EIGHTH DISTRICT CONVENTION

Republicans of the District Meet in Pine City Wednesday

Afternoon---Taft Delegates Unanimously Chosen

The convention of the 8th congressional district met at Sted's hall, according to call, at 2 o'clock Wednesday afternoon. The meeting was called to order by R. G. Haven, mayor of Duluth, and on motion, J. Y. Breckenridge was chosen temporary chairman and R. G. Chase, of Aroosa, temporary secretary. On motion, the temporary organization was made permanent. A committee of five was appointed by the chair as a committee on resolutions. While the committee on resolutions was framing its report, Congressman J. Adam Bede was called on, and spoke in his usual witty manner, for about three quarters of an hour. He spoke about the administration of President Roosevelt and said that in William H. Taft the people would find a man who would carry out the ideas and policies of President Roosevelt. He spoke at some length on the workings of congress, and about the newspapers that kicked on the way that business was being done in that body. He said that the big five that are receiving all the kicks had been in congress for years, and no matter if they were reduced to the lowest position in the house, an appropriation of one hundred dollars could not be passed without their sanction.

At the close of the remarks of Mr. Bede, Clarence B. Miller, of Duluth, who is Mr. Bede's opponent in the congressional nomination in this district, spoke for a short time. His speech was well received by the audience.

The report of the committee on resolutions was then read, the following being a brief synopsis:

The Republicans of the 8th congressional district of Minnesota, in convention assembled at Pine City this 15th day of April, 1908, hereby renew and declare our allegiance to the Republican party. We are proud of its glorious record and its consummate achievements in the interests of a free people. It was born to make all men free and equal before the law. It has stood for progress and prosperity; it has always advocated a sound finance, and believes that a dollar means a dollar worth of gold, or its equivalent, everywhere; it advocates protection and that reciprocity which reciprocates; it has always vigorously opposed the false economic doctrine of buying elsewhere what we can produce at home.

We heartily endorse the protective doctrine and policies of the present National Republican administration, as exemplified and manifested

by the acts and messages of President Roosevelt.

"We believe that his purposes and efforts have been directed with an eye single to promote the best interests of the American people."

"As closely identified with President Roosevelt's administration, we have watched with great pride the career and public service of Hon. William H. Taft, of Ohio. In every walk of life he has shown himself to be a man among men—a type of our highest citizenship, a patriotic, aggressive and far-seeing statesman.

As jurist, as executive in charge of affairs in the Philippines; as cabinet official, and as a statesman he has displayed the highest quality of great executive ability and has rendered in his official career distinguished service to the country.

"We hereby declare that the Republicans of this district favor the nomination of Hon. William H. Taft by the coming Republican National Convention, for President of the United States, and we hereby instruct the delegates to said convention to vote first, last and all the time for Mr. Taft, as the choice of this district for President, and to use all honorable means in their power to secure his nomination."

On motion, the report of the committee on resolutions was accepted.

Jos. B. Cotton, of Duluth, and C. J. Swanson, of Fridley, Anoka county, were then elected as delegates to the National convention at Chicago, and Fred D. Vibert, of Carlton, and E. H. Schlorff, of Brooton, as alternates.

Jos. B. Cotton made a most eloquent speech, thanking the convention for the honor it had bestowed upon him and Mr. Swanson, and pledging themselves to carry out the mandates of the convention.

Hon. R. G. Dunn, of Princeton, then made a few remarks, and at the conclusion offered the following resolution:

Resolved, That we, the Republicans of the Eighth Congressional District, in convention assembled, do endorse the candidacy of Hon. E. B. Hawkins, of Duluth, for delegate at large to the Republican National convention at Chicago.

The chair on motion was instructed to appoint to the congressional committee. The chair asked him in which to make his selection which was granted, and when announced they will be notified by the chairman.

No further business appearing, the convention adjourned.

SCHOOL NOTES.

REPORTED BY FRANK C. GOTTRY.

The Rodak children have all left school.

Andrew Thayer was absent nearly all last week.

There is an enrollment of 40 in the 1st grade at present.

Helma and Robert Steinbord have just entered the 1st grade.

The 1st grade are making Easter rabbits and chickens this week.

The children were nearly tucked to death when they found out that there would be no school to-day (Friday).

Miss Kuhn, Mrs. W. H. Church and sister, Miss Fowler, and High School Inspector Larson, were visitors at our school this week.

Clean Up!

All persons are required to clean up all railroads by May 15th, 1908.

By order of Board of Health,

H. W. FROEMELICH,
 Health Officer,

Pine City, Minn., April 15, 1908.

Anyone having a gasoline engine launch or machinery of any kind that needs repairs should call on E. W. Spittatator at his machine shop on the bank of the river, back of A. W. Axteil's planing mill.

TEACHERS IN SESSION

Instructors of Pine County Meet in the Webster School Last Saturday—
 100 in Attendance.

Two interesting and instructive sessions were held at the assembly room of the high school last Saturday afternoon and evening. The program published in our local papers was carried out with perhaps a few changes. Some excellent papers were read, interspersed with music and song.

The first paper, Kindness to Animals, by G. H. Batson was excellent. Parents as well as teachers should engage themselves to instill in the minds of children, kindness to dumb animals.

An able paper on "School Room Hygiene" was given by Dr. H. W. Froehlich, showing that to be an important factor in school work.

Mrs. Margaret Blair, Superintendent of Domestic Art, in a pleasing way told of the advisability of teaching children sewing, cooking, etc. She complimented Pine county on receiving the greatest number of prizes for sewing at the Industrial Exposition at St. Paul last year.

The last on the afternoon program was an address on the "Psychology of the Child Mind," by Dr. L. Kline, Professor of Pedagogy, Duluth Normal.

The address was listened to with great attention.

Quite a number of teachers went home on the afternoon train.

The evening session was more on the social order. All numbers were well rendered and well received.

The address of the evening was given by George F. James, Dean of the College of Education, University of Minnesota. His talk was along the line of Manual Labor in the public schools.

A violin solo by Ottocar Sobotka closed the evenings entertainment.

Refreshments were served to the visitors by the local teachers and students, and several hours were spent socially, waiting for the night trains.

Prof. Olsen and his corps of assistants are to be congratulated on the success of this gathering of the Pine County Teachers Association.

The next meeting of the Association will be held at Hinckley.

MEADOW LAWN.

The farmers in this vicinity have begun seedling.

E. Elford and Alfred Olson were callers in the lawn Tuesday.

Mr. and Mrs. W. C. Stephan were guests at the Lahart home Sunday.

W. H. Hamlin and son Phillip, spent Sunday at the home of R. E. Hamlin.

Mrs. R. S. Hamlin and Mrs. MacAdam were Bluffstet visitors Monday.

The young men have organized a base ball nine and are preparing for the summer sport.

J. F. Holler and son, Ernest, of Sandstone, were callers in the lawn the first of the week.

Mr. Frank Johnson returned from Chicago Saturday, where he spent the winter with his brother.

Mrs. Kate Duley and niece, Miss Alice Duley, visited with friends here Tuesday and Wednesday.

Mr. and Mrs. Alexander and grandson, C. E. Davis, of Sandstone, were at Mr. Lahart's Saturday and Sunday.

Chernau Smith, who has been visiting at the Cummings home, departed for North Dakota Saturday.

A party was given last Wednesday at the home of H. T. Erdridge, in honor of Hartwell Erdridge, who is visiting at that place.

OBITUARY.

Nicholas Laibert died of heart trouble Saturday April 4th 1908, at the residence of his son, Mr. and Mrs. Nicholas Laibert of this place. He was born in Ontario, Canada, in 1861 and was there for his 50th year. He came to this country when a boy. He has been in the employ of the Pittsburg Steamship Co. in the capacity of marine engineer for quite a number of years and was working independently in connection with the steamship line. He leaves a wife and two children here.

He was a member of the First Presbyterian Church. He leaves a widow and his brother here to mourn his loss.

CHANGE TO WIN PRIZE

Minnesota State Fair Association Offers Public School Pupils an Opportunity To Win Money and Fame.

How many school children are there who are familiar with the history of their own state?

The management of the State Fair are interested in learning to what extent the children of Minnesota know of the struggles of the early settlers, and they propose a novel method of ascertaining.

The big spectacular feature of the 1908 fair will be known as "Fort Ridgely in '62." A reproduction of the old fort as it stood at that time, will be constructed in the in-field of the half mile track, and a portrayal of the attack by the Indians is to be reproduced.

One thousand people, including 300 genuine Sioux Indians, will participate in the exhibition. It is intended to make the enactment as consistent as possible, and, as yet, the story upon which the action will be based is undecided. In order to secure a variety of versions of the various attacks by the Indians on Fort Ridgely, the state fair management intend to offer 18 prizes for the best story or description of the affair, written by a pupil of the public schools.

The story may be taken from any of the many histories that are published on the Sioux war in Minnesota, or they may be written from descriptions of the battles, as described by participants, many of whom are alive, and living in various parts of the state. The story must be written, however, in the writer's own style, and not quoted.

Any boy or girl, living in Minnesota, and a pupil of the public schools, may contest for the prizes. A committee of prominent business men of St. Paul and Minneapolis will act as judges, and the spectacle will be based on the winning story, which will be published in the official program of the fair, together with a portrait of the writer.

There will be 18 prizes given, as follows: To the one whose story is selected as a winner, there will be given a cash prize of \$10, a season ticket to the fair, good for both main gate and grand stand, and in addition a chromo portrait of the winner will be shown in fireworks, on the first night of the fair.

To the one whose story is considered second best, there will be given a cash prize of \$5, and a season ticket to the fair.

To the third, \$3 and a season ticket to the fair, and to the next five, a season ticket to the fair; and the next ten will receive a single admission to the fair.

The contest will close at midnight June 1. All stories must be written in ink, on one side of the paper only, and must be confined to one thousand words. The age, name and the school attended should be plainly written at the top of the page. Stories to be addressed to C. N. Cosgrove, Secretary, Minnesota State Fair, Hamline, Minn.

Promising Village,

Brundage, the thrifty man,

"Let me put you wise to the very best plan,

When ye buy lumber, ef ye don't look out,

Ye'll forget the quality an' jest erblot

Give all yer mind to the money ye'll save,

But I've allers found when ye 'gin to shave

On the price, the boards ye git is full o' knots

An' sap, an' rot. Now ain't it lots

Better to keep your eye on the kind o' stuff

Yer goin' to buy? An when these fellers try to

bluff

An' holler 'Cheap,' like they're goin' to bust,

Jest buy of the dealer in whom you c'n trust."

Good of Debating Societies.
Schoolboys who declaimed "the boy stood on the burning deck, whence all but him was fled" have been laughed off the platform, and now, like Fourth of July spread-eagle orators, are only a memory of the older generation. But the declaiming schoolboy, for all his sheepish slurring of words and vociferous false emphasis, got one great benefit—practice in standing on his feet before an audience. To give his successors similar practice, forensic debating under proper instruction is clearly the thing for upper grammar classes, high schools and academies. Debating means not only speaking but thinking, and is therefore more valuable than "speaking pieces." A recent leaflet of the New England Association of Teachers of English makes a strong plea for the encouragement on the part of teachers and parents of organized debate between schoolboys. It rates the excitement of contest, is related to the teaching of English, and has bearing on a moral question that has vexed our schools—the question of school fraternities and clubs. These societies usually have nothing important to do. The presence in every school of one or more debating societies would satisfy in a healthy way the mysterious desire of young men and women to belong to something."

Needed a Can-Opener.
One of the curious features of life on board modern warships is the necessity of providing can-openers. In these days a very large proportion of the supplies necessarily consists of canned goods. Official statistics show that on a big battlehip when at sea and far away from home markets where fresh goods may be obtained no less than 750 cans must be opened every time dinner is served to the crew. This means wearisome work if the can lids are removed in the ordinary fashion, and the government is confronted with the problem of providing a machine that shall do the work satisfactorily and expeditiously. Experiments with this end in view are being conducted by the navy department, and the man who provides an acceptable machine doubtless will not only put money in his purse and win a creditable fame, but will do patriotic service to his country.

There is a difference of opinion as to whether or not there has been a drop in the prices of the necessities of life. Bradstreet, who has been doing the family shopping lately, says there has been a drop, while diamond dealers declare that there has not. This divergence of views may hinge largely on what we consider the necessities of life. If they are merely pork and beans the change in price at the retail establishments has been too small to attract notice. Perhaps a few more beans are served for a dime, but not enough for one to make a fuss about. If, however, articles of personal adornment are regarded as necessities of life, the diamond dealer may be right. At least we haven't noticed hotel clerks putting their diamonds away. These they would do if diamonds were to come down so greatly as to be within the reach of all.

Andover, Mass., distinguished as an educational center, has just received a legacy of \$500, the income of which shall be applied annually for an "old fashioned spelling-match." The contests will be public. The competitors are to be between ten and eighteen years of age. It may be that this small sum of money will do more for education than a million spent in research among the bugs of Patagonia—if there are bugs in Patagonia.

William Waldorf Astor has imposed another impetus to the Oxford university endowment fund, which was founded by Lord Curzon on his election as vice-chancellor of the university. Mr. Astor originally promised to give \$50,000 when the fund reached the total of \$500,000; now he promises to give \$100,000 when the fund has reached this amount. The present total of the fund is \$375,000.

China has agreed to punish the Chinese officials who took steps to compel Japanese smugglers to respect the laws of China, and the incident is closed. One of these days Japan is likely to bump against a nation that will not be satisfied to have incidents closed in just that way.

A marble statue of George Washington, removed for protection from in front of Independence hall to the rotunda of Philadelphia city hall, was dedicated recently. It was a gift of school children to the city.

It cost Albert S. Black, a St. Louis commission merchant, \$600 to call Miss Annie C. Kerono, a housekeeper for a rival firm, an "old hen," and an "old cat." The woman collected damages in court.

CHELSEA, MASS., IS SWEEP BY FLAMES

TREMENDOUS CONFLAGRATION DEVASTATES SUBURB OF BOSTON.

Three Persons Killed—Injured Number Fifty—Property Damage \$5,575,000—Churches, Factories, Public Buildings, Tenements Burn.

Boston, April 13.—The greatest fire that has scourged any part of the metropolitan district in ten years devastated the manufacturing, tenement and retail sections of Chelsea, burning over one square mile of territory and leveling many of the city's best structures. Sunday was Sunday indeed. Three persons lost their lives and about 50 persons were injured.

The fire started at 10:40 a. m. and was not under control until nine o'clock in the evening, notwithstanding that half of the Boston fire department's strength and steamers from a dozen cities and towns went to the aid of the Chelsea firemen. The loss was estimated at \$5,575,000. About 1,500 families are homeless.

Flames Spread by Gate.

The fire originated in the rear of the Boston Blacking company's works on West Third street, near the Eastern division of the Boston & Maine railroad and in close proximity to the Everett city line. A terrific gale from the north east blew the flames across embers, embers and myriads of sparks to a score of wooden buildings, most of them of cheap wooden construction.

The first started almost in the extreme southwest section of the city and cut a path to the end of Maverick street the city's western southeastern end of the city, which borders on Chelsea creek. This is about two miles from where the fire began.

Among the structures destroyed were 30 churches, two hospitals, the public library, nearly half a dozen school buildings, 20 business places, nearly a score of factories and upwards of 300 tenements and dwelling houses.

Military Guard Property.

A militia guard by Mayor Beck of Chelsea brought out the First company, coast artillery, Capt. Renfrew commanding, in order to guard property moved into the streets from buildings in the paths of the fire. Col. Wool, commanding the marines at the Charlestown navy yard, volunteered the services of the One Hundred and Fifth company, stationed at the navy yard, and on request of Mayor Beck the guard was sent to the fire under command of Capt. Hill. Rear Admiral Swift of the navy was sent out all the men from the receiving ship Wabash who were not already off on leave. These sailors were not sent under command of any officer, but were instructed to give their services wherever needed.

Congressmen's Peril.

The fire consumed the entire on the east side of Everett avenue and on the roof of the People's A. M. E. church on Fourth street was seen to be ablaze. The services were in progress inside at the time and the congregation was unaware that a serious fire was raging. Some one notified the pastor, Rev. Charles P. Burdett. He immediately ran to his people, told them of the danger and advised them to flee slowly from the building. Twenty minutes later there was not a vestige of the edifice left.

In surrounding towns and cities calling into service all available carriers, the police were able to speedily remove the inmates of the Frost hospital and the Children's hospital outside the city limits to retreats of safe buildings, mostly for the benefit of hospital buildings were wholly destroyed.

Late Sunday night the governor put the city under martial law, but there has been little disorder and the flames left little for the troops to guard.

Prompt Relief Measures.

Boston, April 13.—From the chamber of Monday's conflagration on the third floor, Monday's well-organized movement for aid and relief of the 10,000 homeless, a counting of the cost by insurance companies, whose representatives had visited their losses at three millions and a half, and a determination by the city authorities to rebuild the 200 acres swept by the flames where stood, before the fire, property valued at nearly \$4,000,000.

Monday morning, the 14th, reports came of the injured persons taken care of in the various hospitals only to be believed to be in a critical condition. The three bodies which were taken to the morgue in Boston Sunday night remained unidentified.

The Property Destroyed.

Revised figures indicated that the losses were divided, according to the various classes of property destroyed, as follows:

Chimney and walls	\$25,000
Public buildings	\$25,000
Factories, business blocks and office buildings	\$25,000
Dwelling houses	\$25,000
Total	\$75,000

The insurance of \$3,500,000 is divided among about 80 companies.

There was comparatively little fire damage reported among the fire victims and the author is sure that the relief work that practically no one was able to offer shelter during the night. The relief work was taken up by those who had been the Massachusetts fund for San Francisco sufferers.

SYSTEM FROM SEA TO SEA

LAST LINK IN HARRIMAN'S BIG CHAIN ALMOST DONE.

Opening of Illinois Central's Birmingham Division April 19 Completes Trans-Continental Line.

Birmingham, Ala., April 13.—The official announcement by the Illinois Central that the new Birmingham division will be opened for traffic April 19 calls attention to the completion of the last link in the great Harriman trans-continental route, for controlling the Union Pacific, Illinois Central and Central of Georgia, this system will extend from the Pacific to the Atlantic.

In addition to supplying the last link in this chain, the opening of the Haleyville branch will give the Illinois Central an inlet to the great coal and iron fields of Alabama with their immense mineral resources.

The Central of Georgia terminals here connect with those of the Illinois Central, thus giving a direct connection from all Illinois Central points with the sea at Savannah over the Central of Georgia. Connections of Illinois Central with the Union Pacific give a complete system from one coast to the other, connecting the southeastern states and to increase Savannah's importance as a seaport, for in addition to making it the terminal for much of Alabama's coal and iron, it will receive much of the grain and other traffic of the Mississippi valley.

The Mobile & Ohio will open the new Birmingham branch on April 20 and present plans contemplate having the first trains over both lines reach Birmingham the same day. To this end the commercial organizations of Birmingham have planned an elaborate reception.

FOR TAFT BUT UNINSTRUCTED.

Delegates Chosen by Massachusetts Republicans Not Hampered.

Boston, April 14.—The four men who will head the Massachusetts delegation to the Republican national convention will go to Chicago unopposed. These four delegates selected at the state convention Friday are United States Senators Henry Cabot Lodge and Robert M. La Follette, ex-secretary of state, and John H. Long and Sidney O'Brien, a member of Congress.

The convention adopted resolutions endorsing Gov. Curtis Guild Jr., as a candidate for the vice-presidential nomination and advocating a "wise revision" of the tariff.

On the question of the presidential candidate the Secretary of War William J. Taft, who had been held by the convention, recognized that a majority of the delegates to the convention desired his nomination, but that it was "uncertain whether a resolution of preference would be carried, and to this end the presentation would certainly lead to a deadlock, which would be injurious to the welfare of the party."

Milwaukee, April 13.—Delegates from the Eighth and Tenth congressional districts show that La Follette delegates have been elected in the Eighth, but Walter Alexander, a Taft delegate, was won in the Tenth. The Tenth district delegate is a La Follette supporter.

OFFERED MONEY FOR MURDER.

Serious Evidence Against Thomas McGonigle and Mrs. Burnett.

Richmond, Mo., April 11.—In the trial here Friday of Thomas McGonigle and Mrs. Jane Burnett, accused of the murder of Mrs. Margaret McGonigle, Thomas Bailey, 21 years old, son of the accused, said that if he could be allowed to kill him if he revealed what he had seen.

Mrs. Flanigan Davis testified that Thomas McGonigle and his sister, Mrs. Burnett, had offered her \$50 to kill Mrs. McGonigle. Thomas, she said, had fixed a bottle of wine with poison in it to give to Mrs. McGonigle, witness had destroyed the wine. Then she wanted her to shoot Mrs. McGonigle, she refused to do so, and the official action of the state, as though they were dependents of the provinces. If this is the result of the decision it is, to my mind, one of the most important incidents in the history of our republic because the duty of the government is based upon the right of the states to control absolutely their own domestic affairs.

If, then, our whole system of government is changed, have we not only raised the standard of living in the government, but have we not given back a century toward a centralized form of government which is not to the advantage of the people? What this goes to prove is that the money is not more powerful. What it needs to do is to go to distribute the private wealth under the government that all citizens will have equal opportunity.

OLYMPIC COMPANY INDICTED.

Little Rock, Grand Jury Also After Alleged Bootleggers.

Little Rock, Ark., April 11.—The Pulaski county grand jury reporting Friday delivered to Judge H. J. Lee its indictment, for which they were against the Waters-Pierce Oil company for engaging in discrimination against individuals and towns and conspiracy for granting rebates.

Third indictment is against former legislators and associates for alleged hoodlum in the legislative of 1905. The names are being withheld until service is made by the attorney general.

Saved from Fire But Dies.

Chicago, April 13.—William Karl Horner, who was rescued from the burning Northwestern hospital fire yesterday, died Monday. He was on the dining table and under the influence of the smoke the fire was discovered. The shade was being carried from the building was too great for him. His home was at Winona, Wis.

This woman says she was saved from an operation by Lydia E. Pinkham's Vegetable Compound.

Lena V. Henry of Norristown, Ga., writes to Mrs. Pinkham:

"I am suffering from female troubles. My doctor said an operation was the only chance I had and I dreaded it almost as much as death."

"One day I read how other women had been saved by Lydia E. Pinkham's Vegetable Compound. I decided to try it. Before I had taken the first bottle I was better, and now I am entirely cured."

"I am no longer suffering with any female trouble. Should anyone have any trouble should turn to Lydia E. Pinkham's Vegetable Compound."

FACTS FOR SICK WOMEN.

For thirty years Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has been the standard remedy for female ills, and has positively cured thousands of women who have been troubled with dyspepsia, inflammation, ulceration, torpid kidneys, irregularities, peritonitis, prolapse, rheumatism, dropsy, dizziness, drowsiness or nervous prostration. Why don't you try it?

Mrs. Pinkham invites any sick women to write her for advice. She has given thousands to health. Address, Lynn, Mass.

The Power of Love.

Love as many persons as many creatures as you possibly can. Love is the only power by which you can make yourself rich in a moral world.

—Blackie.

Let Me Forget.

Church—What's that piece of cord tied around your neck for?

Gotham—My wife put it there to remind me to mail a letter.

Church—And did you mail it?

Gotham—No; she forgot to give it to me!—The Congregationalist.

A Counter Stroke.

A stylishly-dressed woman entered a Chinese laundry and paid for a laundered shirt.

"Why do you wear those 'rats' I think you call them, in your hair?" inquired the Chinaman, who had an inquisitive turn of mind.

"Push, Mr. John," replied his customer, "I always thought it was Chinese etiquette not to talk about the things they like best."

The Oriental blinked his eyes as the lady passed out.

An End Missing.

An Irishman who served on board a steamer was selected by one of the officers to handle a gun of considerable length that was towing over the taffrail. After pulling in 40 or 50 fathoms, which had put his patience severely to the test, as well as every muscle of his arms, he muttered to himself: "Surely it's as long as to-day and tomorrow I'll have to work for any fire in the ship. Bad luck to the leg or the arm it'll leave at last. What more is it yet? Och, murder! The say's mighty dead, to be sure!"

After continuing in a similar strain and complaining there was little probability of completion of his task, he suddenly stopped short, and addressing the officer of the watch exclaimed: "Bad manners to me, sir, if I don't think somebody's cut off the other end of it!"—The Pathfinder.

LOST \$300.

Buying Medicine When Right Food Was Needed.

Many men complain of "bloating" and "indigestion" while the poor old stomach is loaded with pastry and pork, or worse than losing a pocketbook containing the money.

If the money only is lost it's bad enough, but with lost health from overeating, it is hard to make the money back.

A Mich. young lady lost money on drugs but is thankful she found a way to get back her health by proper food.

"I have been a victim of nervous dyspepsia for six years and spent three hundred dollars for treatment in the attempt to get well. None of it did me any good."

"Finally I tried Grape-Nuts food, and the results were such that it cost a dollar a package. I would not be without it. My trouble had been caused by eating rich food such as pastry and pork."

"The most wonderful thing that ever happened to me, I am sure, was the change in my condition after I began to eat Grape-Nuts. I began to improve at once and the first week I lost 15 pounds."

"I feel that I cannot express myself in terms that are worthy of the benefit. Grape-Nuts has brought to me and my wife freedom from pain and suffering. I will send a copy of this letter if it will help some poor sufferer find such as has come to me."

Name given by Posture Co., Battle Creek, Mich. Read "The Home Well-Being," in page "There's a House."

LIEUT. CHARLES TOTTEN DIES.

Former Army Officer and Prophet Passes Away.

Milford, Conn., April 13.—Lieutenant Charles A. L. Totten, United States army, retired, and former Yale professor, died at his home here Sunday.

Lieut. Totten was widely known because of mathematical deductions which he based upon the interpretation of scriptures, most of them as to the world. He was a native of New Haven, Conn., and in his fifty-seventh year. He was a graduate of Trinity college and West Point. He retired from the army in 1892.

HISTORIC CHURCH BURNED.

Old Edifice in Berlin, with War Flags, is Destroyed.

Berlin, April 11.—The historic earthen church in the Nemo Friedhofstrasse, dating from 1763, was completely burned out Monday night, together with the ancient cemetery.

What remains standing is a ruined structure which decorated the central aisle of the church. Only one of these flags was saved.

Missing Child Found Dead.

Roselle, N. J., April 14.—The body of Lillie Olson, the child who disappeared mysteriously from the home of her parents near here early in December, was found Saturday morning.

The child, who was 10 years old, had been missing for two days.

Daniel R. Noyes Passes Away.

Paul, Minn., April 13.—Daniel R. Noyes, one of the leading Presbyterians of the state, died Saturday morning at the age of 70. He had been stricken with a cerebral hemorrhage.

I've Been Thinking

By Charles Battell Loomis

If you do not care to wreck your bark on the breakers of divorce, see it to that Love stands at the time when you go aboard.

"Love suffered long and is kind." A very pleasant fellow to have at the helm, you must admit.

When you go down to the pier at which the little boat is moored, you and she, be sure to it that Love, the dear little fellow, is standing somewhere, who will and then do you call him up and say, "I entrust my bark to your keeping. We want to sail as long as the boat lasts and we want you to guide us among pleasant places. If storms come up we do not wish to evade them, only see to it that whether all gales; and whether you do see them that we do not strike on the rock of divorce."

And love will shake his curly head and say with a merry laugh,

"I have acted as helmsman to many a couple but never yet have I struck a rock of divorce. Now, over there is a well dressed sailor named Gold. His sail is bigger than this and is furnishes better, but if I do say so, he cannot mind helm as well as I, for

many and many a couple has split up on either side of the rock of divorce. Are you ready, sir? Shall I cast off?"

"Cast off, my heart," say you. "We are in for a long and perhaps an adventurous voyage, but with you and what's on board I'll be bound it will be a happy one."

All of which is a pretty little allegory and I made it up out of my little head.

And it's true, every word of it.

His other day I had been going on at a pretty fast rate denouncing the gotten money of the American "robber barons," saying that I would rather die poor but honest than be as rich as the king of kings of his name, but he is respected by the unthinking everywhere.

Suddenly a man who is known from end to end of the land comes up to me—yes, to me, and asked how now I was getting along.

Why, I almost gasped for breath. He is worth millions, and I wondered how he could have heard of me, who

owe the dollar and a quarter that I call my own.

Now, every body made him slyly sinfully he did. He stands high up among the Standard Oil men and I would to one in contempt for his methods, although I will admit that his manners are perfect and he certainly seems to know people outside of his world.

He congratulated me on a story of mine that he had read. It was one salting plutocrats, but he had missed the satire and had taken it as a compliment.

Said he, "I wish to help people in all the rats. I wish to seek our artists and give them rolls of money. I want to find struggling musicians and aid them to an education. And I particularly want to give you a house and lot and some shares of railroad stock that will yield you an income of \$10,000 a year."

Well, you may imagine I did not know what to do. However the man may have come by his money, he was certainly moved by kindly feelings in wishing to share with me.

I hesitated and hemmed and hawed and thought of my family and of the good uses to which I might put the money.

And then I remembered that my ancestors were Puritans, and that not one of them in all the nine generations ever told a lie or did anything wrong in any way whatever. And I took a long breath and said, "The money perish with thee." And then I woke up.

CUT Prices on Green Vegetables

We have made arrangements with one of the big vegetable hot houses of St. Paul for a shipment of stuff every Friday morning. By getting them direct we cut out the profit of the commission houses, and you get the benefit.

Look at The Prices

Head Lettuce, regular price, 5c
Radishes, 2 bunches, for 5c
Onions, regular price, 5c, our price 3 for 5c
Celery, regular price, 10c, our price 5c

This is all fresh, fine stuff, and is nearly as cheap as you could raise it.

Crockery

We now have the best crockery display between St. Paul and Duluth. Have taken all dishes off the balcony and have them on the ground floor. Come in and look it over and at the same time see some of the great bargains we have in odds and ends that we picked out while moving the stock.

News of the Week.

Chips Picked Up Around Town and Vicinity

The ice went out of Pokagona lake Tuesday.

Many thrifty citizens have already completed their spring yard cleaning.

Rev. E. K. Copper will preach at the M. E. church on Sunday morning and administer the Sacrament.

Dr. Benjamin Swartout, Dentist, will arrive on Tuesday, April 21st, remain until April 28th. Office in the Rybak block.

Mrs. William Zeigler, nee Miss Anna Kiek, of St. Paul, and child, are visiting at the home of Mrs. George Kiek, in the western part of town.

J. A. Oldenberg, of Finlayson, was here on a portion of the grand jury on Tuesday and Wednesday, and while in town made the Pioneer a pleasant call.

Pepe Engel and Abe Swanson launched their launch last Sunday, and on Monday Abe went up to their cottage on Mission Island. This is the first launch of about 30 owned here to make a trip this season.

The Ladies of the G. A. R. will serve a twenty-five cent supper in their hall on Wednesday, April 22, from 5 to 7 o'clock. All are invited. A "pillow-case sale" will be held in connection.

Granville S. Pease, of the Anoka Union, was a Pine City visitor on Wednesday afternoon, and took in the convention. Bro. Pease owns one of the best country papers in the state, and it is always a pleasure to meet him.

C. C. Mitchell, who conducts the only republican daily paper in the 8th congressional district—the Duluth News-Tribune, was here on Wednesday to take in the convention. He made the Pioneer a pleasant call.

Another mark of the growing metropolitan appearance of our village is the new covered ice wagon of J. M. Collins, on the sides of which is inscribed "Pine City Ice and Fuel Co." Pine City is certainly coming to the front, despite the saying of some that she has seen her best days.

Roe G. Chase, editor and proprietor of the Anoka Herald, came over on Wednesday to attend the 8th congressional district convention, and in the morning made the Pioneer a fraternal call. Mr. Chase has owned and conducted the Herald for the past ten years, and it is one of the best exchanges that comes to our table.

J. S. Hogan, of Kerrick, was here on the grand jury, and while in town made the Pioneer a pleasant call. From here Mr. Hogan goes down to St. Paul, where, together with a delegation from Partridge and Hoyoke, he will wait on the railroad and warehouse commission in regard to the action of the Great Northern Railway in closing up these three stations between Sandstone and Superior, which action went into effect the latter part of last week.

Hon. R. C. Dunn, of the Prince Union, was one of the most prominent delegates present at the convention. He spoke several times and offered the resolution endorsing Hon. E. B. Hawkins as delegate at large to the National convention. During his remarks Mr. Dunn said that he had never tried to dictate the course of the republicans of the 8th district, as had been intimated by some, nor did he intend to. He thanked the republicans of the district for the support given him in his fight for governor four years ago.

Osar Berkley, of Minneapolis, was here on Tuesday to see his mother, Mrs. Peter Berkley, who suffered a stroke of paralysis one day last week at her home about 6 miles northeast of here, on the Meadow Lane road. She was brought to the home of her daughter, Mrs. A. W. Piper, in this place, where she is at the present time. The Berkley family are surely having their share of trouble. Mrs. Lyle Gibson has just undergone an operation at Asbury hospital, Minneapolis, and is expected back home the latter part of the week. Mrs. Gibson is a daughter of Mr. and Mrs. Berkley.

Popular Specials.

LAUNDRY—Bill Jumper is again sending laundry to the Laundry Company of Duluth. Laundry sent every Tuesday—Mr. Jumper sent to this company before, and they gave the best of satisfaction.

FOUR SALE—Raspberry plants, 4 varieties. Apply to J. B. Sowars.

FOR RENT—Six up stairs rooms suitable for offices or housekeeping. Apply at this office or to J. V. Voleen.

NOTICE—My wife, Annabel Barnes, lets my bed and breakfast without just cause or provocation. Oct. 21st, 1897, I hereby forbid anyone to trust her on my account, as I will pay no bills of her contracting after this date.

Dated March 10th, 1898.

J. B. SOWARS, BAKER.

GARMENTS WANTED—1000 prints. Also portraits 4x6 inches framed 30 and up, sheet pictures one cent each. You can make 400 per cent profit or \$80.00 per week. Catalogue and Samples free. Frank W. Williams company, 12 W. Taylor street, Chicago, Ill.

FOR SALE—Gasoline launch, row boat heating and cook stoves, large ice box and lots of mattresses. Apply to L. A. Slocum,

FOR SALE—Stove mill wood. Apply to J. B. Sower.

FOR SALE—An organ—or will exchange for a small milk cow. Apply to S. B. Wells.

FOR SALE—I have the Albrecht property back of the M. E. church for sale. For particulars and terms apply on the premises, or to PINE CITY STATE BANK.

Dr. K. W. Knapp, dentist, permanently located in the new Voleen building. Phone 61.

Horton, the photographer, is in his studio every Tuesday and Wednesday.

The choicest water front lots in town for sale by J. H. Claggett. Bring your cream to Madden's.

HICKS' ELOPEMENT

By PORTER EMERSON BROWNE

(Continued)

You doubtless never knew Hicks of Hacksaw; which is your loss rather than his, for, while there are probably very many people who are much like you there is but one Hicks.

For the time when he first began to cogitate at the saying that nature had intended for his brain, that which she had given to abhor, he was always mounted on some ridiculous animal, either a mule or a camel, and he would change 'em like a songster's robes.

He'd rave over eloquence and affairs of honor. Then he decided that at last his chance had come and he bought him a long, low, rakish-looking car with a French name that he could not pronounce, and he named it Hastings. "Er, I know I am on the instant, for hadn't I played football on the same eleven, driven on the same crew, and cut the same lecture?" he said to himself, and he would change 'em like a songster's robes.

Anastole taught Hicks for about six months and then Hicks thought that he could run the car himself. He tried.

When he and Anastole got out of the hospital he tried again, slower. And after awhile he became really expert. He had over one hundred dogs and chickens then and, I ever saw and he averaged three arrests a week during all of last summer.

In spite of his many shortcomings, Hicks was not unpopular. So, when a crowd of us went down to the Laramie River, Nebraska, place for the first football in September, we were not surprised to find Hicks there with his car and Anastole.

We had been there but a few days when there arrived a niece of Mrs. Lipsenauer. Her name was Hortense Stoye. We were glad she was certainly going to look upon.

As for Hicks the moment he got his spectacles on her, it was all up with him.

He was so pitiful that we all felt sorry for him, began to try to cheer him up, and get him interested, even if we had to ring in the anachronistic actions and adventures of Fritz of Fahrneisen to do it.

Still, we didn't devote any too much of our time to Hicks, for the rest of us weren't much better off.

Now, however, he was a bore from her any more than he could possibly help, and the consequence was that she was always surrounded three deep by a circle of adoring swains devoted to the point of manslaughter. And, then, suddenly, Hicks brightened up most amazingly and became his old jaunty, debonair, devilish self again.

A few days later when Hortense's father was looking for her she could not be located. Then it was discovered Hicks was also missing.

Anastole was instituted and at length one of the men found who said that only a few moments before he had seen Hortense and Hicks buzzing along the back road to the crossing in Hicks' unpronounceable racer; and almost at the same time, old Miss Baxter came in and announced that Hicks had told her that there would be an elopement at no distant date and opined that this was it.

We all gasped. Then we all looked at each other in speechlessness. Then, as soon as we could get enough wind with which to do it, we all gasped again.

So this was the answer! So this was what necessitated the change in Hicks! So this was why he had ascended from the cellar of despair down to the root garden of joy! So this— But Hortense! How could she have done it! How could she have chosen Hicks when she had Monty Fiske and myself and all the others to select from? How could she have taken any prize when she might have taken any of the others? How, how . . . !

But Hortense's father at last awakened from the condition of complete bewilderment that enveloped us all. He hopped up right into the air, and when he lit he ordered everyone to do nothing, and then not to do it; and then to do or not, just as he wanted them to do or not! and want them to do. He demanded that we all start in pursuit and ordered out all kinds of vehicles from balloons to submarines.

Somebody said that there was a minister at the Crossing and that they had probably gone there. So Anatole was suggested away from the door of the wind-swept hall and told to bring on the Daim-Vite car and get us over to the Crossing immediately, and as much sooner as possible. Stanwood West was by this time in a state of incipient apoplexy, and the rest were busy trying to keep him from getting in all over; so Monty Fiske and I, being deemed the least valuable to the world at large, hence the best qualified to ride with Anatole, were the only ones to go, while we were glad to do for the double purpose of being in at the finish and of gaining an opportunity to tell each other what we thought of things.

We broke speed ordinances that night so that you couldn't have found a segment with a fine tooth comb; and it couldn't have been more than eight minutes before we sighted the minister, whom we at once recognised because we saw the headlight of Hicks' car in the street in front of the gate.

Before the Daim-Vite came to a stop,

ROAD AND FARM IMPROVEMENT

HOME-MADE POST DRIVER.

It Can Be Used to Drive a Wall Also.

We had hopped out and charged toward the front gate. But just as we reached it, the door of the house opened and out came Hortense, leaning on the arm of a tall, broad-shouldered man who was wearing a cap.

"Good morning, Mr. Hastings," he said. "I know I am on the instant, for hadn't I played football on the same eleven, driven on the same crew, and cut the same lecture?" he said to himself, and he would change 'em like a songster's robes.

The man, who was Hicks, had the best features I ever knew.

"What was he doing there? And where was Hicks?"

It was one of those situations that make a man feel as though his intellect had been taken away. While I was sprinkled all over him. While I was I was into a heap where it would work. Monty Fiske grabbed me by the arm. "Look here, boy, what are you pointing at?" And there, in the seat of our carriage, was Hicks sitting on the curb. His expression—but he had none—not a bit in the world, and he was trying to scratch a cigarette on his trousers with the exacting art of lighting the match, which he held in his hand.

Fiske and I stood like two pumpkins on a log. Hastings and Hortense hadn't seen us at all; and he led her toward a ratty old depot carriage that was standing a bit farther down the street, which he held in his hand.

Suddenly they almost fell over

Easy to Drive Posts with This.

to be driven and the weight lifted and allowed to fall on it. A little practice will enable one to drive posts in soil as easily as in stone. The rig is used also in driving down fence posts.

To drive a post, lay down the farm tools. One 14-inch pipe is preferred. The length should not be over six feet. The first pipe to be driven must have a point of iron or steel. Any lumberman who is an expert at driving can readily make one solid in the end of the pipe and then bore a enormous one-fourteenth poles in it for the first 18 inches of its length above the point. Before driving, a coupling must be screwed down tight and another pipe thread is to be connected to it to make it so that it may not be injured. Also on top of the coupling must always rest a block of lead or seasoned hickory, to receive and distribute the concussion, to prevent splitting the coupling and break joints.

The pipe is driven the same as a post, another length being attached to the first and so on until the ground. One rule must never be forgotten. Each length of pipe must be threaded so long as it screws into the coupling and rests (butts, they call it), on the end of the pipe beneath it. This prevents splitting the coupling and leaky joints.

DRAG THE ROADS.

Not Too Late Yet to Do Much to Improve the Highways.

Hicks, who was still absent and definitely trying to light the cigarette on his trousers.

When Hortense (now Mrs. John Stanwood Hastings, of Brooklyn) saw Hicks, she stopped short and, leaning over him, cried impulsively:

"I have been looking for you for all you did for me, nor can I tell. Your car was really the only one in which we could have been sure that you would have been unavailable, you know. Jack and I are ever and ever so grateful to you, and always will be. Won't we, Jack?" and she smiled at Hastings in a way that made Monty Fiske green with envy.

But poor Hicks seemed beyond human aid. He looked up at her with blinking sheepish eyes and blurted out:

"But I thought you were going to marry me!"

Mrs. John Stanwood Hastings looked completely kerlumpanized (if anyone among us can look like that).

"You said we were going to elope and asked me if I would have the car ready at half past seven, so timed Hicks in the tone of command of a man who has been awakened from a peaceful and roseate dream by having the bed give away.

Hortense looked down on him comprehending, and there was a soft light in her dark eyes.

"I'm so sorry," she cried, softly, "so sorry, Jack, and I wish I could explain very fully, perhaps, for I was hurried and nervous and then, I don't know, for a moment I imagined that you would think that I meant you—I didn't think that you had ever thought of such a thing, or desired it."

Monty and I stood silently watching the only old depot wagon-carriage disappear into the darkness of the quiet, sparsomically lighted street. Then Monty sighed. Then I sighed. Then we both sighed together. And we meant 'em, too.

We tried to add some comfort from the fact that there was but one Hortense, and two of us, so, sighing again, we went to where Hicks was still seated, and, taking the match from his hand, shook him a couple of times.

"Er—what's the matter?" he said at us with lack-luster eyes in which a faint gleam of almost human intelligence. And, as we bundled his tank frame into his tank car he murmured helplessly,

"And to think that she took him when she might have had me!"

And—oh, but what's the use?

CROPS AND MOISTURE.

Vimely Cultivation Will Save Much of Former For.

Much of the moisture taken up by our soils is lost through lack of timely cultivation. At no time is this waste greater than in spring time. During the winter and early spring the moisture that falls is taken by mother earth only in the form of capillary action to the surfaces of the ground and the winds begin to blow. This causes evaporation of the soil moisture can only take place on the surface, such as are found in beds that have been plowed the fall before and have been packed by the rains and are clear to the surface. If nothing is done, there will be hundreds of barrels of water are lost every day which the coming crop may sadly need before the season is closed.

How much we check this great loss of water by early stirring of the surface soil we can make no much, says Forest Henry in the Northwestern Agriculturalist. Anything that will fine the surface soil to the depth of two or three inches will do the work. A furrow a foot wide may perhaps be at the head of the hill. The implement list for this work Ordinarily two harrows as soon as the ground work well will do the work.

The early surface cultivation has also another great mission. It keeps the surface soil from becoming hard and from becoming lumpy. How often a farmer in the past has neglected this early work in his cornfield and then later was compelled to plant his corn two or three inches deeper than he wished in order to put it in moist earth.

Early surface cultivation will keep the soil moist very near the surface so as to insure germination as soon as the weather permits.

The benefit from cultivation are only just beginning to be realized by a few progressive farmers. Will you be one that will be profited by it the coming season?

THE FARM GATES.

If They Are Properly Made and Hung They Will Not Sag.

A good gate properly hung is one of the best equipments of the farm. It will not tip over, and will save the farm property, too, than if the "sorter" help the look of things, a good gate is easy to make and easy to hang also, and I will give here a short description of the kind I have used for a dozen or more years, writes Bertrand Quinn in "Farmers' Voice" and the same I use now on a good many farms around here. We used to be bothered a great deal with gates sagging or getting out of square.

The gate is driven the same as a post, another length being attached to the first and so on until the ground. One rule must never be forgotten.

Each length of pipe must be threaded so long as it screws into the coupling and rests (butts, they call it), on the end of the pipe beneath it. This prevents splitting the coupling and leaky joints.

DRAG THE ROADS.

Not Too Late Yet to Do Much to Improve the Highways.

An Illinois farmer says of the drag:

"The drag is making more good roads than any implements or machine ever invented. The nice thing about the drag is that it is inexpensive and utilizes the material at hand for filling up ruts and depressions. I have tried extensively during the year just passed, over Illinois, Iowa and Nebraska, to drag a track all the way from the west to the east. The secret of success is to use a good drag and a good team of horses.

The drag is to be driven by a team of horses.

"A good gate properly hung is one of the best equipments of the farm. The Easter Resurrection.

A wonderful, beautiful story is told in the New Testament of the resurrection of our Lord and his glory in the resurrection of all men. This is the time of the year when we are most interested in the resurrection of the dead. The resurrection of the dead is a great mystery, and it is a mystery which we must all learn to understand.

LESSON

How, by God's Way,
Which Is Not Our Way,
Easter Spoke Its Old
Message of New
Life

SIt was a sad Easter for Mrs. Farnham. Three times since the little bird had been dead came to her house. Her mother, her husband, and her boy had killed her bird. Lacking them, it was empty, and it ached with a strange perplexed grief, a confused question as to the purpose of her life, which now seemed to her shrunk and without meaning.

She went to church on Easter morning because her beautiful house was intolerable to her, rather than because she expected to find comfort. The masses of white flowers, with the suggestion of perfume, the sweet fragrance, carried her back to the funeral of the last year. The familiar words of the service sounded like mockery to her. "Let us keep the feast!" "Even so in Christ shall all be made alive!" "Set your affections on things above, not on things on earth." Only one she caught at the phrases, only one she caught was powerless to help her.

The hymn was no better:

"The strife is o'er, the battle done;

The work is done."

For her strife was just beginning, and defeat instead of victory seemed her fate. She could not lift her eyes out of her personal woes far enough to apply the words to anything but herself.

She left the church, sorrowing with any one, and, with her heart like ice in her bosom, she took an electric car toward her desolate home.

A half block before her house was reached the car stopped with a suddenness which startled the passengers. Mrs. Farnham, in a fit of thinking that she would walk the few remaining steps, but saw the automobile stop, a white face raising a small boy in his arms from under the fender of the car. The little fellow was unconscious, and there was an ugly bruise on his temple, and a deep cut on his cheek. Before Mrs. Farnham ran to him, she was doing the child was carried into her house, and she was enlisted with the doctors in a fight for his life.

For a week the same was doubtful. Consciousness flickered and wavered, but would not come back. Meantime Mrs. Farnham had learned that the boy was nobody's child. He had no gold papers since he was hardly more than a baby. He had lived wherever he could find shelter, and had eaten whatever he could get. The fact of having a son whom he had never experienced. The erring woman forgot her grief in her devotion to the waif who had been cast at her door by the strange decree of what we call accident.

The day came when the boy's heavy eyelids lifted and his childish curiosity at his surroundings unloosed his tongue. Then the joy of the birth of new life was the most wonderful of joys for his foster-mother. After his long silence it was as if he had come back from the dead. That he could talk and laugh and eat and love again was a proof of the power of life over death. Somehow Mrs. Farnham came to believe that it was such a proof, and that it was sent to her in her desolation.

Out of the boy's almost fatal accident there was wrought for him the miracle of home and love, and the opportunity of education and useful manhood, and for the grieving woman the springtime brought the hope as the lonely winter passed. By God's way, which is not our way, Easter spoke its old message of new life—Yours' Companion.

The Easter-side's Lesson.

Since our existence is divided into two sections, the one of the temptations and sufferings of this earthly life, and the other that which is attained in the security and joy of eternity through Christ, so the circle of the Easter festival is divided into two parts, the time before and after Easter. The time before Easter points us to the conflicts and sufferings of life, the time after Easter to the happiness which we can obtain through Christ. The Lord's passion shows us the present life of suffering. The resurrection and glorification of the Lord shows the life which we shall receive.

Custom Not Christian Alone.

The giving of eggs at Easter is derived from the old nature worship, and is not confined to the Christian nations. The Persians and Indians distribute eggs at the opening of spring, and in many other nations the giving of eggs at the commencement of spring is as common as New Year's gifts with us. In Hungary the boys sprinkle the girls with rose water and receive eggs in return.

Easter.

Now, while the dawn with tint of rose
Smiles through the gray skies, every
where, about her morning care
The East is born.

The little rooms we call the hours
She gliblythinks for all our sakes
And in their cradles gently wakes
The earliest Spring flowers.

The dark hath somehow fallen away,
The sun is up, the path upreared.
The snow-white curtains we bade the
Dawn of Easter Day.

With a cheerful song she gives
The first birds welcome to her door,
While the other world once more
Rejoices that it lives.

—Frank Walcott Hatt.

Legends of the Beautiful Forget-Me-Not

"The sweet forget-me-not that blooms for happy lovers," has more

beautiful legends clinging to its name than any other flower. They begin

"In the beginning," with the creation of the world, and end with the Lord calling the plants in the Garden of Eden before him to give them their names and color. As he spoke to one after another, a tiny flower thought itself unimportant, and years of being overlooked, it timidly pleaded,

"Dear Lord, forgive me not." The old man turned swiftly toward the little plant that dared to interrupt him, then, seeing how sorely afraid it was, he gently laid upon it, gave it for its own the heavens' own blue, and called it Forget-me-not, a reminder that it had once been so foolish as to doubt him.

It is the Persian who has fashioned a beautiful legend to tell how it is that these flowers are scattered over the earth. It is said that when the morning of glory when the world was new an angel stood weeping outside the closed gate of Paradise. And while it is cold, each cold, frosty tree bears the moisture experienced in the cold Schools are good as encouraged by the Government; the enterprising American promoter and Yankee drummers set up, that we take notice of the best agricultural and best agricultural machinery. Although we are as near to affairs as we will be to our own farms in the States. Winnipeg bears the same relation to us as Chicago did at home; and Edmonton and the surrounding advances in the north are as rapid as those in the west of west of Winnipeg: we did not get in each other's way. One's friends over the world probably would we not meet though in winter; and while it is cold, each cold, frosty tree bears the moisture experienced in the cold

schools of agriculture, and progress in general is still slow.

It is a great reason for grading," he said, "that there is a great difference between the Calgarian citizens continuing, and then with building elevators of wheat and one dollar a bushel, many of us find time to go over to the live stock exchange in Chicago or visit our friends during the winter.

Every man is taken for what he is worth or for what he can raise, and in this good air and on this fertile soil we intend to show our old friends that we are made of the right stuff—that we built up the American West."

NEW ARRIVALS IN CANADA NEARLY 300,000 IN 1907.

ABOUT SIXTY THOUSAND FROM
THE UNITED STATES.

Now that it is known that in the

year just closed nearly sixty thousand Americans from the United States declared their intention of making their homes in Canada, it might not be a bad place to search for some reason that would bring this about. These people are not following the example of the fifty-four on trial, who did the same thing the year previous, and an almost equal number who did before that but followed the example of those of the year preceding.

An exact estimate, certain and positive crops of grain of all kinds, good markets for their products, and good land, too—at low rates, easy terms of payment, not forgetting the low prices of land given free by the Government, particularly of which the Canadian Government Agent whose name appears elsewhere will tell you about) and then the splendid social conditions.

The situations are pretty well set up by a writer in one of the magazines. Quoting from this article, we find that "Those who made good in the States" intended another settling as if to continue the story of his neighbor, "Have had a hard time, but the start a little money is a mighty good thing on coming into a new country. Those who make an entry, or even buy lands at low rates, are able to square things in two or three seasons' crops. There are no debts, but little shanties, and then increasing rapidly getting things into shape for better homes. But affairs go much as in the States. We have the largest liberty in property. More is home rule in the Provinces than in the several states of the Republic. Taxes are light and with only a few minor restrictions, and in Manitoba, for instance, a tax on real estate is the only one.

MACHINE GROUND PAINT.

Occasionally one hears the "mixed paint" of the painter slightly spoken of as "unscientific" and "not thoroughly mixed." The facts are, however, that the painter did not mix it at all, and the fault of the painter and his brush prepared to do so.

It is the most "scientific" paint there is, because it is made on the spot to suit the particular purpose for which it is to be used. It is as scientific as a good doctor's prescription.

The paint did not mix at all. It would be as unscientific as a patent medicine. Moreover, the paint which a

housewife turns out is made of

glue, white lead and pure linseed oil.

If he does not mix it, he cannot

make his client cannot be sure.

It acts thoroughly and naturally and truly as a laxative, and its component parts are known to and approved by physicians, as it is free from all objectionable substances.

To get its beneficial effects always purchase the genuine

manufactured by the California Fig Syrup Co., only, and for sale by all leading druggists.

An Undesirable Article.

When Mr. B. went to call upon some friends the other afternoon, he was on his way out of town and so had his revolver in his pocket with him. "This he placed in a corner and then when he happened to leave he overlooked it. His hand reached the door, and called to his little daughter, who had left his grip hand."

The little one gave her mother one swift glance of surprise, but few details follow old orders.

"Oh, Mr. B. when he heard her say, 'mother says you have forgotten to take your grip with you.' Then she added, quickly, in a tone of politest apology: 'You see, most of us have had it this winter, and we'd rather not have any more!'

Prompt Payment.

A village doctor, whose most troublesome patient was an elderly woman practitioner on a retainer list, received a round rating from one day for not coming when summoned the night before.

You can go to see your other patients, and you can't afford to be late when you come when I send you.

"I don't know, madam," was the reply. "I never saw any of it."

Truth and Quality

appeal to the Well-Informed in every walk of life and are essential to permanent success and creditable standing. Accordingly, it is not claimed that Syrup of Figs and Elixir of Senna is the only remedy of known value, but one of many reasons why it is the best of personal and family laxatives is the fact that it cleanses, sweetens and relieves the internal organs on which it acts without any after effects and without having to increase the quantity from time to time.

It acts pleasantly and naturally and truly as a laxative, and its component parts are known to and approved by physicians, as it is free from all objectionable substances.

To get its beneficial effects always purchase the genuine manufactured by the California Fig Syrup Co., only, and for sale by all leading druggists.

160 Acre FARMS in Western Canada FREE

Typical Farm Scene, Showing Stock Raising in

WESTERN CANADA

Some of the choicest lands for grain growing, fruit growing, and mixed farming in the new districts of British Columbia have recently been opened for settlement under the

Revised Homestead Regulations

Entry may now be made by proxy (on certain conditions), and the homesteader, man, woman, brother, or sister of an individual or corporation, may now make a claim of 160 acres each, and thus now can establish a farm for grain growing, stock raising and mixed farming.

There you will find healthful climate, good soil, and excellent opportunities for your children, good laws, and ample opportunities for advancement to market.

Entry fee in each case \$10.00. For pamphlet, "Last Best West," particulars as to rates, and the best time to go and where to locate, apply to

CHAS. PILLING, Clifford Blk., Grand Forks, N. Dak.
