

VOL. XXV

LIGHT VOTE MARKS PRIMARY ELECTION

Preus, Johnson and Carley Are Winners—Election To Be Held July 16.

St. Paul—With returns showing that Governor J. A. O. Preus, Magnus Johnson and Senator James A. Carley were nominated in the special primary election Monday, Minnesota will become a national battleground, with the United States senatorship as a prize, during the next four weeks.

Governor Preus was an easy winner over the field of nine republican candidates.

Governor Preus established his safe lead from the outset. Judge Oscar Hallam came in second on the republican ticket.

Magnus Johnson of Kimball, farmer-labor nominee, and State Senator James A. Carley, Flatwater, democrat, will be the opponents of Governor Preus in the special state election July 16.

When the first returns came in the Farmer-Labor party there were some indications that Dr. Fritsche, mayor of New Ulm, might give Magnus Johnson a real run. That was because the first reports came from St. Paul and from some of the counties in the Third Congressional district where there is a heavy German vote. Minneapolis gave Johnson a big lead, however, and in the returns started coming in the Seventh and Ninth districts, Johnson's vote began growing by leaps and bounds.

Judge Hallam made a fine showing in his home city of St. Paul, which he carried more than two to one over Governor Preus, rounding up 11 of the 12 wards in St. Paul. He leads in returns from several counties, mostly in the second district, where his organization was effective.

Wherever Preus did not come in first in the state—and he came first in practically every county—he came second. Sydney Anderson, first district congressman, showed some strength in his own district but his vote in other sections of the state was not large. Hallam had some strength in the second district but nowhere else outside of Ramsey county did he have much.

The run made by Schall came as a surprise to some of the other candidates. Schall's chief strength naturally came in his own district, the Tenth, where he carried several counties, notably Isanti and Chisago. Schall also received a big vote in Minneapolis even in wards outside of his district.

The very small vote given former Governor Burquist was one of the surprises of the primary.

Victor Power, mayor of Hibbing, got a big vote on the Fox Range and in Duluth as was expected.

Sydney Anderson got a good vote in his home district, the first, carrying several counties. His candidacy and that of Halvor Stenstrom cut in to Governor Preus, but Mr. Stenstrom made no campaign and got but a small vote. Mr. Anderson got a good vote in Minneapolis, but failed to come near the leaders in the state at large.

Ernest Lindbeck's vote was heaviest in Minneapolis and was scattering in the rest of the state.

Will Picnic at Rush Lake

The annual picnic of the Eastern Minnesota lumbermen's club will be held at Rush Lake tomorrow—Friday. The club is composed mostly of the lumbermen along the Great Northern and N. P. railroads between St. Paul and Duluth.

The Pine City Legion band will furnish music. There will be program of informal talks in the afternoon and sports contests for both men and women. There will also be a ball game between the lumbermen and the Great Northern and those on the N. P. Friends of the lumbermen are invited to take a lunch and join them in their annual outing. C. R. Boo of Pine City is a member of the arrangements committee.

Annual Farm Bureau Meet

The annual meeting of the Pine County Farm Bureau will be held at Hinckley next Thursday, June 28th at 1 o'clock. This promises to be a very interesting meeting and all members and others that are interested in the Farm Bureau are urged to be present.

Recall One-Cent Sale your opportunity to make one cent equal one dollar. This week at Prochaska's J. A. Burquist failed to draw many votes and finished rather poorly. Victor L. Power ran strong in St. Louis county and carried several counties in the northern part of the state. In the farmer-labor primary, the Nonpartisan league endorsement, with the backing of railroad brotherhoods made Magnus Johnson the favorite. Dr. Fritsche carried St. Paul and carried a number of counties in Minneapolis, however. Johnson ran with Hennepin in a fashion that put him well in the lead.

Charles A. Lindberg, the third candidate in the Farmer-Labor party made a very poor showing.

Brook Park village gave Preus 9, Schall 17, Hallam 2, and Carley 1.

Brook Park town gave Preus 4, Schall 12, Hallam 3, Johnson 3, Fritsche 3, Lindberg 3, and Carley 1.

Following is the total official vote that was cast in Pine County.

REPUBLICAN	
Schall	778
Preus	239
Hallam	112
Burquist	68
Anderson	62
Power	46
Lindberg	43
Stenstrom	11
Martin	11

FARMER-LABOR	
Johnson	523
Lindberg	196
Fritsche	185

DEMOCRATIC	
Carley	16

Leviathan Rides at Anchor

Boston—The reconitioned liner Leviathan lay at anchor off Pine's Leaside in Boston lower harbor in readiness to sail for southern waters on her trial trip. The work of unloading was accomplished with the same ease and precision but marked the mammoth liner's entrance into the dry dock a month ago to be cleaned, painted and refurnished. The \$2,000,000 reconitioned Commandant Chanty, U. S. N. and Captain Walter J. Bennett directed the task of refitting the steambird.

Schall Gets Big Vote in Pine Co.

The special senatorial primary has come and gone and as far as Pine county was concerned it caused very little interest and a very light vote was cast.

A total of 2377 votes were cast in the county. Of these 1337 votes were cast on the Republican ticket, 908 on the Farmer-Labor ticket and 82 called for the Democratic ticket.

Thomas D. Schall received the highest vote in Pine county with a total of 778. Magnus Johnson on the Farmer-Labor ticket was second with 523 and Governor Preus was third with 239.

Pine City cast 213 votes. Of these 124 called for Republican ballots, 55 for Farmer-Labor ballots and 34 for Democratic ballots. Pine City voted as follows: Republican, Preus 33, Schall 46, Hallam 19, Anderson 9, Burquist 7, Lundeen 2, Powers 8, Farmer-Labor, Johnson 27, Fritsche 5, Lindberg 2, Democratic Carley 29, Carley 5. Hinckley cast 114 votes. 85 Republican, Preus 33, Schall 46, Hallam 19, Anderson 9, Burquist 7, Lundeen 2, Powers 8, Farmer-Labor, Johnson 27, Fritsche 5, Lindberg 2, Democratic Carley 29, Carley 5.

The groom is the eldest son of Mrs. Alice Huber of Pine City and has resided here the past 17 years. He attended the local high school and high schools and was deputy in the county treasurer's office when America entered the war. He was a member of the local naval militia but enlisted in the aviation department of the service. After a few months training at Pittsburgh he was sent to England where he spent 6 months with the Royal flying corps. He has been a member of the local postoffice force the past two years.

The bride is the daughter of Judge and Mrs. Robert Wilcox and was born and raised in Pine City. She graduated from the local high school and attended Macalester college for three years, where she specialized in music. She taught school the past year at West Rock, Miss. Wilcox is especially well known in Pine County as a soloist with a beautiful soprano voice and has sung before many Pine City audiences.

Pine City Couple Wed

One of Pine City's most popular young couples were united in marriage yesterday noon when Miss Nora Olivia Wilcox and Ell Weller Huber were married. The ceremony was performed by Judge Robert Wilcox, father of the bride, at the Wilcox home.

The bride was attired in a dress of large brocaded tulle trimmed with lace and wore a corsage bouquet of pink Killarney roses and and lilies of the valley. The house was beautifully trimmed in white and green.

A wedding dinner was served following the ceremony. Only relatives of the bride couple and near friends attended the wedding. The newlyweds left yesterday afternoon for the St. Croix river opposite Danbury and will spend a ten-day wedding trip down the St. Croix by canoe. They were taken over by Wendell Huber and Miss Rose Barnum.

No Celebration Here July Fourth

Although there has been some talk of having a Fourth of July celebration in Pine City, it has been definitely decided by the Pine City development association not to hold a celebration here this year.

A number of the nearby towns are planning celebrations this year and elaborate arrangements are being made for a big celebration at Hinckley where they will celebrate the Fourth in fitting style. Cambridge is also planning a celebration and a couple of automobiles will be given away there when the merchants of that town bring their big selling campaign to a close.

Beroun Couple Married Tuesday

A pretty wedding was solemnized at Beroun last Tuesday morning at ten o'clock when Miss Mary Sladky was united in marriage to Albert Krzyz. The ceremony was performed by Father Leo at St. Joseph's church.

Miss Anna Krzyz and Ed Krzyz, brother and sister of the groom, attended the bridal couple.

Following the wedding a reception was held at the home of the bride's parents, Mr. and Mrs. Matt Sladky. A wedding dinner was held at the pavilion in the evening when the many friends of the newlyweds gathered to celebrate the happy occasion and wish the happy couple the best success and happiness.

Mr. and Mrs. Krzyz will leave in a few days for Winona, Minn., where his folks reside, and will attend the wedding of his sister there. Upon their return they will make their home on his farm east of Beroun.

Both the newlyweds have resided in this community for a number of years and have a host of friends who join with the Pine Piker in wishing them the best of good wishes.

'Luck' is Coming Sunday

The mere mention of the word "Luck" brings with it a train of reminiscences where that favored word didn't come within a mile of us when we were playing at some time or other for the so-called "beaks" to come our way. We all know how it feels to have "Luck" against us when we particularly need it, and it is knowing that all that feeling when the other fellow comes out to hear the game we can all very well appreciate that humor in the situation. With that idea in mind that inimitable humorous artist of the screen, Johnny Hines, whose characterization as "Torchy" and as the hero of the hilarious farce "Burr" "Em" "Barnes" and "Spre-Fire" film, made theatre-goers the country over laugh joyously with him in those productions, enjoyed the idea of making a feature production, whose stars were built on the hat, which foibles that put so much faith in "Luck" coming Sunday, Monday, June 24 & 25th, Wednesday and Thursday, June 27th.

Nys Sisters Are Married

A pretty double wedding was performed by Rev. Lowe of Pine City at the parsonage last Monday when the Misses Mary and Josephine Nys were united in marriage.

Miss Mary Nys was married to Edwin Lofquist, son of Mr. and Mrs. Fred Lofquist of Biwabik. The bride was attired in a grey traveling suit and carried a bouquet of bride's roses and lilies of the valley. They will make their home at Virginia where Mr. Lofquist, employed by the Great Northern, Power Company.

Miss Josephine Nys was wed to Byron Bremer of Minneapolis. She was also attired in a grey traveling suit and carried a bouquet of bride's roses and lilies of the valley. They will make their home in Minneapolis where the groom is employed at the Potosi motor garage. Both couples attended each other at the ceremonies. A wedding dinner was held at the home of the brides' parents at Rock Creek after the ceremonies.

The brides are two of the popular young ladies of the Rock Creek community and are the daughters of Mr. and Mrs. August Nys of that place. The family has resided in the Rock Creek community the past twenty years and the young ladies grew to young womanhood there. The Pine Piker joins with other friends in congratulations and wish the two happy couples the best success and happiness.

Last Rites for Mrs. F. Heath

Funeral services for Mrs. Frank Heath of Meadow Lake were conducted by Rev. Barnes from the home on Wednesday of last week and the remains were laid to rest in the Pine City cemetery. The pall bearers were Peter Halstrom, Otto Gankel, John Becker, J. A. Hilday, Grant Chapin and Joe Grand.

Mrs. Heath passed away in a Minneapolis hospital June 7th following an operation for acute appendicitis. Her sudden death came as a shock to her many friends in her home community who express their sincere sympathy to the sorrowing husband and children.

Mrs. Heath was born near Mankato in 1857 and spent her early childhood there. About ten years ago she was united in marriage to Frank Heath and they have made their home in Meadow Lake for a number of years. Her husband and children—Erl and Ruby—survive to mourn her loss, also her parents and one brother.

Card of Thanks

We wish to extend our sincerest thanks to the neighbors and friends who last Friday afternoon at 12:30, the funeral of our beloved wife and mother. We also wish to thank kind friends for the beautiful floral offerings.

Meet at Wickstrom Home

The Pine City Farm Bureau will meet at the August Wickstrom home on Cross lake next Sunday, August 5th. Bring your baskets and go out there for a good time. August invades all horsehoes players to be ready for game as he is ready to take on all comers.

TROTZKY ATTACKS BRITISH EMPIRE

Soviet 'Head Hints Russian-French Rapprochement Is Immediate Possibility.

Moscow—An attack on England, hints of a Russo-French rapprochement and a plea for more metal in our national character," marked "a blood and iron" speech by Leon Trotsky, Soviet war minister, before the All-Russian Congress of Metal Workers.

"If an ultimatum is presented to us," he exclaimed, referring to the recent British note, "let us create a detachment of airplanes. If a coup d'etat occurs in Bulgaria, let us have another detachment of airplanes, and if there is a coup d'etat in Persia, build more planes."

"It was for this purpose, perhaps, that Lord Curzon felt strong enough to deliver us his ten-day ultimatum. It was necessary that the blood of the Russian workers and peasants be shed. This account some day we shall present to the English bourgeoisie."

MARK DROPS—FACES TIE-UP

Trade Unions Lose Hope of Remedying Wage Problem.

Berlin—Berlin is buzzing with talk of impending outlay strikes after the mark had suffered a collapse which, once during the day, saw it selling at 120 to 130 to the dollar among unofficial dealers.

"There was scarcely a household in the city where the question was not raised as to how far the German unit can or will fall. One newspaper answers the question with the simple statement: 'The dollar brings 100,000,000 Soviet rubles.'"

AMUNDSEN ABANDONS PLANS

Arctic Explorer Declares Results of Trip Flights are Unsatisfactory.

London—Capt. Roald Amundsen's airplane flight across the "top of the world" has been abandoned. In a telegram to his brother, the reporter said, Amundsen stated the results of his first flights had been unsatisfactory, and that he would not attempt the journey across the Polar basin.

Captain Roald Amundsen planned to start in an airplane from Wainwright, Alaska, or Cape Barrow, 75 miles northeast, and with his aviator, Lieut. Oskar Ordal, dash above the North Pole and land in the Spitzberg islands in the Arctic ocean, 600 miles north of Norway.

Week end special, Friday and Saturday, Camel, Ducky, Stripes, and Chesterfield cigarettes 2 for 25c at Prochaska's.

A HOT WEATHER Necessity!

The Red Star is an oil-burning stove which can be relied upon for ALL kinds of cooking. It matters not whether you are toast-

bread, roasting fowl and baking pastry; this wonderful stove will do the job to a turn and do it with far less attention than a coal or wood stove, for the burners may be set to maintain an even, low heat, or regulated to produce a UNIFORM INTENSE HEAT. THE RED STAR is a MARVELOUS ADVANCEMENT for homes without gas. It gives to these homes the same SMOKELESS and ODORLESS heat as does the city gas range. It is WICKLESS, ASHLESS and DIRTLESS, because it generates its own gas from cheap kerosene, gasoline or distillate—concentrating a double ring of heat directly beneath the cooking utensil and saving at least one-fourth of the fuel bill. Operates NINETEEN HOURS ON A GALLON OF FUEL.

E. Tustin Montague Pours Out Gratitude to Tanlac for Restoration of Health.

Summing up his enthusiastic statement of the benefits he has received from Tanlac, E. Tustin Montague, a printer, of 20 S. 10th St., Minneapolis, Minn., makes the following characteristic remarks: "Tanlac has well merited praise, and I'd be glad for my testimonial to be published in your issue."

"I lost my appetite, my stomach went bad, and I began to suffer a great deal with indigestion. I thought my trouble would go away, but it got worse instead. And I was sometimes so weak, nervous and worn out I felt like I would never get through the day. I had to go to the shop last left me completely done up."

"But since taking Tanlac I have gained ten pounds, cut out anything that was hard on my stomach, and I am now as well as I can be. I used to be a nervous wreck, but that fear is gone now, for I am simply taking life. I am Tanlac's beneficiary for life."

Tanlac is for sale by all good druggists. Accept no substitute. Over 37 million bottles sold.

Tanlac Vegetable Pills are nature's own remedy for constipation. Sold everywhere—Advertised.

Most women suspect there is some mischief on tap every time their husbands smile.

An Experience Meeting

By MARTHA WILLIAMS

Noel Gray came up the drive chanting and sang:

"Tustan, hustan, how your horn! Pines and pines, you're the best!"

With the last word he swept his hair in a wide flourish.

Black-eyed Susan upon the porch shook her head at him, saying: "It is sinful to so perform feats in nature. You know as well as I that the fox and the goat," diaphanously as she spoke. Besides the dimples and the black eyes, her hair was a red wind and weather, leaf-brown hair fine as floss silk, and a figure the perfection of round and slender lines.

Naturally young fellows up and down Caney Fork pined to be seen in her company, also to cut the fat and drink the sweet abundant provided in the home that was her home. Noel was very much at home there—rather more so than at his legal residence, where a thirty stepmother stood the good things Susanna's folk, the Deans, preferred to eat or give away.

This child of the house that he felt himself, he never forgot his manners. This was his first favorite with Aunt Milly, Susanna's grandmother and his mother. The girl was so vivid, so whimsically charming, she harmonized colors and situations, that in the face of all her peculiar avers at each other, witness the soft crimson sash with which she had girdled her doll blue gown; witness also the pair who kept her company, Currie Ayres was still so new and now she blushed at the sound of his own voice, and Judge Jameson, ensharpened in love and great kindness, and greater kindness to me? I knew why he came, but I did not know something else. He came for love, and I could see that from him that there was love to draw him. So in the depth and delight of our happiness we will never let that forgive us—love you as much as you will let us, and forget everything but love."

The judge sat, his head bowed by his hands, hands, alone, alone, alone, but not falling. A long minute he was silent; then his head went up as gallantly as might that of an old war captain at sound of the rally. Rising, he took both their hands in a strong clasp, saying solemnly: "I have plumbed the depths of mystery and found myself lost with the lowest of my fellows. In the redemption of your forgiveness I shall henceforth strive to help others redeem themselves."

Come Easy, Go Easy. Whenever a rich West Virginian coal operator visits and finds the expert but impoverished poker players of the town get up a game, says Capper's Weekly, "At a rooming establishment he makes many sensational hands, big ones that gathered in small pots and big ones brought in chips by the quarter of a peck. Hearts best fast that night. It was a party that took courage and continued until daylight. The next morning when settlement was made the good provider from West Virginia had played had raked in \$10,000, which may be the reason the price of coal is so high."

Arsenic in Nature. It has long been known that traces of arsenic are to be found not only in human and animal organisms but in certain plants such as the cabbage and Asparagus members of the French Academy of Sciences, found also that arsenic is to be encountered in rice, peas, beans, corn, and in most vegetables used as food by man, as well as in apples, pears, pineapples, oranges and nuts. Since plants and animals are so saturated with arsenic from the soil arsenic must occur far more widely in nature than has at one time supposed.

Strange Experience. While in a grilling mill I used to get all my recruits through a regular initiation. One of the boys wore a wig and when we looked at him he kept it on, even when bathing. I was ashamed to let anyone know he had it, but I did not let him know. We all were speechless and scared. I thought we had scolded him—Chicago Journal.

Woman Seeking Advice. "Dear Sir," writes a woman, "our first-born child is a boy and we have a two-month-old baby boy. I have named him Walter, but his father has named him Walter, but the nick-name is Walter. I don't know what to do. If you were me, what would you do about it?" Don't know, says the New York Editor.

That of St. Paul's Cathedral in London is one of our most interesting Special Occasions.

That of St. Paul's Cathedral in London is one of our most interesting Special Occasions. The great bell of St. Paul's is only tolled on the death of any of the royal family in the line of descent from any English sovereign. The honor is paid only to a member of the royal family who could inherit the crown. It is a circumstance of the most important nature, though it may be doubted whether the bell would toll for a royal infant not in the direct line of descent. This rule does not apply to the consort of the sovereign, or the heir apparent, or at a price or privilege on the steps of the throne. The tolling of the great bell of St. Paul's was the first intimation which the citizens of London received of the death of the prince consort, which occurred at 11 o'clock on the night of Saturday, December 14, 1861. On that day the royal family was only preserved from the bell being tolled as the archbishop of Canterbury, the bishop of

OUTFITS FOR THE OUTDOORS;

BUOYANT ORGANDIE FROCKS

EVERY one or two in a while a clever woman longs to "live for a time in the wilderness"—or at any rate, in the open. The very best thing that she can do for herself and her family when a surfeit of duties and obligations has got on her nerves, is to answer the call of the wild, to get everything that usually occupies her mind off of it, to forget even the business of dressing up and to live outdoors until she is refreshed.

In answer to a demand for outfits that one can hike, climb, ride horse-

back, motor or camp out in, there are service suits that are guaranteed to do their part well. They are comfortable, sturdy affairs that leave one unhampered to scramble up steep grades, climb about or ride in and enable one to spend a vacation blissfully untroubled by the elements of weather.

With all the printed materials, plain organdie plays a prominent part, supplying trimmings and accessories, of

which that would wear the sturtest of these ordinary clothes. It is a choice of materials like khaki and jeans and sturdy woollens, including flannel, sun and underwear, such as are used for men's uniforms.

The silk illustrated shows an excellent blouse-and-ribbon combination of heavy brown cotton tulle. The knickers are provided with practical pockets; they button about the legs and are supported by a stout belt of the material. There is also a pocket on the blouse. Soft, close-fitting flannel, wool and rooney sport shoes are the logical accompaniments for such a suit.

Organdie accomplishes in cotton what silk does in tulle; it makes dainty shirtings in place of the shen of silk. These materials are favorites of the younger generation and a sum-

merous down. A gorgeous gown recently exhibited in Paris is of black tulle with frills and diamonds in the front panel, extending from hem to waistline.

Novelty Cuffs. Novelty cuffs are seen on many of the above styles for spring. They are usually developed in two tones, gray and tan, black and white or brown and tan.

Wrap Like a Shawl. For an evening wrap (which could be more charming than a huge square of heavy white silk crepe embroidered in silver. This is folded and worn like a shawl.

Time of Cutting Alfalfa for Hay

Has Much to Do With Value of Cured Product as Feed for Different Animals.

Created by the United States Department of Agriculture. It is probable that alfalfa is not yet in its heyday. Enthusiasts, who believe that the possibilities of this crop are far from being realized. A great part of the nearly 100,000 acres now devoted to hay, and the conditions under which it is put up, the methods used, and the time of cutting, have a great deal to do with the value of the cured product as a feed for live stock.

Time of Cutting Alfalfa for Hay

Has Much to Do With Value of Cured Product as Feed for Different Animals.

Created by the United States Department of Agriculture. It is probable that alfalfa is not yet in its heyday. Enthusiasts, who believe that the possibilities of this crop are far from being realized. A great part of the nearly 100,000 acres now devoted to hay, and the conditions under which it is put up, the methods used, and the time of cutting, have a great deal to do with the value of the cured product as a feed for live stock.

The number of cuttings that may be taken from an alfalfa field in a season varies according to the locality and the variety from eight or occasionally more, in the extreme Southwestern, to two, or sometimes only one, in the northern and semi-arid regions. Thirty to forty days of good growing weather are necessary to produce a hay crop.

Time to Cut Alfalfa. There are conflicting opinions on the proper time to cut alfalfa for hay. Chemical analyses, says the United States Department of Agriculture, show that when cut in early bloom it has slightly more protein than when cut later. But certain animals, such as hogs and cattle, prefer if cut in the earlier stages. These reasons and the belief that frequent cutting produced a larger total yield led to the old practice of cutting just before the flowers appeared. That practice has been discarded. The result of experience accumulated it was found that these early and frequent cuttings, although they produced greater yields the first season, usually reduced the life of the stand and the average yield over a period of years. Later the best shows were used as a guide, cutting being recommended when they had reached a length of one or two inches or when the plants were one-third in bloom. The two guides seemed to be little as the basal shoots make very little growth in dry weather and blossoms are slow to appear in wet periods.

Recent experiments indicate that cutting at a later date than has generally been advised is more desirable, everything considered. At the Kansas agricultural experiment station a comparison was made of cutting at four stages—had, one-third in bloom, full bloom, and when the seed pods were forming. The earliest cutting was highest in feeding value but the stand was practically killed out in one season. Cutting when one-third in bloom gave less hay than cutting when in full bloom and seemed to encourage grass and weeds. Cutting when the seed pods were forming gave the best results, but the stand was not injured. No damage resulted from cutting the basal shoots, but the stand was not injured. No damage resulted from cutting the basal shoots, but the stand was not injured. No damage resulted from cutting the basal shoots, but the stand was not injured.

No damage resulted from cutting the basal shoots, but the stand was not injured. No damage resulted from cutting the basal shoots, but the stand was not injured.

Recent experiments indicate that cutting at a later date than has generally been advised is more desirable, everything considered. At the Kansas agricultural experiment station a comparison was made of cutting at four stages—had, one-third in bloom, full bloom, and when the seed pods were forming. The earliest cutting was highest in feeding value but the stand was practically killed out in one season. Cutting when one-third in bloom gave less hay than cutting when in full bloom and seemed to encourage grass and weeds. Cutting when the seed pods were forming gave the best results, but the stand was not injured. No damage resulted from cutting the basal shoots, but the stand was not injured. No damage resulted from cutting the basal shoots, but the stand was not injured. No damage resulted from cutting the basal shoots, but the stand was not injured.

Blouse-and-Ribbon Combination

Blouse-and-Ribbon Combination. With all the printed materials, plain organdie plays a prominent part, supplying trimmings and accessories, of which that would wear the sturtest of these ordinary clothes. It is a choice of materials like khaki and jeans and sturdy woollens, including flannel, sun and underwear, such as are used for men's uniforms.

The silk illustrated shows an excellent blouse-and-ribbon combination of heavy brown cotton tulle. The knickers are provided with practical pockets; they button about the legs and are supported by a stout belt of the material. There is also a pocket on the blouse. Soft, close-fitting flannel, wool and rooney sport shoes are the logical accompaniments for such a suit.

Organdie accomplishes in cotton what silk does in tulle; it makes dainty shirtings in place of the shen of silk. These materials are favorites of the younger generation and a sum-

merous down. A gorgeous gown recently exhibited in Paris is of black tulle with frills and diamonds in the front panel, extending from hem to waistline.

Novelty Cuffs. Novelty cuffs are seen on many of the above styles for spring. They are usually developed in two tones, gray and tan, black and white or brown and tan.

Wrap Like a Shawl. For an evening wrap (which could be more charming than a huge square of heavy white silk crepe embroidered in silver. This is folded and worn like a shawl.

Time of Cutting Alfalfa for Hay. Has Much to Do With Value of Cured Product as Feed for Different Animals.

Created by the United States Department of Agriculture. It is probable that alfalfa is not yet in its heyday. Enthusiasts, who believe that the possibilities of this crop are far from being realized. A great part of the nearly 100,000 acres now devoted to hay, and the conditions under which it is put up, the methods used, and the time of cutting, have a great deal to do with the value of the cured product as a feed for live stock.

The number of cuttings that may be taken from an alfalfa field in a season varies according to the locality and the variety from eight or occasionally more, in the extreme Southwestern, to two, or sometimes only one, in the northern and semi-arid regions. Thirty to forty days of good growing weather are necessary to produce a hay crop.

Time to Cut Alfalfa. There are conflicting opinions on the proper time to cut alfalfa for hay. Chemical analyses, says the United States Department of Agriculture, show that when cut in early bloom it has slightly more protein than when cut later. But certain animals, such as hogs and cattle, prefer if cut in the earlier stages. These reasons and the belief that frequent cutting produced a larger total yield led to the old practice of cutting just before the flowers appeared. That practice has been discarded. The result of experience accumulated it was found that these early and frequent cuttings, although they produced greater yields the first season, usually reduced the life of the stand and the average yield over a period of years.

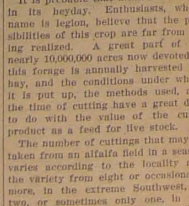

Recent experiments indicate that cutting at a later date than has generally been advised is more desirable, everything considered. At the Kansas agricultural experiment station a comparison was made of cutting at four stages—had, one-third in bloom, full bloom, and when the seed pods were forming. Children Cry for

Fletcher's CASARA

MOTHER—Fletcher's Castoria is especially prepared to relieve infants from one month old to Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep.

To avoid imitations, always look for the signature of Dr. J. C. Fletcher. Absolutely Harmless—No Opium.

Not a Bad Explanation. Donald watched me while I planted radishes, lettuce and other garden seeds.

Later in the day his mother asked him what I had planned to which he replied: "Oh, she planted a lot to eat seed."—Chicago Tribune.

Why Take LAXATIVES? Discovery by Science Has Replaced Them.

Pills and salts give temporary relief from constipation only at the expense of permanent injury, says an eminent medical authority.

Science has found a newer, better way, a means as simple as Nature's Iodine.

In perfect health a natural lubricant keeps the food moving soft and moving. But when constipation exists this natural lubricant is not sufficient. Doctors prescribe Iodine because it acts like this natural lubricant and thus secures regular bowel movements by Nature's own method of lubrication.

As Iodine is not a medicine or laxative, it cannot gripe and, like pure Iodine, it is harmless and pleasant. Iodine is used in leading hospitals. Get a bottle from your druggist today.—Advertisement.

All the Differences. "I want to be an author or an artist," said Gertrude. "What's the difference?" asked her young cousin Billy. "Oh," said Gertrude, "an author is somebody who writes his drinks and an artist is somebody who draws his thoughts."

Death Trap for rats and mice that works all the time. Make it yourself. 25 stamp and your address. Look Box 20, Alexandria, Minn.—Advertisement.

Did He Kiss the Mark? Mother-in-law: "You don't need to let your kids kiss you on the mouth when he kisses you good-by—give him your cheek." Daughter: "do, mother—but he's so nervous he always hits along side."

Quickly and easily cleans steel knives and forks. Removes stains, grime and grease. Use it for pots and pans, aluminum and all kitchenware. Avoid substitutes the name SAPOLIO is on the package. Blue Band—Silver Wrapper. DRUGGISTS' SUPPLY CO. INC. NEW YORK

Culling Small Flock of Sheep Quick Profitable

The farmer who raises a small flock of sheep will find it profitable to cull the flock well, suggests J. C. Holmes of the South Dakota State college.

After the wool is shorn, the farmer can tell whether his ewe has a heavy constitution and needs extra care, or whether she is unfit to keep.

If the wool does not come up to standard weight or show uniform quality and grade, the ewe should be branded for culling or for market.

It is as profitable to cull the farm flock of sheep occasionally and thoroughly for wool and mutton as it is to cull the poultry for eggs and white meat.

Several Advantages of Sweet Clover for Stock. The soy bean can be grown successfully with corn and is becoming a very popular crop in the corn belt, as it can be grown on a wide range of soils, but insouciantly necessary when it is grown for the first time. The hay from this crop contains a high percentage of protein and is necessary when it is grown for a great deal to the value of stage cut. It is grown with silage corn.

Matrimonial Adventures

The Bright Bees of Toupan

by James Branch Cabell

Copyright by United Feature Syndicate

JUST A LITTLE ABOUT JAMES BRANCH CABELL

Mr. Cabell is a very pleasant voice over the telephone. He lives five miles out of town. He has already written the first three of his Matrimonial Adventures through the pen of Mr. Joseph Horne...

Miramon Ljungar had very wonderfully prospered at magic; he was, as they say, now blessed with money...

His wife was discontent, because the wars of the Lesby appeared to this mortal woman inopportune...

Now as she spoke Giselle slumped violently at the black cross. And a faint happiness behind her eyes...

Now for an instant the walls of the room trembled as if blown down...

"Good to you, Sir Ninian," says Madame Giselle, politely enough. And then she spoke, in a different tone...

"That is a very likely story for you to be telling me, who can see that the degenerating creature has wings...

Let it suffice that he made all things to be done. Then, he took the power from Toupan, and made all things as they were...

"This is some more of your stuff and nonsense, out of old fairy tales, where everyone gets three wishes, and no good out of any of them..."

"Miramon said, 'Woe, dearest—' She was about to reply to Toupan, but Giselle continued, with that resistless and devastating outlook...

"I am so much later than I thought, the 'Happily now—' observed Ninian, ineffectively."

"And I might have had an earl, or a well-thought-of baron, who would have had the decency to remember our anniversary and my birthday, and in any event would never have been in the house twenty years ago..."

"Then the more shame to you and the less to me, if you are so fond of such morbid notions to yourself, and me by inserting other people's repose into mine..."

"I employ my natural gift. I express myself and none other. The rosbush does not put forth wheat, nor flax does it return me corn..."

"Now for an instant the walls of the room trembled as if blown down by the wind of her words..."

"That is a very likely story for you to be telling me, who can see that the degenerating creature has wings and still make a noise when it wants to..."

to contrive the dance of the Korred. He kept his mastery of the Sholeen who devastate, of the Shaleen who destroy...

"With that he caught the soiled scolding rag from the hand of Giselle, and he dropped it at one of the remaining bees, and brushed it from the black cross. And this he departed as he went..."

Toupan now moved his wings, exulting and by his moving the world of the High Gods were frightened now with reason, for the universe were divided and rain meting down the sky...

"Oh, very often," replied this Ninian, who too was married. Then Ninian asked, "But what will you do next?"

"The fallen wizard answered: 'Of what sort is the life? It is not so much a dream?' And Miramon said also, 'I wonder, Ninian, just where is the middle of next week?'"

"Dear me, no; that would never suit a woman who had an almost morbid aversion to reptiles."

"But Ninian declares it is in Ninian, whereas Zilphie and Catrin can play at handball, and the earth-quakes are at nurse."

"She would not like that. She had a delicate digestion, and she could not unphilosophically, that it waltz beyond Sild and Gold, in the blue house of the Pleiades and Toupan..."

"Yes," says Miramon, fortornly. "And indeed," the demon went on, with that glib intemperance reserved for the dilemmas of one's friends, "indeed it is in many ways a splendid thing for you to have the choice clear..."

ent live through no half-hour without meddling where they do not understand. Now Miramon kept silence. He was fingering the magic globe which he had bought the first night...

"I was very angry, 'Accursed woman!' he cried out, 'now indeed has your common sense come to you, and you are ready to begin. This is the doom of all artists that have to do with well-to-do women. Truly has been seen that the marriage bed is the grave of art. Well, I have put up with much from you, but this settles it, and I wish you were in the middle of next week.'"
