit at St. Louis will be shipped direct to Portland. In addition large shipments will be made from new mining districts and mines which have recently opened up into prominence. The Moose Lake, Georgetown and Red Lion districts, situated west of this city, will make shipments of minerals to Portland.

The claim is made that the exposition site is the most beautiful ever utilized in any country for such a purpose, and covers 180 acres of land and 220 acres of water. In the park 38 specimens of large native trees and shrubs dot the well-kept lawns. The sunken gardens, where the most beautiful flowers will be planted, with a cascade effect of water running from a fountain in the center, will be one of the prettiest features. In the western part of the grounds will be located the experimental gardens, where many varieties of plants, both useful as market products and beautiful in horticultural effect will be grown. It is claimed that every effort is being made by the management to add to the natural beauty of the central ground by the planting of trees.

Constipation and Diarrhea.

Rea Bros' Cascarian dispels fevers and prevents sickness. It taken before meals in small doses or at bed time it is a very effective remedy. It cures constipation, biliousness and dyspepsia quicker than any other

remedy known. Price 50 cents a bottle Rea Bros' Cascarian is a tasteless laxative, tonic and cathartic. Sold by J. Y. Breckenridge.

Principle for Consumption.

It has long been known by the natives of South America that the juice of the fruit of the ripe pineapple, being of such antiseptic qualities, will thoroughly destroy the germs of catarrh, consumption and a gripe. A preparation known as Syrup of Pineapple Expectarant, prepared by Rea Bros. & Co., contains these essential qualities. It is sold by J. Y. Breckenridge for 50 cents.

No More Stomach Troubles.

All stomach troubles are removed by the use of Kodol Dyspepsia Cure. It gives the stomach perfect rest by digesting what you eat without the stomach's aid. The food outside the stomach's aid, the rest restores the stomach to health. You don't have to diet yourself when taking Kodol Dyspepsia Cure. J. D. Brackley of Alameda, Mich., says: "I suffered Heartburn and Stomach trouble for some time. My sister-law has had the same trouble and was not able to eat for six weeks. She lived entirely on warm water. After taking two bottles of Kodol Dyspepsia Cure she was entirely cured. She now eats heartily and in good health. I am glad to say Kodol gave me instant relief." Sold by J
