Some Suspicious Persons

Enquired if we were "hiring" a certain "weekly" paper to abuse us. Some Facts

Of course every time a spot light is turned on from any sour t offers a splendid chance to talk about the merits of the products, not 'pon honor now, we are not hiring that "Weekly."

The general reader seldom cares much for the details of "acraps."

A few may have read lately some articles attacking us and may se interested in the following:

Some time ago a disagreement arose with a "Weekly." They induced our foods by letter, but wanted to change the form of advertising, to which we objected.

The "Weekly" discontinued inserting our advertisements while they were negotiating for some changes they wanted in the word-ing and shape of the advertisements, and during this correspondence sur manager gave instructions to our Advertising Department to quit advertising altogether in that "Weekly."

Quite a time after the advertising had been left out, an editorial attack came. We replied in newspapers and the scrap was on.

Then came libel suits from both sides, and some harsh words,

Generally tiresome to the public.

We say that in cases where coffee disa-ses and is causing sickness its dismissal il remove the cause of the trouble, and suggest the use of Postum for the son that it furnishes a hot palatable raing beverase, and contains natural ments from the crain which can be

So an attorney from New York spent more or less time for months in Battle Creek hoping to find impurities in our foods, or dirt in the factories. After tireless spying about he summoned twenty-five of our workmen and took their testimony. Every single one testified that the foods are made of exactly the grain and ingredients printed on the packages; the wheat, barley and corn being the choicest obtainable—ell theroughly cleaned—the water of the purest, and every part of the factories and machinery kept scrupulously clean.

He next turned to discover something about our advertising that could be criticized.

That all proved disappointing to the "Weekly." There are very few factories, hospitals, private—or hotel and restaurant kitchens that could stand the close spying at unexpected times and by an enemy paid to find dirt or impurities of some kind.

In-any ordinary kitchen or factory he would find something to magnify and make a noise about.

But he failed utterly with the Postum Works and products.

Twenty to thirty thousand people go through the factories annually and we never enquire whether they are there to spy or not. It makes no difference to us.

An analysis of the methods and distorted statements of the "Weekly" may interest some readers, so we take up the items one by one and open them out for inspection. We will "chain up" the harsh words and make no reference in this article to the birth, growth and methods of the "Weekly" but try to coufine the dis-cussion to the questions now at issue.

This is intended to middle the reader into believing that we put out frape. Nate Distortion No. 4. This is a bud one. It reads as follows: "The only famous physician whose mane was signed to a proposition of the control of the cont

It may be remembered that we were first attacked and have since defended curselves by placing facts before that great jury---The Public.

A good "scrap" is more or less comforting now and then, if you know you are right.

In the case lately tried, an appeal has been taken to the higher courts. We have unbounded faith in the ultimate decision of our American Tribunals.

Our suits against the "weekly" have not yet been tried. They are for libel
