We will sell no wood after our mill begins to saw. *If you want to buy wood, place your order this week at our office.

PINE CITY LUMBER CO.

CARRIERS GET RAISE

Aggregate Expenditure of \$35,000,000 Will be Made for Rural Mail Service During Next Fiscal Year.

A report from Washington states that Postmaster General Meyer has approved the detailed adjustment of salaries of rural free delivery carriers, as submitted by Assistant Postmaster General DeGraw, and the new schedule will make a graded increase in the compensation of from 9 to 25 per cent, based upon the number of miles traversed by carriers, as shown by the records of the department. The new schedule will become effective July 1st.

The readjustment adopted, with the increase of upwards of \$6,000,000 made in the appropriation by congress, will involve an aggregate expenditure for rural service during the next fiscal year of nearly \$5,000,000.

According to the schedule all of the carriers from Pine City will receive \$900 per annum with the exception of the carrier on route No. 2. The schedule follows: Routes of 24 miles or more, \$900 per annum; 22 to 24 miles, \$810; 20 to 23 miles, \$800; 18 to 20 miles, \$720; 16 to 18 miles, \$620; 14 to 16 miles, \$720; 12 to 14 miles, \$604; 10 to 12 miles, \$468; 8 to 10 miles, \$432; 6 to 8 miles, \$306.

SCHOOL NOTES

The seniors are preparing for commencement.

The English XI class is studying Carlyle's "Essay on Burns."

Ten were perfect in attendance in the 8th grade during the past month.

Margery Labodny gave a recitation before the 8th grade Wednesday.

Kenneth Clark was absent a few days this week, on account of an injured hand.

The Virgil class has completed the study of the first six books, and is now reviewing.

The Freeman class has finished the study of Goethe's "Hermann and Dorothea."

The 8th grade pupils have been giving current events every morning during the past week.

Miss Weston gave an interesting talk on grand opera and operatic stars, Monday morning.

Lorena Sode returned to the 1st grade Monday after a three weeks absence due to sickness.

COMMISSIONERS MEET

Transact Much Business in Short Time—New Town Created—New School District—Another County Road.

The county commissioners met at the court house Tuesday afternoon in regular session, and adjourned Wednesday. They will meet again on July 8th at 1 o'clock p. m.

During their convention here, though short as it was, considerable business was transacted, showing that Pine County has a set of progressive and strenuous commissioners. All members of the board were present, as follow: C. C. Ives, chairman; Ed. Clough, A. Parish, C. F. Foster.

A new school district was formed in Polegana town from districts 22, 34, 47 and 48, making school district No. 75. The petitioners contend that their children were forced to go too far to enjoy school privileges. A strong remonstrance was made against the prayer of the petitioners, but nevertheless the commissioners saw fit to create the new district. The new school will draw from the schools at Beroun.

A petition, duly signed by 25 bondholders, was presented for the creation of a new town in the north end of the county. The commissioners, after considerable deliberation, decided to accede to the proposal and therefore ranges 15, 16, 17 and 18 in township 43 will hereafter be known as the town of Fleming. This new town was set off from the town of Partridge, thus making 26 township organizations in the county. The first meeting in the new township will be held on the 25th day of May, at 9 a. m., in order to formally organize and elect officers.

The commissioners granted the petition praying for a new county road to be established in the towns of Bremen, Kettle River and Sturgeon Lake.

Commissioners Clough and Johnson were appointed a committee to meet on June 15th to examine and determine upon a proposed new county road in the towns of Bremen, Pine Lake and Birch Creek. It was decided that the board go to the county poor farm Monday, May 13th, for a tour of inspection.

The usual number of bills were allowed.

Albert Blanehard twisted his ankle quite badly Monday and has since been unable to get about with his usual activity.

NOT FAVORABLE

The Executive Agent of the State Game and Fish Commission Voices His Opinion on Conditions Hereabouts.

One of the more prominent and, in fact, popular business men of Pine City, has received a letter from Carlos Avery in regard to the recent fish case which was tried in a municipal court. Mr. Avery is the executive agent of the game and fish commission, succeeding S. F. Fullerton in that capacity.

Among others, the certain business man in question has interested himself in fishing matters about here, deeming it proper that every good citizen should assist in upholding the arm of the law, and we publish in part the letter he received from Mr. Avery:

The result of Mr. Indrelus' work at Pine City, is very disheartening. If there is no sentiment in that locality which will uphold enforcement of the law, it seems almost useless for us to attempt to do anything. We have very little confidence in the ability of a local warden to do any good unless he is an exceptionally good man. I am willing to send a good man, Mr. Indrelus or some other first-class man, whenever you have a case that needs looking after, but I don't feel that I can put any man on in that neighborhood that will do us any good. It is hard to understand how a jury of twelve men sworn to decide a case could so violate their oath as these men evidently did in that case, because the evidence could not have been clearer. It does not matter at all whether there was any fish in the net or not. Their crime was the use of a seine and the evidence could not be any more direct or conclusive than it was.

Of course, we agree with you that we should not become disheartened and we will do all we possibly can to further game protection in your neighborhood.

"We will let you know a little later, however, in regard to the appointment of—or any other local man if the commission decide to do anything of that kind."

There is quite a bit of sentiment in regard to "going after" violators of the game laws, and the newly appointed executive agent and assistants are conducting a strenuous campaign this spring. Already an unusual number of arrests and convictions have been made throughout the state.

Fishing is the principal attraction at the various resorts during the summer season, and in order to attract the crowds of visitors, it is necessary that the fish be preserved for the open season. The game laws are enacted for the benefit of all, and any found violating the same should be prosecuted, regardless of their station in life. Let those who persist in using unlawful means be prosecuted, and let none stand in the way.

Appointed to Arrange Plans.

Last Saturday afternoon a meeting of B. F. Dayis Post No. 137, G. A. R., was held in Grand Army hall. A committee of three was appointed to arrange for the exercises on Decoration Day. They are J. E. Norstrom, Chester Pitt and Jacob Weekley. It has been decided that the exercises be held in Birchwood cemetery on Decoration Day afternoon, should inclement weather prevent Stetki hall will be used. Miss Maud Kendall has been requested to deliver the oration and other numbers will be provided. M. O. Gupta, quartermaster of the Post, will be marshall of the day and D. Grooley has been appointed to act as aid de camp. Further particulars will be published later.

The lecture, delivered by Prof. Cooper of Hamline university at the Presbyterian church Monday evening, was quite well attended. Mr. Cooper is a splendid speaker and he handled his subject, "The Manufacture of Boys," in a highly commendable manner.

CELEBRATE GOLDEN WEDDING

Tomorrow Will Be an Eventful Day in the Lives of Mr. and Mrs. Oliver Wilcox—Wedded Fifty Years.

Although they have been married for over fifty years, Mr. and Mrs. Oliver Wilcox will not enjoy the celebration of that happy day of the long ago until tomorrow. They were married in Sardinia N. Y., on the 22d day of April, 1857.

It is seldom that nature permits of two score years and ten of matrimonial life. Little did they think at the time Hymen joined their hands and hearts that fifty years hence they would still be "bearing each others' sorrows, sharing each others' joys." But tomorrow the venerable couple will be present at the home of their son, Robert, to receive the congratulations of those whose good fortune it will be to be present.

Mr. Wilcox was born in Sardinia, Erie county, 82 years ago last January. Mrs. Wilcox was born in Scholastic, county, and will be 68 years of age next November. After their marriage in 1857 they went west to grow up with the country. Four children were born to them, but only one, Robert, is now living. He is now serving as judge of probate.

Upon Lincoln's call "to arms," Uncle Oliver joined the army and after his service was completed he was honorably discharged as a company sergeant from Co. M, 1st Reg. Minn. Vol. Cavalry, mounted rangers. He is now a member of B. F. Davis Post No. 137, G. A. R., and his wife is president of the Envir. J. Stone Circle, Ladies of the G. A. R.

Mr. Wilcox has two brothers, while Mrs. Wilcox has two brothers and three sisters. It is expected that they will be present to join in the festivities of tomorrow, and as a large number of old timers have been invited, the occasion will be one not soon forgotten.

The Pioneer joins in congratulating Mr. and Mrs. Wilcox and wishes them many more years of happy married life.

Score Two Victories.

Since the last issue of the Pioneer two Pine City ball teams—distinctly separate—have met and vanquished two opposing teams.

Last Saturday afternoon the high school team played the Sandstone high school sphere chasers and proved their superiority by a score of 9 to 8. From all reports, the game was a good one and judging from the low and close score it appears that the game was one of interest throughout. Clint Breckenridge twirled and Wynne Long caught for the Pine City lads and they worked exceedingly well. During the evening a banquet was tendered the victorious thinking factory beards.

Sunday afternoon the formally organized Pine City base ball club met the doughty Tulips ball team of North Branch. Young Kowalek, Louis by name, zizzed them over the platter for the locals and by excellent support from his fielders, beat 'em out by a score of 9 to 6. John Axelson, a former Pine City slab artist, aspirant, Ludit, and Anderson, took turns in an attempt to snuff out the winning efforts of our boys, but they failed. Guy Michal caught Kowalek and from present indications looks a winner back of the bat.

Next Sunday afternoon the locals expect to while away their time knocking the dye out of an aggregation from St. Paul. They will do their best to win and a fiercely contested spilt will result.

ANOTHER FREEMAN CHILD DIES.

The second death within two weeks in the family of Mr. and Mrs. Chas. Freeman, of Rock Creek town, occurred Wednesday morning at 2 o'clock. The deceased was the eighteen months old baby of Mr. and Mrs. Freeman, and the cause of her death was croup. The bereaved have the sympathy of all in their double loss.

We Don't Keep Paint,
—We Sell it.

Paint is physical insurance. It prevents decay. Property that isn't painted soon runs down, the wood decays and its value shrinks. The wise man uses paint and keeps the wood pores closed and his property increases in value.

There is nothing that makes a house look well kept as does the use of good paint. It is economy to paint if you use the right kind, just as costs as much for labor to put on poor paint as it does to put on good paint, you should investigate the paint you buy and know that it is pure, honest paint. You won't have any trouble if you use FORMAN, FORD & COMPANY'S PAINT, for that is 100 PER CENT PURE, and won't fade, peel or chalk off.

It is made of pure white lead, pure oxide of zinc, pure turpentine dryer and pure Old Parisian linseed oil. The lead covers the surface, fills the pores, and nine hundredths of the combination, makes the paint stay on and holds the color fast. The linseed oil is a preservative of the wood, while the turpentine dryer takes out the moisture and leaves a hard, glossy surface that the sun, rain or snow does not affect any more than it does plain water.

Let us tell you more about this pure paint before you buy.

BRECKENRIDGE'S PHARMACY.

BETTER FLOUR

Our one AIM is to make Flour that is a little better than the other fellow's. We know we do this because we make daily comparisons, and—we are good judges.

If you are among the few that are not using our Flour just try one sack. You can get it from any grocer.

A
Corker
!!

That's what people say about our prices and stock.

We are regular cranks when it comes to quality. We believe that the best particular people on earth when it comes to picking out our stock, and will accept nothing but the best from the manufacturers. Consequently, everyone who sees our stock says that it is a corker. Before you buy lumber of any kind, drop in and see us. Remember we said before you buy

MIDLAND LUMBER AND COAL CO.

E. F. GALLES, Mgr.

THE PINE COUNTY PIONEER.

W. P. GORTER, Publisher.
PINE CITY, MINN.

A Great Good Charity.

The latest charitable enterprise of Helen Gould is notable not only in itself, but for its suggestion of a way in which the city slums may be measurably cleared of a large class of persons who, helpless there, might in a different environment become industrious and independent. Miss Gould has purchased near Greeley, in Colorado, a tract of 100,000 acres. She is ready to expend \$100,000 for implements, seeds and fencing. The land is to be held in trust, and the buyers who prove themselves worthy will be allowed extra terms of payment. They will have the advantages of instruction, with access to library, and the sanitation of the tract will be supervised by skilled and practical directors. Early in the operation the shifflers will be weeded out. No better choice of location could have been made. The town of Greeley was settled many years ago by colonists from the east inspired by the advice of Horace Greeley. From the beginning, says Philadelphia Ledger, it has been conducted in an orderly fashion as any New England village. No liquor has ever been sold there; no rough characters ever found. It congenitally has developed into a prosperous and beautiful little city of well-kept streets and neat and luxurious homes. It is in the midst of a vast stretch of fertile land, adapted to grains and fruits, and absolutely unequalled for the quality and yield of its potatoes.

A temperance crusade in England seems to have taken on much the same aspect as many famous recent court trials, inasmuch as it is largely a matter of expert opinion. The temperance leaders were somewhat set back by a manifesto published in the London Lancet, the great medical publication of England, in which 16 eminent professors and practitioners testified, over their own names, that alcohol has valuable qualities as food and medicine, giving that article a strong recommendation for usefulness and merit. Now the temperance men are trying to get a testimonial to the opposite effect from the same or a larger number of equally prominent professionals. But would not such a procedure leave the matter just about where it was before, asks the "Troy Times," with the public compelled to make up its mind solely on its own construction of testimony made additionally confusing because doctors of such standing so utterly disagree? And where does moral suasion come in?

Good Housekeeping.

There is no preservative of love in married life so sure as good housekeeping; and there is no profession so absorbing, and demanding preparation and skill, as that of the housewife. When a young woman marries she as really enters upon the practice of a life profession as does a young man when he is admitted to the bar, or graduate of a college, after three or four years spent in preparation. The man is willing to equip himself fully for his part of the partnership. Does it seem businesslike and good faith, asks New York Weekly, for a woman to take the place of the second partner with a most indifferent training, or none at all?

Columbia University, New York, is to have a mathematical museum, the nucleus of which will be the collection of mathematical models purchased for the university by ex-President Seth Low at the world's Columbian exposition in Chicago in 1893 and presented by him to the department of mathematics. Among other things will be a collection of models constructed by Dr. Martin Schilling of Halle, Germany, and also one belonging to Prof. Weierstrass of Barmstadt and a set of mathematical instruments from the institute of Dr. G. Corradi of Zurich.

The new post office building in City of Mexico is the first government building in Mexico of any architectural design worthy of the name. It is of fireproof construction, its frame being the first steel frame to go up in the city. Architecturally the new post office is unexcelled by any building in the country, and as a thing of real beauty surpasses, in the opinion of many, even the congressional library at Washington. It is far superior to any office building owned by the United States government.

Mr. Schubert's program immensely simplifies the situation. All we have to do is to hustle right hard and we'll catch up with all that overspecialization. But, meantime, hasn't some resourceful financier got away with our money?

The department has ordered an army officer to ride horseback from Portland, Ore., to New York. Perhaps this is a mistake because the circumstances of the ride which is to seek a lengthy accident report.

WANT TO DISCLOSE CASE OF THE STATE

HAYWOOD'S COUNSEL AT BOISE
ASK FOR A BILL OF PAR-
TICULARS.

Court Delays Decision—Arguments of Lawyers Richardson and Darrow for the Defense Are Answered by Senator Borah.

Boise, Idaho, May 7.—Judge Frank Wood will decide on Wednesday evening on the eve of his trial for the murder of his wife, Mrs. Anna Steinberg. William Haywood is entitled to receive at the hands of the state a bill of particulars specifying the overt acts charged against him. The motion of the defense for this disclosure of the case of the state was argued at length Monday, and at the time of the decision the court announced that it would make a decision at the time stated.

The prisoner, under guard of Sheriff Hodgkin and two deputies, was brought into court for the argument, and of his counsel both Frank Richardson of Denver, and Clarence Darrow of Chicago, and his attorney, Senator Borah alone spoke in behalf of the state, although James H. Hawley, his associate, was in the court room when the proceedings began. The discussion always earnest, was characterized at times by deep feeling and dramatic intensity.

Argued for Defense.

Mr. Richardson when making the argument, contended that the indictment was lacking particularity; that it left the defendants in the dark as to the nature of the case to be presented against them, and the defense were entitled to a more specific statement of facts. He submitted an affidavit citing a great number of authorities and precedents in favor of his contention.

Mr. Haywood in reply declared that the defense was seeking a disclosure of the proof in the hands of the state, rather than of the prosecution, and asserted that the reports contained in the affidavits did not support such a contention.

Mr. Richardson, who closed the argument, began by saying that it was the duty of the defense to secure a disclosure of the evidence in the hands of the prosecution, and asked why the defense was not entitled to such a showing. He made a spirit-like attack upon the attitude of the prosecution towards its witnesses and evidence, describing it as mysterious, unfair and unjust. He asserted that the defense had been treated as one of the worst of criminals, and the accused laid stress upon the difficulty of securing testimony from distant places and the danger to the defense of "surprise" testimony, and passionately asserted that the rights of the prisoners were as much in the hands of the defense as in the keeping of the defense.

Ready for Trial Otherwise.

In answer to Judge Wood, Mr. Darrow said that the defense was not ready to go to trial, but Mr. Richardson interrupted him to make the qualification that the defense was as ready as possible. In view of the circumstances where the case of the state was withheld from it, he said that in all other respects the defense was ready.

Mr. Richardson, responding in brief to the argument of Mr. Borah, said that the counsel for the state made no distinction between the overt acts between the overt acts which the state would seek to show against the prisoners and the evidence by which it would seek to show the commission of the alleged overt acts. The defense wished to know what the overt acts were.

Mr. Borah closed the discussion with a spirited speech in which he defended secrecy in obtaining witness, instancing the loss of two in Colorado. Sunday, disavowed a desire for any man's blood, and avowed the innocence of the state's chief witness.

The suit will be based on the testimony showing that the contractor collected from the state for 752 thermometers and installed only 353, and on the substitution of domestic for barometric glass and an inferior glass for official fumigation. Mr. Richardson & Co. general contractors, for the fumigation, Joseph M. Huston, architect for the building commission and also the board of grounds and buildings, among those involved in the scandal.

GEN. J. K. HUDSON IS DEAD.

Well-Known Soldier and Newspaper Man of Kansas.

Topeka, Kas., May 6.—Gen. Joseph K. Hudson died at his home here Sunday. He was stricken with heart trouble in December last, and ever since then had been in a failing condition.

Gen. Hudson was born in Carroll County, Mo., in 1848. He joined the Third Kansas volunteers at the opening of the civil war and was mustered out as a major in 1865. He served in the Kansas legislature in 1871 and later became state printer. In 1878 he became publisher of the Topeka Capital, and was soon elected to Congress as a political factor. In 1888 he was appointed brigadier general of volunteers in the war with Spain. Following the conclusion of peace he was made major general.

Eleven "Black Hands" Convicted.

Wilkes-Barre, Pa., May 7.—Eleven of the 12 Italians who had been on trial here charged with "Blackhand" in the Lehigh county court Monday were sentenced to prison. The second verdict of the jury was opened. The other two defendants were acquitted.

Deaths in Swimming Bath.

Bethel, Me., May 7.—Ernest McPiersen, aged 26, son of a prominent cotton manufacturer of Ontario, Canada, was drowned in the plunge at Oregon Springs Sunday night while swimming.

FRISCO CAR MEN ON STRIKE

STREET RAILWAY EMPLOYEES
QUIT, TYING UP TRAFFIC.

**Company Will Attempt to Operate
with Non-Union Crews; Calling on
Authorities for Protection.**

San Francisco, May 6.—The street car men and conductors struck Sunday, tying up the street car system of this city. In lieu of the cars, all sorts of vehicles, from automobiles to express wagons, were used by the public.

The motorists and conductors of the United Railroads early Sunday morning voted to declare a strike, after having failed to obtain an eight-hour day and a flat wage of three dollars.

The strikers have been reinforced by the stationery firemen, who demand recognition of their union and an increase of wages from \$2.75 to \$3.50 per day. The drivers and other allied trades will come to the support of the platform men. There was no disorder, as no attempts were made by the railroad officials to take cars from the barns, but it is expected that an effort to run cars will be made Monday.

Mr. Patrick Calburn says that the United Railroads, which will still operate its lines independently of the car men's union if realistic, will demand from the city and state authorities the full protection guaranteed by the law. The officials are making elaborate preparations to run cars in the event of a strike and they claim to have a hundred experienced men ready to take the places of the strikers.

In the event of the city and state being unable to provide protection in case of serious trouble, federal assistance will be sought. It is believed that the United Railroads Investment Company, of New Jersey, is the holding corporation of the United Railroads, a corporation foreign to this state. It is reported that Farley, the noted strike-breaker, is in the city and that he will have charge of the strike-breaking operations.

TO PROBE KANSAS CITY POLICE.

Charges of Graft and Corruption Will Be Investigated.

Kansas City, Mo., May 6.—Monday the board of police commissioners will begin the promised investigation of charges of police corruption. The probable advent in Kansas City with in the next week or so of Gov. Polk, who has practically said he would come here and take a hand personally in the case, has caused the commissioners to postpone the promised investigation.

For a long time allegations have been made that graft was commonly practiced on the force. It has been charged that it extended all the way from the protection of petty criminals to the highest officials. The commission of the grave crimes of murder and dangerous crooks shielded, and appointments made at the behest of certain factions to pay political debts and with no consideration of the fitness for office of the appointees.

The commission of the grave crimes of murder and dangerous crooks shielded, and appointments made at the behest of certain factions to pay political debts and with no consideration of the fitness for office of the appointees.

GRAFTERS WILL BE SUED.

Pennsylvania Capitol Scandal to Result in Prosecutions.

Pittsburg, Pa., May 6.—Civil and criminal suits will be brought by Attorney General John J. Connelly on behalf of the state capital city. A complete list of those who will not be named as defendants will not be known until the inquiry is completed.

The commission will hold no more public sessions under the legal rights of attorney of state.

The suit will be based on the testimony showing that the contractor collected from the state for 752 thermometers and installed only 353, and on the substitution of domestic for barometric glass and an inferior glass for official fumigation. Mr. Richardson & Co. general contractors, for the fumigation, Joseph M. Huston, architect for the building commission and also the board of grounds and buildings, among those involved in the scandal.

GEN. J. K. HUDSON IS DEAD.

Well-Known Soldier and Newspaper Man of Kansas.

Topeka, Kas., May 6.—Gen. Joseph K. Hudson died at his home here Sunday. He was stricken with heart trouble in December last, and ever since then had been in a failing condition.

Sail 750 Miles in a Balloon.

Castro, May 6.—Maurice Farman and a friend ascended from St. Cloud on Wednesday evening in a balloon of 1,600 meters gas capacity, and landed at Coblenz, Germany, Friday, having traveled a distance of 750 miles.

FINANCIAL PROBLEMS OF THE SEASON.

UNFROCKED RECTOR AND WARD LOCATED

**MARRIED MINISTER, WHO Eloped
WITH 17-YEAR-OLD GIRL, RE-
PORTED FOUND.**

**Rev. Cooke Said to Have Admitted His
Identity Offered to Go Back to
Long Island If Assured Protection
from Mob Violence.**

New York, May 6.—Rev. Jere Cooke, unfrocked rector of St. George's Protestant Episcopal church of Hempstead, L. I., and 17-year-old Florence Whaley, his ward, who eloped last Monday, have been located in a hotel at Peekskill, N. Y., according to information received Saturday. It is reported that the police of Nassau county have issued a warrant for Cooke's arrest and that officers have been sent to Peekskill to serve it.

Mrs. Whaley, grandmother of the missing girl, went before Judge Getting at Mineola and swore out the warrant for Cooke's arrest. While the coroner positively what charge was made, it is rumored to be abduction, Miss Whaley being still a minor.

Cooke Fears Mob Violence.

Two switches and a small steamer trunk constituted the baggage of the couple. The elopers appeared to be perfectly happy, however, and no sign of alarm was shown when they heard the tide of the disease. Blood poisoning set in and on Saturday other abscesses started to form in the left ear and throat. The patient's condition was aggravated by a bad attack of rheumatism. Monday morning the physician set a bone and a doctor, who arrived in the afternoon, Dr. Watson, said he had received anonymous letters threatening his life three days before he left Hempstead, and this was the main reason for his flight.

August Belmont Ousted Cooke.

The disappearance of Cooke and Miss Whaley has been the principal concern of the church, of which Cooke had been rector for five years. The church is one of the most important on Long Island, and includes among its parishioners scores of wealthy country homes in that vicinity.

Among the church members is August Belmont, who took an active part in the proceedings following the minister's disappearance, which resulted in the pulpit being declared vacant and Cooke being deposed from his ministry.

Makes Dope of His Ward.

Miss Whaley is heiress to a fortune of \$125,000. She was given to the care of Cooke by her dying father. She trusted his pastor-guardian with the confidence of innocent childhood, until she was completely in his power.

When Cooke eloped with his ward he abandoned his wife, who is now prostrated over the scandal.

Bishop Burgess deposed Cooke at the request of the offending rector, who acknowledged his wrongdoing in a letter.

ESTRADA IS IN COMMAND.

**He Will Put End to Lawlessness in
Puerto Cortez.**

Puerto Cortez, Honduras, May 1, via New Orleans, May 7.—Gen. Juan Estrada, of the Nicaraguan army, was Monday appointed commandant of Puerto Cortez, in place of the Honduran commandant. The appointment probably ends the lawlessness exhibited in the port of Puerto Cortez, which was recently beaten. Gen. Estrada, ever since the Nicaraguan invasion, has been strict with his men, severely punishing infractions of good order. The investigation into the assault upon the negro he is still under way.

NORTHERN TEXAS SWEEP BY TORNADO

**SEVERAL TOWNS ARE WIPE
OUT OF EXISTENCE BY
GREAT STORM.**

**Loss of Life is Small—Many Persons
Suffer Severe Injuries—Wires Are
Blown Down and Details Are
Scanty.**

Fort Worth, Tex., May 7.—A storm of wind and rain accompanied by general thundering and considerable damage in northern Texas Monday and which at some places assumed the proportions of a tornado, according to meager reports received here, resulted in the loss of at least three lives, the injury of many other persons and great damage.

Several villages were wiped out, but because of the prostration of both telegraph and telephone wires, details are almost impossible to obtain.

At Deport, one of the largest villages in Lamar county, 20 miles from Paris, the storm passed northeast cutting a path about 300 yards wide. The intensity of the storm was not touched, the damage being in a resident district. The Baptist parsonage was blown to pieces, its timbers and the furniture scattered over the ground. R. H. Bryan's residence was demolished. As yet it can be ascertained that one was lost at this point. Crops are badly damaged.

It is reported that at Halesboro, in Red River county, the wife and Andrew Bell were hurt.

Develops Into Tornado.

A terrific wind passed over Sulphur Springs about two hours past noon Monday to the northeast of Sulphur Springs. The wind assumed the proportions of a tornado, carrying death and great property damage in its wake. A passenger train on the Cotton Belt was held up by the train crew until the storm passed. The locomotive could see the lightning cloud as it swept across the tracks and cut a swath through the country. As soon as the storm passed the train proceeded and no one was hurt.

At the village of Antioch, Mo., Pleasant Grove, which is also called the white city, was completely destroyed. Antioch is about seven miles north of Sulphur Springs. This is in the tornado belt and most of the houses are provided with storm cellar. To this fact is due the escape of a number of those who were caught almost in the path of the storm. The home of James Ferguson was destroyed, entailing a loss of about \$10,000. Three barns on the place were also destroyed and many head of live stock killed.

Man Crushed by Debris.

The renter of the place named Barzil, whose family consisted of himself and his wife, was crushed to death when coming and made a run for the cellar at the Lemmons home. Hardi was caught by the wind before he could reach shelter and crushed by flying debris. Five of the children reached the cellar in safety, but Mrs. Barzil and two of the children were fearfully injured and fears are entertained for their recovery.

The home of James Ferguson was destroyed and Mrs. Ferguson was dangerously hurt by flying debris. Ben Foyne and his wife were badly hurt when their home was blown down, but it is thought they may recover. Mrs. Sis Lackey was hurt and will probably die.

There were others injured at Antioch, but it is impossible at this time to learn their names. Crops in the fields were also injured which was unusual with so little rain.

The village of Birthright was destroyed and it was known that at least one death occurred there and it is said one person was fatally hurt. Crawford Martin and J. P. Conner were seriously hurt and may die. Birthright is a village of between 300 and 400 persons.

EX-POLICE CHIEF INDICTED.

**True Bills Against Collins and Other
Chicago Officials.**

Chicago, May 7.—The grand jury Saturday evening returned several indictments resulting from the late morality campaign. Those indicted are John M. Collins, former chief of police; W. L. O'Connell, former commander of the police works and manager of the Dunne campaign; E. M. Roche, former city business agent and treasurer of the Dunne campaign; Frank D. Comerford, former attorney of the police department; and Detectives J. McGrath and P. J. McNulty.

Collins was charged with violating public records, conspiring to violate the civil service laws and other offenses; the others are charged with conspiracy to violate the civil service law, and to do an illegal act in the formulation of the police code; that is said to have collected funds for Dunne's campaign.

TWO KILLED IN A COLLISION.

Interurban Electric Cars Crash Together Near Bowling Green, O.

Toledo, O., May 6.—A southbound limited car on the Toledo Urban & Interurban electric road collided with a northbound local car of the same line Sunday night about one mile south of Bowling Green. It is reported that two persons are dead and over a score injured.

MINNESOTA NEWS

Interesting Items Gathered in the Gopher State

Fight With Wild Beast.
Mankato.—James Mullen, owner of a county poor farm, tells of a thrilling adventure that he had with a strange animal that he and two other men discovered in a cave on the bank of the Le Sueur river.

With his hired man, Tom Jones, and George Folsom, who was walking along the bank about noon when they discovered the cavern, the mouth of which were piled skulls and other bones of cattle and sheep and smaller animals. They sent Mullen's dog into the cave, and a fierce fight ensued that was terminated by the animal dashing out and leaping over the dog. Mullen struck the beast on the head with a spade as it fled past him, but this did not stop it.

After another brief encounter with the dog, the animal made off. Mullen states that it was as large as a mountain lion or leopard, but he could not say what color it was. He believes the animal is the same one that has been seen about Lamberton and in this country during the spring, and that recently tried to pull down a steer on the Columbus Ballard farm near by.

» Text Value of Clay.

Mankato.—Prof. N. C. Winchell, the state chemist, arrived in the city to examine the deposits of blue clay along the banks of the Blue Earth river. They took samples from several points on the banks of the river and examined the surface.

The banks of blue clay are believed to be the last remains of the chronicles of Le Sueur, the French explorer, who sent several ships of his fleet to France more than two centuries ago in the belief that it was rich in minerals. Recently the clay has been a good deal of talk in the newspapers in the Blue Earth and Le Sueur river valleys, and the question has been expressed that Le Sueur may not have been mistaken.

Gold, copper and precious stones have been found at different points in the valley.

Woman Inspector.

St. Paul.—Mrs. Perry Starkweather of Minneapolis was appointed to the position of inspector for the state labor department, the new position created by the legislature. Mrs. Starkweather has been making a study of the labor laws and the condition of women in this and other states. She drew up the bill which was passed and signed by the governor.

The duty of the woman inspector is to visit places where women are employed to make recommendations for their welfare. It is said that there are \$3,000 women in the state working for wages and that their annual earnings are approximately \$9,000,000.

Plant Rainbow Trout.

Parkersburg.—Ten pairs of rainbow trout have been received by the local Protective association and have been placed in Fall creek, a few miles east of here. The association also expects to secure about twenty cans of black bass, try and about 2,000,000 young pike to be placed in the lakes near Parkersburg. The association has had a number of the best lakes seined and many rough fish caught for use as food were taken out and destroyed.

Nurses' Board Chosen.

St. Paul.—Governor Johnson has named the five members of the state board of examination and registration of nurses. Under the law one member must be a physician and the others graduate nurses. The names were selected here: Dr. Jeannette McLean; St. Paul; Edith Remond, Minneapolis; president of Hennepin County Nurses' association; Bertha Johnson, St. Paul; surgical nurse city and county hospital; Helen Wadsworth, St. Paul; teacher of nursing in St. Luke's Hospital and Eleonore Hamilton, Minneapolis. The board will shortly meet to organize.

Memorial Day Order.

St. Paul.—Levi Longfellow, department commander of the Minnesota G. A. R., has issued his order for the annual observance of Memorial Day to the G. A. R. posts in the state. As May 24, 1907, is Sunday, the preceding Sunday, May 26, will be Memorial Sunday, when the posts will attend divine services in a body. He urges May 24 as a day for memorial exercises in the schools.

Didn't Feed Horse.

Minneapolis.—Abraham Jacob, a peddler was sentenced to the workhouse for thirty days for starving his horse by leaving him in the barn for two days without food or water.

Use of Net Costs \$10.

Minneapolis.—William Meyer of Bapst was arraigned on the charge of illegal fishing with a net in the Blue Earth river at Caledonia and paid a fine of \$10. The charge was preferred by V. H. Jordan, state game and fish warden, who captured six cans at Caledonia while fishing with nets. They had chosen weeds of all kinds for their fishing grounds. These were discarded at once. He was a well-to-do farmer and had a grown up family. He can't recover.

THE NEWS IN BRIEF.

Three children named Dominique were burned to death in Blind River, Mich.

Fire in the printing plant of the Blanchard Press New York, did \$125,000 damage.

Ten persons were injured when a Santa Fe passenger train was derailed at Norborne, Mo.

John W. Lawson, the Boston financier, was received in private audience by the pope.

Gen. Kuroki and staff were greeted at Misouka by a great crowd of Japanese of western Montana.

The Burlington flyer was wrecked near Manhattan, Mont., one passenger being killed and 25 injured.

W. R. Haymaker, formerly an attorney of Frank Worth, was admitted to a room in a Kew City hotel.

George B. Butler, portrait painter, died at his home, near Croton Falls, N. Y. He was in his seventieth year.

All bids for officers' quarters at the naval training station at Lake Bluff, near Chicago, were rejected as too high.

Three white men and 15 natives were killed by an explosion in the Modesto gold mine in California.

Mrs. Mary Hunter, of Winona, Minn., formerly prominent in society but for several years a recluse, was found dead.

King Carlos of Portugal will visit Argentina after his trial in Brazil next year, according to a cable dispatch.

Max Frisch, painter, artist and illustrator, died at his home at Plattsburgh, N. Y. He was an animal painter of note, 45 years old.

Miss Harriett T. Haskell, for 40 years head of Monticello seminary for young ladies at Godfrey, Ill., died of heart trouble, aged 72.

President Dillwyns of the Lake Carriers' association, said that the loss of lake traffic would be greater this season than ever before.

The jury that heard the case against Victor Roland O'Shea, of Chicago, charged with killing his wife, disagreed and was discharged.

Rev. Henry Bryant, a colored preacher of Bridgeport, O., was buried in Grand Rapids, Mich., his funeral service having been held at his home.

David Rosenthal, a Cincinnati artist, has sued Edward C. Wettengel for \$20,000 for slander because Wettengel said unkind things about his work as a painter.

A dispatch from Klamath Falls, Ore., says Count Otto von Wallenstein, who was supposed allied with White Bull, is alive and well at Klamath Falls.

Two identical bids for the Niagara Falls (N. Y.) coal contracts for the schools may lead to an investigation of an illegal combination of coal dealers of western New York.

Secretary Taft decided against the steam shovel men employed in the Pacific Northwest, and raised a large increase of pay. In some other matters he ruled in favor of the workers.

Theodore Nemooy brought suit against the Chicago-Navy Electric Air Line Railway company in Chicago, to enjoin it from doing business in Illinois and asking an accounting of its books.

The w. w. Hughes, former dean of the law school of Columbia university, and legal adviser of Gov. Hughes of New York, committed suicide on a Hudson river steamboat. Overwork had brought on a nervous strain and insomnia.

The trial of three former employees of the禹钛 Steel Tube company, charged with conspiracy to defraud the government by supplying defective boiler tubes for war vessels, was begun in Pittsburgh. One of the defendants pleaded guilty and turned state's evidence.

"Largest Man" Is Dead.

Jacksonville, Ill., May 7.—George W. Shepard, probably the largest man in the central states, weighing 535 pounds, died Monday of paralysis. He was 51 years old.

THE MARKETS.

NEW YORK—COTTON. Steers, May 1, \$4.25-\$4.50; hog, \$2.75-\$3.00; mutton, \$2.25-\$2.50.

ST. LOUIS—COTTON. Steers, \$4.25-\$4.50; hogs, \$2.75-\$3.00.

CARES OF BUSINESS WOMAN

When Placed Where Accidents Are Likely to Happen, She Should Always Carry Insurance—Laws Relating to Adopted Children.

BY KATHERINE LOUISE SMITH. (Copyright, 1908, by Katherine Louise Smith.) There are times when it is desirable for a woman to take out an accident insurance policy. This is a woman who may be employed in some factory or office building where conditions are such that there is danger from fire or accident at any time. If she is a moneyed woman she is exposed to accidents on the street and in traveling. When a woman has a child, there is a risk of railroad casualties.

Three white men and 15 natives were killed by an explosion in the Modesto gold mine in California.

Mr. and Mrs. John C. Haskell, of Winona, Minn., formerly prominent in society but for several years a recluse, was found dead.

King Carlos of Portugal will visit Argentina after his trial in Brazil next year, according to a cable dispatch.

Alfredo S. Ladd, of Winona, Minn., was rejected as too tall for the naval training station at Lake Bluff, near Chicago.

Miss Harriett T. Haskell, for 40 years head of Monticello seminary for young ladies at Godfrey, Ill., died of heart trouble, aged 72.

President Dillwyns of the Lake Carriers' association, said that the loss of lake traffic would be greater this season than ever before.

Sporting Gossip.

American sport with the season of 1907 at hand enters upon what promises to be a banner year. Judging by last season's records, high-class performances in almost every branch are assured; but best of all, from the democratic point of view, the athletes on diamond, track, field and river surpass those of, say, two years ago by probably two to one.

There is no question but that the advent of the public school boy in almost every branch of sport, the heavy schedules for the year, calculated to give everyone a chance either individually or as a member of a team, are signs of unusual health in sport. Stars of the athletic field will, as hercules, engage the most widespread attention, but they will by no means cast into the shadow the newcomer or the good average performer who is a credit to our country.

It is to be hoped that the new national association will be successful in its efforts to bring about a spirit of classification in sport.

These are your duties in order:

You should write to the deceased if he left any property.

You should offer the will for probate, prove the will, file bonds, give notice, make and return an inventory according to the law of the state.

You must collect the property, and after paying debts must dispose of the remainder if the will directs.

You must render an account from time to time of the amount spent of the estate if any.

You must render an account from time to time of the amount spent of the estate if any.

You must render an account from time to time of the amount spent of the estate if any.

You must render an account from time to time of the amount spent of the estate if any.

There are many purposes for which the design may be used: for the ends of towels or towel covers it is particularly suited; it may also be used on sofa or dinner-wear cloths, etc.

One of the many prettiest cottons that are now to be obtained is the so-called "water cloth," which is of medium thickness; the work is in satin stitch with the exception of the long stitches that simulate water, and the buttonhole edging the scallops.

There are many purposes for which the design may be used: for the ends of towels or towel covers it is particularly suited; it may also be used on sofa or dinner-wear cloths, etc.

One of the most attractive of season's designs for wear in Evening.

This is simple jacket, to be made up in almost any woolen material. It fits closely into the waist and the sides and back, and is fastened with a front row of small buttons. The collar is of velvet, and the revers are faced with material. Plain coat sleeves, rather full at the top, and simply

decorated with a row of buttons.

Pleasant stripes with a contrasting color and small roses.

Materials required for the jacket:

24 yards 46 inches wide, five-eighths yard cloth, one-quarter yard velvet, four yards lining silk.

Archie Hahn has run his last race.

The great dash man, probably the best and most consistent sprinter this country has ever produced, announces his retirement from the cinder path.

The announcement came as a great surprise to among followers of track athletics, who have been expecting his retirement for some time.

Thomas Longboat, the Indian runner of Toronto, Canada, broke the record for the Boston Athletic association's 25-mile Marathon road race from Ashland to Boston, and defeated a field of 114 runners after the most closely contested race ever run.

Longboat covered the distance in two hours 24 minutes 45 seconds, this being five minutes faster than the previous American record, which was established in 1901 by J. J. Caffey of the Boston Athletic association.

Robert Fowler of the Cambridgeport Gymnasium association, finished second, also within the previous record. His time was two hours 27 minutes 54.45 seconds. John H. Hayes, St. Bartholomew's club, New York, was third in two hours 30 minutes 35 seconds.

John W. O'Mara, Cambridge; J. J. Lee, Roxbury; Charles E. Petch, Toronto; Sidney H. Hatch, Chicago; J. H. Neary, Natick, Mass., and John Lindquist, Brooklyn, N. Y., all finished in the time under two hours and 40 minutes.

Archie Hahn has run his last race. The great dash man, probably the best and most consistent sprinter this country has ever produced, announces his retirement from the cinder path.

PINE COUNTY PIONEER.

ED. C. GOTRY, Editor and Prop.

Entered in the Post Office at Pine City as
Second Class Matter.

PINE CITY MINN. May 10, 1907

WHAT a jolt the Jamestown exposition would give old Powhatan should he return to his old hunting grounds for a day or two this summer.

This paper doesn't always approve of all it reports as news. The news columns of a paper is supposed to be a correct report of the transactions of the people of the town in which it is published and the reader should not suppose that because we publish an account of a shooting scrape that we carry a six-shooter in our boot.

CAPTAIN JOHN SMITH and Pocahontas were to the leading figures at Jamestown this year, though both have been in their graves for a few hundred years. Gracious! What a calamity it would be if the belles of Jamestown should assume the costumes worn by the belles a few hundred years ago according to what they believed to be right.

The closing of our stores and business houses at six o'clock is a movement that all should approve. There is no reason why the stores should not close at 6:30 every evening in the week but Saturday. With telephone service and all of the modern conveniences the people can transact their business during working hours and the expense of keeping open nights might be saved, and the patrons would find no inconvenience after they once got accustomed to the change.

THE kodak fad may be annoying but there is one consolation, future generations will have some correct idea of what we looked like, and acted like, and will not depend on the imagination of some artist (?) of a more or less visionary turn of mind. Some of the pictures just now being published of the Jamestown colony look suspiciously like modern productions of amateur subjects manufactured for the sole purpose of sale during the exposition.

One of the latest is for a good looking young woman who acts as a book agent to call on the business men of a city and ask if they would endorse a certain movement in the city to place certain highly recommended books in the school library. Of course the man can't say no and is asked to just write his name on a slip of paper. This he does and gets all about it until the slip attaches to a bill for a large order for books later turns up in the hands of an efficient collector. Moral: Look not upon the smiling young woman if thou wouldst retain thy cash.

A MAN who never strikes a false note." This might be easily said of president Roosevelt. His speech at the opening of the Jamestown exposition was so full of patriotism that it should be read and re-read by

every man and boy in this land. Among the gains that might be slipped from the speech, none is truer or more lofty than the following: But what we care for most is the character of the average man; for we believe that if the average of character in the individual citizen is sufficiently high, if he possesses those qualities which make him worthy of respect in his family life and in his work outside, as well as the qualities which fit him for success in the hard struggle for actual existence—that it is the character of our individual citizenship, there is literally no height of triumph attainable in this vast experiment of government by, and for a free people."

AVRIL 26th was Memorial Day in the confederate states and one of the notable features of the day was the fact that in almost every city of the south garlands were placed alike on the graves of the Union and Confederate dead. At Atlanta, Ga., a notable feature of the parade was hundreds of school children bearing red, white and blue streamers. The new south is rapidly losing its bitterness over the late unpleasantness, and the north gladly reaches her hand to the south as both units in paying a tribute of respect to the men of both armies who so gallantly fought for what they believed to be right.

EASTERN papers say that the foolish fad that has prevailed in the cities during the past winter indulged in by some women of all degrees carrying around in their arms the foolish combinations of woolly cloth and sandust, known as "Teddy Bears", has given place to a new fad. This latter evidence of insanity consists in the votaries of fashion appearing on the streets with a real live monkey in their arms. While this is bad enough there has been a steady growth of this species of foolishness for the past twenty years. The baboon is but one step further than the "Charley boy" fad which has afflicted eastern society for some years past.

FARMING in theory at least has been taken from the list of avocations in which mere brute force and plodding industry are the only essentials to success. To day there is no avocation in which a wider knowledge and a more diversified education is demanded than in the line of agricultural pursuits. The farmer's institute is not an outgrowth of this theory but is one of the products of the change that has taken place in the minds of the men who follow the business. The realization of the needs of a wider vision than one man's experience can give has made the institute a necessity. The Agricultural College, though in its infancy, is one of the signs of the times. Here the farmer and the farmer's son and daughter gathers a theoretical knowledge of the business, and lay a foundation for the practical tests to be made on the farm. The day when the farmer plods all day and half of the night in the same path his forefather's trod without a moment's time for reading, study and thought, has passed and in its place has come the day of the farmer who takes the necessary time each day to keep in touch

with the outside world and the community around him. The boy and the girl are realizing more and more that the farm is but a field of activity for both brain and muscle where the mental and physical can have sufficient activity to keep both in a good healthy growth. The day of scientific agriculture is here and the man who would succeed on the farm must be a man of sufficient intelligence to keep up with the march of progress along these lines.

LOCALS.

Fred Arthibise spent today at St. Paul.

Attorney L. H. McKusick went to Hinckley on business Wednesday.

The infant child of Mr. and Mrs. Victor Olson is quite ill with pneumonia.

Mr. and Mrs. Jas. L. Coplan became the parents of a girl baby last Saturday.

W. R. Neuman, the Hinckley real estate dealer, was a Pine City caller Wednesday.

Watch for the big steamer Monday. It is scheduled to make its initial trip from Fritzen's on that day. Miss Hattie Pennington is home from the northern part of the state where she has been teaching school. North Branch Review—W. A. Thomas was in Pine City the latter part of last week assisting Mrs. Garwood in moving her household goods down here. She has leased the Golden West hotel and is getting ready to open to the public.

Little Sophia Pell, whose parents reside several miles from town on the St. Croix road, met with a serious accident last Saturday morning. The girl was playing about a corn stalk cutter with two of her brothers, when her right hand accidentally came in contact with the gearing of the machine with the result that it was found necessary to amputate two of the fingers. She is getting along as nicely as can be expected.

We are all familiar with the general rule that when a damsel gets a right smart squint at a ferocious looking mouse it is all day with the discoverer until she has vanquished the tasseled and the violent seeks some other mouse more congenial than the grand opera efforts usually rendered.

But an exception to the rule was presented for our observation Wednesday. One of the lady clerks at the court house caught sight of one of the many small and misshapen morsels left over from the waste basket in her office. Without awaiting the formality of an introduction Miss Deputy lays her mighty hand of wrath upon the ear of the unsuspecting intruder, and when he goes to the barbershop for green cheese and antiseptic. Just as we are about to pass a few lines to the recording secretary of the Federation of Woman's Clubs urging for a gift of a medal to the heroine, we were informed that one of the regulars in the office had snatched out the exoskeleton of another wood grub in the laboratory of the high school, and, upon further inquiry, found that the really up-to-the-minute girls had all other rodent exterminators buried up in a corner. Therefore, to keep up our shop we must do what we need no longer do in the wilderness of cat-traps and poison snakes—why make men (we needn't). [The foregoing literary gem is respectfully dedicated to the Mill Cy Grist, because it's the limit.—Editor.]

News of the Week.

Chips Picked up Around Town and Vicinity.

Chas. Steik made a trip to St. Paul on Friday last.

R. E. Welty, the McClellan paper man, was in town Monday.

Miss Mamie Erickson was here from Rock Creek Wednesday.

Miss Mildred Riley went to Duluth Monday for a few days stay.

John Heywood was in Minneapolis, Saturday in company with his wife.

Capt. and Mrs. E. H. Hobert were down from Hinckley Saturday.

Robt. Harte returned Tuesday from a couple of days visit in St. Paul.

Mrs. M. A. Soderbeck and two children are visiting in St. Paul this week.

Representative H. P. Webb, of Sandstone, was a county seat town.

Paul Olesen was here Saturday and Sunday, the guest of his brother, Peter Olesen.

The presence of County Attorney Scott of Sandstone, was noted on our streets Monday.

Mrs. Eugene Barnum and daughter, Rose, returned from a brief visit to North Branch Monday.

F. M. Smith returned Wednesday after a few days' visit with friends in Stillwater and St. Paul.

Miss Lida Slocomb returned home Saturday after an extended visit with relatives in Minneapolis.

Peter Olesen, sr., arrived Saturday last from Lake Benton and will remain here for several weeks.

W. H. McCullum, of Minneapolis, arrived Wednesday to visit with his friend, Wm. Kibbee, at Hotel Ages.

Rev. R. J. Meland, of Grantsburg, will preach in the St. Croix school house Thursday evening, May 18th.

C. H. Westerman, the North Branch lumber dealer, mingled with friends and transacted business Monday.

Wm. Hintz, of Adu, was in town yesterday. He informed the Pioneer that he would probably engage in business here in the near future.

Mr. and Mrs. John Axtell and son returned to their home at North Branch Monday after a visit with the former's parents, Mr. and Mrs. J. W. Axtell.

Dr. E. C. Clemens delivered an excellent sermon at the M. E. church last Sunday evening after which the Sacrament was administered. The service was largely attended.

Mr. and Mrs. Elbert Bede and infant son, of North Branch, and Miss Frances Smith, of Harris, arrived Saturday and visited over Sunday with Mrs. J. Adam Bede and family.

Mrs. J. E. Cooley, of St. Paul, was here Friday last for the purpose of settling matters concerning the estate of her mother, deceased. She was accompanied by her sister, Miss Mary McNeal, of Hinckley.

The Hinckley Enterprise says "R. P. Allen was up from Pine City Monday to look after his interests. He says his business has grown to such an extent that he will be obliged to put on a delivery wagon. This growth also makes a large addition to his building a business, and that will be made soon."

Ernest Splittosser was here from North Branch this week arranging for the removal of his machine shop to this place. Mr. Splittosser is an expert machinist and gasoline engine repairer, and launch owners especially will find his engine menditorium a place of refuge when their kapinkers go kabump. The shop will be located near Axtell's planning mill.

We had a lovely fall of snow on Tuesday, the 7th day of May, 1907. Don't forget the date. While you are about it, also bear in mind that this year's April was the coldest, several generations—and then some.

She may clean up soon, and she should do it soon too if she has a speck of decency about her. Mae has already disgraced herself enough and unless she hurries her deportment will be something wretched. But to be honest with our large circle of friends, we candidly believe that the weather man is in league with Jack Frost in a conspiracy to punish a fellow down in Rush City who stole an armful of wood from a catalogue house buyer. The weather man should have his neck wrench-

Oscar Nelson, of Braham, was in town Saturday last.

A. W. Piper made a business trip to St. Paul last Saturday.

C. E. English was here from St. Anthony Park over Sunday.

John Y. Breckenridge, jr., was up from the state "U" over Sunday.

Dr. K. W. Knapp left Monday for a visit with friends in Webster, S. D.

Mrs. J. G. Haywood went to Minneapolis last Friday for a brief visit.

Miss Neddie Sloan, of St. Paul, arrived Sunday for a visit with relatives.

Mrs. Peter Engel and son, James, went to St. Paul Monday for a few days' visit.

Miss Louise Glasow has accepted a position with the Tri-State Telephone Co.

County Surveyor John Mullon arrived from Hinckley Wednesday for a business visit.

Harris E. Leach, a real estate dealer, of Spring Valley, has been here during the past week.

Miss Minnie Veerker departed Monday for a visit with friends at Lundstrom and Minneapolis.

H. S. Akin was here from Willow River last Saturday. The Proverb acknowledges a pleasant call.

Wm. Poole has received a new camera and expects to secure some excellent photos this season.

Laurence Horton attended the funeral of his aunt, Mrs. John Grant, which occurred at Linwood Sunday.

Frank and Raymond Gottry Sunday dined with their uncle and aunt, Mr. and Mrs. John Kinney, at Banning.

Mrs. Henry Glasow is preparing to move to Cloquet, where she will reside with her husband. She expects to leave next Wednesday.

Rev. J. J. Parish left Monday for Duluth after visiting Rev. S. G. Briggs in a series of revival meetings. Rev. Briggs was formerly pastor of the M. E. church at Rush City.

A special meeting of Emily J. Stone Circle, Ladies of the G. A. R. will be held Tuesday, May 14th, at 8 o'clock p. m. All members are requested to be present and prompt.

WHAT WE DO

One of the most important things we do is to finance the farmer. If you need money to pay your labor during the seasons of planting and growing, we will advance it. You can pay it back after the crop has been harvested. You can carry your account with us as a BORROWER during a part of the year, then carry it on as a DEPOSITO when you have realized on your efforts and investments. See us now and arrange to draw ready cash from the bank in small sums from time to time as needed in your business.

One gallon will make 2 gallons of first-class paint. Guaranteed strictly pure linseed with all necessary turpentine and driers. Try it and you will use no other.

The Third Person

By Owen Oliver

(Copyright, by Joseph B. Bowles.)

"They're two of Sis' sweethearts," said Mrs. Vaughan, with a laugh; as Jack Read and James Bell went past the gate. I looked after them with a smile.

"Sweethearts?" I cried. "Why, the child has only just put her hair up."

Mrs. Vaughan laughed again.

"She's 18, you know. I had a couple of sweethearts myself when I was 18."

She matched a skein of wool critically against the light. "For the matter of that, I believe they both proposed to her about once a week." She settled upon the skein and resumed her work.

"It seems only the other day that you used to call her your little wife . . . Well, well! . . . You were always fond of her."

"Of course," I agreed. "Of course I am. Little girls are like kittens. They ought not to grow up. It makes one feel old," I sighed.

"I'm afraid you're right. Girls are always older than other people," Mrs. Vaughan inspected the skein again, as if she mistrusted it. "Why don't you marry, George?"

"You aren't available," I pointed out. "You threatened me with a knifecredit."

"My job relieves me from the necessity of having you earn it."

"My job relieves me from the necessity of having my ears boxed."

"You are a boy to me," She shook her head slowly.

"You do look 30," I protested.

"I'm 40 next week. You are 33, aren't you?" I nodded. "How old do you feel?"

"Anything from 25 to 100. I think Sis has kept me young. I shall miss her if she goes and gets married!" We had been friends since she was a baby.

"You won't try to persuade her not to 'will you?'" Her mother laid her hand on my arm.

"You over-rate my powers of persuasion."

"I am not so sure of that. She thinks a great deal of what you say."

"Umph!" I got up and took my hat. "I'm afraid my reign is over. Anyhow, she hasn't told me about the sweethearts yet."

"Good-bye," Mrs. Vaughan held my hand a trifle longer than usual. "You will make your little playmate, George," she said gently. "You're always been so kind to her; so very, very kind. She'll never forget; but—"

"This file doesn't fit. If I were you, I should get married by a wife."

There are lots of nice girls."

"I'm afraid I should be hard to please. Sis and Sis' mother have set my standard . . . Bless them! Good-by!"

Then I went. As I was going slowly down the path Sis swept in at the gate. She grabbed me by the arms and tried to spin me round. The dignity of her years had not fully come upon her.

"My dear man!" she cried, "you're looking as solemn as a funeral. What is the matter with you?"

"Sweethearts!" I said.

She opened her eyes wide. She has wonderful eyes and splendid long lashes.

"You haven't!" she cried. "It's that horrid Miss Mellor! I'll never speak to you again . . . Then I believe it's Miss Gray? I saw her talking to you after dinner on Sunday, and you didn't take notice of me."

"She isn't a bit nice. So there."

"I didn't say my sweethearts!" I remarked. She had the grace to blush.

Mother has been talking nonsense to you," She poked a stone with her parasol.

"I'm a nonentity, Kiddie!" I always used to call her that. "But I suppose you won't tell me your secrets now?"

She chirped the stone through the gate and into the gutter.

"You don't want to know my secrets now," she said, with an air of grievance. "I suppose that Miss Gray—her hair doesn't suit her?" She nodded agreeably.

"Miss Vaughan has a new hat, I observe. She has shown me her new hats before she was grown up, Kiddie."

"Well, pretend I haven't," she pro-paled. "It's off the lawn and fence for 'tiddlers'." She laughed and took my arm. "Do you remember when I fell in the pond?" I laughed, too.

"Don't talk that today. I can't pretend you're little enough to carry home . . . Above those sweethearts, Kiddie!"

"What?" she inquired, innocently. "Tell me about all of them."

"We've only an hour and a half," She laughed wickedly, under her breath.

"Then tell me about Jack Read and Jim Bell. Which is it?"

"That is the difficulty," she stated. "Which do you like best?"

"There's a bird's nest somewhere about here," she observed irrelevantly. "Three speckled eggs!"

"Which do you prefer?"

"They're all alike."

"No, they're not."

"So, then?" She laughed triumphantly, and I had to laugh too.

"You mean you won't confide in me now?"

She studied my face, under her long lashes and with a serious

"Of course I will. I like Jack best, because he's dark."

"Umph!"

"But I like Jim best because he's fair."

"Pf!"

"I prefer Jack when he gives me beads."

"Confounded cheek!" I growled.

"But I prefer Jim—when he gives me music."

"Like his impudence!"

She seated herself on an old tree-trunk and swung her hat by the ribbons.

"You see," she explained. "I like Jack without Jim, and Jim without Jack. So I don't know what to do. If there were she-Mormons—You are looking horribly cross, George."

"Umph!"

"It doesn't suit your style of beauty!"

"Umph!"

"Your conversation is monotonous!"

I sat down on the trunk beside her slowly.

"The fact is, Kiddie, I've had a shock. I'm only just realized that you are grown up. It's very nice for you, and you're grown up very nicely. But it isn't nice at all for me. I lose such a jolly little child."

"Oh, you don't!" Only I thought—

She stopped and looked down at her shoes.

"Thinking is a new pastime for you."

"I sat at the library and read books."

"You always say things like that. That is why I think—at least, I don't think—only."

"Tell me, dear," I put my hand on her shoulder.

"I thought perhaps that, now I was

thinking."

"Mother—Why are you weeping, my dear?"

"Daughter—Boo-hoo!" George sent me a peck of kisses in his letter.

"Mother—Then I don't see any cause for tears!"

"Daughter—Yes, he used to send a bushel, and now I believe that even the peck is to be short weight—Chicago News."

"An Unfortunate Deficiency."

"I suppose the Boston-Shakespeare mystery will never be explained," remarked the student.

"No," I answered. "The cold-blooded man . . . We have found out all about it long ago if there had only been some royalties for the two families to go to law about—Washington Star."

"A Willing Signer."

Lady—Say, little man, don't you want to keep this pledge which binds you to never smoke cigarettes when you're a man?"

"Ho!—That I will, lady; in a hurry, to. I've always been against them, from the cradle."

"Daughter—Yes, he used to send a bushel, and now I believe that even the peck is to be short weight—Chicago Daily News."

"A Direct Preference."

"Which professor do you prefer, medicine or the law?"

"The law," answered the observing youth. "An attorney never has to get up in court and be examined as a witness."

"I see I don't datter you. The sweethearts' do."

"They mean it!" There was a flash in her eyes.

"I agreed," I said. "I'm sure they do. Of course they do. They don't mean nicens things than I think of you . . . Which is it, little girl?"

"Neither," she shrugged her shoulders pettishly. "I like one just as much as the other. Really I do. I suppose I shall end like the Scotch."

"A Willing Signer."

Lady—Say, little man, don't you want to keep this pledge which binds you to never smoke cigarettes when you're a man?"

"Ho!—That I will, lady; in a hurry, to. I've always been against them, from the cradle."

POULTRY And BEES

COOP FOR HENS AND CHICKS.

Type of Construction Used by Ontario Agricultural Station.

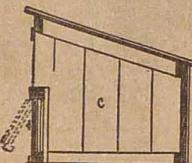

The authorities of the Ontario Agricultural college have devised a coop which they recommend for hens and chicks. It is so devised that it gives plenty of air both day and night, and during the night in particular can be so closed that small animals cannot get in to disturb either hen or chicks. A good idea of the front of the coop is shown at A in the accompanying illustration.

The upper part is covered with wire

Secondary House for Brooder Chicks. netting and the lower part with slats so that the chicks can come in or go out as they please. The front which is made to fit over the slats can be fastened in place by thumb buttons on either side of the coop.

A good idea of the end sections is

Another House for Young Chicks. shown in C. The size may be made to suit the owner, but it has been found by the Ontario authorities that a coop two feet high in front, 15 inches high in the rear and two or three feet long works very satisfactorily. The perch or roost is broken off with a length one foot wide.

As shown at C, the front is movable so that when the chicks are large enough the hen can leave the coop during the day time.

SOLAR WAX EXTRACTOR.

Rays of Sun Used in Rendering the Wax.

A solar wax extractor is needed in every apiary and several are kept running in many large aparies. Extractors which render wax by steam are also used. To the latter class belongs the extractor invented by Mr. T. C. Thordson, in Tipton, Indiana. This improvement, invented in Switzerland and improved in America, consists of a tin or copper vessel with a circle of perforations in the bottom near the sides to let in steam from a boiler below and within this upper vessel another receptacle containing a series of perforated combs. Within a few years wax extractors employing the heat of the sun and known as solar extractors have come into general use. The essential features in all the forms that have been devised are metal tanks with a glass cover and usually a wide and straight under which is placed the receptacle for the wax, the whole so arranged as to enable one to tilt it at such an angle as will catch the direct rays of the sun. The effectiveness of the solar extractor is increased by having the glass doubled and adding a reflector, such as a mirror or a sheet of bright metal.—Exchange.

CHICK CHAT.

Fine, clean grit should be the first thing eaten by little chicks.

Early maturity for market means considerable in making up the profits.

Flock of chicks—bright bramblings will grow a feather to weigh two pounds at eight weeks of age.

A pound of naphthalene dissolved in a gallon of coal oil makes an excellent lice paint for the roots.

State (not moldy) bread moistened with milk is one of the best first foods for chicks and ducklings.

A poorly bred thoroughbred is worse than a scrub. Scrub treatment will make him a valuable animal.

Grit and dirty water is a frequent cause of health trouble in the early youngsters; provide clean water in clean dishes.

The "spring chicken" should be hatched not earlier than February, nor later than May. The market weight is two to three pounds.

Strong parents make strong chicks—strong chicks are active and quick growers—quaint practices like the jucy, meaty brother and sister.

Set two hens at the same time; then, if the hatch is not large, all the chicks can be given to the most motherly hen and the other set again, or given her liberty.

HENS, MOTHERS FOR GOSLINGS.

Directions for Hatching and Rearing Them.

The first thing to consider in hatching goose eggs is to have a nest box which holds three or four under a good hen. More cannot be covered properly. Confine the hen to a fair sized run with her nest inclosed in some quiet place. Keep a dish of pure water, also one of grain where she can eat. Scatter over her well the times with lime powder and remove all clean eggs after seven days. When the goslings hatch give them the most careful hen for six. Confine the hen and gosling in a shady grass run. Give water in a drinking fountain. The young ones cannot get in and out of this and can be washed clean inside and out.

The yard must be changed often enough to have good, soft grass all the time. Grass is the best goose food. If easily obtained give corn and millet, also a mixture of corn and millet mixed with first week feed. Also add a fifth rolled oats to the feed. After the first week, suggests Orange Judd Farmer, increase amount of shorts and corn meal, also add a little beef scrap. After the first week, feed the hen a mix of corn shorts, corn meal and oats, with about a fifth of the feed compound of beef scraps. Plenty of grass, good but not too much feed, clean coops and pure water all the time, will make the goslings larger than the hen at one month old.

QUEEN RAISING.

Nursery Cage for the Hatching of Virgin Queens.

An English farm expert, Mr. Slaters, has recently published in the British Bee Journal a description of his improved nursery cage for queen-cell and virgin queens. He says:

My improved nursery cage for the hatching of virgin queens and for holding them until they are attached to the nuclei is illustrated in the cut. The ripe queen-cell is held in position by the wire-clothes cloth, which can be easily adjusted to grip securely queen-cells of any size. The cage opens on a new principle, which makes it possible to take the queen-cell or of foot for the queen experiments and easy. The cage hangs between the combs some distance from the top by the stout wire shaft, the bent portion of which rests on the top-bars of one of the frames. The perch or roost is made to keep warm between brood and this is important in the cold nights of May and June. The cage itself is of the smallest possible size, so that a number of

hatching chambers can be attached to the nuclei.

Clean Up.

All residents and property owners of Pine City are required to clean up their yards, streets and alleys by May 25th.

Leaves, paper and trash may be burned, while lumber, ashes, tin cans, etc., should be removed to the dump grounds, west of town.

By order of the Board of Health, Dr. H. W. Froehling, Chairman:

MEADOW LAWN.

J. F. Holler came down from Sandstone last week.

E. C. Holler and Mr. Jones spent Tuesday night in the lawn.

P. J. MacAdam and August Spelling were Rush City visitors Saturday.

Elmer Carrier and mother, Mrs. Berkley and daughter, Miss Daisy, were callers at the Dile home Sunday.

Harvey Lysteth went to Rush City Tuesday to accept a position in that place.

M. T. Lahart departed Monday for Fergus Falls to attend the U. S. circuit court.

Mrs. N. J. Edridge and Mrs. Brooks were callers at the S. Smith home Monday.

A number of the farmers of this place are receiving nursery stock this spring. A good sign of prosperous farmers.

While hanging May baskets Friday night Walter Purdy fell and hurt his left arm quite seriously. He has been unable to use it since.

Sheep Raising.

A. J. MC GUILFRE

In October, 1904, twenty five live high grade Shropshire ewes were bought for the Experiment Farm. They were bred in December and dropped their lambs the latter part of May and fore part of June. Many of the lambs were weak, and only 15 were raised from the 25 ewes. Their weakness was attributed to the ewes being in too high flesh, being pastured on heavy rye pasture.

The following fall eighteen of the old ewes were bred in October and dropped their lambs in March and the fore part of April. Twenty-four lambs were raised, all strong and vigorous.

The 18 lambs raised in 1905 were all carried through the winter. The weather lambs of this lot were sold in May and June, being a year old. They were sold for mutton and averaged \$3.75 apiece, weighing 47 pounds dressed, and selling at 8¢ per pound.

The weather lambs of the lot born in March, 1906, were sold in September at seven months and averaged \$5.00 apiece, weighing 35 pounds dressed, and selling at 10¢ per pound.

The 1905 lambs sheared 31 pounds of wool, selling at 24¢ per pound, bringing their total value up to \$4.05

Sold and Guaranteed by
 J. Y. BRECKENRIDGE.

at a year old, \$1.15 more per lamb than the lambs sold at 7 months. The cost of feed for the winter was \$1.80, making a cash difference of 65 cents per head in favor of the lambs sold in the fall at seven months.

The cost of feed for the ewes from October 15 to May 1 was \$2.40 per head. Their average weight of wool was 7.2 pounds, selling at 24¢ per pound, bringing \$1.72 per head.

Crediting the value of the lamb at seven months would make the gross income \$5.25 from each ewe. Deducting the cost of winter feed leaves a net profit of 80 cents per head for the ewes.

The cost of pasture varies under different conditions. On the experiment farm the sheep are pastured on winter rye in May and on second crop clover in September and October, and during the summer in a 30-acre timbered pasture, partially cut over and a little brushwood, (4 acres). The cost of all the pasture, May 1 to October 15 is estimated at not more than 80 cents per head for the ewes.

Summary: 1. Breed in October to have the lambs come in March and early April, and sell all wanted for breeding in September. A March lamb is from 25 to 50 percent better developed in September than a May lamb.

2. Raise roots to feed in winter. Ration fed on Experiment Farm: Clover and timothy hay and roots, and 4 pounds of oats per ewe a day in March and April, 2 pounds of hay and 2 pounds of roots per head daily.

3. If the pasture is heavily timbered and with brush it will require little feed. Sheep will not clear land unless starved to it, and a starved farm animal is not profitable whatever use it is put to. When the land is brushwood sheep will keep down a second growth and help to prepare the land for cultivation.

4. Sheep have to be fenced and well fenced when kept in diversified farming. Spring and fall they may range over the farm to advantage, but during the summer a few times through the fence may spoil a good share of their profit.

A little Kodol taken occasionally, especially after eating, will relieve some stomach trouble and heartburn. J. Jones, Northland Team, writes, "I am sure three one dollar bottles of Kodol positively cured me of dyspepsia, and I can recommend it as that was three years ago and I have not been bothered since with it." Kodol is guaranteed to give quick relief. Sold by Breckinridge's Pharmacy.

"Here's to your health and happiness," DeWitt's Little Early Risers famous little pills. Nasty sick headache or biliousness may come on at any time; the cure is an easy riser. Sold at Breckinridge's Pharmacy.

For a cold or a cough take Kennes-
 da's Laxative Cough Syrup. It is
 BETTER than any other cough remedy
 because its laxative principle assures
 a healthy, copious action of the bowels
 and at the same time it heals irritation
 of the throat, strengthens the bronchial tubes, and relieves the lungs.
 Contains honey and tar; pleasant to take.
 Children like it. Conforms to the National
 Pure Food and Drug Law. Sold
 by Breckinridge's Pharmacy.

When your back aches it is almost
 invariably an indication that some-
 thing is wrong with your kidneys.
 Weak, diseased kidneys frequently
 cause aches of the entire system.
 DeWitt's Kidney and Bladder
 Pills afford prompt relief for weak
 kidneys, backache, inflammation of
 the bladder and all urinary diseases.
 Sold by Breckinridge's Pharmacy.

DeWitt's Carbonized Witten Massel
 Salve does not merely heal on the sur-
 face. It penetrates the pores and
 promptly relieves pain caused by
 burns, bites, scalds, cuts and skin
 diseases. It is especially good for
 bites of insects.

When your food has not been pro-
 priately digested the entire system is im-
 paired to the same proportion. Your
 stomach and digestive organs not only digest
 what you eat; it tones the stomach and
 adds strength to the whole body.
 DeWitt's Kidney and Bladder
 Pills conform to the National Pure Food and
 Drug Law. Sold by Breckinridge's
 Pharmacy.

How's This?

We offer one hundred dollars reward
 for any case of catarrh that cannot be
 cured by Hall's Catarrh Cure.
