BUILD MEMORIAL TO KNUTE NELSON

The Knute Nelson Memorial Committee is endeavoring to raise a fund of \$50,000 before December 1st...

For the purpose of erecting a suitable memorial to his life upon the grounds at the State Capitol.

His sponsors are seeking a large number of small contributions rather than a few large ones...

Perhaps no man who has ever been prominent in the public life of this state has so fully exemplified the motto of the great statesman...

The accident occurred in Brimson and we understand that they did not see the train approaching.

Lee Netser is the son of Mr. and Mrs. Ed Netser of Duluth, former Pine City resident.

He is survived by his parents and two sisters, Murra and Beattie. One of them relative here for the funeral in addition to the immediate family were Mr. and Mrs. Percy Netser and Mr. and Mrs. Albert Johnson of Duluth and Carl Johnson of Spooner.

The deceased had a host of friends in this community who were relieved by the large attendance of friends at the funeral.

Arrangements have been made through the Land Clearing Department of the University of Minnesota...

SOKOL S.G. GIVE FINE PROGRAM

The Sokol demonstration in the assembly last Sunday afternoon, was a revelation to most of the large audience present...

There was an exceptionally large attendance and the program put on by the St. Paul and Denham Sokol Unions was extremely interesting.

The afternoon program opened with a concert by the Pine City band. Short talks were made by representatives of the St. Paul and Denham Unions.

The speakers exhorted the members of the organization which is to promote physical and moral training for its members.

The program consisted of a number of athletic contests and a drill by the boys and girls.

There was fancy dancing that was very entertaining. One dance by a 10-12 lady about six years old and ten girls put on fancy dances.

The program was given with a precision that showed painstaking drill in learning them. The entire program of drills, marching and dancing demonstrated how well the participants had been drilled and the whole demonstration was given with clockwork precision.

A large number of members were present and the program was well received. The Sokol Union now numbers 65 members.

The program was given with a precision that showed painstaking drill in learning them. The entire program of drills, marching and dancing demonstrated how well the participants had been drilled and the whole demonstration was given with clockwork precision.

WHEAT SHORTAGE IN WORLD, REPORT

Rye Estimated at 171 Million Bushels Below Normal—Shortage of Bread Grains.

Ottawa—The world this year faces an estimated bread grain shortage of 574 million bushels—401 million bushels of wheat and 173 million bushels of rye.

The estimate is based upon official reports to the institute from all important countries of the world with the exception of Russia, Mr. Doherty said.

Recent forecasts of European requirements have ranged from 600,000,000 to 650,000,000 bushels of wheat, he asserted. He estimated that the bread grain shortage in Europe as compared with production and consumption last year would be 449,000,000 bushels, divided 172.5 million bushels of wheat and 176.5 million bushels of rye.

The program was given with a precision that showed painstaking drill in learning them. The entire program of drills, marching and dancing demonstrated how well the participants had been drilled and the whole demonstration was given with clockwork precision.

News Briefs from All the State

Condensed Series of Happenings of the Week in Minnesota

Blayton—Mr. and Mrs. Oscar Heik of this place celebrated their 50th wedding anniversary.

Perham—Louis Engstrom, a prominent farmer of Lake Park, was given to death by a bull as he was leading the animal to water.

Chaffee—The Rev. J. A. Kretschmer and family have arrived here from Elizabeth, Minn., and was installed as pastor of the St. Paul Lutheran church.

Tracy—It is possible Gro. Proulx will be asked to assist in collecting \$5000 for the tornado swept district near here to further the work of building up destroyed homes.

Albert Lea—The Interstate Power company of this city, plans to purchase the Dubuque Electric Company plant of Dubuque, Iowa.

Montevideo—More than a hundred relatives and friends gathered to assist Mr. and Mrs. Herman N. Underwood to celebrate their 50th anniversary at their home here.

Minneapolis—The team of the University of Minnesota defeated three representatives of Oxford University, England, in a debate on the principles of prohibition at the University Armory.

Benjamin—Actual fire damage and loss through business as a result of the disastrous fire in the Gustafson lumber company's yard has been placed at \$750,000 by officials of the company.

St. Cloud—Curing sick minds by interesting them in work that requires mental as well as physical effort is a phase of recreation being tried out at the St. Cloud Veterans' hospital.

Rochester—Alcohol and moonshine liquor taken by the police in the most in raids is to be distributed among the policemen for use in their automobiles to keep the radiators from freezing.

Zumbula—County Agent Preston Hale is pushing the organization of two more cow leasing associations for Goodhue county, one among farmers in the vicinity of Kenyon and the other in the vicinity of this village.

Duluth—The first practical effect of the government's order directing the United States Steel Corporation to abolish Pittsburgh plants appeared in the northwest in the form of an announcement of a Duluth price base on wire products.

Hopkins—Dr. John S. Rydell, 53 years old, owner of the Rydell hospital of Minneapolis, was killed instantly when the roof of a garage under construction at his farm near Hopkins caved in and crushed him. His skull was fractured.

Hendricks—Harvard W. Swenson, editor and publisher of the Pioneer-Press, a weekly newspaper published here, has been elected to be the youngest editor and publisher in the United States. He is 37 years old and has been out of high school for only a few months.

Park Rapids—Meeting here today call for an annual meeting of the Minnesota Electric Highway Association, the board of directors of the organization took up the plan for the reorganization of the plans of operation of the Jefferson in the state of Minnesota.

Montevideo—That the sweet corn raised by the farmers in the vicinity of Montevideo this year will be a profitable one is shown by reports given by the canning factory. A total of \$23,000 was paid to the farmers for their corn this year.

St. Paul—Because America is enjoying greater material prosperity than any other nation, it should be able to do more than to share the gains for "international welfare," the phrase and motto in the Near East, Governor J. A. O. Proulx said in urging Minnesota to participate in the International Golden Rule Sunday, December 7.

Duluth—First two death tolls of the season were reported here. Both deaths were mysterious. Stray bullets coming apparently from nowhere to kill their victims, Eric Johnson, 49, Minneapolis, father of four children and Edward C. Bolander, 46, farmer and head of a family.

Fergus Falls—The annual meeting of the Park Region Medical Society was held in this city. Officers for the coming year were elected as follows: President, Dr. W. H. Gifford; secretary, Dr. U. L. Bergquist; delegate, Dr. T. B. Johnson; alternate, Dr. C. A. Baker; speaker, Dr. W. H. Gifford; and honor, Dr. D. B. Johnson.

Brainerd—Richard Erdman was a sweeping victory for the office of county commissioner by securing a 2 to 1 vote over that of his two opponents, A. C. Youngberg, incumbent, and Peter Jensen. Mr. Erdman's name did not appear on the ballot.

International Falls—The Klondike county commission has appointed Miss Anna E. Erickson secretary and superintendent of the office to succeed the late George A. Gifford. Miss Erickson, who is now attending California university, formerly was county auditor.

Minneapolis—More than 4,000 cars of gasoline have been handled this season by the Motor Fuel Sales Co. of Minneapolis. The net of the 4,000 cars sold was \$1,000,000.

Grand Forks—The proportion to be \$75,000 in bonds to provide money for building a new bridge over the river here was approved by a vote of 4,000 to 1,000.

Grand Forks—The proportion to be \$75,000 in bonds to provide money for building a new bridge over the river here was approved by a vote of 4,000 to 1,000.

Dawson—A big post-election rally was held at Dawson, the home of Governor-elect Theodore Christiansen. Several thousand people gathered to cheer a man who is the safety of Evelev residents, is being feared. It is an abandoned mine property.

Fairmont—Spanish influenza War Veterans of Minnesota went on record for a state bonus similar to that given World War veterans in recognition of their service in their country.

Bayley—E. N. Beck of this place has accepted a call from the congregation of the Lutheran church here and has arrived to take up his work.

Olivia—Four protest letters a month will be written to various agencies by committees of women's clubs which are making strenuous warfare against the billboards.

Ortonville—Henry Knick, 67 years old, was killed when he fell 30 feet into a grain bin. His body was found by persons who were attracted by moaning.

Pigeon—Dr. O. G. Halom of Lake Umbagog died here, having been stricken by a stroke. He was prominent in southwestern Minnesota for 25 years.

St. Cloud—Several Minnesota dairying leaders at a meeting here at which merchants of Owatonna, Steele and Roseau counties, for the stimulation of butter sales.

Fairbault—Visitors from Northfield, Morrisville, Lakeview, and other points in the vicinity of Fairbault attended the 25th anniversary celebration of the local Rural Neighbor camp here.

Minneapolis—Nearly 2,000,000 cans of condensed soups were packed by 29 Minnesota canneries in 1924, and farmers in the state were encouraged to further expansion of their diversified activities.

Winona—More than 500 visitors attended the 10th anniversary celebration at St. Mary's College, when the alumni, students and friends gathered on the Heights to renew acquaintances.

Bemidji—Fighting an \$50,000 fire which burned 24,000,000 feet of lumber threatening to spread to the city of Bemidji and wipe out its largest industry, 700 firefighters were employed.

Triumph—Selecting the choicest materials in the store, robbbers backed up a truck to the general merchandise store of Peter Warming here and made away with approximately \$3,000 in merchandise.

Clinton—A lot of this place went out to the Thomson farm, just north of here, and picked a quantity of wild plums grown there. Many of them were not sheltered in any way.

Wells—Bathhouses, water chutes and other buildings at the community swimming pool will be provided this year by the Business Women's Club here. The pool was opened last year.

Brainerd—The town swimming pool was provided by the club last summer. The pool was opened last year.

Four Tubes Found in Filad's Favor

(Edited by G. Douglas Wardrop, Editor of Radio Merchandising)

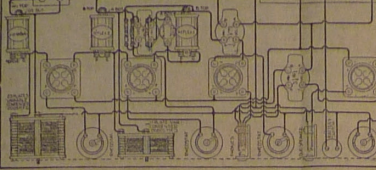

Diagram of the New Four Tube Eria and Sava "B" Battery Current.

The popular duo-tube circuit has been further improved by the engineers in the Electrical Research Laboratories. Another stage of audio frequency amplification has been added to the three-tube set. This gives the circuit greater receiving range and more power on the distant stations. Simplicity of construction and ease of operation and tuning has not been sacrificed by the additional stage and a variable condenser across the second stage, has been added to the circuit. The selectorator can still be used in place of the variable condenser. The selectorator is essentially a fixed coupler for use in any circuit where a transference of energy must take place between the aerial and the grid of the first tube. The tuning is accomplished by means of a variable condenser across the secondary windings in place of the inefficient method of taps on the primary winding. In addition to reducing the losses that are usually present when taps are used, the selectorator turns the reflex into a current transformer. The location of a station can be located by the number of the dial or it can be tuned in by the use of a variable condenser across the secondary windings in place of the inefficient method of taps on the primary winding. In addition to reducing the losses that are usually present when taps are used, the selectorator turns the reflex into a current transformer. The location of a station can be located by the number of the dial or it can be tuned in by the use of a variable condenser across the secondary windings in place of the inefficient method of taps on the primary winding.

Superflex That Gives Great Volume and Sava "B" Battery Current.

Currents are amplified by the first two tubes, then the current is changed into the form of audio frequency when it is passed through the crystal detector.

The use of three stages of audio frequency amplification increases the volume and strength of the signal so that it has been received by the antenna to a point where a loud speaker may be used on many of the stations that are far away from the receiver.

The volume is too loud for the four stages then the loud speaker plug may be shifted to the second stage. Three of the audio frequency amplification is practical only when audio transformers of a low ratio such as Eria three and one-half to one are used throughout.

The usual good quality of the reflex type of receiver is further improved by the use of low ratio audio transformer that have very little distortion, and by the use of the "C" biasing that is of from one-half to one tube.

Four 10V A-01 or C-30A tubes should be used with a six-volt storage battery. From 100 to 125 volts of B battery will be required for operation of the receiver. The use of less than 100 volts of B battery will result in a decrease in volume and range of the receiver.

Pointers on Saving Tubes From Blowouts

By HERBERT S. HALL, E. E. Many radio fans when trying out a new circuit and at other times are very much afraid that their tubes might be destroyed by the B battery potential being accidentally connected across the filaments.

If two 22½-volt B batteries are connected in series with a resistance of approximately 20,000 ohms as shown, a small voltmeter will show practically no voltage across the terminals A and B, that is, less than 1 volt, an amount which may be safely applied across the filament of any tube without danger.

When terminals A and B are applied to the plate circuit in the usual manner the volume of sound will be the same as though a 22½-volt battery were used in the filament circuit.

There is one very good use of this arrangement other than for testing purposes. When leaving the set to be used by an inexperienced person the latter cannot "blow" the tube by connecting wires to the tube or A battery terminals.

For those who are interested in what happens when this hookup is used with a set the following nontechnical description should suffice:

The nickel shaft of the new switch shuts off the battery current when it is pulled out of the way. When the shaft is pulled back out the current is turned on. The shaft can be pulled all of the way out of the switch, breaking the circuit. The shaft can be carried around in your pocket until you again wish to use the receiver. In the meanwhile the set is locked and cannot be turned on without the shaft.

The switch is of the quick make and break type with heavy phosphor bronze contact springs, the ends of which are fitted with silver tips. The switch is of the single hole mounting type with a knurled nut that can be adjusted for any thickness of metal part of the screw driver.

This is done by wrapping a layer of ordinary friction tape around the metal part of the screw driver to about one-half inch of the point.

Two Pairs Phones and Speaker at Same Time

It is sometimes necessary to use more than one pair of phones or loud speaker in a radio set at the same time. This presents a problem. The ends of the pairs of phones must be tied together in some fashion, and come apart at the end of the listening program. To avoid this trouble merely insert two or more double circuit jacks in the set.

Connect the outside prongs of the "A" battery lead of the tube in which the double circuit jacks are to be used. Then connect all the inside prongs of the extra jacks together. That is, the two outside prongs of the "A" battery lead are to be used. Then connect all the inside prongs of the extra jacks together. That is, the two outside prongs of the "A" battery lead are to be used. Then connect all the inside prongs of the extra jacks together. That is, the two outside prongs of the "A" battery lead are to be used.

Wrap Tape Around Screw Driver, Eliminate Short Circuit.

The "B" battery will be shorted directly across the "A" battery, thereby burning out one or more tubes. This can be prevented by the use of the "B" battery lead as a rule the diphenylamine does not take the trouble to be used in the experiment. This being the case, it is the best policy to insulate the screw driver so that such an occurrence will be impossible.

Four different coats are essential for the complete winter wardrobe, and Paris has made such a definite niche in the contemporary hall of fashion, says a Paris fashion correspondent in the New York Herald Tribune.

The afternoon coat, the evening wrap, the ensemble cloak and the sports coat are all decreed by the current mode, and while the minimum requirements of fashion may be satisfied by the first two of these, the socially active woman will find a definite demand for all of the models.

The most important type of coat—because it cannot be omitted from even the most frugal wardrobe—is the afternoon coat, which can be worn for formal and semi-formal daytime functions.

The Paris coasts has offered models in new interpretations of this essential garment, and these have centered around two silhouettes—the slim, straight outline and the fuller flared effect. The latter type is smarter, because it is newer and because it is gradually gaining ground in popularity.

The coat flare differs from the dress flare in that the distended effect begins at a higher line—usually slightly above the knees. It is accomplished by the manipulation of zoids and flounces, and in order to impress the flared effect more generally of waistline is often perceptibly fashioned.

Fur Trimming Popular.

Full evidence is given in the forthcoming winter fashions of the portly-shouldered fur-trimmed fabric coat, the evening shawl, and the fur-trimmed wool. Where dress and coat match this is a happy solution of the ensemble idea.

In a striking fashion model, the evening shawl, and the fur-trimmed wool. Where dress and coat match this is a happy solution of the ensemble idea.

THE COMMON COLD

It is the testimony of physicians that no disease causes as much disability and affects a larger proportion of the people as the common cold.

The average person still regards a draft as dangerous and a sure-fire producer of colds; exposure and changeable weather as certain to be fore-runners of colds, and had air as the advance agent of this greatly feared ailment.

Medical science has discovered however, that they are only predisposing agents that lower the individual's vitality and enable the cold germ to obtain a foothold.

That the common cold is a germ disease has been determined beyond all shadow of a doubt and those who wish to avoid "catching cold" can remain out of its clutches by keeping at physically.

Correct living habits, such as plenty of fresh air, nourishing food, some exercise and a happy, wholesome outlook on life will be productive of the vigor and vitality that is needed to hold the cold germ in check, though they may be present.

The common cold, which may be productive of more serious ailments, is not to be sneered at and the best way to escape the consequences is to be ready to meet it on equal terms and put it to rout.

TIMELY SUGGESTIONS

WILL IMPROVE HABITS OF CHILD AT TABLE

What can we expect of children at the table? Perhaps Johnny bolts his food, and runs away to play with never an "excuse me." Or Mary plays with her food and does not eat it. And so we think these things must be because Johnny and Mary are only children. Somehow we expect the child will outgrow these faults, never realizing that a few suggestions at the right time can prevent the formation of undesirable habits. Let me illustrate.

Three year old Jimmy was in the habit of drinking milk noisily. His aunt said one day, "Jimmy, how quietly can you drink that milk?" Jimmy decided to show her he could drink it very quietly indeed. It was a new accomplishment, so Jimmy practiced it to show others, and soon he had overcome the bad habit.

How many a mother has been embarrassed because her child started eating before the guests at the table were served. She might have been spared that embarrassment if each day her child waited with the rest of the family until all were served.

Many children have a habit of leaving a good share of their food on their plates. Just as we adults learned to leave clean plates during the war, so little children can form the habit and be quite proud to show you their clean dishes. Not only will this early training make the mother happier, but the child himself as he grows up will not have the disagreeable struggle of trying to remove poor table manners.—Lyle Horton, home economics, University Farm.

PRESBYTERIAN CHURCH NOTES

J. G. Reinhardt, Pastor

Theatre Notes

THURSDAY & FRIDAY—

Marquette De La Motte in "De sire."

The House of Devils was brilliantly lighted. A crowd of distinguished people sat at the table in the dining room. The famous European dancer, as she promped about the mirror-like floor. But in an upper room and behind the portiers were two of the greatest clowns in "The Cats Meow"—Also a comedy "The Cats Meow."

SATURDAY—

Alvin Blue & Beverly Bayne in "Her Marriage Vow."

Powerful dramatic photodrama which throws a searchlight on the modern marriage model. Shows how a little slip may often bring tragic consequences. Wherein a wife is placed in a position whereby she kills her own children.

And Corking comedy "Wide Open Spaces."

Trize Night.

SUNDAY & MONDAY

Love Family in "The Love Family."

A stirring story of timberlands, of red-blooded men fighting for fortune and love where heavy tax and hobnobbed best are victors.

A thrilling drama of a society girl forced to lead a man primitive in love and hate, who locks the door to his heart on her wedding night.

A gripping picture of a woman's battle to prove his worth to the woman he is compelled to marry him and to win the love she denied!

See the fight with Cankoo and angel on floating logs in swirling rapids.

Comedy "Black Oxford."

TUESDAY—

Distinctive Pictures—"Second Youth."

It's a scream! It's a scream! It's a scream! You have known a man who suffered from the attentions of flirtatious females, you'll appreciate the life of the hero in this fast and frolicsome film.

Bring your sweetheart, your sister, your mother—it's the kind of picture you'll want to marry him to, to see. Here's a real Joy Picture.

Into the net. Family Night.

WEDNESDAY—

Dempsey-Phipps Fight Pictures.

Carroll Myers in "Poisoned Paradise" and 3 Acts.

Ancient Coffee House

Philadelphia possesses the distinction of having the oldest stock exchange on the American continent. It was founded in May, 1774, in the London coffee house, an old hostelry at the corner of Front and Market streets.

Varied Colors of Planets

The color of the planets are: Mercury, pale ash; Venus, brilliant straw; Mars, reddish ochre; Jupiter, bright silver; Saturn, dull yellow; Uranus, pale green; Neptune, the same.

GOOD FOR WEAK EYES

The quick action of simple camphor, hydratis, witchhazel etc. as mixed in Lavoyette eye wash astonishes people. One small bottle helps any eye weak, sore or strained eyes. Aluminum eye cap free.—Prochaska's Pharmacy.

HAVE YOU APPENDICITIS AND DON'T KNOW IT?

Much so-called stomach trouble is really chronic appendicitis. This can often be relieved by simple glycerine, buckthorn bark, etc., as mixed in Ad-Verla. Most medicines act only on lower bowel, but Ad-Verla acts on BOTH upper and lower bowel, and brings out all gasses and poisons. Removes but matter you never thought was in your system. Excellent for obstinate constipation.—Prochaska's Pharmacy.

ALBERT JOHNSON

Attorney-at-Law

Will be at my office of County Attorney in the Court House, every Monday.

A. K. STRATTE, M. D.

Physician and Surgeon

Office over the Postoffice Telephone—Office, 186-W; Res. 186-G.

Up-to-Date Spider

Little Bobby, who had been taken into the country for a day's outing, saw a spider spinning a web between two tall weeds. "Hey, Pop," he yelled, "come on over here and see this bug putting up a wireless."—Chicago Blade.

Some Do

A very thin girl had a pair of long gloves and they wouldn't stay up. The girl wouldn't. She complained about this to a gentleman friend and he suggested: "Why don't you—put garters on them?"—Louisville Courier-Journal.

Refugees' Contribution

Danish lineas and stiks are of Eastern origin, being first manufactured at Danmuss. Their manufacture was introduced into England about 1871 by Dutch and Flemish refugees who fled Alva's persecutions.

TIRE SALE

This cold, disagreeable weather is the time when you will not want to stop and fix a poor tire. Look over your tires and then look over the prices given below and see if you can afford to run the risk of having one go bad. You can't afford to have them repaired when Standard Make tires can be purchased at the prices given below. An increase of 15 percent is looked for at the first of the year so get your tires at these reduced prices now.

SUZANNE LENGLEN IS TO START ALL OVER

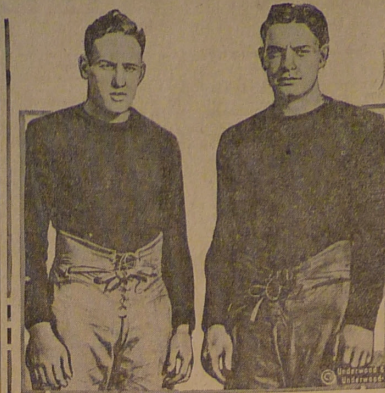

Drive Lost Its Speed and Placements Their Accuracy.

Suzanne Lenglen fears she will have to learn tennis all over again. When the mighty Suzanne returned from her enforced vacation at Pauville, near Dieppe, where she retired after her breakdown at Wimbledon, she found that the courts had changed and her placements their accuracy.

In two sets at St. Cloud, just previous to her departure for Nice, she defeated courts too small and tennis too high. Her vaunted placements, the terror of her adversaries, either went over the side flags or struck the net. After being told to get down to Madame Yausard—a player to whom Suzanne could generally give and a handicap—the former champion of the world threw up her racket in disgust and announced that she would practice in secret at the St. Cloud club and would not play in public again until December.

"Three months without taking a racket in hand have just about done me," she said. "I don't want again to make such a miserable showing before a gallery. The next time you

Manager Stanley Harris

Is Banker in Washington

Manager Stanley Harris of the world's champion Washington Senators has joined the ranks of business men. He signed a contract with Redmond & Co., an investment banking house of Washington, beginning his new work after a short hunting trip and continuing until he takes his major league training to Tampa, Fla., next spring to begin training for the 1925 campaign. His headquarters will be in Washington.

"Having accidents, I probably will have a long baseball career ahead of me," said Harris. "But the baseball season, including spring training, runs only from March to October. I'm certainly not going to idle away five months every year, no matter how successful I may be in baseball. "I have had several flattering business offers, but picked the banking profession because it holds such great opportunities for the future. In any event, I'm going to work just as hard as a banker as I did as a player."

"I must get back into form before spring," said Suzanne. "While I am very anxious to play Miss Williams next summer, if I fail to lose my title there is no one in the world to whom I would rather pass them on than her."

Thanksgiving

Suddenly over the border That shelters night from day The sun had dropped and as quietly Sped on its ceaseless way. But in the west there lingered In dapper hues and fair, A twilight which awakened The watcher's heart to prayer.

God, for beauties shown me, The mauve, the crimson and gray, That herald the advent of evening And tell of departing day; For clouds tinged with gold and silver For heaven's lanterns fair, For all of earth and its wonders, I offer this, my prayer.

I thank thee for friends who are loyal, For dear ones, for love that is true, For home and the comfort it brings me When day and my labors are through; For victories won o'er the tempter, For strength of my body of clay, For peace in our land of freedom, And hope—for the coming day.

—Chicago Tribune.

Thanksgiving Reveries and Queries

Thanksgiving is the first of America's own holidays. As the earliest to be set apart for observance runs through the whole history of the nation. Like most other distinctive features of our American order of life it sprang up out of the local soil, at first and for many years colonial. It became national only as its observance spread from town to town, from colony to colony, from state to state.

While it has a historical interest all its own, Thanksgiving is identified with no single event, no special occasion, no definite date in our history. It recalls no single day as does Independence Day. It commemorates the name and service of no man, as do the birthdays of Washington and Lincoln. It is not shared with other peoples as are Christmas and New Year's.

Day Identified With All. The American Thanksgiving day is identified with the soil we till, for whose harvest we give thanks. It is, therefore, identified with the soil and the toilers whose tillage and productive labor, inventive skill, constructive and distributive enterprise, has clothed and developed our own people and many of their kith and kin in the old fatherlands across the sea.

Thanksgiving is an older and greater Labor day. It recalls and calls forth all kinds of effort by all classes of people. It merges the common product of the common toil, for the national possession of which the President and governors of the whole people call upon them to thank their Father, Creator and the good providence of the Great Provider. In this reminding us that our harvests are the joint product of Mother Nature, the children of men and Father God, Thanksgiving is best of all the American people's expression of grateful appreciation for their "country"—its soil and waters, its fertility and beauty; for our great out-of-doors nature, its response to human effort, to its duty, to its work and its working with nature's law. Thanksgiving is, therefore, our nation's inalienable holiday.

Celebrates Entire Year. And yet it celebrates the full round year. While held over by harvest, Thanksgiving does not let us forget the seed and sowing of the springtime, the growing and swelling of the summer, the ripening and reaping of the autumn, the gathering and storing of the winter. Moreover, and above all, in this linking soil and water, earth and heavens, it is the Day of Thanksgiving of the Father of us all, as the great giver not only but as the greatest worker, with whom we may work and who works with us for the common good. "My father works with us," said the greatest of men, "and I work with him." "The Father of us all," says the Bible, "is the Father of the Fatherless." These reverent awaken queries, also, that man, the Father of us all, is the Father of us all, as the great giver not only but as the greatest worker, with whom we may work and who works with us for the common good.

These reverent awaken queries, also, that man, the Father of us all, is the Father of us all, as the great giver not only but as the greatest worker, with whom we may work and who works with us for the common good. OCCASIONS FOR THANKSGIVING

THAT we have bread enough and to spare for the hungry of the earth. That our ancient order of obedience and orderly change stands fast.

For the hope of better social understanding and just dealing. That our great opportunities of world-wide helpfulness remain.

That the idea of brotherhood among the nations has taken root. For the true men and women who are giving lives of service.

For leaders raised up and the opportunity following them. For the open door of knowledge and the desire for truth above all men.

For joys of simple living and the unpoised saints. For work and rest, the patience that continues, the ideals that soar.

For the love of home in all of us, and its satisfaction when it comes. That the joy is bigger than we, and that the joy is larger than we.

For the love of home in all of us, and its satisfaction when it comes. That the joy is bigger than we, and that the joy is larger than we.

For the love of home in all of us, and its satisfaction when it comes. That the joy is bigger than we, and that the joy is larger than we.

For the love of home in all of us, and its satisfaction when it comes. That the joy is bigger than we, and that the joy is larger than we.

For the love of home in all of us, and its satisfaction when it comes. That the joy is bigger than we, and that the joy is larger than we.

For the love of home in all of us, and its satisfaction when it comes. That the joy is bigger than we, and that the joy is larger than we.

For the love of home in all of us, and its satisfaction when it comes. That the joy is bigger than we, and that the joy is larger than we.

For the love of home in all of us, and its satisfaction when it comes. That the joy is bigger than we, and that the joy is larger than we.

For the love of home in all of us, and its satisfaction when it comes. That the joy is bigger than we, and that the joy is larger than we.

For the love of home in all of us, and its satisfaction when it comes. That the joy is bigger than we, and that the joy is larger than we.

For the love of home in all of us, and its satisfaction when it comes. That the joy is bigger than we, and that the joy is larger than we.

For the love of home in all of us, and its satisfaction when it comes. That the joy is bigger than we, and that the joy is larger than we.

For the love of home in all of us, and its satisfaction when it comes. That the joy is bigger than we, and that the joy is larger than we.

For the love of home in all of us, and its satisfaction when it comes. That the joy is bigger than we, and that the joy is larger than we.

For the love of home in all of us, and its satisfaction when it comes. That the joy is bigger than we, and that the joy is larger than we.

For the love of home in all of us, and its satisfaction when it comes. That the joy is bigger than we, and that the joy is larger than we.

For the love of home in all of us, and its satisfaction when it comes. That the joy is bigger than we, and that the joy is larger than we.

Schalk's Mark Broken

Ray Schalk's best record for catching 100 or more games each season to pass into the record books. He performed in 100 or more games every year for the White Sox. Numerous players this season made it impossible for him to come through. He had hoped to stretch the record to 12 years.

Chilhowee Sets Record

Chilhowee, the son of Ballot-Bourton, has established a new American record for 145 for miles in a small circle, heads close together, as the play is called. Any player in doubt as to whether he is in the circle or not, instead of using such a play, has the right to raise the question.

Kelly Rated Valuable

McGraw classes First Baseman George Kelly as one of the most valuable players on his club. This year he has led in second in the absence of Fritsch, and also played the outfield. Kelly is a graceful fielder despite his size.

Baseball will awaken again with the crisis.

The United States has held the Davis cup since 1920. Women bookmakers are permitted to operate on all race courses. Fishing is the favorite sport among successful men, followed by golf and tennis.

Tennis is played at night in Australia on electrically illuminated courts.

Roberto Barcen, Mexico's foremost snooker, has been throwing balls for 21 years. Fencing has been added to the list of sports for men at the University of California. Pretty golf for a world's series player will not do but play golf will next March.

Joe Kirkwood is eliminating tuck shots for safer and surer form of execution in golf play.

In Fred Heimach, Connie Mack has developed not only a good southpaw pitcher but a batsman. Heimach signs many a name for himself with a timely base hit. The Jockey club in Buenos Aires, Argentina, is the wealthiest sports club in the world.

Don Batts' record for a mile in 1:55.4. Peter Manning's record for a mile in 1:53.4.

The combined seating capacity of 41 parks in the American and National baseball leagues is 40,000. The failure of Bobby Vose to deliver for the Red Sox may mean the passing of the slugging outfielder to the minors. Vose struck the Red Sox in a run to \$25,000 and wasn't a profitable investment.

Pennsylvania State college has two sports clubs on its grounds.

Thomas Fortune Ryan, it is reported, will discontinue his entire racing and breeding stock at an early date. On the Pacific coast the famous A. D. Woodruff's Santa breeding farm will be sold to the highest bidder.

Eastern Grid Fans Not Strong for Huddle Idea

The huddle system of giving signals is not meeting with great favor in the East. For several years it has been a part of western football, many of the leading teams resorting to it. In the huddle system, instead of having the signal called as the teams line up, the side having the ball goes into conference before each play.

Ted Cox Is Grid Star

Ted Cox, captain and right tackle of the great American sport gaining favor in Holland and being played regularly, met of them, would if the game is played on ice, as the fan compares ice with about every sport played in Holland. It is not true that the players in the Netherlands play baseball on the ice, but it is interesting to know that the game has been played in this fashion. The first record of a game being played with skates was made in 1861 between two Brooklyn clubs.

Baseball in Holland

When baseball fans in America hear of the great American sport gaining favor in Holland and being played regularly, met of them, would if the game is played on ice, as the fan compares ice with about every sport played in Holland. It is not true that the players in the Netherlands play baseball on the ice, but it is interesting to know that the game has been played in this fashion. The first record of a game being played with skates was made in 1861 between two Brooklyn clubs.

Field Hockey Popular

Field Hockey among school girls is growing in popularity. From two Philadelphia schools in 1921, the United States Field Hockey Association has a membership of seven Quaker City schools and six Pennsylvania schools. Worcester and Greenough, with knowledge gained in the English game, have been the first to introduce the game in the United States.

Thankfulness and Hope

Thanksgiving is not, at its best, that unpoised joy of dawn, but rather that he feels. And so it is. That all of us, equal members in a free democracy, are privileged to draw our livelihood from the soil, to take up the untold people, and to join together in a festival of good cheer. It is to thank for what the past has yielded; to face the future with a mutual hopefulness in what it holds in store.

That from a nation conducted on business principles should emanate a "holiday" that is indeed a day of feast.
