The discipline in this school is very hard. The children should be watched very closely both on the school ground and in school as to their conduct. Talks ^{on} ~~and~~ morals and manners should be given frequently.

Recherd was not so good at first, but during the last two months he improved so much both in his work and behavior that it was a pleasure to teach him.

How each teacher had taken interest in each child and understood Jerry is trying to be good and do his work, but sometimes he guesses at the words while reading. In fact this whole class have had that habit more or less. He has difficulty in expressing himself.

Dorothy was very bashful at first, but later did good work and learned English language rapidly. She is promoted to "A" first Class "A" and I think she can finish the first grade in 3 or 4 months.

Albin is only five years old, didn't make him do any regular work as he just entered in the spring. He can write his first name and copy some words and read a few words. He had some phonics too. He ought to be started as a beginner. Edmund just attended a few days in spring but he couldn't make forty days any more (needed to attend) didn't enroll him in the register.

Due to ~~the~~ no phonics training before this year.

Some children only attend 27 - first grade - Some children would start in spring learn to write their first name, some phonics didn't make 46 days required - Some 12½ days

Some teachers had classification of grade - "A" "B" & "C"

Question - Oct. 1 - 1923. Lila Berry.

Oct 2 1923 Jennie Meyers.

The discipline in this school is very hard. The children should be watched very closely both on the school ground & in school as to their conduct

Talks on morals and manners should be given frequently. Some of children had to learn the English language rapidly accomplished to learn the language. Could finish the first grade in 3 or 4 months.

George is slow, may have to keep him separate from the rest. His attendance is irregular.

Ernest ^{4th grade} is ambitious and work very hard, if he keeps up at same rate as he did this year, he could ~~do~~ fifth grade work the later part of the year. - 6th grade he was promoted to eight grade. skip a grade.

Seventh grade. Each child in the group works a different pace and it is difficult to have them together.
