

MRS. WARREN G. HARDING IS DEAD

Old Friends Pay Respects To Former First Lady at Marion, Ohio.

Marion, Ohio—Florence Kling Harding, widow of Warren G. Harding, twenty-sixth president of the United States, is dead.

The end came at the White Oaks sanitarium of Dr. Carl W. Sawyer, where she has been fighting for life for the last few weeks.

Mrs. Harding's death was due directly to a kidney ailment from which she had suffered for years and which nearly resulted fatally while she was mistress of the White House. She died peacefully, Dr. Sawyer said.

Clifford H. Kling, Mrs. Harding's brother, George B. Christian, Jr., who had been secretary to Mr. Harding, Mrs. Mary Sawyer, widow of Gen. Charles E. Sawyer, and Dr. Carl Sawyer were present when the end came.

Husband's Death Severe Test.

The most severe test of her fortitude was during the final illness and death of President Harding, and the trying ordeal that followed—the cross-country trip with the body of the president, the public services in Washington, then the trip to and the funeral at Marion, Ohio.

Thousands of neighbors and friends passed the hour of Mrs. Florence King Harding, to pay their last respects, when a line formed at the Longshore home here, where the body of the former first lady lay in repose, a steady stream of people passed in and out. It was a silent, reverent crowd, mostly people who had known the Hardings when they were struggling newspaper folks. The funeral was held Monday.

DAWES ACCEPTS LEGION POST

Will Be Vice Chairman of Committee Raising Orphan Fund.

Indianapolis—Accompanied by Charles G. Dawes, vice president-elect of the vice chairmanship of the honorary committee created by the American Legion to assist in its campaign to raise an endowment fund of \$5,000,000 to care for disabled World War veterans and orphans, fallen soldiers, was announced at national headquarters here.

Russell G. Croston, national adjutant and executive secretary of the committee in charge of the drive, also announced that 12 other men, several of them cabinet members, had accepted the Legion's invitation to serve on the committee.

The list included Secretary of State Hughes, Secretary of the Treasury Mellon, Secretary of Commerce Hoover, Secretary of War Clegg, Interior Work, Secretary of Agriculture Gore and Secretary of Labor Davis.

FENG PLANNING TO RESIGN

"Christian General" Declares Task Ended—Will Go Abroad.

Peking—Chen Chi-fu, former premier of China, and former leader of the Anti or military party, was inaugurated as chief executive of the new government of the Republic of China, General Feng Yu-hsiang, the "Christian general," who recently deposed Mr. Feng, is expected to resign his military command, and is expected to leave his leadership to Yuan Chi-fu, premier.

Feng's army will be placed under the command of the military, and it is reported to be the intention of Feng to leave Peking almost immediately and eventually to proceed to a statement Feng said he had accomplished the checks for which the "Christian" army was organized, after ousting a "corrupt" government. He was therefore content to leave affairs in other competent hands.

PARIS TO GET \$100,000,000

Authorization of Transaction by House of Deputies Provided in Bill.

Paris—Finance Minister Clemenceau has arranged with the French senate for a loan to France of \$100,000,000 at 4 per cent.

The other conditions of the loan, including the issue of bonds, will be announced later. M. Clemenceau explained the terms of the loan to the senate, which gave its approval and authorized him to present a bill to the chamber of deputies.

M. Clemenceau said the previous loan had the appearance of securing France's debt, while the present loan has a different aspect, as the government would have to place the \$100,000,000 in a bank.

Russia Fights Opium Use.

Ministry—Although Soviet Russia recently declined to join the League of Nations, she has agreed to accept the League's opium convention. The Russian government has announced that it will not permit the sale of opium in any form, and that it will not permit the sale of opium in any form, and that it will not permit the sale of opium in any form.

CAPT. DAUGHERTY IS INSTRUCTOR

First Inspection of Battery E Last Friday Evening.

Captain L. A. Daugherty made his first inspection of Battery E last Friday evening. Captain Daugherty is the regular army instructor for the 125th Field Artillery, Minnesota National Guard, having recently been assigned to the regiment. He expects to visit the local battery about once a month.

He made a few brief remarks, which he inspected the battery, which he stated it was his desire to have the 125th one hundred per cent efficient when they went to camp next year and asked the cooperation of the men in accomplishing this. He made a thorough inspection and check-up of all material and equipment. He impressed the local organization, not only as a thorough instructor, but as an efficient officer as well, and they will look forward to his visits and feel they will make rapid strides under his instructorship.

Captain Daugherty was at Camp Croston, the local organization was there last summer. At that time he was assigned to the 14th Field Artillery, regular army, stationed there. He served with the 14th and then the 1st of the war as a battery commander. In 1921 he was assigned to the 7th F. A. and served in the army of occupation, remaining in Germany until 1923.

Captain Daugherty was a member of the San Francisco, California National Guard, for 10 years, previous to his regular army service, and has served in the regular army the past nine years. He served with the 1st of the National Guard make him thoroughly acquainted with the needs of that organization and his many years of service in the regular army have given him the practical experience to make him an efficient instructor. He is "all soldier" and he makes the prediction that the 125th will have their own in efficiency at camp next year.

Captain Boo has received invoices and freight bills for some of the needed equipment which has been ordered and will be here in the near future. Captain Daugherty also stated he could get a caisson and possibly a gun for Battery E from Minneapolis.

The battery basketball team is now busy practicing and are looking forward to the season. The uniforms and equipment for the team, purchased by the team, will start in the near future. Captain Daugherty is manager of the team and announced Friday evening that tickets for eight games will be sold to members for \$2.50 each.

Hold Whist Tournament

Eight of the Pine City players entertained a like number of their country neighbors at the opening of a whist tournament last Monday night. The session was held in the Hotel Agnes, play starting at 8 o'clock and continuing until after eleven. Supper was served at eleven o'clock.

Pine City won the session by a score of 48 to 22. The score might indicate a one-sided game, but it was far from that. With one exception of a what tournament last Monday night. The session was held in the Hotel Agnes, play starting at 8 o'clock and continuing until after eleven. Supper was served at eleven o'clock.

The visiting teams were Arvid Swanson and Mike Hudak, Ed Brown and Jack Trolan, John Nelson and Gus Trolan, Andrew Carlson and August Wickstrom. The Pine City teams were Carl Holmberg and Otto Johanson, Roy Carlson and Stanley Gunn, and P. Ellis and Judge Wilcox, George Staske and Will McEachern.

The Pine City players thoroughly enjoyed having the visitors in for the evening and will look forward to a return engagement and many more sessions. It doesn't matter which wins or loses, but what counts is the fact that folks living outside the village, and the village people, become better acquainted in a social way. We need more social gatherings of the same kind. The good was fostered rivalry and good fellowship developed at each gathering; it was a lot to all of us.

Creamery Exceeds Last Year

The Pine City Cooperative Creamery passed last year's production on the fifth of this month by about 5,000 gallons of butter made during the year up to this date.

The output of butter produced by the creamery for this year will run about 720,000 pounds. This will be by far the largest amount ever produced by the local creamery.

GUST HOFFMAN KILLED IN MONTANA

Gust Hoffman, son of Daniel Hoffman, was killed in Noyon, Montana, Tuesday or Wednesday of last week. Only summer reports have been received here at this time, but they state that he was stabbed by an Indian and robbed of his watch and some money. The Indian had been arrested at the scene.

The remains were brought to Pine City for interment and arrived last Sunday. Funeral services were conducted by Rev. John Love from the Methodist church, last Tuesday, and burial was made in Birchwood cemetery where his mother was laid to rest a year or more ago.

The pall bearers were Roy Harris, Paul Klumbe, Hans Grandt, Frank Chemelik, Wm. Schultz and Casper Krause.

Gust Hoffman was born in Germany 42 years ago last April 18th. He came to St. Paul in 1886, living there 4 years and then moved to Hinckley living there until after the fire when the family settled on the farm north of Pine City.

His father, four brothers and four sisters survive. Herman who resides on the old farm home, Carl, Adolph, Mrs. Harry Davis, Mrs. Charles Olson, Mrs. Herman Lessing and Mrs. Pyle of Minneapolis and Arthur Hoffman.

Other relatives here for the funeral were Mrs. Carl Hoffman, Mrs. Fred Harris, Roy Harris of Lanesville, Mich., Mr. and Mrs. Henry Jacob and Walter Lank of Hinckley, Mr. and Mrs. Gust Kolozsky and daughter Ruth of Wisconsin.

HOME TALENT PLAY AUTO PLUNGES THRU BRIDGE RAILING

Don't forget the Home Talent play in the Family Theatre on Wednesday evening, December 3. The title of the play is "The Many Husbands" and will furnish you two hours of wholesome fun. It is a series of sensational happenings and mixups which keep you wondering what will come next. You can't afford to miss it. Tickets 25 and 35 cents. Music will be furnished between the acts.

Following is the cast of characters: Colonel Thaddeus Crane—Donald Spickler; Dorothy Crane, his daughter—Hazel Heath; Chauncey Chilton, his secretary—Edward Wornie; Leonard Malaha Arthur Mattlan, his poor neighbor—John Holmberg; Harry Brown, a bookkeeper—Edward Wornie; Mitty Brown, his wife—Margaret Love; Reverend Ormsby—a preacher—Hazel Heath; Harold Truax—Muriel Heath; Mollie, a servant—Laelle Blederman; Jones, an expressman—Libbie Polivka; O'Flynn, a patrolman—Emanuel Gardner; Rudolph Bauer, a detective—Wesley Love.

The driver was about three sheets in the wind and was carrying a heavy load himself. He was given a berth in the local bastle for the night and released the next morning. The auto had given a lift some fellow along the road, who had doped him and taken his money. Whether he was doped or not is a matter of conjecture. That is, he was doped, but as to the matter of the doped and where he got it, is questionable.

He said his wife was at Groningen and was expecting a new arrival that day, and he was in a hurry to get there. He was in a hurry to get there, he was in a hurry to get there, he was in a hurry to get there.

THREE NEW CO. EGYPTIAN CABINET QUILTS IN CRISIS

Allenby Orders Troops to Occupy Alexandria Customs at Once.

Cairo—The Egyptian cabinet, headed by Zagloul Pasha, tendered its resignation to King Fuad, who accepted it at once.

The king summoned Zivir Pasha, president of the senate, who consented to form a cabinet. The indemnity of 500,000 pounds demanded by the British for the death of the sirdar, Maj. Gen. Sir Lee Stack, was paid by the Egyptian government.

The acceptance of the premiership by Zivir Pasha, who was expected to complete the task of forming a cabinet is believed likely to bring a new political outlook will be produced which will obviate the taking of further measures which the British have considered necessary.

Sir Lee died in Cairo after blood transfusions had been unsuccessful in combating the effect of three bullet wounds suffered in an attack.

The Sudan Herald, shortly before Sir Lee's death, strongly urged the British authorities in Egypt to take drastic action as a sign that the population of the Sudan can rely on the support and protection of Great Britain.

He has had many years of service in town offices he served as assessor of the towns of Chengwatana and Pine town and of Pine City village council. This is the first time he has been elected for a number of years. Mr. Wilcox is married and has two sons and one daughter.

Fred Degetrom succeeds Frank Stepan of Willow River as commissioner of the fourth district. Fred is known to practically everyone in Pine county as a fish and game warden which position he has held the last few years. He came to Pine county in 1892 and in '95 he took up a homestead in the Town of Partridge, near Askov, where he resides today.

He served as a member of the county board one term and did not run for re-election, being succeeded by the late Joe Zimmerman. At the time of Mr. Zimmerman's death, a successor was elected by the chairman of the town boards of the district. Mr. Degetrom was tendered the position but declined and Frank Stepan was appointed.

Mr. Degetrom is a member of the Partridge town board since it was organized, with the exception of the four years he served on the county board. Mr. Degetrom is married and has a large family. The boys run the farm while he tends to his duties as game warden.

MINNESOTA BANKS GAINING

Replies to Call Show Big Improvement in Position.

Minneapolis—The financial condition throughout Minnesota is rapidly improving. Replies to a call for a tabulation of the October 31 bank call in the office of A. J. Veigel, state superintendent of banks, show that the banks have reduced their bills payable.

The tabulation which was completed shows that the total deposits in the 1947 state banks, net savings banks and 42 trust companies, were \$435,586,094.57 as compared with \$419,151,034.49 on June 30, the previous call. An increase of \$16,455,060.08.

The cash reserves as shown in the last report were \$61,786,406.99, while the reserve requirements were \$25,509,915.83. This shows that the banks have reduced their bills payable \$36,276,491.16.

PLAN TO STORE COAL URGED

Community Proposal Made in Report of U. S. Engineers.

New York—A report of the coal storage plan of the American Engineering Council, made public by James Hartness, president of the organization, outlines a series of community plans by which the principal cities of the country may, through a system of uniform monthly shipments, avoid coal famine.

Mr. Hartness said a series of surveys on which the report is based has revealed that storage is the remedy for the nation's coal troubles. The committee recommends, according to the report, that all consumers purchase their coal in a 12-month contract for yearly requirements, with a provision that the coal is delivered monthly in equal allotments.

FAHY FOUND GUILTY BY JURY

James Murray Also Convicted in Connection With Mail Robbery.

Chicago—William J. Fahy, former postal inspector and James Murray, politician, were found guilty on five charges of robbing the mails with a gun, five charges of robbing the mails, and one charge of conspiracy to rob the mails, in connection with the \$2,000,000 bond mail robbery by a federal jury here.

Walter McCormick, chauffeur for Murray, was acquitted. He was pictured as an innocent victim when he permitted a mail robber wounded in the holdup to be taken to his apartment.

BEACH CONVICTED ATTACKED

McGohe Inquires into Alleged Remarks of Juror and Hibbard.

Minneapolis—Charges made in affidavits filed by James Hibbard for a motion for a new trial in the case of Maj. Alfred Beach, former "Veterans" bureau official convicted of a bribery, caused Judge John F. McGoo to defer sentence in the case and to ask the charges be investigated by the United States district attorney's office.

It is charged that a juror in the Beach trial was guilty of misconduct and that Hibbard, district attorney, made the statement that "he by his institution of a new trial in the case of the way." Mr. Hibbard testified as a government witness during the trial.

TWO KILLED IN AIR WRECK.

Clover Field, Santa Monica, Calif.—A man and a woman were killed and two others injured when a biplane crashed here when they were flying collided in mid-air. The crash was seen by Miss Ruth G. Wilson, both of Pasadena, who took a landing in their commercial plane, which was piloted by Leslie K. Traugott, a lieutenant in the army air corps. Traugott and Mrs. Traugott have a fair chance to recover.

ACCORDED ESSAYISTS

The students of Pine City High School will be glad to hear that the school has been awarded a motion picture to 1425 Cleveland avenue, St. Paul, where his mother is living, grabbed him as he tried to open the door. The son is married and has a farm near his father's place, and two boys are living in Racine.

A child of an alleged child kidnapping Wednesday was reported to Chicago police Friday by a mother who had been separated from her husband but not yet divorced.

Two men in a closed car, according to the story, chased eight-year-old child more than a block and a half to 1425 Cleveland avenue, St. Paul, where his mother is living, grabbed him as he tried to open the door. The son is married and has a farm near his father's place, and two boys are living in Racine.

Now as long as the fellows who are working hard to develop a good team have the spirit, there is no reason why the school should not be behind them 100 per cent.

Howard Balguy will have charge of the pep meetings this year, and also will take charge during the games. He is planning on getting started this year, and he is sure to have a wonderful team of "Yell-ers" by the time the first game comes around—December 6th. If anybody has any suggestions to make, contact them to Howard as soon as possible.

Excavations at Kish

Show Man's Progress

Discoverer of the styles, the oldest known writing instrument, in excavations at Kish, the world's most ancient "business city," has solved the riddle of how cuneiform script was written. It was stated by D. C. Davies, director of the field museum at Chicago.

Mr. Davies stated that records of man's progress, dating back 6,500 years had been excavated at Kish. He discovered the earliest evidence that the Sumerians gave the art of writing to the world.

These people, Mr. Davies explained, excelled before "the soldiers of Babylon" arose, and in the same country as that occupied by the Babylonians at a later day. Kish, their capital, was nine miles from Babylon on the banks of an old channel of the Euphrates. It was a vast metropolis, with a civilization older than Egypt's.

Were cuneiforms to catch mice or because we wanted another pet besides the dog?

Sparrow Air Champion

Even the loquacious sparrow still can't do the trick of the 21st. If the record of a Belgian farmer can be trusted, he has to test the speed of a sparrow while nested under the eaves of his cottage. The farmer tagged the sparrow and four carrier pigeons and mailed them to a friend at Compiègne, France, 140 miles distant from his home, with instructions to release the birds.

According to the farmer, it took the pigeons about five minutes to find their bearings. On the other hand, the sparrow started five minutes later, and, flying a straight course, arrived at its nest in an hour and eight minutes.

Ants Eat Farm Houses

State entomologists of Illinois are investigating the destruction by white ants of a two-story farm house at Moxie, Ill. In removing the structure, they discovered the ant-eaten completely honeycombed the woodwork of the structure, starting at the foundation and going to the roof. This often happens in "poplar" countries—Scientific American.

Boschee's Syrup

Alleviates irritation, soothes and heals throat and lung inflammation. The constant irritation of a cough keeps the delicate mucous membrane of the throat and lungs in a congested condition, which BOSCHEE'S SYRUP gently and quietly breaks up. It is a proven preparation in the form of a liquid remedy for colds, coughs, bronchitis and especially for lung troubles in millions of homes all over the world for the last fifty-eight years, enabling the patient to obtain a good night's rest, free from coughing with every expiration in the morning. You can buy BOSCHEE'S SYRUP wherever medicines are sold.—Adv.

Hook-up Shown for Benefit of Non-Technical Layman. Wiring is Simplified Itself; Chances for Going Wrong Are Minimized.

By ROBERT LA MAR

"All men are born free and equal." So says the Constitution of the United States. However, the very most we live in defies this. Some are rich, others are well off, while the vast majority are poor.

Therefore, we can't spend our money without looking before we leap. If you are desirous of purchasing a radio set that will do the work of the more costly one, and yet be less expensive, I think I know of the set you are looking for. The receiver costs but a few dollars to construct, yet operates as well as the best of course. It may not look as well as the more expensive sets.

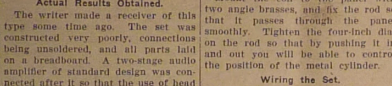

Now for the set: A few things about it won't harm a bit; in fact, they may help materially.

First, it is of the good old regenerative type, and is more specific. It is what is known as the "ultra-audio," the old, yet efficient, means of obtaining regeneration, as discovered by Dr. Lee De Forest. As few controls as could be wished for are provided, to wit, one. Strangely it is not a condenser, a coupler, or even a variometer. Indeed, it is quite different. A metal ring! Strange, but true.

Actual Results Obtained.

The writer made a receiver of this type some time ago. The set was constructed very poorly, connections being unsoldered, and all parts laid on a breadboard. A two-stage audio amplifier of standard design was connected after it so that the use of head phones might be avoided.

The log of stations heard after a few nights looked like a page from the telephone directory. Stations from Chicago, Cleveland, Canada, Mexico, Havana, Memphis, and from places too numerous to mention, came in all over the room wonderfully well.

A Little Hook-Up That's Sure Fire and Full of Pep.

Visit your local radio store and procure the following:

One piece of cardboard tubing two inches diameter and one foot long.

One-fourth pound of No. 24 B. C. wire.

One rheostat.

One seven by ten-inch panel.

One baseboard, seven by nine inches.

One socket.

One .00025 fixed condenser (mica, of course).

One variable grid leak.

Eight binding posts.

One .001 inch condenser.

One four-inch dial.

Necessary nuts, brass, screws and sundries.

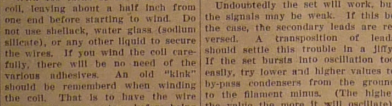

With 100 turns of the wire on the coil, winding about a half inch from one end before starting to wind. Do not use shellac, water glass (sodium silicate), or any other liquid to secure the wires. If you wind the coil carefully, there will be no need of the various adhesives. All that should be remembered when winding the coil. That is to have the wire pass over a warm stove before being wound on. Then wind the wire snugly, taking care that each turn fits close to the previous one. Now anchor the two ends with sealing wax.

Next, wind fifteen turns of the same size wire on top of the 100 turns. These turns should be wound in the same direction as the secondary, and in the center of it. This is very important.

Prepare a piece of thin sheet brass, or copper, six inches by four. Bend the brass or copper, as the case may be, in the form of a circle, using the

Grid Leak Mounting Can Be Made From Old Clips

During the course of construction of a new set, the builder often finds that a separate grid leak mounting is necessary. Such a mounting may be employed when 11 grid leak is con-

Grid Leak Mounting Can Be Made From Old Clips

Loop Reception; Some Good and Bad Points

A loop is the most sensitive receiver because it must employ radio frequency amplification to amplify the small amount of energy that it collects. But the loop receiver has so many advantages over the present-day style of receiver. The great advantage is that there is little doubt that this will be the ultimate style of receiver. The great advantage is that there is little doubt that this will be the ultimate style of receiver. The great advantage is that there is little doubt that this will be the ultimate style of receiver.

Why Walter Johnson Wins Popular Favor

Here's why Walter Johnson is regarded as he is by players, managers, fans, the whole world, says Bill Franke in the Philadelphia Ledger.

Billy Evans, the prince of umpires, went to the Washington club house about two hours before the start of the grand finale. Billy had with him two friends, two Amateur League baseballs. Friends of the umpire desired Johnson's name on the horse, as a memento of the greatest world series ever played.

Johnson was in uniform, but it wasn't yet time for practice. He was sitting on a trunk not saying much.

"I looked up at Evans

"Holy smoke!" he said slowly.

"Billy, do you mean to say there are two persons who want my name on a baseball after the game?"

"Yes, I'll sign that's one thing I'm good for. Writing my name"

LEONARD IS ABOUT READY TO RETIRE

To Vacate Throne Without Another Defending Fight.

Penny Leonard is about ready to announce his retirement as a lightweight. It is not improbable that he will follow the lead of Johnny Dundee, recently retired feather king, and vacate the throne without another defending contest.

Leonard has always been heavy, and is not getting any lighter. Leonard could have made the weight this summer if a legitimate challenger had been developed. He had gone through a long siege of training and was on a simple diet.

Leonard had hopes Luis Vientafil, the Chilean, would come through fast enough to qualify for a championship fight. Vientafil, hardest hitter among the challengers, had the start but frittered away his chances in Broadway cafes.

One by one the other contenders faded into obscurity until presently none were left with the slightest claim to distinction as a lightweight challenger. Leonard then arranged a bout with Micky Walker for the waterweight title. This did not come off, as an injured thumb sustained by Leonard.

This bout will not be held until next summer. It will be an open air attraction, with Tex Richard doing the promoting. If Leonard wins he will continue as a waterweight champion. Otherwise, he will hang up the mittens for good.

Leonard promises to be the second lightweight champion to retire in 1925. Jack McCallister, old-timer, was the other.

Leonard's retirement will be due to lack of competition. In McCallister's day the title was worth a great deal of money. It has been worth nearly \$500,000 to Leonard.

Captain of Michigan

Photograph shows Winslow M. Lovejoy of Montclair, N. J., who is captain and manager of Yale football team. He is a veteran of two seasons.

Brilliant Play of Fred Lindstrom Not Expected

The play afield and at bat of Freddie Lindstrom, second baseman of the Toledo club in 1923, in the title world series was one of the dazzling lights of the seven-game tourney.

Lindstrom wasn't due to play in the series. The injury to Heinie Grob, regular Giant third baseman, brought the 19-year-old player into the closing games of the pennant race and into the big money series.

If ever a young player rose to the dizzy heights of the altogether unexpected, it was Lindstrom. He played brilliantly afield, without stage fright, and timed his throws perfectly as he hit by hit and often.

One wondered if Lindstrom were moving over his head as he say when a player is doing better than expected. It may be that the younger, less inspired or it may be that the series simply revealed a budding star who burst into full bloom in the games that followed.

Certainly we'll know next summer, for McGraw hardly can do anything else but fret Freddie Lindstrom at third base. If Freddie can play through the season as he played in the series, Heinie Grob is a utility infielder from next spring on.

Chilhowee Lowers Mark for Mile and Furlong

Chilhowee won the Covington purse at one and one-eighth miles in 1:48.45, lowering the American record by one 1/10 of a second. He also won a half mile and a half, going in 2:27.35, one and one-fifth seconds for the distance at 2:28.45. Chilhowee took the lead at once, holding it throughout, winning by three lengths. He established second season lengths ahead of Hopless, third.

Cueists Set World Mark

Details of the billiard game which Walter Lindrum, Australian, the darted world champion, set at 16,000 to 15,375 at Sydney recently stamps the contest as the greatest in the history of the game. Lindrum made 100 breaks, including a break of 1210 and Fankhouser one of 1300, while Lindrum averaged 108 for the entire game and Fankhouser 110.

Five Records for Altrack

How many baseball fans know that Nicholas Altrack, famous comolid of the Washington American, holds five records for pitchers in world series? Three of them being held jointly with J. L. Vaughn, formerly with the Chicago Cubs. In 1903 Altrack set the five records for pitchers in world series: Six putouts in one game, three putouts in one inning, eight assists in one game. It changes occur in one series, 11 chances accepted in one game.

Is After Wagner's Record

The record for the greater number of games played in a single league by a ball player is due to be broken either next year or the year after it. J. L. Wagner, who has played 2,781 games in the record is now 2,781 games, held by J. L. Wagner in his years with the Cincinnati Reds. Another year and the record made by Wagner may be equaled or at least within close reach of the Detroit manager.

To Quit Amateur Swimming Ranks

Johnny Weissmuller, the world's greatest swimmer, may do that which every athlete dreams of doing, but seldom does, retire at the top of his glory, an undefeated champion. He has been made a tempting offer to go into vandyell, along with Stubby Kruger, backstroke record holder.

Only Woman Crew Coach

Miss Eleanor Clifton, head coach of the Smith college crew, is the only woman crew coach in the world, and she is one of the best girl crews in the country organized. She is shown here directing the girls.

Major League Clubs Pick Training Sites

All major league clubs, with the exception of the Boston Red Sox have decided upon sites for their 1925 spring training quarters. Florida draws the most clubs, three going to the Philadelphia Athletics at Port Myer, Washington at Tampa, Phillies at Bradenton, Boston Braves and New York Yankees at St. Petersburg, Brooklyn at Clearwater, St. Louis Browns at Tarpon Springs, Cleveland at Lakeland, Cincinnati at Orlando and New York Giants at Sarasota. Three clubs go to the Pacific coast, all being National Leaguers: St. Louis at Stockton, Pittsburgh at Tass Islands and Chicago at Catalina Island. The Chicago White Sox journey to Shreveport, La., and the Detroit Tigers go back to Augusta, Ga. The Red Sox are undecided between San Antonio, Texas, and Sanford, Fla.

Yale's Grid Captain

Photograph shows Winslow M. Lovejoy of Montclair, N. J., who is captain and manager of Yale football team. He is a veteran of two seasons.

Baltimore Is Too Good for Balance of Circuit

Baltimore won its sixth straight International League pennant this fall. It finished in a walk, 19 games ahead of Toronto in second place and 34 in advance of the Washington Senators. It was one of the hollowest victories in the history of the organization.

Baltimore, all told, copped 117 titles as of October 11, having a percentage of .700. The Orioles got away to a splendid start and set the pace the entire route. It clinched the bag weeks before the end of the season. In the American league this year some twenty games separated Washington from the last-place team. A glance at the International shows there were exactly 63 1/2 games difference between Baltimore and Jersey City, which finished last.

Notes of the Sporting World

Madrid, Spain, has two ski clubs with a membership of over 3,000.

Tris Speaker is one big league manager who encourages golf among his players.

George Cheney of Baltimore has a string of knuckouts that reach the century mark.

Now that Washington has won a major league pennant baseball fans are being urged to help to build up the good example set by the Senators and win their first pennant in 1925.

Thurston, by winning 20 games for the White Sox, is said to have earned substantial baseball money this winter.

Duffy Lewis, manager of Salt Lake, has been chosen to manage the Park land club in 1925.

Manila has issued a campaign to raise funds by subscription to erect a new Jose Rizal Memorial stadium, a plan of which it is hoped will have in scope for the Far Eastern track and field sports to be held next May.

Rumor has it that Miller Huggins retires, Eddie Collins may go to the Yankees as manager.

All "Red" Grange asks of any rabbit is that it get out of the way and let someone run who can run.

Ed Garvey, former star tackle at Notre Dame, is in New York trying to get on as a professional bowler.

Paul W. Eckley succeeds John J. Carney as coach of the Cornell varsity basketball squad. Eckley has been with the Cornell football, basketball and baseball squads since his graduation from Cornell in 1917.

You may think a baseball player gets it hot and heavy from the manager when he pulls a home run, but did you ever hear of a coach telling a slow thinker a few diverting words?

A dispatch from London says that the ancient Irish custom of hurling has been revived, and it might be followed by passing that when it comes to hurling, nobody can beat the Irish.

TEARING DOWN VS BUILDING

Building, fault finding and back biting will retard the growth of any town or city. There can never be any lasting prosperity where these factors are apparent in the minds of a considerable portion of the people. Consideration and energetic cooperation will materially advance the interests of any community. One of the mainstays of all great municipalities.

Natural advantages have much to do with community achievement, but natural advantages alone will not suffice. Cooperation is an essential element, but it never marches alone by itself with fault finding and back biting. The latter are destroyers, not builders; they tear down instead of building up.

Community advancement means personal security to the individual and this is best achieved through energetic and persistent cooperation.

Community advancement means personal security to the individual and this is best achieved through energetic and persistent cooperation.

Community advancement means personal security to the individual and this is best achieved through energetic and persistent cooperation.

Community advancement means personal security to the individual and this is best achieved through energetic and persistent cooperation.

An improving state of the public health. The production of our industries has been large and our harvests have been bountiful. We have been remarkably free from disaster and remarkably successful in all our pursuits which flourish during a state of domestic peace. An abundant prosperity has overwhelmed the land. We shall do well to accept them to the service of the righteous cause of the Giver of all good and perfect gifts. As the nation has prospered, let all the people show that they are worthy to prosper by dedicating America to the service of God and man.

Therefore J. Calvin Coolidge, President of the United States of America, hereby proclaims and fixes Thursday, the 27th day of November, as a day for national thanksgiving. I recommend that the people gather in their places of worship and at their family altars, and offer up their thanks for the goodness which has been shown to them in such a multitude of ways. Especially I urge them to supplicate the Throne of Grace that they may gather strength from their tribulations, that they may gain humility from their victories, that they may bear without complaining the burdens that shall be placed upon them, and that they may be increasingly worthy in all ways of the blessings that shall come to them.

In witness whereof, I have hereunto set my hand and caused to be affixed the great seal of the United States. Done at the City of Washington this 5th day of November, in the year of our Lord 1924 and of the Independence of the United States 149th.

CALVIN COOLIDGE
By the President,
CHARLES E. HUGHES,
Secretary of State.

Theatre Notes

Thursday & Friday—
Mary Alden in "Pleasure Mad"
Book and Stage Success

"Pleasure Mad" is an adaptation of the popular novel "The Joy of Content," a book that has enjoyed extraordinary success. Mrs. Alden has written a rare story of the real character portrayal and powerful dramatic presentation.

Also a comedy "Wall Street Blues" Prices 10 and 25 cents.

Saturday—
Jack Holt in "Making a Man"
None of your wishy-washy heroes for Jack Holt. He reveals in two solid fighting roles—and here's the best one he has ever had. He and his cast at the start, he learns through a fortune what hunger and love and sadness really are. Of course there's a girl—pretty Eva Novak—and a top supporting cast.

Our Gang Comedy—"Buckknockers." Price night.

Sunday & Monday—
Elinor Glyn's "Six Days" with Corine Griffith and Frank Mayo
Elinor Glyn, author of "Three Weeks" has written one of the most daring yet delightful stories. You will see her latest drama unfolded in this brilliant, thrilling screen romance.

Also a comedy "Simple Ladies." Matinee 5 and 15c. Nights 10 and 35 cents.

Tuesday—
Theodore Roberts in "Grumpy"
He was just a fish, profane old man with a terrible temper. Till a slick young fellow stole a 100,000 diamond from him and tried to steal his pretty granddaughter. Then Grumpy snarled and came to life.

"Into the Net"
Family Night.

Wednesday—
Home Talent Play.

Tickets for the Home Talent play to be given by the Epworth League Wednesday evening December 3rd in the Family theatre can be obtained at Piper's and Beecher's grocery stores.

EDUCATIONAL WEEK
OBSERVED IN H. S.
American Education Week was observed this year the week of November seventeenth to twenty-first.

On Monday Hon. J. Adam Bede spoke on the constitution telling us of its importance and greatness. In discussing a summary of the three departments of our government and their powers. Also, Mr. Bede, told of the last proposed amendment. As most of the pupils were not acquainted with it, he stated it, gave its meaning, discussed it and gave his personal view of it.

Tuesday, Patriotism Day, was observed by another talk. This was given by Mr. Michael Hurley. He also brought in the constitution in his message, and showed the views of foreigners toward it. By his talk he stands out as one of the greatest patriots.

The school enjoyed both talks immensely, and is very grateful to those men for giving all the opportunity to hear them.

Friday was visitor's day in our school, when the friends and parents came to visit one of the Nation's greatest institutions—THE SCHOOL.

GIRLS DECIDE FOR BASKET BALL TEAM
Are you going to play basket ball? That is the question now being broadcasted round the assembly. The pastor prompting the question is

that the girls are going to have a team of their own. This enterprise is expressed in the words of one of the girl athletes. "Girls, if you can't play, be present to make a success in any field of athletics. It is necessary to have interest in the athletes of your 'school'. That doesn't mean just school."

Now as every one knows in order to make a success in any field of athletics it is necessary to have interest in the athletes of your "school". That doesn't mean just school.

twelve or fifteen girls coming down to practice, for does it mean support by the girls alone. But it does mean good solid backing by every member of the High School, including students and faculty.

The girls are to be given two nights a week for practice Monday and Wednesday Miss Van Bunkle, one of the grade teachers is going to coach. All the girls, whether intending to play basket ball or not, are requested to attend this meeting for the future success of the team depends largely upon the spirit of alliance and cooperation of the girls. The attitude all the girls should show to

Milestones of Service

THIS rioting, pushing, fast-stepping age of ours, with all its complexity, concentration and achievements, never could have attained its present development had it not been for petroleum and the long list of useful products which stem from this one widely distributed raw material.

Today, when almost everything we do, from the felling of trees to the keeping of accounts, is accomplished with mechanical assistance, the refining of crude oil and the compounding of the numberless products derived from this base is one, if not the most essential of all industries.

From crude petroleum come the most readily procured, best and cheapest lubricating oils and greases, and from the same source we get gasoline, the most economical, most mobile and most compact source of power yet discovered.

In the rebuilding of this great industry the Standard Oil Company (Indiana) has been a pioneer; an advanced worker on the forefront of progress.

Today, skillful, highly trained men working with every facility which science, or their own ingenuity, can suggest, are striving to perfect still further the scores of useful products going to the public under the brands of the Standard Oil Company (Indiana).

Throughout the ten middle western states in which this company maintains distributive facilities, is an ever-growing organization working, building to insure every person in the territory getting standardized, superior quality petroleum products he needs, when and where he wants them.

And always the company is looking forward, building and training for the years to come.

Office boys of thirty years ago are Directors of the Standard Oil Company (Indiana) today—office boys of today are being schooled, trained and developed for places on the Board thirty years from now.

The Standard Oil Company (Indiana) is proud of the record it has made in keeping ahead of the times, and believes that each progressive step has been marked by a milestone of service to the thirty million people of the Middle West.

Local Happenings

J. Adam Dole was home to spend the week end with his family here. Paul Perkins was up from St. Paul the latter part of last week.

Miss Catherine Buford was down from Sundstone to spend the week end at the home of her parents here.

Miss Clara Kain, district registrar of deeds, was a week end visitor in Minneapolis.

Mrs. S. G. L. Roberts and son John returned home last Thursday from a week's visit in the Twin cities.

Able Klieker was up from Minneapolis to spend the week end with his folks here. He is working in a drug store in the Mill City.

Mrs. W. O. Torre's sister and husband, Minneapolis, visited at the Torre home, north of town, last week.

Miss Katherine Laxson of the Power company office has been quite ill recently which resulted from being vaccinated for smallpox.

Mrs. Gene Wilcox returned home from the city, the latter part of last week, where she had been for medical treatment.

Webb Hodge and Henry Hofer and son Dave returned home from their hunting trip last week. Webb brought a deer back with him.

Mrs. Glenn Coleman and son came up from Stillwater last Saturday and visited with her folks over the week end.

Dave Karaly and Otto Toman hunted on the flats east of town last week and have succeeded in bagging a deer.

L. F. Appby went to Rush City last Monday where he assisted in the judging of the Chicago county county show held there this week.

Miss Carlisle, L. F. Appby and Wm. Stuck returned from their hunting trip in the north woods, last week, and they all brought home venison.

Mrs. Swenson and sister, Mrs. Ed Lagonson, went to Minneapolis last Thursday. Mrs. Lagonson expected to have her tonsils removed while in the city.

Mr. and Mrs. Don Thompson accompanied by Mr. and Mrs. Fred Jordan and son Earl, drove to Bayport last Sunday where they spent the day visiting relatives.

Ray Point, who has been employed in The Pine Polka plant the past six months, left for his home in Slayton last Tuesday and expects to spend the winter there.

A baby daughter was born to Dr. and Mrs. Calahan of Polkama sanatorium at Abbott hospital, Minneapolis recently. We take this opportunity to extend congratulations.

Louis Yoshner and Mrs. Joe Hietz left for Minneapolis last Sunday where they will attend the Sokol school of instruction being held there this week.

The Pine City Motor Company has installed a rectifier for recharging automobile storage batteries and are now equipped to repair, rebuild and recharge batteries.

The fire department was called to the home of Mrs. Florence Gray yesterday morning. No damage was done, the fire resulting from the chimney burning out.

Wm. Schumaker, James Wadell Jr. and Chas. Beechel returned from their hunting trip last Friday. They were unsuccessful and did not get any venison.

Don't fail to see "Too Many Husbands" at the Methodist church on Wednesday evening of next week. This is a home town play given by the young folks of the Methodist church and is well worth seeing.

Wm. Voss came up from the Twin cities last Saturday to attend to some business matters. He has been suffering from a severe attack of influenza but was feeling a little better when here.

Frank Stuck drove up from Minneapolis to attend to some business matters the latter part of last week and spent the week end at the home of his brother, Wm. Stuck, living north of town.

Wm. Bantleon and Dad Scodell returned home from their hunting trip last week. Two Iowa hunters, who had been at their camp, accompanied them here on their way home. They all got their allotment of venison.

Wm. Challean, local radio enthusiast, told us the other day that he picked up Kalam, Radio, the other night about 11 p.m. He was using his father's Federal radio at the time.

The Pine City Motor Co. has delivered a new Liberty car to George Houtick and a new 4 door Ford Sedan to Henry Horn. O. V. Peterson, proprietor of the company, will be a business caller in the Twin cities the latter part of this week.

Albert Arndt of Salina, who had been in the Twin cities, met his family here and returned home with them last Sunday. Mrs. Arndt and the children drove down to meet him and for a visit with her father, Otto Becker, and sister Mrs. Jos. Tallon.

Earl Hofer has rented the Hytack store room adjoining the Main shoe shop, and will move his store in before December 6th. He has been located in the Tussometer building, east of the track, the past three or four years.

Mrs. Bert Cowan left for Tracy, near New Ulm, last Saturday where her husband is working. They expect to spend the winter there and will return here in the spring and have been living in the latter place near the fair grounds.

The children of the Presbyterian church gave a concert last Friday evening at the mission school in Tennessee where Miss Larson is teaching. The concert consisted of three acts with those taking part dressed in colonial style. A luncheon was served following the playlet.

Don't forget the big sale of fancy work and the big chicken pie supper to be given by the organization held all in the church on December 4th. This will be your chance to buy many beautiful Christmas presents. Everybody is invited to attend the sale and supper. Sale starts at 2 p.m. and the supper at 5:30 p.m.

Miss Grace Halstrom, who is taking a course in nurses' training at the Swedish hospital in Minneapolis, spent the week end with her sister, Miss Gladys Halstrom, teacher of the first grade. The Misses Halstroms and Miss Rita Vanfurik visited at the home of the former's grandmother in Rush City Sunday.

A number of friends held a surprise party on Miss Joie Shambaugh at the Shambaugh home last Sunday evening. Progressive fun was played the high score prizes being won by Richard Houtick and Mrs. Cornak, and the low score prizes by Albert Houtick and Mrs. Richard Houtick. Refreshments were served following the playing.

Rich Kowalke, who was hunting near Ely last week, returned home last Friday. He was accompanied by Amy Kowalke and Art Biedermann each of the boys bringing home a deer. Art and Amy who have been playing on the ball team at Ely the past summer returned to Ely this week, where they have a job for the winter and will play on the basket ball team there this season.

A. W. Piper has had the balcony in his store enlarged to double its former size. The office room at the rear of the balcony has also been enlarged and a new stairway put in.

A new plate glass front and show window was recently installed and with the additional room for display furniture in the balcony, makes a fine improvement to the interior of the store.

Mr. and Mrs. Jos. Hudachek returned to their home in Owen, Wis., on Wednesday of last week after a two week's visit at the home of their daughter here. Mrs. Albert Houtick and Mrs. Houtick took them home in the car and on the way they visited at the home of their daughter, Mrs. Jos. Karky, in Eau Claire. Mrs. Houtick made the trip of 200 miles in two days, spending the night in Eau Claire.

"Kinky" and his 6 cylinder 4 will play for the Rotary Thanksgiving dance in the armory on Saturday evening of this week. Orchestra names are getting to be just as jazzy as some of the jazz music these days. On making inquiry as to who Kinky was we discovered that he is represented in the person of A. E. Edstrom of Sundstone and plays piano in his organization of music makers.

Other members of this musical troupe are Harry Larson, the well known local trumpeter, George Freeman violinist, Glenn Anderson of Ogilvie trombone and his sister, Miss Norma Anderson is the drummer. They are gaining quite a reputation as an excellent dance orchestra and besides the dance at the armory Saturday night they play at Rock Creek on Friday night and Hinkley on Friday night.

The ladies of the G. A. R. will meet at the home of Mrs. A. V. Norstrom on Tuesday afternoon of next week. The annual election of officers will be held and all members are urged to be present.

SCHOOL NOTES
Gladys Buford, Katie

The third graders have been practicing good manners the past few days.

Frank Livingston was enrolled in the fourth grade Thursday.

The honor rolls in the grades for the past month are as follows:

5th Grade
Dorine Staples
Eleanor Henda
Teddy Buschmeyer
Loretta Kanesh

6th Grade
Wilhelmina Sauser
Roy Carlson
Irene Stephens
Florence Rich
Fred Hollar

7th Grade
Helen Harvey
Ada Larson
Bill McKusick
George and Alma Livingston were enrolled in the Sixth grade Thursday.

The literary society of the D 5th grade held a Thanksgiving program Wednesday afternoon.

At a meeting of the F. S. girls held Monday night it was decided to have a girls basketball team this year. There were over 25 girls present at the meeting.

Mrs. Houtick made the trip of 200 miles in two days, spending the night in Eau Claire.

"Kinky" and his 6 cylinder 4 will play for the Rotary Thanksgiving dance in the armory on Saturday evening of this week. Orchestra names are getting to be just as jazzy as some of the jazz music these days. On making inquiry as to who Kinky was we discovered that he is represented in the person of A. E. Edstrom of Sundstone and plays piano in his organization of music makers.

Other members of this musical troupe are Harry Larson, the well known local trumpeter, George Freeman violinist, Glenn Anderson of Ogilvie trombone and his sister, Miss Norma Anderson is the drummer. They are gaining quite a reputation as an excellent dance orchestra and besides the dance at the armory Saturday night they play at Rock Creek on Friday night and Hinkley on Friday night.

The ladies of the G. A. R. will meet at the home of Mrs. A. V. Norstrom on Tuesday afternoon of next week. The annual election of officers will be held and all members are urged to be present.

SCHOOL NOTES
Gladys Buford, Katie

The third graders have been practicing good manners the past few days.

Frank Livingston was enrolled in the fourth grade Thursday.

The honor rolls in the grades for the past month are as follows:

5th Grade
Dorine Staples
Eleanor Henda
Teddy Buschmeyer
Loretta Kanesh

6th Grade
Wilhelmina Sauser
Roy Carlson
Irene Stephens
Florence Rich
Fred Hollar

7th Grade
Helen Harvey
Ada Larson
Bill McKusick
George and Alma Livingston were enrolled in the Sixth grade Thursday.

The literary society of the D 5th grade held a Thanksgiving program Wednesday afternoon.

At a meeting of the F. S. girls held Monday night it was decided to have a girls basketball team this year. There were over 25 girls present at the meeting.

STORAGE BATTERIES

We are now equipped to give complete service on Storage Batteries with a new stock of

Ford Batteries

We are installing a Rectifier for recharging Batteries, and are equipped to make

...Battery Repairs...

PINE CITY MOTOR CO.

WE THANK YOU

This is the season of the year when all good Americans extend thanks for the many things we all have to be Thankful for.

The Pine City Mercantile Company takes this opportunity to thank all our patrons who have favored us with their patronage during the past year.

It is our aim at all times to give the best service possible; to handle only quality merchandise, and we ask only a fair profit for what we have to sell.

Again we thank you for your past patronage and hope that we may continue to serve you during the year to come

PINE CITY, MINN.

The Store of Personal Service

Buy Your Hardware at the Hardware Store

The New Majestic Range

On your choice of a range depends to a great extent the comfort of the household for many years. Care in selecting the one that gives the best service will be repaid with satisfaction on every day of those many years. Consider well the cooking and wearing qualities, the fuel economy and appearance of the range you buy. Remember that it is a lasting purchase - you are buying for a long time.

The Great Majestic is a range with a reputation that generations of users have given it. Your neighbors have tested its qualities and will you that all claims for it are true.

Today there more Majestics giving superior service in the kitchens of America than any other Range. Easy time payments if desired.

DEPARTMENT DEVOTED TO SCIENTIFIC FARMING

WATER RATIONS FOR BEEF COWS

Roughages Which Furnish Protein and Mineral Matter Make the Best Feed.

The cost of wintering the beef cow may make her a practical question of an asset unless careful economic methods of winter feeding and management are practiced. During the pasture season the problem is an easy one, but when winter comes the cattle feeder must begin to do some figuring.

Yearly feed costs are considerably lower if beef cows are bred to drop their calves in the spring, thus being dry during the winter season. As J. H. Vaughan of the animal husbandry division, University of Minnesota, says, "Less winter roughage is required for dry cows than for cows nursing calves."

The winter ration of the beef cow should be made up largely or entirely of roughages in order to cheapen it, but these roughages should furnish sufficient protein and mineral matter to maintain the cow in thrifty condition and enable her to drop a strong calf and suckle it properly. Some roughages such as alfalfa, clover, and soybean hay, are best of all roughages for wintering beef cows because they furnish more protein and mineral matter than other roughages. Corn silage is cheap, succulent, very palatable, and produces a heavy winter condition in cattle. Corn fodder, corn stover, and cane fodder, well cured, are other excellent roughages, especially for the early winter. They are not so well related in the spring. Straws furnish good supplementary roughage.

Where all of these roughages are available, breeding cattle can be fed limited quantities of silage and some hay or clover hay and allowed all the corn stover and straw they will eat. Fifteen to 20 pounds of silage and 3 to 5 pounds of hay may be fed daily and the other roughages may be varied from day to day to provide some variety in the ration. As Mr. Vaughan points out that feeding trials at three state experiment stations have shown that beef feeding cows may be wintered successfully on any one of the following rations:

Ration No. 1—15 pounds corn silage, 4 pounds alfalfa or clover hay and 20 pounds straw (about 10 pounds). These cows gained from 1 to 1.25 pounds per head daily.

Ration No. 2—10 pounds shock corn, 4 pounds alfalfa or clover hay and 20 pounds straw (about 10 pounds). This ration was satisfactory, though not so good as No. 1.

Ration No. 3—50 pounds corn silage, 1 pound cottonseed or linseed meal, 2 pounds alfalfa or clover hay and 20 pounds straw (about 10 pounds). These cows gained 1.5 to 2.0 pounds per head daily. When silage is high in cost, part of the silage should be replaced with cheaper roughages such as stover and straw.

Ration No. 4—30 pounds corn silage, 1 pound cottonseed or linseed meal, 20 pounds alfalfa or clover hay and 20 pounds straw (about 10 pounds). This proved a good ration.

Ration No. 5—47 pounds corn silage, 1 pound cottonseed or linseed meal, 20 pounds alfalfa or clover hay and 20 pounds straw (about 10 pounds). These cows did very well in fact better than necessary, and the cost of wintering them was a little high.

Ration No. 6—50 pounds corn stover, 1 pound cottonseed or linseed meal, 2 pounds alfalfa or clover hay and 20 pounds straw (about 10 pounds). This proved a good ration.

Ration No. 7—47 pounds corn silage, 1 pound cottonseed or linseed meal, 20 pounds alfalfa or clover hay and 20 pounds straw (about 10 pounds). These cows did very well in fact better than necessary, and the cost of wintering them was a little high.

SHEEP RAISING IN MINNESOTA

Maintaining a flock of from 25 to 100 breeding ewes as part of the average farm is a profitable proposition or half-acre farm in the best sheep production plan for the average middle west farmer, says Phil A. Anderson of the division of animal husbandry, University of Minnesota, in a new bulletin on "Sheep Raising in Minnesota."

A small flock for the average farm will fit in best with average farm conditions, says Mr. Anderson. The beginner will be safest in starting with grade ewes. Management, care, and feeding of the small farm flock are not difficult or burdensome and afford an attractive enterprise that might be turned over to the boy as a means of giving him a share in the management of the affairs of the farm.

Mr. Anderson's bulletin treats of the selection of breeding ewes, of summer grazing, sheep managing and handling, fattening sheep and lambs, marketing, etc. Copies may be obtained without cost on request to the Division of Publications, University Farm, St. Paul.

Potatoes are cheap and plentiful this year, and thoughtful housewives will use them in every possible way. The improved acre must yield not only corn but civilization, not only potatoes but culture, not only wheat but effective manhood.—Kanyon J. Butterfield.

When one buys honey on the market, it is little chance that it is adulterated, as the federal food authorities have found no cases of adulterated or mixed honey on the market since August 1920.

GALPIN ON U PROGRAM

Farm Folks Will Also Have Chance to Hear McKelvie, Waters, and Glover.

C. J. Galpin of the farm population and rural life section of the United States Department of Agriculture will be one of the principal speakers during Farmers' and Homeowners' Week Short Course to be held at University Farm December 29 to January 2. Several other men who have national reputations in the field of agriculture and education have also been engaged to give addresses, among them Samuel R. McKelvie, farm paper editor and twice governor of Nebraska; J. Waters, editor of the farm edition of the Kansas City Star

The dairyman who has his cows freshen in the fall will have a good winter occupation. He will be employed at that time of the year when milk is high and when he has little else to do. His cows will be dry in the hot summer months when he will have to devote a great share of his time to irrigating, caring for and harvesting his crop. In fact this system works admirably.

Now is the time to breed the cow for winter occupation. The dairyman who has his cows freshen in the fall will have a good winter occupation. Practical Opinions on Agriculture

COVERING ALL PHASES OF NORTHWESTERN FARM LIFE

Quality Apples Now in Demand

With Growth of Consumption Buying Public Discriminates in Selection.

A survey of American nursery lists shows that there are more than 200 kinds of apples grown in this country and offered for sale as trees, but not more than 20 to 25 of real commercial importance. Nitrogen is the most important of the other two constituents in a factory-mixed fertilizer, they say. Fertilizer economy necessitates using the smallest steps in nitrogen in the air. Clover and alfalfa are more promising nitrogen factories than the usual crops. "Give them a chance," the college says, "to work effectively on every farm."

Sweet clover and alfalfa have been found under favorable conditions to make available 100 pounds to the acre additional nitrogen for the following year. This is when the nitrogen would only a single year, the crop removed, and the stubble turned under. If the clover crop were plowed under in green manure, even more nitrogen would be furnished for the following crop. Red and milk clover have made particularly good records in experiments at the state college.

A good legume hay crop and 100 pounds of available nitrogen in each acre of soil lead to permanent and profitable farming. It would require six tons of the ordinary mixed hay to furnish the same amount of ammonia, to furnish an equal amount of nitrogen. If purchased in the form of fertilizer, the nitrogen would cost at present prices from \$35 to \$40. "By all means," the college says, "plant the clover now. It will give you a chance through more legumes on the farm before corn replanting of the best fertilizer bill."

Meatless Heads List. A study of the apples of New York in regard to quality shows that the second. Following in order of excellence come Grimm's Golden, Stayman, Winesap, Jonathan, Wealthy, York, Baldwin, Duchess and Ben Davis. The last named is one of the commonest and most heavily in public favor due to its poor eating qualities. With the improvement and more careful picking and shipping, the natural feeding quality is no such an improvement. The question of quality can be given greater consideration. Many of the older and extensively grown apples are now being replaced as eating apples by newer varieties, which can now be kept and handled commercially as easily as the older, better keeping sorts.

Cooking and Eating. With the development of a standard apples will be used more largely for cooking purposes while the better quality apples will be exclusively for eating as raw fruit. Many people brought up on old-time foods, but reliable authorities have doubted their consumption of this kind and strength giving fruit through the use of the standard varieties made possible by the marvels of cold storage and the attractive and handsome appearance of many of the fruit markets, where a wide variety of apples is on sale in contrast to the limited assortment of former years.

Use Grain Mixture That Adds Weight to Calves.

The dairy division of the University farm, Minnesota, has been conducting some experimental work whereby the dairyman who sells whole milk may find a solution for his feeding problems. The results of the experiments indicate that calves can be raised successfully on a mixture of four parts ground corn, one part linseed meal, one part bran, and a legume roughage. This mixture was raised on from their milk diet at the early age of 50 to 60 days.

The hay and grain should be placed before the calves when they are very young, the object being to get them started on dry feed as soon as possible and to give them all the feed of the kind they will clean up. Best results are obtained by feeding the hay and grain in about equal quantities.

One of the calves in these experiments was weaned at the age of 60 days and thereafter fed grain mixture until the calves were 100 days. At the end of the trial this calf weighed 377 pounds and was 1041 per cent normal. Another calf was weaned at the age of 60 days and raised on 40 pounds of milk and a grain mixture and alfalfa hay. At 158 days old it weighed 355 pounds and was 1023 per cent normal.—Minnesota College of Agriculture.

Richest Milk Is Always Last Drawn From Udder.

The first milk given by a cow generally contains 10 per cent of fat, the last milk drawn from the udder may test as high as 30 per cent. Just before the milk is drawn the udder is demineralized and the supposition that the cream rises to the top of the udder as it does after the milk has been drawn is just as logical as any other reason that might be given.

It is a fact, however, that the richest milk is always the last drawn from the udder in milking and for this reason a thorough job of milking should be done and the cows milked dry.

Dairying Facts

Calves need regular feeding if they are to make regular gains. An observer states that great clouds of the guinea fow have preyed on the grasshoppers in the state birds immediately after the hay has been taken off. The whole flock usually moves from one place to another and the guinea fow have worked for a day or two in a field, depending on its size few grasshoppers are in evidence.

Pullets Confined Will Need Spring Conditions.

The pullets that are confined in the house must have spring conditions in order to give a spring production. This means they should be kept on scratch grain, dry mash, green feed, oyster shell, grit, and milk or water. A good rule is to give the birds a mixture of equal parts of corn, wheat and oats, and to 80 pounds of this mixture add 20 pounds of high-moisture alfalfa. This mixture is dry in a hopper available at all times. Scratch grain can be furnished either in the form of a mixture of 10 parts of 14 pounds per 100 birds. A mixture of equal parts of corn, wheat, kaffir, and alfalfa fed in this combination makes a good scratch feed.

Cost of Fertilizer Easily Reduced

Sweet Clover and Alfalfa Have Made Fine Records.

"Give the air a chance to help pay the fertilizer bill." This is the suggestion of the soil and crop men of the New York State College of Agriculture at Ithaca to farmers who complain of high fertilizer costs. Nitrogen is the most expensive part of the fertilizer. The other two constituents in a factory-mixed fertilizer, they say. Fertilizer economy necessitates using the smallest steps in nitrogen in the air. Clover and alfalfa are more promising nitrogen factories than the usual crops. "Give them a chance," the college says, "to work effectively on every farm."

It would require six tons of the ordinary mixed hay to furnish the same amount of ammonia, to furnish an equal amount of nitrogen. If purchased in the form of fertilizer, the nitrogen would cost at present prices from \$35 to \$40. "By all means," the college says, "plant the clover now. It will give you a chance through more legumes on the farm before corn replanting of the best fertilizer bill."

Meatless Heads List. A study of the apples of New York in regard to quality shows that the second. Following in order of excellence come Grimm's Golden, Stayman, Winesap, Jonathan, Wealthy, York, Baldwin, Duchess and Ben Davis. The last named is one of the commonest and most heavily in public favor due to its poor eating qualities. With the improvement and more careful picking and shipping, the natural feeding quality is no such an improvement. The question of quality can be given greater consideration. Many of the older and extensively grown apples are now being replaced as eating apples by newer varieties, which can now be kept and handled commercially as easily as the older, better keeping sorts.

Cooking and Eating. With the development of a standard apples will be used more largely for cooking purposes while the better quality apples will be exclusively for eating as raw fruit. Many people brought up on old-time foods, but reliable authorities have doubted their consumption of this kind and strength giving fruit through the use of the standard varieties made possible by the marvels of cold storage and the attractive and handsome appearance of many of the fruit markets, where a wide variety of apples is on sale in contrast to the limited assortment of former years.

Use Grain Mixture That Adds Weight to Calves.

The dairy division of the University farm, Minnesota, has been conducting some experimental work whereby the dairyman who sells whole milk may find a solution for his feeding problems. The results of the experiments indicate that calves can be raised successfully on a mixture of four parts ground corn, one part linseed meal, one part bran, and a legume roughage. This mixture was raised on from their milk diet at the early age of 50 to 60 days.

The hay and grain should be placed before the calves when they are very young, the object being to get them started on dry feed as soon as possible and to give them all the feed of the kind they will clean up. Best results are obtained by feeding the hay and grain in about equal quantities.

One of the calves in these experiments was weaned at the age of 60 days and thereafter fed grain mixture until the calves were 100 days. At the end of the trial this calf weighed 377 pounds and was 1041 per cent normal. Another calf was weaned at the age of 60 days and raised on 40 pounds of milk and a grain mixture and alfalfa hay. At 158 days old it weighed 355 pounds and was 1023 per cent normal.—Minnesota College of Agriculture.

Richest Milk Is Always Last Drawn From Udder.

The first milk given by a cow generally contains 10 per cent of fat, the last milk drawn from the udder may test as high as 30 per cent. Just before the milk is drawn the udder is demineralized and the supposition that the cream rises to the top of the udder as it does after the milk has been drawn is just as logical as any other reason that might be given.

It is a fact, however, that the richest milk is always the last drawn from the udder in milking and for this reason a thorough job of milking should be done and the cows milked dry.

Dairying Facts

Calves need regular feeding if they are to make regular gains. An observer states that great clouds of the guinea fow have preyed on the grasshoppers in the state birds immediately after the hay has been taken off. The whole flock usually moves from one place to another and the guinea fow have worked for a day or two in a field, depending on its size few grasshoppers are in evidence.

Pullets Confined Will Need Spring Conditions.

The pullets that are confined in the house must have spring conditions in order to give a spring production. This means they should be kept on scratch grain, dry mash, green feed, oyster shell, grit, and milk or water. A good rule is to give the birds a mixture of equal parts of corn, wheat and oats, and to 80 pounds of this mixture add 20 pounds of high-moisture alfalfa. This mixture is dry in a hopper available at all times. Scratch grain can be furnished either in the form of a mixture of 10 parts of 14 pounds per 100 birds. A mixture of equal parts of corn, wheat, kaffir, and alfalfa fed in this combination makes a good scratch feed.

Head and Adjuncts of Eggs Heavy Producers of Eggs

One of the best indications in picking light egg fow is the type of head. The head of the heavy producer is fine. Care should be taken not to pick birds with heads that are too heavy. The former expresses a weak vitality and the latter coarseness or beefiness. This is the mixture of the head, vitality, and egg production run hand in hand. The eye should be prominent, large, well colored and well set. The eye should be placed in the rear of the socket with some of the eyeball showing in the fore part of the eye. The head should be well balanced, being moderately broad and deep, giving the bird a clean-cut, wide-awake appearance. The extremely deep head, the head that is too narrow and the long, thin, narrow, pointed head of the low vitality bird are all to be avoided. The head should be well developed and bright red in color. The head should be covered with feathers, moderately short and bleached. The low producing hen generally shows a depressed eye with overhanging feathers, and the head set at the back of the eye. An extremely long, sharp beak is usually possessed by the low producer.—University of Illinois.

Contagious Roup Easily Spread Among Chickens. Contagious roup is very easily spread from one bird to another by contact through the feed, water and litter. Roup is easily controlled by proper management and housing. Damp, overcrowded, drafty quarters are conducive to its spread. Only valuable birds should receive individual treatment in a dry, well-ventilated place and give plenty of fresh air and feed. Every morning the birds should be all the chicken matter from the eyes and nostrils and let its head in a solution of bicarbonate of mercury (1 to 3,000). This is an excellent remedy for the disease. Hold the bird firmly and immerse the head until the eyes are covered, keeping it there a few seconds, or until it struggles.
