Gold Won by Our Ships

Prosperity of Merchant Marine Due to the War

Washington.—The present guiden era for American shipping resulting from great demand for escal tonnage, and the extraordinary predits that have hean made in our carrying trade by sea, have been shown by research to be a recurrence of similar conditions that have prevailed three times better in the history of the American mer-

Whenever there has been any extraordinary condition to change political in or economic balances in this er other great countries, prosperity for shipping has followed, say experts of the Unit-

an Strice singuing down.

In proof of this they could to the great expansion of our cogal reals following beat of 1800 by the strice and the West Strice and the Strice and

None of the stories of fabilities are lings of vessels in the merchant marine in the first three years of the present in the first three years of the present ware-before the shipping board began regulating freight charges at see—are more interesting than those of the wealth won by ships owned in of Salem, Mass., in the period in which their owners were developing American trade with distant parts of the earth, following both peace treattee earth, respectively between the sale of th

In 1709 the ship Mt. Vernon of Salem made a profit of \$100,000, four times her original cost, on a single round trip to China, going out with sugar, and returning via the Mediterranean, where she took on silks and wines for the American market.

The owner of the Mt. Vernon, Ellas HaskassDerby, died while she was on this voyage and left an estate valued at \$1,000,000, the largest American fortune to that time.

Salem captains were ever on the alert for new ventures in those days of rich profits. When in 1795 Capt. Jonathan Carnes of Salem heard by way of gossip when ashore at Barcelona, Spain, that pepper grew wild on the coasts of Sumatra, be noted the information carefully. On his arrival home he imparted it to Jonathan Peele, a Salem merchant, who forthwith fitted out the schoon! Hajah, and dispatched her to Sump a.

The Rajah brought back the first full cargo of pepper to be landed in America, and her owner reaped the tidy profit from its sale of 700 per cent on his investment.

Certain ships, known for their lucky voyages, made fortunes for their owners. One famous in the annals of that person of the state of t

The value of her cargoes may be judged in that in her 22 years of active existence there was paid on them at the Salem customhouse, in import delice and less than \$200,000.

The George was a tiny ship, as vessels go nowadays, being only 114 feet long, yet she proved a shining example in other wars of the giories of the bad the reputation of carrying the most intelligent crews to be found anywhere—except possibly on certain other and the ship—and was famed for the number of men who graduated deck.

When she salled on her first voyage to India, in 1815, hardly a man in her crew was twenty-one years old, yet each was an experienced seaman, and nearly every one was a navigator.

Of the sallors who served on her in

i. Of the sailors who served on her in her long and prosperous careier, 45 became captains, 20 chief mates, and six sevond mates. Thomas M. Saunders who served on her as a boy, passed through every grade—of ordinary and sable seman; third, second and chief mate—and ultimately became her capfain.

The case of the George has been cited as an example of the beneficial effect of continued prosperity on a nation's merchant marine.

rot tess than 7,000 men signed artides in the counting room of Joseph Peabody to man his fleet, the various craft which made 38 voyages to Calcutta, 17 to Canton, 32 to Sumatra, 47 to St. Petersburg and 30 to other European ports.

In the later period of the so-called clipper ship era of the merchant marine, great profits were made by Amerfean ships at a time when the vessels of other nations were grabbing for charters. This was due to the superior speed of the American vessels. The Rainbow, the first distinctly

200 per cent profit on her first voyage

The Oriental, an American clipper built in New York in 1849, to compete with the English tea ships, earned \$48,000 in freight money on her first cargo of ten from Hong-Kong to London.

In the gold rush to California, in 1840 and 1850, many ships carried more than their value in a sincle voyage. Demand for space regulated the charge for carrying freight, as it does now, and the top prior reached was 800 u ton.

At this rate the ship famued Russell carned \$70,00 to freight money on one voyage—more than her cost. Some of the charters made in the earlier period of the war, for American vessels were on such a liberal basis that the freight money for a single voyage to Archangel, for example, paid for the ship making the voyage, a condition to be looked for say the experts. In these of abnormal demand for earlier paids of the carned the control paid.

Food Problem

By Dr. Samuel G. Dixon missioner of Health of Pennsylv

Most of our foodstuffs are made up f different constituents. A potato is

tuents. A potato is largely composed of starch, whereas beefsteak is largely composed of nitrogen or protein, Starch represents so many heat-producing units, and beefsteak likewise produces its own quota.

This is so when

matter from a bar contract standpoint, but if you made a test of the same values by feeding these foods to human beings you would find the values varied greatly because of the variations of the human or or ganic machinery which handled them some individuals, passes through the digestive system without the body as similaring it and obtaining the addition of its best units. In the cases of other diddididals, the same thing would hap find the diddididals, the same thing would hap the same thing

pen with bectateak.

Nor this reason we must remember when advising foodstart for a comma manner of the state of the state

stuffs.

The people of the state of Pennsylvania eat too much potato. The large proportion of starch in the composition of this vegetable produces a catarrhal condition of the digestive tract, which interferes with digestion and leaves the patient insufficiently nourished, eventually over a long series of years pro-

Ment, as a rule, is also overeaten by Pennsylvanians. Just now, however, during the tension of the war, we need more ment than usual.

It should also be kept in mind that meat will be more easily produced daring the war than will vegetables, for our trouble will be the want of male help to carry out the continuous demands occasioned by the cultivation of vegetables during all stages from planting to gathering, whereas cattle can in great measure take care of themselves, and what human help is required need not be of the highest development, either physical or mental.

Potatoes as Substitute
For Wheat and Any Other
Grains in Making Bre

By P. G. Holden.

It is bardly possible to estimate the possible for a standarding of food conservation great value of potence as a substitute for wheat and other grains in timising of breat.

One hundred million buddels of main postures will save 100,000,000 bushels of wifest. About 30 per cent of the annual popular carp is the Visited States consists of apral pointers which are minarchishin, made fully use of, presentedly washed million of the presented presentedly washed million of the present search se adopting for one-third the wheet floor used to making brand. Pofron bread is better bread in every way then bread made entirely of wheat of a combination of whem and other

grains— of patrons his french is esclared at any time. To repartise a large it utilizes was patrons of a sarse where and other grain while can be exported; serves corn, barden and outs which can be used to produce ments and falls for our soldiers are ments and falls for our soldiers are for every ment; does not require fee, trat work face the heasewifts, nor claims, the usual custom and practices of, the house means two had one third when a morth, forgr. when the sands.

Pear.

Potatoes are grown in every section of the country, found in every home are a universal food. Every family can produce them. Potatoes are a produce them.

Mixing Potato Bres

the possibilities of increasing the to tal yield in this country cannot be estimated. Pointoes are a perishabil crop—cannot be exported to forsign countries, cannot be carried over from one season to another. The potatoes we grow in this country we must use at home. The nature of potato state is so nearly the same as wheat flow that there is no difficulty in using its combination in bread making.

Last season the farmers of the United States produced about 440,000,-000 bushels of potatoes. About 100,-000,000 bushels of this crop were small, irregular, unmarketable potatoes.

irregular, unmarketable potatoes.

I earnestly believe that in no other way can so great a saving be made in food in America with so little labor and so small expense as the use of small potatoes in the making of bread in place of small grains which can be shipped to our soldiers and the fighting armites of the allies to help us win this way.

Baked or bolled potatoes, mashed or put through rieer, can be substituted for one-third the wheat flour in any standard recipe for making wheat bread, biscutts, panenkes, waffles, doughtnuts, pie crusts, etc. When potatoes are used, a little less liquid the benefited in the wind of the standard of the

Says Stonewall Jackson's Strategy Eclipsed Other

Which of all the American general is it that has given European strate gists most food for thought? Give guess, or two or three. And then yo will be wrong, according to a Souther congressman, who says it is not Wash ington or Sherman or Grant or Robust E. Lee, the Baltimore Star's Washing

ton correspondent writes.

"Stonewall Jackston is the mun," this
congressman declared. "I was supprised recently in talking to British
army officers, to learn that they have
made it a point to study all of Jackson's campalgus. It seems they regard him as the eleverest of all the
American generals and the most caps
be in maneuvering againet odds.

"One British officer told me that he personally, with a staff of subordinates had gone on foot over all the ground covered by General Jackson in his great raids during the Civil war. He said it was as the a study in tactics as

y. Three Grades Considered

Three Grades Considered.

A special feature of the ordinance is
the grading of milk and cream, which
is believed to be of paramount importance. A great sanitary and economic
question will be solved, it is asserted, if practical grading of milk,
with the consequent grading or selling
price, can be enforced. Three grades

NEED HELP ON MILK LAW? EXPERTS'

A study of the milk ordinances of many cities, large and small, shows a great diversity of opinion anong lawmakers and their a proper milk ordinance. A great lack of uniformity among laws, some of which are entirely out of dich, has been noted. Many of them seem to be transcripts of ordinances in force in scripts of ordinances in force in nicipal series of law without regard to local conditions, and some contain provisions which are unnecessary and unreassonable and cannot be enforced. Building the series of the department dilution for the containing the

are considered—"Certified," Grade A, and Grade B. Pasteurisation is compulsory for Grade B but optional rot experience in the others. Community health departments must determine from their own experience the score and hacteria must determine from their own which represent the largest quantities of milk sold. Grade A must be of such quality that there will be no question as to its purity and safety. Grade'B can be of lower grade than A because posteurisation is obligatory. No grade posteurisation is obligatory. No grade

PINE CITY MILLING COMPANY

Tuesday, Feb. 12th

Service Day

at our store

For the benefit of all users of De Laval Cream Separators we have established a De Laval Service

On this date we shall be glad to have any De Laval user bring his separator to our store for a complete and careful inspection and adjustment, which will be made free of charge. Should any parts due to unusual wear or accident, need to be replaced, this will be done, the only charge being for the price of the new parts used.

A De Laval Service man will be with us to assist with this work, Bring in your Separator and receive the benefit of his advice on the care and operation of your machine, as well as the free service. It is our wish, and that of the De Laval Company, that every user of a De Laval Separator get the maximum of efficiency at the minimum of cost,

No expert is required to keep a De Laval in repair. A little care with the use of De Laval Separator Oil will keep it running satisfactorily for years if adjustments are made when needed.

The following articles are offered to our trade as real bargains, present wholesale prices considered. We offer them at low prices because we got them that way-some of them being bought a year ago though they have just been received.

Sweaters

We purchased an entire "lot" of the fomous Patrick, all-wool sweaters and are offering them way below the present market at \$6 and up. We also have good wool-and-cotton sweaters as low as \$1 50

Work Shirts

Also dress shirts, with or without collars. Bought a year ago but just received. We offer them at the old price while they last. Come and see them for yourself.

Spring Dress Goods

We have just opened an enormous stock of up-to-date spring dress goods in dress ginghams, Egyptian tisues, voiles, and silks in plaids, stripes and

New Silk Waists

We have a new consignment of Ladies' silk waists just received from New York, consisting of late creations, at very moderate prices, in fact, they would be ordinarily considered awfully cheap.

Louden Sling Hay Carrier

LISTEN == LET'S LOUDENIZE A LITTLE

LOUDENIZE-meaning, to farmers, to modernize. Example—to modernize your farm, Loudenize your barn. And what farmer is there who is not interested in moderating his farm, especially his barn? The wise farmer

His barn is the dynamo, supplying the power to his entire plant. The dairy dollars are double duty dollars and are sure ones. And judging from the size of our pile of orders to be filled with "Nothing But Louden" barn equipment, everybody's getting wise.

We want to talk to you, Mr. Prosective Builder, and to show you why, especially with the present shortage of help, you should install Louden Labor Lifters in your new barn, or rather show you how you can do it, and do it economically, for of course, your own good business judgement shows you why.

judgement shows you why. Will figure your job the right way-the Louden way. There's no obstacle but what there's a Louden way

Write or ask for Illustrated Louden Book of Barn Plans. Price \$1, worth \$100, given or sent-FREE

The directors of the feroun
branch of the Pine county chaptes
The directors of the Beroun
merat the State Bank at Beroun
on the evening of January 30th,
1918.

Motion was made and seconded
that the board of directors of the
Beroun branch of American Red
Gross meet the last Monday in
list of those who are helping the
sech month for business transactions.

On motion the buying committee
of the branch was instructed to
buy two bolts of muslin, for the
making of Red Cross bandages,
and that money be allowed for
same as soon as material is received.

After the routine business the
secretary submitted the following
report of receipts and disburse
ments since the organization of
the branch:
