

## SPRING SUITS INTRODUCED; COATS FOR EARLY SPRING

THE contemplation of spring has put fashion in a joyous mood, judging from the many suits and frocks now displayed in the windows. There is the classic plain, tailored suit, for the most practical wear; takes on a frivolous touch somewhere, with a dash of white or pink ornament or lace—just enough to bring it from being tame or severe. Much attention, formerly given to this type of suit, is wandering away

## The KITCHEN CABINET

(Copyright by Western Newspaper Union.)

If life is short at best,  
If we wonder what and why,  
If we have no time to rest,  
Friendship ever—yours and I.

Let this day be gray and sad,  
Let us fight on and go through,  
And at evening just as glad,  
Say to me what you say to you.

—James W. Foley.

### MEALS FOR THE DAY

Feeding the family is a very important business, and one which cannot be done successfully without a full and well-stocked larder. With a study of individual's occupation, character, age and health, the day may be planned.

**Heavy Salads prepared of meats, molded fish and such combinations fit into a light luncheon, as they are the main dish, while a fruit salad may make a most acceptable dessert, following a hearty main dish.**

**Roast Chicken.—Dissolve one-half cupful of water in a casserole of a cupful of water and let it boil five minutes; melt four squares of chocolate over hot water and pour the syrup into it, stirring all the time. Scald the milk, add a pinch of salt, then add two eggs, place in a double boiler and mix, heat several minutes.**

**Turnovers.—Put a white sauce, using the chicken broth, season with salt, pepper and a teaspoonful of curry, and the turnovers, cook one-half hour; then add two dice white meat, which has been well cooked with the bones. Serve when well heated with baked rice, hot.**

**Cheese.—Dissolve one-half cupful of water in a casserole of a cupful of water and let it boil five minutes; melt four squares of chocolate over hot water and pour the syrup into it, stirring all the time. Scald the milk, add a pinch of salt, then add two eggs, place in a double boiler and mix, heat several minutes. Turn marshmallows (one dozen) in small dice and drop into the cheese, when hot. Set aside until cool, then beat briskly. Pack one-half cupful of cheese in glasses with a spoonful of whipped cream on top of each.**

**Brown Stew of Carrots.—Mash and strain three large carrots. Drop them into a pan and boil until tender. Cut half beans, add a sharp cutter; add to a pint of rich brown sauce, prepared from stock, catsup, cayenne pepper and onion juice to season. Simmer forty minutes; thicken the sauce after removing the carrots; return them to the sauce and serve very hot.**

**Sprinkles and Sauerkraut.—Take a piece of bacon and wrap it in a "bacon" and keep it in a cold place to Kraut to fill it. Wrap meat place in the oven to roast. Salt the meat and season with pepper. Roast slowly for several hours, then brown."**

Long the road of human life you see a fellow travelin' slow. You An' like as not you'll find he's home. He was makin' swimmin' his headway, but he bumped into a stone, An' sprained his ankle, so onward, an' left him there alone.

He's got to swim, or smifit—he's too old for swimmin'. But he's givin' up, but he's givin' just as earnest, if it An' doest a heap of good sometimes to go a little slow.

An' say a word of comfort to the man that smifit him too. —Anon.

### SOMETHING ABOUT RAW FOODS

Serving raw food is nothing at all new, but the real value of raw food is in the raw fruits and vegetables which we have only known about for a few years, and which are now coming into general use during the time of some of our greatest food experts.

We are still to learn more and more of the value of raw food.

Raw foods do not bind the stomach so we need not prepare to be digested or starved. To begin with, one may have at a meal some ripe olives. These are a great delicacy; one can munch them like Fletcherites along comes a bowl filled with a nutty-looking custard, which is two uncooked eggs well beaten, two dessert spoons of sugar and the juice and rind of an orange. One taste finds it surprisingly good. With this a few pecans and blanched almonds, with unsalted butter.

The bread is prepared with the whole wheat, ground and mixed with water.

This is a sandwich a salad. The basis of this salad may be watercress, romaine, head lettuce, chervil, or any other fresh greens a few slices of radish, a grated onion, radish, small tomatoes, cream cheese, grapes, grape fruit and grapes. Over all a dressing of oil and lemon juice, grape fruit juice or orange juice, vinegar (that is considered a delicacy).

No butter, no pepper, but well beaten egg in substitution, blending off all these foods results in a delicious salad.

**Bordeaux Pudding.—Cut sponge cake and a few squares of cinnamon bread into small cubes. Mix with a generous amount of milk, eggs, and bellflowers. Brown, coat, heighten and black in twirls and other weaves, provide the cloths that are enlivened by gay-colored silk in boudoirs.**

Box coats, flaring or cape sleeves, wide-style and unusual trimmings are among the latest fashions. Spring suits have in store for us. Silk or rayon does couching on, embroidery, braidings and all-over effects, loop trimmings of bows, ribbons, lace and bellflowers. Brown, coat, heighten and black in twirls and other weaves, provide the cloths that are enlivened by gay-colored silk in boudoirs.

Those who design coats for us

lace. Slightly more expensive and very lovely is another bandage of pearls with round pearl ornaments with brilliants at each side.

**Combinations.** Combinations of materials are now the most exclusive models. Frequently the long waist is of a different material from the skirt. This is an excellent thing to remember when remodeling frocks, or when you have not quite enough material for a complete costume.

**Attractive Headress.** No evening costume is complete without a headress of some sort. A particularly attractive one consists of a narrow band of pearl beads above a wide band of silver.

### Cow Testing Records

Herd's Dairyman—A report of the year's work in the Pine county Minnesota Cow Testing Association for the year 1922 follows:

Three hundred fifty-six cows were tested producing an average of 5,738 lbs., milk testing at 35.56 cents per lb., total value of fat, 74.76. Average cost of feed was \$35.86. Average gain above feed was \$44.49. Average price of butterfat was 38 cents.

A grade Holstein cow owned by Wm. H. Johnson of Woods Park was high con with 9554 pounds of milk containing 431 pounds of butterfat.

The low cow produced 1,549 lbs. milk and 78.61 lbs. butterfat.

The best herd owned by M. G. Bahnenmann of Pine City averaged 9,319 lbs. milk testing at 35.49 cents per lb. with a feed cost of \$43.31, returning \$90.51 above the cost of feed.

The poorest herd averaged 3,358 lbs. milk and 142.31 lbs. butterfat, with feed cost of 24.44, returning \$26.89 above cost of feed.

Fifty-seven cows produced over 300 lbs. of butterfat.

One hundred and forty cows produced between 200 and 350 pounds of butterfat.

### Development Assn. Meets

A meeting of the development association was held in the club rooms last Tuesday evening, when a number of matters were taken up.

A letter was received from Geo. Emery of Hinckley asking for the opportunity of holding a meeting here in the near future for the purpose of discussing the proposed road bond issue. The matter was left to the secretary of the club for arrangements for such a meeting if one was desired.

The trade extension of the club was instructed to appear before the village council and request have the feed mill plan raised for the benefit of the village, especially those from the cities who came here to sell farm products.

J. J. Madden, Robt. Wilcox and J. P. Buchanan were appointed a committee to be chosen to be submitted to the club that will provide for a committee of the club to pass on the merits or demerits of solicitors who come from the cities soliciting for the various institutions advertising schemes, etc.

A house committee consisting of Bert Boo, Phil Slesky and T. D. Brown were appointed to have charge of the church plan and set a rental charge for the use of the room for private purposes.

A number of routine matters were discussed and disposed of.

T. J. Buckton, pastor

There will be no services Sunday as Rev. Buckton will preach at Carlton.

Our Box Candy Fresh. We order our candy in small shipments by express—Prochaska's Pharmacy.

### A TALK WITH A PINE CITY MAN

Mr. Charles Blazek of Pine City tells of his interesting experience. There is nothing like a talk with one of our own citizens for giving home and encouragement. He has suffered from the dread kidney disease. We, therefore, give him an interview with a Pine City man.

"Heavy lifting weakened my kidneys and made my back lame," says Mr. Blazek. "Sharp knife-like pains took me in the small of my back and stooping always made these pains worse. It was a task to straighten again after such a long symptom was the too frequent action of my kidneys which caused me to get up three or four times during the night to pass the kidney secretions. I saw Dr. Dean's Kidney Pills advertised and decided to try them. The first box which I got at the Breckenridge Pharmacy, relieved me of the backache and after taking another box I was entirely cured."

The eighth grade students are writing compositions about Valentine Day.

Eighth grade citizenship teacher—What is the meaning of recreation?

Student: Recreation is not having to work or arithmetic.

Miss Ross of the eighth grade spent the week end at her home.

Miss Nicholson and Miss White

## The Human Factor in Industrial Efficiency

DURING the past two years the number of accidents in the Standard Oil Company (Indiana) organization has been reduced 80%. This splendid result has been brought about through intelligent co-operation of employees. The saving in life, efficiency, and money cannot be computed.

The fact that the Company has been able to secure whole-hearted co-operation is the reason for the complete success of the safety plan, and is a very significant fact in connection with all this Company's enterprises.

During the first year after the plan was adopted, over 97% of the safety suggestions made by employees were adopted. Mechanical safeguards were greatly extended, and a system of education was carried on whereby in numerous instances the habits of the employees were changed. Thoughtfulness was substituted for thoughtlessness.

This campaign with its remarkable achievement of 80% decrease in accidents is of definite interest to 30 million people in 10 Middle Western States.

Safety in co-operation promotes efficiency of the worker at his task, and makes him a better citizen. The employee who realizes the fact that his safety is being looked after at every turn is free to give his entire attention to his duties.

In any industry the human factor is the key to efficiency. The man who is content, well paid, assured of his future, and safe from injury, may be depended upon to give his best effort to his work. He is more productive; he is more content; he is prouder of his work.

Thus by safeguarding the welfare of the worker, the Standard Oil Company (Indiana) takes the initial step towards harmony within the organization, which enables the Company to produce annually a tremendous volume of petroleum products of uniform quality, which are such essential factors in promoting commercial progress and domestic happiness.

Dehaven, Minnesota.

Hookworm is World Menace. Of the world population of 1,700,000,000 people inhabiting the world, according to the latest statistics, more than 900,000,000 live in countries where hookworm infection is a serious menace to health and working efficiency.

With increasing pressure for the development of man, the struggle against hookworm, the control of this disease becomes a matter of serious international concern.—Trifit Magazine.

Value of Gypsum in Land.

Editor of the Iron Range of the early soil experts of the United States said in 1852, "All other manures whatever be the nature of their action, require to be applied in quantities far exceeding any but of crop expected from their use. But one bushel of gypsum will fertilize a acre of land fit for its action may add more than twenty times its own weight to a single acre."

Daily Thought.

The best portion of a good man's life is his little nameless unremedied acts of kindness.—Wordsworth.

Dr. and Mrs. R. L. Wiseman left for the Twin Cities Tuesday afternoon to undergo an operation there last Tuesday.

Wm. Korbel was a visitor in the Twin cities Saturday, going down for the Hamline-Carlon basketball game.

Rev. and Mrs. Herb Parrish of Wadena are visiting at the home of their parents, Mr. and Mrs. A. H. Daniels.

Bob Oldenthal left for St. Paul Tuesday to attend a meeting of secretaries of the Federal Farm loan association.

This Fraternity is the second oldest on the Hamline Campus established in 1908, and having an active membership of about thirty.

Albrecht Frey, one of Sophomore at Hamline has been working for the past two years has been of such a quantity that it made him the only logical man for the position. Fred is to be congratulated on this election.

Frank Poerl, Pine county's popular treasurer, and Pine City's Burkhardt, is exhibiting a healthy full-grown lemon, that dropped from a lemon tree, which fell over.

The lemon is 3 inches in circumference, some 14 mm! Frank has a lemon tree, a cotton tree and a few other tropical plants in the basement of his room. Whenever a wind blows in the room, it hits the just couple of days—Frank goes downstairs and looks over his cotton orchard, and he can imagine nice balmy weather with the wind blowing through the trees.

The women of the church entertained their husbands at a dinner at Ed Prochaska last Monday evening. Each lady escorted one of the other members of her husband's party.

The women were entertained in the second cabin for them in Andy Younghouse's sedan. Following the bounteous banquet, a number of toasts were responded to those present. Mrs. Nick Johnson acted as master of ceremonies. A short program was given and games played. It was a very delightful evening and one that will long be remembered by the men present.

Sophomore at the University of Minnesota to the number of 94 have been added to the list who maintained during the first quarter of the college year an average standing of A or B, entitling them to compete for student honor. This year the greatest students who maintain the A or B average to the end of their second college year. The list includes the names of all students who have kept on this fair record, and the names of those students who are eligible candidates for honors.

J. B. Johnston, dean of the college of science, literature, and the arts who made the announcement, among those so honored is Myron Allen, son of Mr. and Mrs. R. P. Allen.

## International Kerosene Engines

Are Made to Serve You

Pumping water for the stock is one of the big chores that takes a lot of time and is no child's play, especially after a day's work in the field. An International engine will keep the tank filled for you as well as one does for your neighbor, if you will put it on the job. It does the work on kerosene, the lowest priced fuel you can buy.

An International will pay for itself by pumping water alone, say nothing of the many other jobs that you can turn over to it, such as sawing wood, chopping feed, running the farming mill, corn sheller, grain elevator, potato sorter, sprayer, etc. An International will save you a lot of time, and do a lot of your work.

1½ and 3 H. P. engines carried in stock, also a complete stock of cordwood saws, saw frames, mandrels and balance wheels on hand.

I have one No. 15 New Style DeLaval Separator on hand. This machine has been used for a short time, but is in A1 condition. Price \$75.00

Sixty years ago I was in a run-down, nervous condition; my back ached terribly and had bearing pains. I suffered from frequent headaches and felt weak and mean all over. A friend told me about Dr. Pierce's Favorite Prescription. I took it every day and about it that I bought a bottle. I never took a medicine in my life that did me so much good; it strengthened my body and relieved my aches and pains. My system was regulated and my nervousness left me. I am just as well now as I ever was. I am a widow and a widow's day and I give all the credit to Dr. Pierce's Favorite Prescription.—Mrs. Christina Van Hess, 1424-D, Dakota Street.

# The Cottage Gardener

The Successful Gardener Plants the Seeds in a Flat Tray, to Be Set in a Window on the Living Room Floor or in the Basement Where it Is Warm and Sunny.

## SHOULD FERTILIZE TO GET GOOD CROP

**Stable Manure, Soil Building  
Crops, or Commercial Fer-  
tilizer Necessary.**

Most farmers can spare enough manure from their other crops to fertilize properly a one-acre garden plot, especially near towns, manure is no longer to be had in quantity and other means

are being used for fertilizing gardens.

In brief, states the United

States Department of Agriculture at least three methods of adding fertility to the soil. First, by the application of manure; second, by the use of soil

or commercial fertilizer.

Vegetable plants for starting early

garden should be sown three weeks

earlier than the first frost.

When the weather is warm, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.

When the weather is cool, the

soil should be turned over and the

seed sown in the open ground.
