

SHIPSTEAD'S DEFEAT OF KELLOGG BY 25,000 PLURAL INDICATED BY LATEST AVAILABLE RETURNS

Gov. Preus and Balance of State Republican Ticket Wins by Good Margins.

Minneapolis—Minnesota has apparently joined the column of states furnishing political news for there is every indication that Senator Frank B. Kellogg, Republican, has been defeated at the hands of Dr. Henrik Shipstead, Farmer-Labor candidate.

Gov. Preus and all the other members of the Republican state ticket have been absent but Kellogg is trailing so far behind them that there seems no doubt of his defeat.

In 1914 precincts out of the 4,172 in the state the vote stands: Shipstead 120,828; Kellogg, 95,928; Olsen, 41,831. The Shipstead lead is 24,900.

Last week Kellogg was more than twenty-five thousand behind his opponent, Governor Preus is leading him by nearly twenty thousand in a mass number of precincts. In 1912 precincts the vote on governor: Preus, 113,215; Johnson, 85,157; Andrews, 37,092.

Mrs. Anna Kellie Olsen is a poor third in the senatorial race and Edward Indrehs, Democratic candidate for governor, is running even a poor third in the gubernatorial contest.

The big blow to the Kellogg forces came with Ramsey, the Minneapolis state's home county, went against him by nearly eight thousand. The total vote in the city of St. Paul, 300 precincts, was: Shipstead, 27,921; Kellogg, 17,244; Olsen, 11,253.

Identifiably Governor Preus led Ramsey county by 400 votes. He received 22,584, Johnson received 22,275 and Indrehs 10,013.

Minneapolis gave Shipstead a plurality of approximately five thousand. The vote on senator in Minneapolis, with only four precincts missing, was: Shipstead, 52,580; Kellogg, 47,193; Olsen, 11,810.

Preus Does Better. Governor Preus had much better in Hennepin county. With only three precincts missing in Minneapolis Preus had a lead of more than 13,000. The vote was: Preus, 55,838; Johnson, 42,491; Indrehs, 11,123.

Latest reports continue to show a wide spread between the Preus and Kellogg votes, indicating that these districts carried by the Republicans that Kellogg was not holding his own.

It is believed that Kellogg will carry the First and Second congressional districts, but there is nothing to indicate that he will carry any others.

LA FOLLETTE WINS EASILY. Governor Blaine Has Corresponding Majority in Governorship Race.

Milwaukee—People of Wisconsin voted approval of Senator Robert M. La Follette. The victory is assured. It is shown in the fact that with 1072 precincts out of 2,535 reported, La Follette is leading his opponent, Mrs. Jesse Jack Hoover, independent Democrat, by 100,000. The vote was: La Follette, 211,645; Hoover, 25,778.

From the same number of precincts Governor John J. Blaine, was in the lead. The vote was: Blaine, 132,211; Bentley, Democrat, 17,147; Arnold, Socialist, 11,611.

Victor L. Berger, Socialist, turned tables on William H. Stetson, Republican, in only five precincts missing, had a lead of 3,684 for the congressional seat from the Fifth district.

NORTH DAKOTA RACE CLOSE. Nestor Elected Governor—Senatorship in Doubt Until Rural Returns Come In.

Perry, N. D.—With Governor Nestor carrying the state by two and a half to one against William Lenzke, interest in the North Dakota election centers solely now upon the senatorial contest.

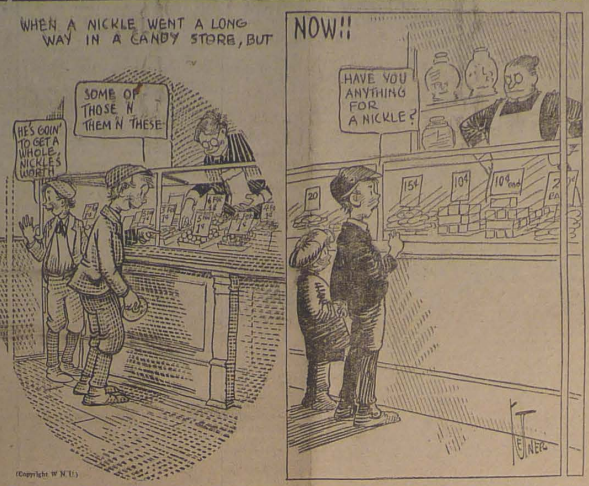

Returns from 572 out of the 1,123 precincts in North Dakota give O'Conor 46,998 and Prater 22,237.

It is expected that the O'Conor lead will be cut down as soon as rural returns begin coming in from the strictly rural sections. The Republican is claiming victory, but the result will be in doubt for a day or two until returns are complete.

Amendments Set Majority. Minneapolis—On the heels of early returns, Senator as yet, the two amendments to the state constitution as at the election Tuesday were given the majority necessary and sufficient to be passed they will obtain a majority of all the votes cast at the election, instead of merely a majority of the ballot cast on the questions.

Francis' Core Election Cases. Lincoln—Stetson showed a mixed feeling on the part of the electorate. There the electors turned out a republican administration and put in Democratic one, headed by "Bronze Charlie" Bryan, brother of the famous Congressman. At the same time they turned out a Democratic senator, Governor Stetson, and elected H. H. Howell, a Roosevelt supporter, publican.

R'member

Therrien Elected Representative

Joe R. Therrien of Pine City, was elected to the state legislature as representative from Pine county, defeating L. C. Pedersen of Ashby by 273 votes. Therrien received a total of 2140 votes, and Pedersen 1976.

Mr. Therrien's election came as a complete surprise to the political "knowers that live" in the county, who seemed confident that he had no chance to be elected. With "The Pine POKER" the only paper in Pine county that is read out for, and discussed Mr. Therrien's election in the last week issues, and with the active support of his friends who have always felt that he had a fighting chance to be elected, it was demonstrated last Tuesday that the judgment of The POKER and his friends had been correct.

N. L. Oakland was re-elected county commissioner from the Third district. At the time of going to press the total vote had not been tabulated, but Oakland's win was certain. He received 2140 votes, and Pedersen 1976.

Table with 10 columns: Precinct, Therrien, Pedersen, Olsen, Kellogg, Shipstead, and 5 others. Rows list precincts like Shipstead, Kellogg, Olsen, Johnson, Preus, Indrehs, Schall, Ruitledge, Therrien, and Pedersen.

NATIONAL RETURNS SHOW BIG UPSET

RETURNS from every section of the country indicate that Cleveland has a long run over Lillian Christie in 1920 have been reversed or practically wiped out.

The east furnished startling upsets. A landslide in New York swept Al B. Smith, Democrat, into the office of governor and elected R. S. Copeland to the United States senate. Lodge, republican of Massachusetts is leading his democratic contender by a narrow margin, but a recent gain may be necessary to determine the final result.

Senator Joseph P. Bradley of New Jersey was beaten by the democratic nominee, Edward C. Edwards, by a majority placed at 85,500. In Pennsylvania, Binohy won the governorship by 200,000.

The vote in the Middle West showed many surprising results. Ohio was split—A. V. Denney, Democrat, winning the race for governor, while the republican candidate, unopposed by neighbors, their chief interest in life apparently was centered in their own state.

Michigan Johnson of California is referred to the United States senate. Cleveland's victory in the gubernatorial contest was a surprise. The republican candidate for governor, J. B. McLaughlin, was defeated by the democratic nominee, John W. Aldrich. The republican candidate for governor, J. B. McLaughlin, was defeated by the democratic nominee, John W. Aldrich.

DEATH THREATENED TO JUDGE

Judge Who Sent Wets to Jail Defies Anonymous Writers.

Minneapolis—Threatened with death if he persisted in putting out straight fact sentences to politicians and blind judges, Federal Judge Page Morris has struck back at writers of anonymous letters which he has received by defying them to do their worst and announcing that more drastic punishment than ever is in store for men who persist in breaking the prohibition laws.

"I will not be intimidated by any such threats," the veteran judge said just before boarding a Duluth train where he went to cast his vote.

At least three anonymous messages, designed to frighten Judge Morris, have been received by him and turned over to R. M. Huggah, postal inspector, who has started an investigation to identify the authors.

Judge Morris is 62 years old and is one of the most picturesque figures on the United States federal bench. He has attracted nationwide attention a few weeks ago when he announced his intention of sending liquor law violators to jail.

Bonar Law Completes Cabinet. London—Premier Bonar Law announced the appointment of the remaining minor officials in his government. He has decided that his cabinet shall consist of 25 members, the smallest in years.

Harding to Call Special Session. Washington—President Harding is expected to call a special session of Congress for a special session of Congress convening Nov. 20, it was announced at the White House.

Girl Abducted, "Fish Fang" Hunted. London—A British rescue party in an airplane is scouring the barren wastes of Labrador in a search for a trace of the "fish fang" tribe, who, it is believed, have abducted Miss Marie Lindsay.

Short courses and reading circles are being formed now to study horticulture and farm problems. Are you working in one in your community? Cabbage keeps best in a cool cellar. A good plan is to hang the heads down so all surplus water will drain off them.

Leaves make good fertilizer for the garden if they are well decayed. Dig a hole in the garden and put them in it, covering with soil.

The District Court in Session. District Court resumed its grand Tuesday afternoon, after an adjournment over the week end and Monday so the jurors could get home to work. In the case of Spates vs. Clark, in which the plaintiff sued for unjust enrichment, the verdict was for the defendant.

The jury returned a verdict for the defendant in the case of the Gordon House Fire Co. vs. W. F. Richards. In the case of the Gale Mfg. Co. vs. Adam Biederman, the defendant brought a counter claim, part of which was allowed by the jury.

The case of Mojawa vs. the Town of Sturgeon Lake, went to trial today. The documents were accepted by the election judge, who declared that the documents were valid and turned them into the city clerk's office on October 30 with a memorandum inquiring if their acceptance was proper.

The mayor of those who registered in it, a man, was able to go to the polling place to vote, but were refused ballots.

NEAR EAST WAR AGAIN LOOMS

French Stand Firm and Send Dreadnought to Allied Fleet.

Constantinople—The Allied high commissioners sent an ultimatum to the Turkish Nationalist government at Ankara that Allied troops will remain in Constantinople until the Near East peace treaty is signed.

Three additional classes of Turkish soldiers have been called to the colors. An unconfirmed report received via Paris said that 10 Turkish sailing vessels had disembarked troops at Isparta planning to seize Gallipoli peninsula during the absence of Allied warships changing patrol. Gallipoli peninsula is European territory, flanking the Dardanelles on the north.

The French government has reached the limit of its patience in dealing with the Turks and is sending more and more to order its attitude toward the Ankara government.

All Kemal Bey, editor of the Constantinople anti-National newspaper, Sabah, has been arrested and condemned to death by the Turkish authorities. The Allied representatives gave Hatt Pasha 48 hours in which to release the editor.

According to Turkish Nationalist newspaper, Sabah, has been arrested and condemned to death by the Turkish authorities. The Allied representatives gave Hatt Pasha 48 hours in which to release the editor.

SOLDIERS COULD NOT VOTE. Veterans Registered by Affidavits Are Refused Ballots.

Minneapolis—Disabled veterans at Ashby hospital who registered for the elections on October 28 and were refused ballots because their names were not on the polling list of their precinct, complained last week against the person or persons responsible for their loss of voting privilege.

Thirty-five veterans who have been permanently confined there for periods ranging from a month up to years, who claim no other place as their home, were registered October 28 by affidavits. The affidavits were made on the form prescribed by law, properly attested, and delivered to E. M. Stanfield, election judge.

The affidavits were obtained by J. H. Hickey, a former service man who was himself a resident of the hospital. Mr. Hickey took the affidavits after obtaining a ruling from the attorney general's office that such procedure was proper.

The documents were accepted by the election judge, who declared that the documents were valid and turned them into the city clerk's office on October 30 with a memorandum inquiring if their acceptance was proper.

The mayor of those who registered in it, a man, was able to go to the polling place to vote, but were refused ballots.

Cont's Crochet Cotton, Sewing Thread, Men's Heavy Flannel Union Suits, etc. with prices. Signatures: 'The Store that Saves You Money' and 'Pine City Minnesota'.

The Pertinent Pointers for Practical Farmers

PROFITABLE BEEF RUNS IN CYCLES Seven Year Period Followed By Like Period of Depression.

BUTCHER AND REDUCE LIVING EXPENSES Failure to So Provide For Home Needs Cause of Rising Costs.

Better times are coming for the growers of beef cattle in the production of L. F. Garvey, assistant professor of farm crops and farm management, University of Minnesota.

Profitable beef production apparently runs in cycles of seven to eight years, followed by a similar period of depression, says Professor Garvey.

The indications are that we are just entering the beginning of a new period of prosperity from one of the depression periods of beef production which occur about every seven years.

The opportunity for getting started in beef cattle production is very good at the present time, in fact there have been few times when one could get into this type of livestock production more economically.

Good breeding stock has been low in price and in fact many cases purchased stock has sold for less than its real worth.

It would not pay to use just any kind of stock for this type of livestock production, for it is the wellbred and well constituted animal that proves most profitable in the long run.

The man who has good foundation stock coupled with a well organized and managed business has a good outlook for profitable beef production during the next few years.

Professor Garvey does not believe there is any immediate danger of overproduction. "If all the farmers in the area adapted to the best production method available, their attention to that industry," he says, "it would be three or four years before their extra would have any appreciable effect on the market. This is something of course, that will not happen as many do not like that type of livestock production and many are not adapted to that sort of work."

Poultry Shows Promise Interest. An excellent means of promoting interest in better poultry breeding, says Cars Cooke, poultry specialist in extension with the state university, is a plan which has just been put forward by A. T. Messen, agent for Noble county.

Last winter, during a series of poultry project meetings conducted in Noble county by Miss Cooke, the Commercial club of Wilmont staged a successful utility poultry show and county day. So great was the interest that plans are being made this year to hold a series of such shows in connection with a grain show at several towns in the county immediately preceding the county poultry show. A utility class will also be included in the county show, as well as classes for market eggs and dragoon poultry.

Birds entered in utility classes must show no standard qualifications but are judged chiefly from the standpoint of vitality and capacity for production. Birds will be entered singly or in pairs, you decide how many birds where space and supply capacity are limited.

It is to be expected that this series of shows will do much to increase the interest in standard breed flocks and at the same time more as farmers and residents of the county poultry show.

Perhaps are coming into their own. They have a short growing season they help store the soil and when they yield heavily in forage and seed.

A. A. Hanson, University Farm dairy livestock specialist in charge of cow testing association work, says that Minnesota will have its first cow testing association for the coming year. The influence of the recent National Dairy show in Iowa was the last in this progressive increase. Test associations will be formed by January 1. Dakota to come in next, followed by Iowa, Illinois, Ohio, Wisconsin, Michigan, Minnesota, North Dakota, and Nebraska counties.

Prize Go to Red River Valley. As was to be expected, the Red River valley carried off the prize in the 1922 contest for the best government association for the best field of wheat from an acre which could be located anywhere, situated in a field of a quarter of an acre in the Red River valley. Prizes were won by Red River valley wheat growers, who are handling with freedom their own wheat, from 30 to 40 bushels per acre.

SEEING POWER OF INSECTS

Interesting Data Collected in Connection With Studies in Comparison With the Human Eye.

Very curious data have been collected in regard to the seeing powers of insects. The human eye in perfect condition is able to see objects separated laterally only one minute of arc apart. Put two objects, as for instance, two black circles, on a white ground just one inch apart and place them at a distance of about 280 1/2 feet. As seen with the naked eye the apparent space between the circles will be a minute of arc. This space is plainly the limit of detail visible to the unassisted human eye.

Now it might be supposed that an insect, having a compound eye, would be able to see more detail than we do; in other words, could separate small objects closer together. As a matter of fact, owing to the small aperture of the lenses composing the facets of the eye, and the spacing between the facets, insects see less detail than we do.

It has been calculated that a dragonfly cannot see separately two objects that are placed less than one degree apart. In other words, to such an insect two silver coins lying on a table six inches apart, and viewed from a distance exceeding 4 1/4 feet, would appear as a single object.

Bees and flies, according to the same investigation, are still more limited in their ability to see the details of objects presented to their eyes. A fly could see the two silver coins only if they were separated only at a distance not exceeding about seven feet.

It has been remarked as a consequence of this that we can see the tail on the antenna of a fly at a distance of two feet or more better than the fly itself can, though they are but the fraction of an inch from its eyes.

Washington Star.

CURED MONARCH OF AVARICE

Power of Turning Everything He Touched into Gold Quickly Palled on King Midas.

It was because King Midas helped a drunken companion of Bacchus to sober up that he received the power of turning everything into gold at the touch of the scepter he had offered to King Midas anything he asked, and the king wished this unpleasant power upon himself, according to Ovid. Midas enjoyed himself immensely at first, turning twigs, apples, stones and clods of earth into gold. But the trouble began as soon as he set down to eat. The bread he touched turned to gold and defied his teeth. The wine flowed down his throat as liquid gold.

According to an embellished version of the myth, the crowning misfortune wrought by Midas' curse in blessing's guise was when, in the act of caressing his little daughter, he turned the child into a golden statue.

Bacchus had been aware that the gift was anything but desirable. So, believing Midas cured of avarice, he set the king to wash away the power in the fountainhead of the River Pactolus. As a result of his bath, the sands of that river remain golden to this day.

Peculiar Deep-Sea Fish.

The artist's deep-sea graven, has a method of lighting that gives the appearance of a multitude of smoke rings. When excited by the noises of an enemy, the graven ejects respiratory water in tiny squirts and into this stream the inciferin is forced from countless glands opening into the stream by ducts. As the chemicals combine, puffy clouds of luminescent particles that in this case, "This is the 'smoke screen' provided by nature.

The species of luminous fish, called "Photobolophorus," has a dimmer system in an inklike chamber and burns continuously. When the fish wishes to shut off the light, he causes a black pigment to collect at the bottom of the light cell's opening like an eyelid. The light organ preserves its luminescence even when removed and is used by fishermen of the islands of Bandai, about 800 miles southeast of the Philippines, as bait for night fishing.

The Singer and the Song.

A song is a great adventure. Thousands write it, tens succeed; and when they have succeeded, its fate still lies entirely with the singer. No one ever had it so much in his power to make the worse appear the better cause, or to refrain from so doing. The ancients placed Thamyris and Narcissus among the gods; the moderns pay their counterparts royalties. But the singer's personality is still localizable in terms of canonization or of cash. That personality means all that he has been able to crowd into "his life," and he may still enlarge it. A good way to do that is to read all the poetry that he does not sing, and "listen to all the music written for some other instrument than the voice." — H. Fox Brongers.

ROCK CREEK NEWS DE'T

West Rock News. Fred Allgood will ship a car of stock from the local yards on Tuesday of next week.

There will be a reception for the new Methodist minister of Pine City at the church on Friday evening of this week. All are invited.

Word received here last week that Harley Mickel and Miss Helen at Kokon on Tuesday last week. Harley is the son of Mr. and Mrs. Chas. Mickel living south of town. He has many friends here who wish them congratulations.

The Rev.ohn Lowe will preach at in Rock Creek Methodist church next Sunday afternoon at 2:30 o'clock. The residents of Rock Creek are most cordially invited.

East Rock Creek

Mrs. Wm. Hanson who has been visiting her mother Mrs. J. G. Nyland, returned to her home in West Rock, Tuesday.

Geo. Tokarak is having a cellar dug under his house.

Ernie Stevens is having his barn cemented.

Geo. Stevens, Geo. Tokarak, Wm. Gilbert and Nels Shelwood were busy engaged over the week and installing new seats in the school house.

Enola Stevens, who has been in bed for a week with a severe cold, has recovered and is attending school again.

Oscar Erickson has moved onto the Ole Erickson farm.

Alec Kowales, who has been living in the G. L. Stevens house, has moved into his own new house.

Mrs. Skelle, who has been away visiting returned home Friday accompanied by her brother, Elmer Bohlen of Lindstrom.

Ray Kayser of St. Paul is visiting at the Ed Swanson home.

Carl and Herman Laisson and Peter Malberg went up north on a hunting trip, Saturday.

Swedish Methodist Church Notes. Of West Rock. Louis Johnson, Pastor Sunday school at 10 a.m. Morning service at 11.

There will be an auction sale and social held at the church on Tuesday evening November 14th at 8 p.m. All are invited to attend.

ROYALTON CHURCH NOTES

Sunday school at 10 a.m. Evening services at 7:30.

Confirmation class Saturday at 10. The ladies aid will meet at the home of P. O. Johnson next Wednesday afternoon at 2 p.m. Miss Anna Johnson will act as hostess.

Greatest Mother Summons Her Children

If so, a Monarch Range will clear them out. And what's more, they will stay away, for a Monarch is not subject to the many ailments most ranges suffer when they get to be a few years old.

The way to prevent trouble in future years is to build a range RIGHT to start with—so it will stay right. We sell the Monarch because we know it is built right. If you will come in, we will be glad to show you exactly what we mean. We will show you why the only way to build a range for permanent satisfaction is with unobtainable malleable iron and hand riveting at every joint. There is only one right way to do anything—and that is the right way to build a range.

You will be delighted at the handsome appearance of the Monarch—and also to know how easy it is to keep clean and looking like new. The moderate price will surprise you.

Diarest statesman. "Senator Snortsworthy seems to have the gift of oratory." "How is that?" "If Senator Snortsworthy had his way, he'd depend entirely on the gun and a high snort and never open his mouth in public."

Employee Partnership a Big Factor in Efficiency

IN its issue of Oct. 1, 1922, the Chicago Tribune says, "In this field (industrial peace) there is much to be hoped for from intelligent effort to induce investment by employees in the industry or business in which they are employed." * * *

The acknowledged efficiency of the Standard Oil Company (Indiana) is due in no small measure to the fact that every employee of the Company, if he will, may become a partner in the business by taking advantage of the stock-purchase-plan.

The Standard Oil Company (Indiana) employees are insuring, through investment, the present well being and future security of their families, an end which every man is striving to accomplish.

Whole-hearted cooperation is essential to the conduct of any business. The management of the Standard Oil Company (Indiana) recognizes this fact and believes that no better way to secure this co-operation can be devised than by giving every employe an opportunity to become a partner in the business.

There is no little time nor decreased efficiency due to dissension, misunderstanding or misunderstandings to be charged upon the consumer bills. Every employe of the Standard Oil Company (Indiana) is delivering full-time and energy to the performance of his task, and this work is to him a pleasure, not a task.

It is estimated that this is another item in that cycle of success which the Standard Oil Company (Indiana) renders its people.
