

Brughman Gains 23 lbs

Cedar Rapids Woman Feels Like a New Person Since Taking Tanlac

"Besides getting relief from awful suffering I have actually gained twenty-three pounds in weight and you may know by that what I think of Tanlac," said Mrs. Sadie Brughman, residing at 1252 F street, East Cedar Rapids, Iowa, in an interview, recently. Mrs. Brughman is the wife of Harry C. Brughman, a valued employee of the Quaker Oats Company. Her statement while, indeed, remarkable, is by no means unusual as many thousands throughout the United States and Canada have testified to having used the Master Medicine with the same wonderful results.

"It has been something less than three months now," continued Mrs. Brughman, "since I began taking Tanlac and if anyone could feel like a new person I do. I had been suffering from stomach trouble, rheumatism and extreme nervousness for five years. My liver was also in a very bad condition as my skin was as yellow as a pumpkin. My food would sour on my stomach causing gas, pains and spells of palpitation of the heart when it just seemed like my breath would stop. It was right on the stomach that I began to feel better. My lower limbs ached so with rheumatism that I could hardly stand. I could neither rest myself or let anyone else in the house rest. I got so nervous and miserable. These troubles had reduced my weight until I was almost a living skeleton and was so run down and felt so badly I could not attend to my household affairs.

"I had used everything in the way of medicines and had been told a number of times that an operation was my only hope of recovery, but I have gotten rid of it all by taking a few bottles of Tanlac. My husband had been trying to get me to try Tanlac for some time, but I refused to do so because I thought it was like all other things I had taken and would do me no good. But I kept on suffering and getting worse until one day he brought home a bottle and insisted so that I began taking it. Well, it wasn't long until I found Tanlac was altogether different from any other medicine I had ever used, for soon after starting on my second bottle there was a wonderful change in my feelings. I am now eating just anything I want and am never troubled the least. Bit with gas on my stomach, palpitation of the heart or any other uncomfortable feeling afterwards. My complexion has cleared up until it is like new. The rheumatic pain has disappeared from my limbs and my nerves have quieted down until I can sleep just like a baby. I am really and truly feeling like a new person and owe it all to Tanlac."

Tanlac is sold in Pine City by E. J. Prochaska.

Nick Thiry moved into his new home last Wednesday night back of the Catholic church which he purchased some time ago having retired from farming.

Wants County Live Stock Assn. A subscriber of The Pine Packer writes to us, referring to our suggestion for a county sheep feeders' association and says that the county needs a general live stock breeders' association—for cattle, sheep, hogs and poultry—and that it could very well have in different committees devoting their special attention to these different lines of the live stock industry and composed of men who especially wish to work along each line. He says that such an organization would be of as much benefit to anyone as these lines as would a separate organization—and vice because it would have the membership, influence and spur of men in every branch of the industry.

He is right. A general county live stock breeders' association is necessary—more so than a sheep or cattle or poultry association because it will have a larger field. And it will be of more benefit to each line because it will carry greater weight and wield more influence. The opposition can stand five small men's efforts to break it, but if these men can combine their efforts they will be able to accomplish their desires.

Farm Bureau Activities, Jan. 1-10. The Farm Bureau work to date this year has covered an immense field, reaching nearly every community in the county as indicated by the following taken from the office reports:

At the beginning of the year the Farm Bureau directors decided on a program that would emphasize the improvement of all conditions affecting live stock and potatoes—our main sources of farm income—and to cooperate with all existing organizations in the county to stimulate and lead improvement along these lines. Some idea concerning the work may be gained from the following brief sketch of the records in the Farm Bureau offices:

Individual office calls for information 477; telephone calls 87; letters written 1240; circular letters on livestock and potatoes 4800; 6 on potato improvement have been called 178 times (1) 139 different farms traveling to date 2000 miles, and has held 69 different meetings with a total attendance of 5377.

At these meetings and conferences the subjects of rural organization, marketing problems, livestock and potato improvement have received special emphasis. In addition to public meetings and personal work the Farm Bureau has reached over 80 per cent of the population through 56 different articles published in cooperation with the county papers and the Farm Bureau news.

Work has been divided as follows: 13 articles on livestock improvement, 12 on marketing problems, 14 on general livestock problems, 15 on potato improvement, 10 on marketing problems, 28 on cooperation and marketing, 15 on farm plans and management, and 43 on general agriculture.

Approximate time has been distributed as follows: Office work 136 1-2 days, field work 96 1-2 days and 7 days leave of absence. This accounts for more than the actual working days from January 1 to October 4. In addition to this work the above meetings were night meetings.

Address Getting Into Sheep Now. Dr. Warwick, the veterinarian who left Pine City and Hinckley to return to Iowa to practice his profession, recently told The Pine Packer that this fall, with the decline in the price of sheep owing to drought in the western range region, looks to him like the best time to get

PACKED TO THE GUARDS

Chengwatana Town News
Mr. and Mrs. Jack Miller arrived from St. Paul, yesterday, for an indefinite visit at the home of her parents, the Anton Drimmels.

On last evening, Oct. 15, a number of friends and neighbors gathered at the home of Mr. and Mrs. Thomas Huettl and family and gave them a pleasant surprise in a farewell party. Refreshments were served to about 75 people, young and old spending a delightful evening. All regret to see their neighbors leave them as they are retiring from farming but are pleased to know they decided to make their future home at Pine City where they will always welcome their friends. A beautiful silver berry-noon was presented to them as a remembrance of that last evening spent amongst their friends. They have the best wishes of all for good luck in their new home.

The Misses Harriet, Sadie and Agatha Huettl came down from Minneapolis to visit old friends and help their parents move into the new home which they purchased in Pine City.

Mr. and Mrs. Herbert Schultz from St. Paul are enjoying a visit at the home of their parents, Mr. and Mrs. Frank Drimmel.

Mr. and Mrs. Emil Brox will move into their new home immediately after the departure of Mr. Huettl and family, having bought the latter place. All the neighbors give them a hearty welcome.

Mr. and Mrs. John Tachery intend to leave on Saturday to visit relatives and friends at St. Paul, where they intend to go to New Ulm and Mantova—the latter being their old home place. They will be gone about three weeks.

The Wonders of America

By T. T. MAXEY

THE WASHINGTON MONUMENT.

This gigantic shaft, unique, imposing, dignified, yet simple to an extreme, is a most fitting and suitable memorial to the Father of Our Country. It occupies a site near the River Potomac, selected by the man whom it honors, in 1783.

The construction was laid on July 4, 1848, and the last stone set on December 6, 1884. It was dedicated on February 21, 1885. The proportions of this mammoth obelisk are colossal. The foundation goes down 30 feet and is 100 feet square. The walls are 12 feet thick at the base, 1 1/2 feet thick at the top and taper through to the top. The cap stone weighs 3,200 pounds. It is 555 feet high and is said to be the highest monument in the world. The white marble used in its construction came from the quarries of Maryland. It is estimated that there is more stone in the interior to house an army of 12,000 men. The shaft rises to the top contains 217,000 steps. An elevator makes the top easy to reach, so that all visitors may see and enjoy the magnificent view of the national capital, its historic surroundings and the romantically beautiful river the man it honors loved so well, which is visible in the clear-day view from the top. On a clear day, a prominent peak, Sugar Loaf, in the Blue Ridge mountains, is fifty miles or more to the northwest, is plainly visible.

THE BIG TREES IN CALIFORNIA.

The biggest trees in the world are found in California. They are of two varieties, both a species of evergreen sequoia (in honor of a Cherokee Indian) redwood and sequoia gigantea. The former grows quite extensively in certain sections on the western slope of the coast range; the latter only on the western slope of the Sierra Nevada mountains, at an elevation of about one mile above sea level. The former is said to reproduce itself from the stump, the other from little seeds which grow in pods.

The best known and most frequently visited grove of the redwood sequoias is near the little city of Santa Cruz, on the coast some seventy miles from San Francisco. Some of these trees are more than 250 feet high and 20 feet in diameter at the base. The largest, however, is the real thing in big trees. Some are almost 400 feet high and 90 feet around at the base. The bark is of a reddish brown color, very thick and fluted up down. The branches are very large, bearing 50 feet or more from the ground.

The secret of their age is still one of the unexplained problems of the universe. Estimates range all the way from 4,000 to 10,000 years. But suppose it is only the former. Think of living a million and a half of days. Think of the changes which have been wrought in that time! That they are the tallest, sturdiest and oldest living things in all this big world of ours is an undisputed fact.

THE LIBERTY BELL.

This bell, the most treasured relic in the nation, was cast by a London bell founder, brought to America in 1752 and hung in the dome of the old state house in Philadelphia. It weighs about 2,000 pounds.

It was cracked by a stroke of the clapper while being tested and repaired in Philadelphia in 1793. Again it proved defective and again it was recast. The words "Proclaim Liberty Throughout All the Land Unto All the Inhabitants Thereof" are inscribed upon it.

Before the British occupied Philadelphia it was taken down and hid in the Delaware river, being removed back and returned to its former position.

It recalled the prophecy of its inscription when in 1776 it rang out the glad tidings that the 13 states had ratified the Declaration of Independence.

For fifty years or more it rang in the celebration of every national anniversary. On July 4, 1905, while ringing for the Fourth of July, it cracked again and has been ever since.

It is now in the custody of the War Department and is being repaired in the shops of the War Department.

THE NEW YORK STATE BARGE CANAL.

It opens the western country and provides a means of communication for the products of the West to the seaboard and the seaboard to the West. It is a most important and necessary work. It has been a long time in the making and will be a great benefit to the West.

The canal is 160 miles long and will be a great benefit to the West. It will be a great benefit to the West.

SIGNED FISHING TREATY FOR CANADA

Fishing rights in waters between the United States and Canada are safeguarded for the people of both nations by a treaty. These are three who signed the latest fish treaty in Washington on behalf of the British empire. They are, from left to right, Robert Lindley, counselor to the British ambassador; Sir Douglas Dixon, chief justice of the province of New Brunswick; and W. A. Ford, superintendent of Canadian fisheries.

THE PROFITERS' WIFE.

The wife of a profiteer, she had the office work, "come up at every turn" "blasting with diamonds, the wife of a war profiteer uttered a faithful oath during the other day and did not on a pair of slippers.

"I like these slippers very well," she said. "I think the Lotta XV heels are just what I need. Suppose you give me a pair of Lotta XV heels. A Lotta XV would be just what I need. To the shoes, she said, she was willing to give up her profits."

BUNGALOWS ARE POPULAR NOW

California Type of Five-Room Structure Described.

MAKES A COMFORTABLE HOME

Design Provides a Convenient Arrangement of Comfortable Rooms—is Attractive and Inexpensive to Build.

By WM. A. RADFORD.

Mr. William A. Radford will answer questions and give advice FREE OF CHARGE on all subjects pertaining to the subject of building. He writes for this paper. On account of the wide area of his paper, authors of the "Bungalow" are in his hands, without doubt, the most complete and up-to-date information on the subject of building a bungalow. He will answer all inquiries in his own words, and only endorses two-cent stamps for reply.

There are two good reasons why bungalows are popular. One is the air of coziness that the exterior gives, and the other is that the rooms all are on one floor, simplifying the work of the housekeeper. Bungalows are the proportion of the homes built following this type of architecture.

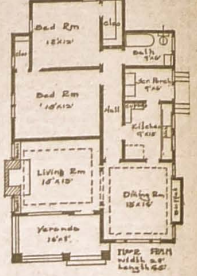

The bungalow here pictured is a good example of an inexpensive home. The walls are added to the height of the windows, and covered with "shakes," or shingles above. Both are painted green. The porch posts and the chimneys are constructed of rough hewn, and the roof is of a gray roofing composition. The attractive porch is floored with concrete. The dimensions of the house are 20 by 45 feet, just the right size for a small lot. The five rooms are the living and dining rooms, kitchen and two bedrooms; and bath room, of course. Additional features are the front porch, 16 by 8 feet, and a screened-in rear porch, 5 by 6 feet.

The ceilings of the living and dining rooms are beamed, and the walls of the latter are finished with a panel wainscot and paneled rail. The woodwork of the two rooms is of pine, stained in a dark mission oak color. These rooms have oak floors. The woodwork in the other rooms is of pine, painted white, and the doors are white.

The living room has a wide, open fireplace, and there is a built-in buffet in the dining room. Bookcases are built-in on either side of the fireplace.

opportunities that pass by the renter; likewise his family will be accepted in social circles that are denied to those who do not own their own homes. But best of all, is the satisfaction that comes from knowing that the place in which you live is yours, to fix up as you see fit.

Home building now is on the boom. Bents are high and houses scarce. The money that is paid for rent will pay for a home. With a small amount of loan assistance, or by holding and cash, the local banker or real estate man will provide the family with the sort of home he wants; built according to his ideas of what a home should be. Building and owning a home is good business.

to his ideas of what a home should be. Building and owning a home is good business.

No Monotony. "I reckon you had a right lively time in Kansas City?" Insisted an acquaintance.

"Tollable," replied Gabe Gonnell of Grade, "but nothing like what I probably would have had if I wasn't content with my feet. You see, if you meet a respectable looking man after a o'clock in the afternoon, anywhere the least bit off to one side, he's a hold-up and a don't look respectable, he's a plain clothes policeman, and he'll pound you because he thinks you're a hold-up. So I was practically on the keen jump all the time I was there, dodging one or the other."—Kansas City Star.

Air Waves. That aircraft actually narrate a kind of invisible story is revealed by a series of motion pictures, the first of their kind ever taken, that show the air in motion against the wings of an airplane. Three miles of film were used in making the photographs, and

they reveal the plane, instead of being continuously upheld by the air, traveling from crest to crest of a series of waves; in more technical words, the element of perfection which produces the lifting power of an airplane is not constant, but is excited in intermittent moving air waves, not unlike the waves of the ocean. These air waves have their period of formation, followed by a collapse, which, again like the sea, has its undertow; and, during more than a quarter of the time in flight, the air flow created by the air screws has no lifting power on the wings. To take the pictures required a special camera devised by the invention section of the United States army.

Trance Treatment. Dr. Thomas Pomeroy, a New York physician, is quite an unusual type of doctor, with methods peculiar to himself. When a patient presents him self, Doctor Pomeroy, instead of subjecting him to the conventional examination, takes the patient by the hand, and goes into a kind of trance.

During this trance he analyzes all the patient's symptoms before "coming back to earth," and dictates a prescription which is taken down from the spot by his niece, who has been his assistant for many years. He uses nothing but herbs in treating his patients, and generally is averse to surgery.

When the trance is over, Doctor Pomeroy is seldom able to remember what he said while it lasted, but the method is said to be so interesting that some of the most successful medical men call him as second opinion in cases where they are in a quandary as to the correctness of their own diagnoses.

Duty Owed to the World. "The home is the unit of society and whether a man and woman marry a new unit is added to society and the duty of that man and that woman is to give a 'square deal' to the cause of humanity and keep the torch of civilization, which has been passed in their hands by the preceding generation brightly burning and flaming; to greater brilliancy, hand it on to the next in line.—Exchange.

The Mighty Fighting Needle. More than 22,000,000 knitted articles were turned out by Red Cross women from the time the United States entered the war to the end of her participation in society and the duty of that man and that woman is to give a 'square deal' to the cause of humanity and keep the torch of civilization, which has been passed in their hands by the preceding generation brightly burning and flaming; to greater brilliancy, hand it on to the next in line.—Exchange.

Germs Grow Partially. Germs grow very rapidly, especially if the food is a little warm, and are not so fastidious as you may think. The food, if well cooked for safety, simply "warming up" is not enough.

It is just as needless as it is dangerous to take violent or unwholesome purgatives. Nature provides shock absorbers for your liver and bowels against calomel, harsh pills, sickening oil and salts...

Harl Harl. First Minister—Tumbo, can you tell me why baseball and pancakes are alike?

Second Minister—No, I can't. What's the reason?

Important to Mothers. Examine carefully every bottle of CASORIA, that famous old remedy for infants and children, and see that it bears the Signature of Dr. J. C. Kline.

Use for Over 30 Years. Children Cry for Fletcher's Castoria.

The average consumption of coal for steam boilers is 12 pounds per hour for each square foot of grate surface.

Potatoes, tobacco and corn are native to America.

WOMEN NEED SWAMP-ROOT

Thousands of women have kidney and bladder trouble and never suspect it. Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

Pain in the back, headache, loss of appetite, nervousness, are often times symptoms of kidney trouble.

Don't delay starting treatment. Dr. Kline's Swamp-Root, a physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions.

Get a medium or large size bottle immediately from any drug store.

However, if you wish first to test the great preparation send ten cents to Dr. Kline & Co., Birmingham, N. Y., for a sample bottle. When writing be sure and mention this paper—A-4.

A Poet Scolded. Poet—There is poetry in everything. Editor—There is too much of it in the mails.

THE RIGHT WAY...

Cuticura Soap

IS IDEAL For the Hands

W. N. U., Minneapolis, No. 41-1919.

Toil to Work Scores of Women

in homes, stores, offices and factories are not fit to be at work. They toil on day after day and year after year suffering with distressing weaknesses and derangements, hoping against hope that they will soon feel better, but how can they hope to do good work or escape permanent invalidism?

Such women are in danger of derangement of women's functions. They owe it to themselves to try that good old fashioned root and herb remedy Lydia E. Pinkham's Vegetable Compound, which for more than forty years has been restoring American Women to health and strength.

Here is a Notable Example. Joplin, Missouri.—"I took Lydia E. Pinkham's Vegetable Compound to see if it really would do as it was advertised and it sure did, and more. I was weak and could not do much work, had bearing down pains and had to go to bed. I learned about the Vegetable Compound from my mother and my husband told me to get it.

After taking one bottle I was able to be on my feet most of the time and do my work again. I have a baby eleven months old and I have done all my own work, even the washing and ironing since she was three weeks old. I certainly recommend your great medicine to everyone who complains of female trouble and I am more than willing for you to use my testimonial."

—Mrs. TIMOTHY GRANEY, 426 Connor Ave., Joplin, Mo.

And Another. Chicago, Illinois.—"I suffered for four years with pains in my sides, hips and legs and a terrible backache. I could not do any work at all. I was treated by many physicians but it did not help me. I read in one of your books where other women have been helped by Lydia E. Pinkham's Vegetable Compound, so I tried it and it helped me very much so that now I can do everything in the house. I have told my friends about Vegetable Compound and you have my permission to use this letter."

—Mrs. I. OVENSTEIN, 902 S. Marshfield Avenue, Chicago, Ill.

Thousands of such Letters Prove the Curative Value of

Lydia E. Pinkham's Vegetable Compound

LYDIA E. PINKHAM MEDICINE CO., LYNN, MASS.

Farm Auctions

We are booked for the following Farm Auctions for the latter part of October

Thos. Nuttle, Oct. 17, 5 mi. n. e.
David Radabaugh, Oct. 25, 3 mi. e.
O. C. Brown, Oct. 20, 1-2 mi. s. e.
Jos Yanda, Oct. 30, 6 mi. s. e.

These are all bonafide sales and if you are going to need anything in the farm line it will pay you to examine the respective advertisements in this paper, or the bills, for particulars.

We specialize in this class of business and if you contemplate holding a sale we will gladly assist you in arranging it.

Watch this space for later announcements.

What Is Big Business?

BUSINESS, be it big or little, is production and distribution of commodities and service.

The size of a business is measured by the service it renders the public, and regardless of the capital invested, it never can become Big Business unless its output of useful service is great.

The Standard Oil Company (Indiana) is classified with big business, and it deserves to be, for from the day of its organization the goal toward which every effort has been directed has been to render a useful service to the public at large.

Originally the purpose of the Company was to manufacture and sell an illuminating oil of superior quality, but as the years have passed the Company has been able to take a wide range of other useful products from crude petroleum, and has made them available to mankind.

Today the Standard Oil Company (Indiana) is big because its job is big, and as the job expands so must this organization if it is to keep pace with the insistent and ever-increasing demands of a discriminating public, and thereby discharge completely its obligation as a public servant.

Pine City News

A baby girl was born at the home of Mary Reilly, yesterday. J. J. Madden is having the east side of his business buildings brick veneered as a fire protection.

If you are a lover of music let me interest you in a phonograph.—Staeck's the Jeweler.

Mrs. Fred Jordan entertained a number of friends at an afternoon party at her home, last Friday. Prescription work promptly and carefully attended at Dr. Schaeffer's pharmacy. Prices right. adv.-14

Mrs. Geo. Sherwood returned home last Thursday from Virginia where she spent a week at the home of her son Lloyd.

Mrs. Fred Cherrier went to St. Paul, last Saturday, to look after the affairs there of Mrs. Georgia Ketchum whose death was given in The Pine Piker last week.

Mr. and Mrs. Howard Staeck and daughter and Chas. Staeck were even from Duluth to spend the week end at the home of their uncle, George Staeck, here.

Fred Jordan's deal for Mrs. Dunning's home fell through and he has since purchased the Frank Cort property on 9th street, two doors south of Grandma Piper's.

Arnold Leubker expects to return today, to the Webster, Wis., region where he is installing many Delco light plants on the farms of that region. He will return to this locality, later, to work.

J. T. Milder was in town last Saturday from Pootah with a truck he took back. He is installing a truck business there, with three lines contemplated—one of them down this way.

The Leon Heath Post of the American Legion will hold their next meeting next Monday evening—Oct. 20—in the armory. A big turnout is expected as the members are very enthusiastic over the local organization.

John Barrymore could not be more ideally cast than in the stellar role of the film production of the sensationally successful farce, "Are You a Mason?" by Leo Ditrichstein, which will be displayed at the Family theatre, Wednesday, Oct. 22.

The meeting of the Royal neighbors, last Friday evening, resolved itself largely into a farewell party for Mrs. R. A. Lawrence who was given a good time and presented with half a dozen silver teaspoons on the eve of their family departure for their new home at Detroit, Minn. The Lawrences leave today.

That a new Cecil B. DeMille production is one of the things the near future holds is always pleasing news to those who care for the best in photoplay art, for it is a recognized fact that the pictures made by this master director are actual theatrical events. Mr. DeMille's latest creation, "For Better, For Worse," will be shown at the Family theatre, Thursday, Oct. 23.

W. H. Bastien our new hand leader, brings his household goods up from Minneapolis, Tuesday, by auto truck—he and Fred Jordan having been the first to employ this means for bringing their goods from a distance. Both say it is the only way—a trifle more expensive as compared with freight but cheaper in that it saves crating and drayage at both ends. It is also much quicker.

W. A. Brooks sold his home on 6th street, the last of last week, to the John Olsons who have been making their home with their son Eric on his farm, about six miles east on the St. Croix river, which place he recently sold to Peter Sagmoen. The Brooks family expect to move onto a farm in the Mills Lake late region, whether he went Monday, and may leave soon or possibly not for a month.

George Sherwood sold his Pine City dry lay, last Saturday, to John Kinsky and Dick Ruby and the new men, who are coming, took charge the first of this week. Mr. Kinsky is a nephew of Frank Harvey of the place and Mr. Ruby a son of J. C. Ruby living east of town. George has operated the lay for 9 years and has come to be a fixture which will be much missed. He has not settled his future plans yet.

The recent resignation of Rev. Clark from the pastorate of the Presbyterian church here to accept a position in charge of music and religious education with a large newly federated church at Janesville, Wis., has brought about the question of unity between the Presbyterian and Methodist congregations here and it seems very possible that a single service in the Methodist church may result though this remains to be determined by the congregations of the two churches. Rev. and Mrs. Clark will leave, next week, for their new home and Miss Melin expects to leave at the same time for Denver, Col., where she may decide to remain or return to her home in New Jersey.

The A. M. Challeen sale is drawing big crowds this week—the store was jammed last Saturday morning and filled with buyers all day. It is a very successful sale and has brought buyers from far beyond all of the surrounding towns and has resulted in moving many thousands of dollars worth of goods though it has hardly made a dent in the big stock Mr. Challeen had stored away in his store—main floor, basement and second floor. The sale will go on until Oct. 31 in charge of Mr. Stedman of Minneapolis who has succeeded Mr. LeGrove who met with a severe accident shortly after arriving here. Mr. Challeen was at Minneapolis the first of the week to see Mr. LeGrove and found him well enough to be removed to his

PIPELESS CALORIC FURNACE

A Practical, Efficient Method of Heating Without Pipes Through Only One Register

What It Does

The CALORIC, the Original Patented Pipeless Furnace, heats your entire home, new or old, three rooms to eighteen, through one register.

The CALORIC heats uniformly and thoroughly. Whether your house be of the bungalow type, with all rooms on one floor, or of the two or three stories high—all the rooms will be warm and comfortable.

The CALORIC saves from one-third to one-half of your fuel. The same amount of coal, coke or wood which will heat two or three rooms with stoves, will heat the entire house through the CALORIC. Or if you are now heating your entire house, the CALORIC will do the same work better with one-half to two-thirds as much fuel.

The CALORIC is easily and quickly installed in any house, new or old, and without interfering with your present heating system. Where there is no collar, a pit can be dug large enough to hold the furnace and the fuel supply.

The CALORIC reduces fire risk, as all the heat comes up through the center of the register, while the cool air is cooled, passing down through the outer part of the register, where it comes in contact with the floor.

Over fifty thousand enthusiastic owners from Portland, Maine, to Portland, Oregon, testify that the CALORIC is and does all and more than we claim. The CALORIC is also giving splendid results in stores, factories, churches and halls. Can you afford not to investigate?

- and How It Does It

The CALORIC is not a pipe furnace with the usual coils of metal, nor is it an expensive heating system for the purpose of meeting a demand. It is specially designed and built from the ground up to heat buildings more uniformly, economically and satisfactorily than they have ever been heated by other appliances.

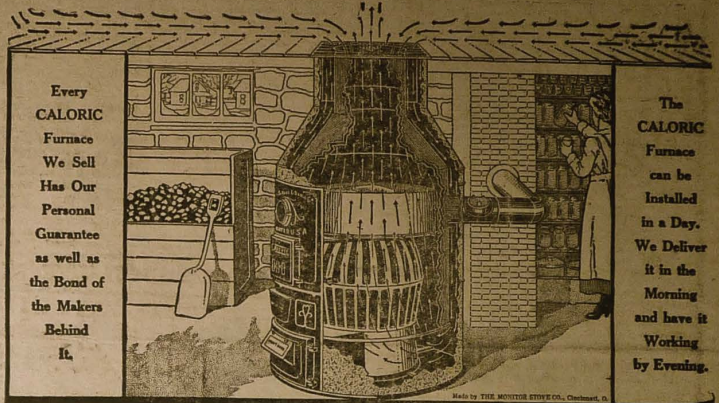

The CALORIC works through Nature's own laws of circulation by the movement of air currents. Warm air rises naturally. Cold air falls. Warm air and cold air cannot occupy the same space at the same time, say more than cold water and warm water can do so.

In the same volume that the warm air is distributed into the house, an equal amount of cold air is drawn into the furnace, where it is heated, moistened by the vapor from the two gallon water pan, and then re-circulated through the register. This process continues as long as the fire is kept burning.

Thus there is created a constant circulation of properly conditioned warm air. Just as running water purifies itself, so the circulating warm air, passing constantly through heat of from three hundred to eight hundred degrees, in which to germ so live, is kept pure and healthful.

Now this is merely an outline of the principles of operation and instructive manner in our CALORIC Catalog. Call at our store, phone or write us for a copy.

The CALORIC is manufactured and guaranteed by The Motor Stove Co., Cincinnati, Ohio, makers of heating appliances for 39 years.

Every CALORIC Furnace We Sell Has Our Personal Guarantee as well as the Bond of the Makers Behind It.

The CALORIC Furnace can be Installed in a Day. We Deliver it in the Morning and have it Working by Evening.

WHAT WOULD GRAND- ma Have Said Fifty Years

or so ago, when she was worrying about the milk and butter down in the "spring-houses" during the hot-spell if someone had told her about the

Farmers' Co-operative Creamery

in your vicinity, where milk and cream are handled for over 800 farmers, and where as much as 45000 gallons of milk are taken in daily to be shipped 100 miles distant to be consumed or there condensed and shipped to far corners of the earth. Here also hundreds of pounds of butter are churned daily which is sold to farms 2000 miles distant, eaten by people in the eastern cities, or exported across the ocean to feed people of foreign nations.

Modern Methods of Handling

milk and cream makes an every day happening of what a half century ago would seem a miracle. It is the privilege and to the advantage of dairy farmer's to patronize a modern creamery. We are here to serve you.
