Vol. XXIV

Refuse Aid For County Nurse

After a two hour debate on the question of appropriating money for the support of a county nurse in Pine County, by a large majority of taxpayers, last Monday evening, the board of commissioners had voted in the negative to do nothing more than to appropriate \$1,000 to the Pine County Health Association and Thomas Young against an appropriation, and commissioners Stephen A. Carlson and Thomas Young against an appropriation, and commissioners Hancock and Oakland being in favor of the proposition.

The court room was comfortably filled with men and women, mostly men of whom were present, who were favorable to the board. Gov. Emery of Hinckley opened the debate by presenting petitions bearing about 1200 signatures of taxpayers, asking for an appropriation. Eleven organizations over the county, had also sent resolutions asking for favorable consideration.

Mr. Emery stated that the assessed valuation of Pine County was \$11,000,000, which would mean a two-tenths of a mill levy, or in other words, every \$1,000 assessed would pay a tax of 20¢. He further stated that about half the land in Pine County was owned outside the county and was of no value to the county, and was of little benefit to the whole county, should he decide to tax it, and not from a few, as is the case when subscriptions are taken in.

Mrs. Nick Perkins made the real talk of the day. She said—"I am here to represent the greatest unorganized class of workers in the world today, the mothers, who are raising the future men and women of the world, and who are scattered on the face of the globe. We contribute to county and state fairs, to farm bureaus and other things that are for the good of our country, but the saving of one weak child, and putting him on his feet, means more to the mothers than the raising of 500 blooded animals."

Miss Mary E. Hall, principal of the Pine City schools, and Mr. Schwartz, superintendent of the Sandstone schools, spoke of the good that was done in the examination of school children.

Other speakers in favor of the county nurse were State Senator Larson, Joe Thorsen, State Representative Pedersen, Mayor Perkins, H. W. Hart, Mrs. Eddy, Mrs. Dane, secretary of the Pine County Health Association, Mrs. Sonfald, Rev. William Hinckley, chairman of the County Red Cross, and Mrs. Thompson.

R. E. Ball of Pine City led the opposition and was ably supported by R. Odenthal. Both these gentlemen were of the opinion that a county nurse was a needless expense. Frank G. Walsh, who had been a candidate for the office, withdrew after a few objections to the appropriation, but Odenthal and Walsh seemed to have the matter well in hand, and Frank was content to give them his moral support.

Hold District Meeting

The meeting of the Board of Directors of District Unit No. 2, held at Hinckley the afternoon of December 1st, was very interesting and very satisfactory to those interested in the development of this movement.

The meeting was called to consider the action taken by the Executive Committee November 30 in holding the field test. This district Unit of the Buttermakers Association had held their annual meeting on that day, and requested a deferral of the field test. The Executive Committee, which considered the objection, makes a strong recommendation of Mr. Starkweather as field master.

The Directors after considering this question felt that the could not afford to postpone and so voted an adjournment.

Finally, however, the association was just getting established. They further felt that it would be better to obtain the field test and to have the Executive Committee make a report concerning the same.

The meeting was called to consider the action taken by the Executive Committee November 30 in holding the field test. This district Unit of the Buttermakers Association had held their annual meeting on that day, and requested a deferral of the field test.

They further felt that it would be better to obtain the field test and to have the Executive Committee make a report concerning the same.

This action met with general understanding that the field test would be held on December 1st, and the Executive Committee voted to do the same.

The meeting was called to consider the action taken by the Executive Committee November 30 in holding the field test.

They further felt that it would be better to obtain the field test and to have the Executive Committee make a report concerning the same.

Governor Boosts Seal Sale

Governor J. A. O. Preus is a member of the Minnesota Public Health Association strongly urges the people to purchase Christmas Seals. The governor's letter is as follows:

Dr. William E. Wild, Executive Secy., Minnesota Public Health Assn., 200 Shubert Building, St. Paul, Minn.

My dear Dr. Wild:

When we stop to consider the progress that has been made in the fight against Tuberculosis in the last few years, we should remember not only a privilege but an obligation to do everything within our power to bring this fight to a successful conclusion. In view of the fact that the death rate in Minnesota from Tuberculosis last year was lower than it has ever been in the history of the State, I cannot too strongly urge the people to support the Minnesota Public Health Association and the County Public Health Associations by purchasing Christmas Seals, which is the sole means of financing these organizations.

Permit me to take this opportunity of congratulating you on your splendid work in the past in Public Health Education, and extend to you my best wishes for a successful sale of the Christmas Seals.

Very truly yours,

J. A. O. Preus.

Can Pay Auto Tax Now

New 1922 motor vehicle licenses on sale Jan. 3. Mine Vehicle service tax is now paid on vehicles registered locally on Jan. 1 and older cars only after taxes are paid in full. The statement is intended to correct a common mistake that it was necessary in 1921 to register cars not in use or temporarily off repair.

"It is important for applicants to remember that 1921 registration certificate, or a sworn statement made at the time of application in case it has been lost, must be seen in with the application for 1922 registration and license," said Secretary Holm. "Duplicate certificates can be had from this office by making a sworn statement of ownership and paying the 25 cent fee required by law."

Secretary Holm reports that registration of motor vehicles for 1922 is nearly ended but that lack of funds among some and lack of information on the part of others is causing delay.

Win First Game.

The Moose Lake basket tossers went down to defeat at the hands of the Pine City quintet Friday December 2, at Moose Lake, by a score of 42 to 36. The local boys did a splendid showing, however, by holding Moose Lake to three field baskets and piled up 17 for themselves. Considerable fowling was done during the game, Pine City having 25 marked against Eau Claire and Moose Lake 13. Moose Lake made 13 out of 25 tries, while Eau Claire made 10 out of 17 tries.

The pine cone follow-up follows:

Pine City Moose Lake
E. Klicker LF Anderson
H. Johnson RP Westby
Wm. Johnson C Bergan
L. Thompson C Olson
A. Becken LG Eby

Substitutes: Hawley for H. Johnson, Jacobson for Ehr. Anderson for Jacobson.

Local Birds Win at Show

The Chicago County Poultry Show, held at Rockford, Ill., Dec. 1 and 2, had 7th and 8th grade 575 birds, about a hundred less than last year. Some fine birds were on exhibition, coming from all parts of the state.

L. E. Appleby of Elgin and H. A. Poulet of Pine City won first and second place, and the following birds:

Appleby, first bird, Barred Pigeon Rock; won first on cockers, second, hen and second pullet; Particular Wyandottes, second cock, first, second and third pullets, third cock, and fourth pullet.

The judges cleared from the platform to go up to the play grounds.

NOW IS THE TIME TO SUBSCRIBE

To carry out the Principle of most of our advertisers, who are offering Specials in their ads, we will make a special subscription rate of \$1.50 per year -- either new or past due subscriptions -- on all subscriptions paid between now and January 1st, 1922.

Hartz & Johnson
Rock Creek, Minn.

John Street and wife of Henriette spent Sunday at the Isaac Matteson home.

Geo. Stump and family of Greeley spent last Sunday at the John Lindgreen home.

Mrs. Fred Harts and Mrs. Dahl were business callers in Pine City.

L. B. Becklund was a business caller in the Twin cities on Wednesday of this week.

The Home Missionary Society met with Mrs. Lee Skellie on Tuesday afternoon of this week.

Miss Mitchell, local school teacher, spent the week at the home of Mr. and Mrs. Hinsdale.

Miss Shirley Stern of Pine City visited at the local schools here on Monday afternoon of this week.

Mrs. Gust Olson, living east of town, went to Rush City last Friday to visit at the home of her parents there.

Sam Martin, buffermaker for Fred and Russel at West Rock, spent the week end with friends in Minneapolis.

Fred Harts left early Monday morning for Manchester, Minn., and other points to visit with relatives. He returned on Wednesday.

Several friends of Mrs. Frits Swanson tendered her a surprise visit on Saturday afternoon at her home west of town.

Jay Barringer of Eagle Bend, Minn., arrived last Saturday for a few days visit at the home of his brother, W. W. Barringer, of this place.

F. W. Holm, local buttermaker, attended the meeting of the buttermakers of this district, held at Tipton last Thursday. He reports a fine meeting.

Mrs. D. P. Pepin and Mrs. R. J. Van Dyke went to Sandstone last Saturday to attend the County convention of school boards that was in session at that place.

A meeting of the Jersey cow cattle raisers of this vicinity was held at the bank on Tuesday afternoon of this week. Plans were made for the bettering of the Jersey herds in this section.

The Farm Club, after a vacation during the summer months, will start their winter work when they meet next Wednesday evening, December 16th. All members are urged to attend. Refreshments will be served.

Harts & Johnson have replaced their ice cream which toppled over by the fall of the patent Saint on Halloween night, by a garage of Fred's which was moved in from West Rock. Johnson Bros. did the moving.

The annual open sale held by the Index will be held at the church next Sunday, the 13th. Lunch will be served. A pie social will follow the sale, in the evening. Here is a chance to do some of your Christmas shopping. All are invited to attend.

Mr. Rayfield, well known farmer of the south of Rush City passed away at his home last Sunday afternoon. Death resulted from high blood pressure. Mr. Rayfield was well known in this community and friends are sorry to hear of his unexpected death.

The Royal Neighbors will hold their regular meeting Wednesday afternoon of next week, December 14th. The annual election of officers for the ensuing year will be held at this time. All members are especially urged to attend. A cover lunch will be served.

The Modern Woodmen of America will hold their annual election of officers at their meeting to be held on Saturday evening of this week. A big "chicken barbecue" will be served after the business meeting. All members are urged to be present at this meeting.

Henry Mills went to St. Paul last Saturday where he received

To other Towns

treatment for his eyes and to visit with his mother there. Ray Mills who has been working at a garage in Des Moines, Iowa, returned home Monday evening and will probably remain in the home of his parents for the balance of the winter.

Louis Olin, living near the county line, south of West Rock, passed away at the Brahma hospital last Sunday after a brief illness. He had sold his farm goods and had intended moving to Oregon to make his home. He is survived by one son and three daughters. Friends extend their sympathy to the beloved family.

Our town constable, Everett Akins, is now sporting a fine new star to help him to give added dignity and authority to his office of keeping peace within our midst. We also understand that he has his order in for a regular outfit and a new six-shooter. The Skipper evidently believes in a great crime wave coming this way. Go easy neighbor.

Hastens Return on Building Investment

Since a building is an investment, the sooner it is occupied the more quickly it will pay dividends.

By starting construction now and continuing through winter, the wise builder not only hastens occupancy and quickens dividends on his investment, but he escapes the delays of spring, when hundreds of projects usually compete for materials, labor and transportation.

The resourcefulness of the building industry has made winter construction entirely practicable. Some precautions are required, but they are simple and easily understood. Write, phone or call for further details.

Beroun News Department

THURSDAY, DEC. 6, 1921.

Wm. Guttill was a business caller in Pine City last Saturday.

Mr. and Mrs. Ray Peterson of Milaca visited at the Oscar Uglem home last Wednesday.

Mr. John Hedin of Pine City visited his son in Beroun between Monday and Tuesday.

Mrs. Mary Kothers of Pine City visited at the J. W. Chalusky home the first of the week.

Frank Fremd left for the twin cities last Monday noon, expecting to be gone for some time.

Mrs. Helen Peterson is expected back today, and plans on remaining here.

The young folks around Beroun are planning another slough ride party next Sunday evening.

Mr. and Mrs. Jim Hejny spent last Sunday afternoon at the John Schambauer home.

Jack Elsner, who is working at Brook Park, spent the weekend visiting a number of friends from the cities at her home over the weekend.

Tom Shima, proprietor of the Hotel Comfort, was a business caller in town, last Tuesday.

Ira Holt, of the Pine City creamery, was a business caller in town, last Tuesday.

Andrew Nees went to the Twin Cities last Tuesday, expecting to be gone a couple of days.

Jim Hejny received his new machine for charging batteries, last week, and is now equipped to repair, store and recharge batteries in his new battery department.

Mrs. J. Fiedstad, and daughter, Mary, visited their home at Brown Valley, Minn., after visiting at the home of Wm. Hander for two weeks.

Charles Woodbeck, Carl Oksaneen

and D. S. Duea stopped in Beroun on their way to Carlton County, where they will be employed on the trunk highway.

A birthday party was given last Wednesday afternoon by Mrs. Adolph Strohkirch in honor of his son, Benjamin, who was five years old.

Benjamin Elsner was operated on for appendicitis last Wednesday.

Quite a crowd attended the Picket Co. show at Prochaskas hall, last Sunday evening. The company was composed of some colorful folks singing, banjo playing etc. Following the show a number enjoyed dancing.

Commissioner Cap Hancock was taken ill while attending the county board meeting in Pine City, Tuesday night, and returned home the following morning. He is suffering from a bad case of grip, which he hopes will turn into nothing more serious.

Chengwatawa News

Mrs. J. R. Wilson went to Pine City Friday to spend the weekend with her parents.

Miss Lillian Wilson went to Minneapolis last Saturday for a week's visit with her cousin, Mrs. G. Moen.

Francis Gaukel spent Saturday and Sunday in Pine City.

at the E. W. Hemmers home on Thursday Nov. 8th. A large crowd attended and refreshments were served.

In Pine City

Fred A. Separing, Pine City, says that all attention has been paid to the dogs and the kennels acted annoyed and the screeches passed much too often. My back ached a great deal, especially after I had been bending over for any length of time. I didn't feel like myself at all. A tired drowsy feeling would come over me and last for a long time. Don's Kidney Pills bought at Prochaskas Drug Store gave me fine results and won't cost long to pay for.

For a week I carried me. I haven't had a kidney complaint since.

Price 60¢ at all dealers. Don't simply ask for a kidney remedy—get Don's Kidney Pills—the same that Dr. Kidney had. Foster-Milburn Co., Mfgs., Buffalo, N. Y.

Tanlac is made of roots, herbs and bark and contains no minerals or opiates. For sale at Prochaskas Pharmacy.

SANDSTONE, MINN.

Typical Vacuum Tube, many of which are used in the big Amplifier.

Latest Form of Loud Speaker for Addressing Public Gatherings.

Projecting the Human Voice Four Miles

By R. W. King

spoken into the ordinary telephone transmitter in Chicago were clearly heard over this enormous area.

The loud speaker includes a telephone transmitter, an amplifier, and several large speakers. The "loud speaker" is supported by a large steel tower. Each projector is equipped at its small end with a very powerful telephone receiver for connecting the various wires and electric currents supplied to it. The purpose of this projector is to magnify the very minute currents produced by the transmitter which is connected to the receiver.

The apparatus is the result of the research laboratory maintained by the Bell Telephone System. In this laboratory, which is the largest devoted to public works in the country, 2,800 persons are employed, and exhaustive studies of every technical question arising in the telephone art are conducted. In the course of these very important agencies of the Bell System, to develop the art of telephony and maintain America's supremacy in speech communication.

The projection of the human voice over the remarkable distance of nearly four miles was an accomplishment recently attained, exact and painless. The telephone transmitter which first required a telephone transmitter so perfect in its operation that it reproduced with absolute fidelity the com-

licated waves of the human voice in the form of electrical currents. In the second place, an amplifier was designed which would magnify with equal accuracy the minute currents generated by the transmitter. Finally, the large speaker was connected, and due to the sound projectors are of such construction that they reconstruct magnified electric currents into sound waves which are clear and distinct.

The projector could be heard across the valley nearly four miles away, one amplitude magnifying the electrical currents from the telephone transmitter about 10,000,000,000 times, and this ten-billion fold amplification was produced without any in way destroying the original quality of the speaker's voice.

The "loud speaker" involves apparatus which is exactly similar in principle to the equipment of every long distance telephone circuit, involving, among many other things, a transmitter, an amplifier and a receiver, which are perfectly synchronized in every far-reaching study of all the elements comprising the circuit. The loud speaker is, therefore, a natural by-product of the resources underlying long distance telephony.

Local News

Henry Blank loaded two carloads of oak cordwood, yesterday, which he shipped to Stillwater.

Mrs. H. H. Mallory spent the week at home in her parents' care, Mr. and Mrs. E. M. Perkins returned home, the first of the week after a few days visit in the Twin cities.

Adolph Petersen came up from St. Paul, last week, to visit his wife with his family here. He expects to return Sunday.

Mrs. Hans Grand returned from Minneapolis last Sunday after several days spent with relatives in that city.

R. B. Carlson, J. D. Boyle, Nick Perkins, W. W. Gunn, Jens P. Miller and Mrs. F. A. Wiley attended the school officers meeting held at Sandstone, last Saturday afternoon.

The Milburn Lutheran ladies aid will meet next Thursday evening.

Louis Habich, who has been selling ice for Louis Volene the past couple of years, left for New York a few days ago, and sails from there Monday. He expects to be back with his family here. He expects to return here this coming spring.

Mrs. Herb Parrish returned to her home at Wadena, last week, after a two or three weeks visit at

the home of her parents here, Mr. and Mrs. A. H. Daniels. Rev. Parrish came up to accompany her home.

A. M. Challeen and Clint Boovent to the Twin cities this morning to attend to some business interests.

Frank Davis and Leigh Armer left for the Twin cities Wednesday afternoon. Leigh will proceed to Chicago and tent while in the U. S. N. for the winter. Frank expects to join Leigh in Chicago at a later date.

We wish to make a correction in an item in last week's issue of The Poker, in which we stated the Royal Neighbors held a surprise party for Mrs. Henry Burge. It was a neighbor's party, given by a number of friends, and intended to all be members of the lodge.

There are two new arrivals in Pine City this week, a baby girl born to Mr. and Mrs. Dick Lawrence and a baby boy born to Mr. and Mrs. Leonard Larson. We join with other friends in a welcome to the little folks.

Jos. Petersen came up from St. Paul, last Saturday, and returned Monday. He has been down there the past week, where he had an operation performed on his left eye.

The right eye is getting along very nicely, but it was necessary for him to return to St. Paul for further treatment.

Word was received a couple of days ago, of the marriage of County Engineer Jorgenson in the Twin cities, the forepart of this week. The newlyweds went onto Chicago last night for a short wedding trip, and expect to arrive in Pine City the latter part of this week.

Mrs. F. J. Cassidy was down from Hinckley and spent the week end here. They took possession of the Palace Cafe at Hinckley, which they purchased the forepart of last week. Hinckley is a small town, but the hotel here, we feel sure, will give Hinckley a first class restaurant that will be a credit to the town.

A fair-sized crowd attended the lecture of Whernside Rowell in the Family theatre, last Saturday evening. This was the third number in the series of lectures given by the author of the "Lean Heath post. His talk, lasting about two hours, was about the same as given at the Chautauqua, when he was here last summer.

The regular monthly meeting of the development association will be held in the church this evening. All members and their friends are urged to be present. There has been some talk of building a club house in Pine City, or closer to the lake, and we understand two men have already agreed to put \$500 each into the proposition if it goes through.

Nate Fisher this week received word that he had sold his home in the district of Kiev, Russia, and after figuring up the sums, found that the postage amounted to an even two thousand rubles. The nominal value of a Russian Ruble is fifty cents of our money. The strange part of it is that a ruble is just as hard to get in Russia as it is in America. After sending the postage, and still it takes a basket full to buy a lunch. People generally find that Lemnines and Traskies and Kaisers are expensive critters--Willow River Farmer.

Quite a number of local boys

attended the basket ball game at Moose Lake, last Friday. After the game they enjoyed an informal dance, having hired the orchestra themselves.

School Notes

The Pine City High School has kept ball team defeated Moose Lake last Friday evening at Moose Lake by a score of 42 to 19, which clearly showed that the Pine City quint was Moose Lake's superior. The game was well played, but on account of the shouness of Moose Lake the Pine City team were unable to hear the whistle did not play up to last year's form. In the first half the I. C. team allowed M. L. only one field basket, the remaining 8 points being made on foul shots. At the end of the first half the score stood 18 to 8 with Pine City on the long end. The second half was a little faster than the first, the boys being more accustomed to the floor. The game ended in Pine City's favor 42 to 19.

The team showed up favorably in its first start of the season, and they showed their superiority in the early minutes of the game. However, the game was marred by foul, 25 being made by P. C. and 14 by M. L. The fouls were nearly all technicals. The game was cleanly played and the refereeing fair by Pine City won. Who would have said?

The Carnival was a great success. Everybody is satisfied with the results. The Karnival Band and the Minstrels gave their little pieces and the Shocking Lady shocked her way into the mystery and curiosity of the audience.

As a whole everything went off well.

Next Friday evening--Pine City plays Moose Lake at the armory. Don't fail to be there and see what the team can do this year.

ANNOUNCEMENT

In addition to the regular issue of The Pine Poker, next week, we will issue a Christmas Supplement, containing 8 pages of Christmas Stories and words of cheer. Practically every merchant in Pine City will have a Christmas ad. They will offer Christmas Goods at prices that will give the purchaser an opportunity to save money on Christmas buying.

"WHERE YOUR TAXES GO"

This series of articles by Edw. G. Lowry, will commence in next week's issue of The Pine Poker.

MOST EFFICIENT AUTO OPERATION

Saving of Gasoline Given Place of
Greatest Consideration
by Owner.

FUEL CONSUMED WHILE IDLE

Rapid Acceleration is an Expensive
Luxury, Using More Gas Than
Other Little Economies.

Honest efforts to operate an automobile economically often fail because the driver does not understand the fundamental practices most important to good results. Although fuel is by no means the largest single item of expense, gasoline savings are customarily given the place of greatest consideration and consequently deserve first mention.

The largest segment of gasoline waste lies in idling the motor. Many drivers believe gasoline consumption to be slight while idling, and that by avoiding stops, they are saving the battery. The main rule of the thermostat device is made of bakelite or one of the impregnated bakelite fibers that is water and steam proof. It is held in a frame and is threaded into a bracket which is turn soldered into the neck of the radiator. The lower end of the tube is also threaded into the memory chamber which is made of fiber. This chamber is locked and made leak-proof with a nut. At the upper end of the tube is the contact which is supplied with the connection which is made with the terminal ends of brass and soldered to the supporting bracket, thus making a ground connection to the cylinder.

After the device is assembled the copper tube is soldered in place and a wire led out through it to a small lamp on the dash. The circuit is

WARNING TO DRIVER BY FLASH OF LIGHT

Homemade and Effective Hot-Motor Alarm for Autos.

Any Man With a Little Mechanical Ability Can Construct Device—
Made of Thermostat
Is Made of Bakelite.

Below is an illustration that shows a homemade and very effective hot-motor alarm. Any car owner with a little mechanical ability can easily build one. The sketch shows a section of the radiator tube with the thermostat device attached. The main rule of the thermostat device is made of bakelite fibers that is water and steam proof. It is held in a frame and is threaded into a bracket which is turn soldered into the neck of the radiator. The lower end of the tube is also threaded into the memory chamber which is made of fiber. This chamber is locked and made leak-proof with a nut. At the upper end of the tube is the contact which is supplied with the connection which is made with the terminal ends of brass and soldered to the supporting bracket, thus making a ground connection to the cylinder.

After the device is assembled the copper tube is soldered in place and a wire led out through it to a small lamp on the dash. The circuit is

made through the battery circuit on the car as shown. The device is built into the bracket onto the thermostat tube so that the device can be adjusted.

This is accomplished by adjusting it in boiling water and then setting it in a tube of short of making the circuit. In other words, when the water in the radiator reaches the boiling temperature, the motor is dangerous. When the water has cooled down, the heat of the motor is eliminated and the hand throttle provides the circuit thus lighting the lamp.—Popular Science Monthly.

Drive Done by Idling.
When idling excessive amounts of gasoline collect in the carburetor and vaporizes overheat and the raw gasoline dilutes the crankcase oil. Lubrication at this slow speed is inefficient because the splash from the connecting rods is reduced.

Brake acceleration, although desirable in traffic, is an expensive luxury, and many more gasoline than gradual speed increases. Unnecessary and violent application of the brakes, however, wears the hands prematurely and strains every part of the engine and speeds tires toward the junk pile. On long stretches of open road the driver can often make better time by using the hand throttle instead of the foot accelerator, if one is installed in the car. This is true because the uneven gas feed caused by the frequent starting up and down of the foot accelerator is eliminated by the hand throttle which is equivalent to millions of dollars, she says.

Prize Animal Aberdeen-Angus.

Having spent 20 minutes daily feeding, petting and playing with "Invincible," her grand champion Aberdeen-Angus, Vicki Lorraine Parline with her pet had a hard time that she spent the afternoon, on which Invincible was sold, in tears.

"Like all babies, when we have come to say 'good-bye,' she'll cry," she said in her report. "He will lie down and place his head in my lap for me to rub. I taught him to pick up his feet and when he did, I would scratch them. He wanted me to play with his feet all the time. He also knew his name and would come to me when called."

As a result of the sale, Mr. Parline has been deeply grieved by the judge at the show to have shown herself one of the best feeders of beef livestock in the country.

The American farmer is considered the keenest buyer of automobiles.

Gasoline costs 88 cents (44 cents)
a gallon in Mexico.

The membership of the Automobile association in London totals more than 1,000.

Automotive exports from the United States last year exceeded \$330,000,000, going to 114 countries.

A new steam automobile is to make its appearance in the market in a short time to sell at about \$1,000.

Ontario leads all other provinces in Canada in the registration of automobiles; Saskatchewan ranks second.

The MINNESOTA FARM

Pertinent Pointers for Practical Farmers

Prepared by the Agricultural Department, University of Minnesota

BELVILLE GIRL WINS HONORS AT STOCK SHOW

Virginia Scanlon Secures Peasant
of Consistent Aim—Maternal
Proficiency Acre From

Effort.

(From the University of Minnesota publications.)

Although the recent Junior Livestock show at South St. Paul closed her career as a Boy's and Girls' club member, Virginia Scanlon of Belville, Minn., won with the grand championship of the show after four years of consistent trying, will not drop out of club activities. She is a student in the department of agriculture of the University of Minnesota and hopes eventually to become a classroom teacher.

Virginia Scanlon worked in the home of 1913, although her father had no good stock on hand, Virginia secured a good call through F. W. French, her county agent, who was then secretary of the state Farm Bureau Federation, and won fourth in her county contest. In 1914 she placed second in the county competition and won with her eligible entry for the state contest, where she placed second in the Hereford special and third in the open class. In 1920 she won the state championship and second in the state contest.

Virginia Scanlon is now working for the University of Minnesota, Superior to the Common Black Ry.

(Prepared by Office of Publications, University of Minnesota.)

Through the efforts of E. G. Roth, county agent, the rye acreage of Crow Wing county has been transformed from a crop which did not pay off from 15 to 18 bushels an acre to Rosen rye, yielding from 22 to 25 bushels an acre. This, according to Agent Roth, is Extension service superior to all others.

Three years ago Mr. Roth secured for nine co-operating farmers one and one-half bushels each of Rosen rye seed as a test. The results that first year were remarkable, ranging from 25 to 35 bushels of rye from one and one-half bushels of seed sown.

The nine farmers were so well pleased that not a single bushel of the previous year's crop was planted.

Other farmers, however, were interested and bought seed from outside the county, mainly from Jackson and Morrison counties.

In the course of time the county agent in securing about 25 bushels more of Rosen rye seed. In addition, some seed was sent outside the county agent's office.

Most of Crop Used for Seed.

From the total crops thus planted, about 8,000 bushels were harvested in the fall of 1920, and over 10,000 bushels in 1921, and 15,000 bushels for sale.

Most of this was sold for the 1921 crop. For the 1922 crop the acreage has been expanded until practically the entire area of the rye acreage of the county, 3,000 out of 5,000 acres, is sown to Rosen rye.

That Rosen rye is superior to common black rye is amply proved by the average yield secured in the county.

In 1919 the average yield of common rye per acre was 17 bushels, that of Rosen rye, 25 bushels.

In 1920 the average yield of common rye was 15 bushels, that of Rosen rye, 28 bushels.

In 1921 the yield of common rye was 18 bushels, Rosen rye, 25 bushels.

In 1922 the yield of common rye was 15 bushels, that of Rosen rye, 28 bushels.

Thus, in 1922, the average yield of common rye was 17 bushels, that of Rosen rye, 25 bushels.

In 1923 the yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1923, the average yield of common rye was 17 bushels, that of Rosen rye, 25 bushels.

Thus, in 1924, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1925, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1926, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1927, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1928, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1929, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1930, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1931, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1932, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1933, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1934, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1935, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1936, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1937, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1938, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1939, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1940, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1941, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1942, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1943, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1944, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1945, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1946, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1947, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1948, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1949, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1950, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1951, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1952, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1953, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1954, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1955, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1956, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1957, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1958, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1959, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1960, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1961, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1962, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1963, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1964, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1965, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1966, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1967, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1968, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1969, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1970, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1971, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1972, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1973, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1974, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1975, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1976, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1977, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1978, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1979, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1980, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1981, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1982, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1983, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1984, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1985, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1986, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1987, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1988, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1989, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1990, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1991, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1992, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1993, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1994, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1995, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1996, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1997, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1998, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 1999, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2000, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2001, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2002, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2003, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2004, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2005, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2006, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2007, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2008, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2009, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2010, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2011, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2012, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2013, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2014, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2015, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2016, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2017, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2018, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2019, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2020, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2021, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2022, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2023, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2024, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2025, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2026, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2027, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2028, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2029, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.

Thus, in 2030, the average yield of common rye was 15 bushels, that of Rosen rye, 25 bushels.
