KILLED APPROPRIATIONS BILL

Legislature Denies Approval of University, Normal School Funds.

Madison, Wis.—The Wisconsin Legislature ended when the Senate joined with the assembly in killing the University of Wisconsin and nine Wisconsin normal school appropriation bills by adopting the conference committee report.

The repeal of the assembly to pass bills without financing them through income surtaxes and the determination of the Senate to stand against surtaxes resulted in a deadlock that climaxed the sixth month session.

The university and normal schools are now forced to fall back on continuing appropriations that carried them through the last two years.

The normal schools' situation is expected to be acute next session. A special session of the Legislature will be needed early in the fall to remedy conditions.

The Store that Saves You Money THE FARM Pine City Minnesota

Begin As a Child

TO SAVE, and when YOU are a man YOU will be ready to make your way in the world. That has been the guiding principal of all successful men.

FIRST NATIONAL BANK

Capital and Surplus, \$58,000 Pine City, Minn.

Former Farmer "buys" a large flat in city!

Dear Neighbor Bill: Last week when I paid my rent I that I was buying the flat I live in. That money would have paid the taxes on my old farm for a year.

Mr. Farmer! think before you move

I haven't been working very steady because those who they call unions strike so much, don't tell the Carbons but you can't make any money here and let me know if my old '980' has been sold or rented again. I suppose that red huffer you bought so cheap at my sale gives lots of milk now. How much would you take for her now? Take good care of my dog, Bill, for I may want him again. Must get to bed now as we have to get up at five o'clock and ride an hour to my work.

Write me about your crops. Your old neighbor, I. M. Sorro.

Pertinent Pointers for Practical Farmers

Prepared by the Agricultural Department, University of Minnesota

THUNDER AND LIGHTNING WILL NOT SOUR MILK

But Humidity and Heat Favor Development of the Acid Bacteria.

Milk doesn't become sour because of a thunderstorm. However, another common impression or delusion is the bonafide.

"At the time of thunder showers," says Harold May, bacteriologist of the dairy division, University of Minnesota, "the conditions are more conducive to souring because of the excessive humidity and heat which precede and accompany the storm, and which have a tendency to penetrate the ordinary household refrigerator to such an extent that the higher temperature is sufficient to favor the rapid development of the lactic acid bacteria and the acidifier of the sugar into the acid to sour the milk."

"The thunder and lightning have absolutely no effect in themselves. The atmospheric condition simply favors the action of the bacteria. If the milk is kept cool, below 50 degrees F. at all times, this will not occur. It is not so, the large milk companies with thousands of quarts of milk on hand would become bankrupt after a few such storms during the summer months. They escape the losses from sour milk because of their efficient refrigeration."

The souring of the milk is brought about entirely by the action of those microscopic plants known as lactic acid bacteria which convert the lactose or sugar in the milk into an acid known as lactic acid. Curdling or coagulation of the milk occurs when the acid acts upon the casein of the milk in such a way that it is precipitated. This curd may then be turned into butter or cheese by a compact mass, a complete coagulation, which is the finishing point of the normal souring of milk.

YOUNG CHICK LOSSES HEAVIER THAN USUAL

Bacillary White Diarrhea Rife in Many Flocks in Minnesota.

"They die like flies" is the gist of several reports regarding the spring hatch received at University Farm from poultry keepers of the state. Bacillary white diarrhea has been widespread and deadly, according to reports from the state.

The disease is characterized by watery, white diarrhea, which is usually fatal. It is caused by a bacterium which is very common in the soil and in the droppings of infected birds. The disease is most common in young chicks, but it can also affect older birds.

DAIRY FACTS

SUPERIOR SIRENS HELP DAIRY

Improvement Means Mating of Females to the Best of Hered With Purebred Bulls.

In most cases dairy herd improvement is almost entirely the result of good females as are already in the herd with a superior male, says the New York State College of Agriculture.

The first daughters of Agriculture said Mrs. E. J. Conklin, a highly respected resident of 20 Royallton Ave., N. Y., Minneapolis, Minn., recently.

"Why, I even went to the polls and stood in line waiting to cast my vote and didn't feel tired. That shows how good the milk is."

"But before taking Tanlac there were times when I was too weak and nervous to even do any sewing. Just get together me terribly, my back and head ached badly and I was too tired to sleep right."

"At first I didn't take much stock in Tanlac, but now I'm convinced there is nothing like it. I don't know what it is to have indigestion, headaches or nervousness, and I help with the housework and do lots of other tasks without feeling tired. Tanlac is simply grand."

"Tanlac is for sale by all good druggists. Accept no substitute. Over 37 million bottles sold."

Tanlac Vegetable Pills are nature's own remedy for constipation. Sold everywhere.—Advertisement.

FULL CALVES ARE PREFERRED

Young Animal Develops Sufficiently During Winter to Give Some Good Firm Pasture.

With many farmers it is the practice to have the cows fresh in the spring. There is much to be said in favor of fall-calving in a fall-calving schedule.

The advantage of fall-calving is that the calf is born in the fall when the weather is cool and the mother has plenty of feed. This results in a larger calf and a more productive cow.

The advantage of fall-calving is that the calf is born in the fall when the weather is cool and the mother has plenty of feed. This results in a larger calf and a more productive cow.

Local News

Miss Anna Stifter came up from St. Paul Monday to spend the Fourth at the John Bauer home. Postmaster Collins is having the exterior of the postoffice building repainted and the work is being done by S. Kilgore.

George Chilton came down from Crookston last Tuesday and will spend the week at the home of his father, A. M. Chastain.

The John Lindquist and Richard Lindquist families spent the Fourth with relatives at Forest Lake and also visited Allan Lindquist in Wyoming.

Mr. and Mrs. Ed Hakes and Judge and Mrs. Rolt, Wilcox drove to Duluth where they spent the Fourth with the Carl Wallace family.

Wm. Engler is now employed at the local Interstate lumber yard, taking the position vacated by Allan Lindquist.

The Methodist ladies aid will meet with Mrs. McNeal, south of the school house, Wednesday July 11th. You are invited. Lunch will be served.

Misses Adella and Babe Tallon came up from the Twin cities to spend the Fourth and the holidays of the week with their folks here.

Mr. and Mrs. Oscar Nelson accompanied Roy Carlson back from the Twin cities last Saturday and are spending the week here. Mrs. Nelson is a sister of Mrs. Carlson.

Mr. and Mrs. Harold Jorgensen drove to Mankato Tuesday where they spent the Fourth with relatives. They were accompanied by Mrs. George Staacke.

Miss Virginia Holt was up from St. Paul for a visit a few days ago for a visit with her sister in North Dakota following which she will return to her home in Pontiac, Mich.

Mr. and Mrs. Allan Lindquist are now settled at Wyoming, Minn., where they moved recently. He has been appointed manager of the Interstate Lumber Co. there. Allan was employed in the local yard for the past two or three years.

Mrs. Peter Holmes accompanied her husband and Roy Carlson home in the latter's car from St. Paul last Saturday. Mrs. Holmes has been in St. Luke's hospital there the past few months and her health is considerably improved.

Roh't. A. Theman of Fairmont visited at the home of his brother Alice Theman, east of town, last week. Misses Loretta Krossman and Hertha Becker of Para, Ill. were also visitors at the Theman home over the week end.

Mr. and Mrs. Emory Blanche left the week end for their home in Chicago after a two week visit at the home of his parents, Mr. and Mrs. Bert Hanschard.

Mr. and Mrs. Jas. O'Brien and daughter came up from Minceau Tuesday to spend the Fourth at the Phil Minsonevs home.

Mr. and Mrs. Ell Huber returned home from their wedding trip last week. They will make their home for the present at the home of his mother, Mrs. Alice Huber. Ell is back at his work in the postoffice and believes that Postmaster Collins must know every child in the community according to all those who characterized them and said that Jerry sent them up for treats.

Mr. and Mrs. W. S. McEachern and daughter Winellen drove to Taylors Falls last Sunday morning spending the day at the Howard Tolson home. Miss Winellen remained there for a week's visit and will go on to Superior for a visit at the home of her uncle, Dr. McEachern.

Lorenzo Gray, son of Mrs. Florence Gray, visited here last week and is now in Virginia where he is completing arrangements for opening a dental office there. He graduated as a dentist from the state university last month.

Mr. and Mrs. Gene Barnum are going to Duluth today for a few days visit with Earl Gray at Nopenning.

Dr. S. S. Hesselgrave and wife and Richard Hesselgrave of St. Paul and Mrs. J. D. Hesselgrave and Mrs. Freeman Wilson of Minneapolis spent the 4th with the C. C. Ives family. The Dr. and Mrs. Ives are brother and sister and Mrs. Wilson is her sister also. Mrs. Wilson is to start for her future home at Miami, Florida next Saturday.

Frank Hody drove up from Iron Center last Sunday and remained over until after the Fourth with relatives. He is working for the telephone company and has been at St. Cloud until recently.

Carl Wallace came down from Duluth last Saturday for a short visit at the Wilcox home. Mrs. Wallace and son Bobbie, who have visited the past week with her parents, returned with her husband to Duluth Sunday. They were accompanied in Duluth by her sister, Mrs. Florence Wilcox.

They say there is nothing new under the sun except the patch on the boy's pants, but we heard of a new way to kill snakes—if it works.

County Engineer Jorgensen and Chas. Freeman of the Power company are the inventors. Last Monday a good sized snake was spiraling around on the roof where the crew is working in Pokesama.

Jorgensen and Freeman corralled the snake and decided to exterminate it via electricity. Com. Gust Anderson and Tom Ling were the spectators and were curious to see how an overdose of electricity would affect the reptile. The executioners first tried the dynamite, but that wasn't strong enough. They then decided to hitch the wire to the spark plugs of an automobile.

East was jealous of the other and both wanted the honor so they both caught hold of the wire. Jorgensen attached it to his plugs and Freeman aimed it at the snake. One end of the wire was fastened and then when they were all set, the other end was hitched on. Then began the original "snake dance".

The electricity meant for the snake shot into Jorgensen and Freeman and continued to shoot at each chug of the motor. The wire was long and they had lots of room to dance. Jorgensen gave a bound that carried him over the car. Freeman jumped up in the air, and so did the daylight out of Tom and Gust and those worthless leaped to one side. Jorgeny yelled "Sudden aid, sudden death" and a few things that are unprintable. Freeman was too busy to yell. Tom and Gust were convulsed with laughter, and the dance went on. Both the dancers were full of pep and would have been dancing just yet if the car ran out of gasoline. The snake slid off into the grass and the inventors decided that "all's well that ends coz'ly" but things were "elavohvoo" for a minute or two.

There having been numerous complaints entered with the Council of this Village, July 2, 1923.

The Village Council of the Village of Pine City, Minn., met this day at its regular meeting.

The minutes were called to order by Pres. Derr with the following present: Pres. Derr, Trustees Daley and Worche and Clerk Pennington. Absent: Trustees Doo.

The minutes of the meeting of June 4th and the Equalization Board to the 20th, were read and duly approved.

There having been numerous complaints entered with the Council of this Village, by its citizens in regard to the local boys and girls destroying property in the village, the clerk was instructed to publish notices warning the parents and children against such vandalism and that anyone caught destroying property will be dealt with accordingly.

The following bills were presented for payment:

E. M. Power Co. lights.....	\$237.93
Robert Derr, 15 hrs. on election board 46, 1 day board of audit 34.....	10.00
H. W. Daley, service elec.....	6.00
Ang. Larson serv. elec.....	6.00
C. F. Jackson, elec. board.....	6.00
W. H. Hamlin, 39 days assessing village prop., 15 hrs. elec. board 83, 1 day equalization board.....	106.00
Pine Co. Pioneer, notice.....	2.00
Nordme Matter, Co. meters.....	25.80
N. W. Bell Tel. Co.....	12.00
P. C. Library, June salary.....	125.00
J. D. Wilcox, June salary.....	16.50
Knute Samberg, labor.....	11.10
Venzel Herzman, labor.....	100.00
C. M. Pennington, salary \$20, freight on meters \$7.93, postage \$1.50, 1 day serv. equal board.....	33.43

A motion was made by trustee Woehle, 2nd by clerk Pennington that the above bills be allowed.

There being no further business the meeting was adjourned.

Robert Derr, Pres.
C. M. Pennington, Vill. Clerk.

DOES IT PAY TO WORRY ABOUT APPENDICITIS?

Can appendicitis be guarded against? Yes, by preventing intestinal infection. The intestinal antiseptic, Adler-Iska, acts on both upper and lower bowel removing ALL foul, decaying matter which might start infection. EXCELLENT for gas on stomach or error in constipation. It removes matter which you never thought was in your system and which nothing else can dislodge. One man reports it is unbelieveable the awful gripes Adler-Iska brought out—20¢ sale.

If you are sick and have tried everything else and did not get help, then try

The Better Way of Milking

- (1) It Works in Harmony With the Cows. Because the De Laval Milker works in harmony with the cow, in observance of the principles of milk secretion, better results are obtained with it than with any other way of milking.
- (2) Uniform Pulsation Action. Cows like and respond best to uniformity of pulsations or squeezes. Pulsation speed of the De Laval Milker is governed by a master control which is geared to the pump and is as regular and uniform in its action as the pendulum of a clock.
- (3) Pulsator Close to Udder. Vigorous and stimulating action, which cows like so well, is secured with the De Laval because the pulsator is located close to the udder. The pulsator has only one moving part, is non-adjustable, requires no oiling and will run for years without attention. No other milker has these features.
- (4) Alternating Action. The alternating action of the De Laval causes milk to be drawn from two teats, while the other two teats are given a massaging and brief rest period. In this manner an even and continuous flow of milk is drawn from the udder.
- (5) Self-Adjusting Teat-Cups. De Laval Teat-cups fit all sizes of teats. No metal touches the teat, and the rubber liner fits snugly about the teat, permitting the vacuum to be applied only to the point of the teat and not to the sides. This, together with other exclusive advantages, accounts for the pleasing and gentle action of the De Laval Milker, and is one of the many reasons why the cows like it so well.

CHAPTER I—Continued.
"Mr. Whittington called again."
"If you will call upon me tomorrow morning at eleven o'clock, I will give you the details of my proposition before you."

"At eleven o'clock," said Tuppence doubtfully.
"At eleven o'clock," said Tuppence doubtfully.
"At eleven o'clock," said Tuppence doubtfully.

"The adventures have begun," she murmured to herself. "What does this mean to me, I wonder? There's something about you, Mr. Whittington, that I don't like at all. But on the other hand, I'm not the least bit afraid of you. And as I've said before, and small doubts say again, little Tuppence can look after herself, thank you."

And with a short, sharp nod of her head she walked briskly onward. As a result of further meditations, however, she turned aside from the direct road and entered a post office. Tuppence wrote rapidly: "Don't put in advertisement. Will explain tomorrow." She addressed it to Tommy at the club, from which in one short month he would have to resign, unless a kindly fortune permitted him to renew his subscription.

It wanted some five minutes to eleven when Tuppence reached the block of buildings in which the offices of the Eastonia Glassware Company were situated. To arrive before the time would look over her shoulder. So Tuppence decided to walk to the end of the street and back again. She did so. On the stroke of eleven she plunged into the recesses of the building. The Eastonia Glassware Company was on the top floor. Tuppence knocked. In response to a voice from within, she turned the handle and walked into a small rather dirty cuter office.

A middle-aged clerk got down from a high stool at a desk near the window and came toward her inquiringly. "I have an appointment with Mr. Whittington," said Tuppence. "Will you come this way, please?" He crossed to a partition door with "Private" on it, knocked, then opened the door and stood aside to let her pass in.

Mr. Whittington was seated behind a large desk covered with papers. Tuppence felt her previous judgment confirmed. There was something wrong about Mr. Whittington. The combination of his sleek prosperity and his shifty eye was not attractive. He looked up and nodded.

"So you're turned up, all right? That's good. Sit down, will you?" Tuppence sat motionless with her hands clasped. Mr. Whittington sorted through his papers.

"If you will call upon me tomorrow morning at eleven o'clock, I will give you the details of my proposition before you." Tuppence looked at the girl with a certain interest. She had never seen her before. She was a young girl, about twenty, with a certain air of mystery about her.

"I want me to go to Malama Colombari?" For how long?
"That depends. Possibly three months."

"That is all. There are no other conditions?"
"None whatever. By the way, you are English, are you not?"
"Yes."

"You speak with a slight American accent?"
"My great aunt in hospital was a little American girl. I dare say I picked it up from her. I can soon get out of it again."

"The clerk followed his discreet knock into the room, and laid a paper at his master's elbow."
"Telephone message just come for you, sir."

Whittington snatched it up and read it. A frown gathered on his brow.
"That'll do, Brown. You can go." The clerk withdrew. Whittington turned to Tuppence.

"Come tomorrow at the same time. I'm busy now. Here's dirty to go on with."
He rapidly sorted out some notes, and pushed them across the table to Tuppence.

"The girl counted the notes, secured them in her handbag, and rose."
"Good morning, Mr. Whittington."

Whittington looked surprised.
"Surely you are not thinking of refusing? I can assure you that Madame Colombari is a most high-class and orthodox establishment. And the terms are most liberal."

"Exactly," said Tuppence. "That's just it. The terms are almost too liberal. Mr. Whittington, I cannot see any way in which I can be worth that amount of money to you."
"No," said Whittington softly. "Well, I will tell you I could hardly less obtain someone else for very much less. What I am willing to pay for is a young lady with abundant intelligence and presence of mind to sustain her part well, and also one who will have sufficient discretion not to ask too many questions."

"I want me to go to Malama Colombari?" For how long?
"That depends. Possibly three months."

"Exactly," said Tuppence. "That's just it. The terms are almost too liberal. Mr. Whittington, I cannot see any way in which I can be worth that amount of money to you."
"No," said Whittington softly. "Well, I will tell you I could hardly less obtain someone else for very much less. What I am willing to pay for is a young lady with abundant intelligence and presence of mind to sustain her part well, and also one who will have sufficient discretion not to ask too many questions."

"Even so, O King. Now, will you come and have lunch?"
"I'll come anywhere. But what have you been doing? Holding up a bank?"
"All in good time."
"And now tell me," said Tommy, unable to restrain his pent-up curiosity any longer, as he sat in state in the Piccadilly.
"Miss Cowley told him."

"And the curious part of it is," she ended, "that I really did invent the outfit of Jane Finlay. I didn't want to give my own because of poor father—in case I should get mixed up in any thing shady."
"Perhaps that's so," said Tommy slowly. "But you didn't invent it?"
"What?"
"You told it to you. Don't you remember, I said yesterday I'd overheard two people talking about a female called Jane Finlay? That's what brought the name into your mind so far?"

"So you did. I remember now. How extraordinary—Tuppence railed off into silence. Suddenly she crossed herself. "What were they like, the two men you passed?"
"One was a big fat sort of chap. Clean shaven, I think—and dark."
"That's him," cried Tuppence, in an ungrammatical squeal. "That's Whittington! What was the other man like?"

"I can't remember. I didn't notice him particularly. It was really the unattractive name that caught my attention."
"And people say that coincidences don't happen!" Tuppence fainted her luncheon happily.
"But Tommy had become serious. "Look here, Tuppence, old girl, what is this going to lead to?"
"More money," replied his companion.

"I know that. You've only got one idea in your head. What I mean is, what about the next step? How are you going to keep the game up? After all, you know, you can't bluff him forever. You're sure to slip up sooner or later. And, anyway, I'm not at all sure that it isn't actionable—blacking you, you know?"
"Nonsense! Blackmail is saying you'll tell unless you are given money. Now, there's nothing I could tell, because I don't really know anything. I've got a plan. Obviously what we've got to do is to find out more about it all."

Tommy applauded.
"Don't jeer. We can only find out through Whittington. We must discover where he lives, what he does, what he is, in fact! Now I can't do it, because he knows me, but he only saw you for a minute or two in your car. He's not likely to recognize my plan is this, Tuppence went on calmly. "I'll go alone tomorrow. I'll put him off again like I did today. It doesn't matter if I don't get any more money at once. Fifty pounds ought to last us a few days. You'll be about outside. When I come out, I shan't speak to you in case he's watching. But I'll take up my stand somewhere near, an' when he comes out of the building I'll drop a handkerchief or something, and off you go!"
"OR I go where?"
"Follow him, of course, all right! What do you think of the idea?"

"Sort of thing one reads about in books. People will wonder what I'm up to. Anyway, it will be rather a lark."
They met by arrangement the following morning and proceeded to city ward. Tommy remained on the opposite side of the road while Tuppence plunged into the building.
Tommy strolled slowly down to the end of the street, then back again. Just as he came abreast of the building, Tuppence darted across the road.
"Tommy! The place is that. I can't make anyone hear."
"That's odd!"
"Isn't it? Come up with me, and let's try again."

Tommy followed her. As they passed the third floor landing a young clerk came out of an office. He hesitated a moment, then addressed himself to Tuppence.
"Were you wanting the Eastonia Glassware?"
"Yes, please."
"It's closed down. Since yesterday afternoon Company being wound up, they say. Not that I've ever heard of it myself. But anyway the office is to let."

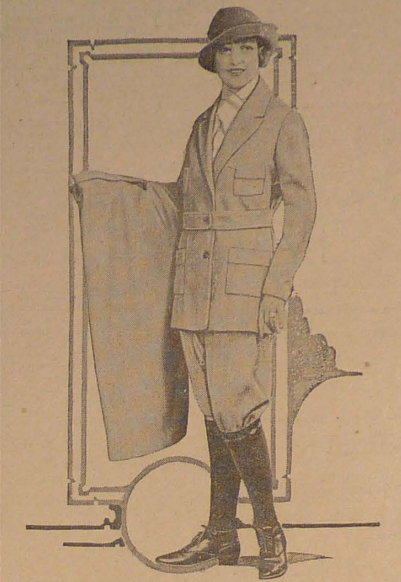

"Just go on with what you're doing now. Find Jane Finn."
(TO BE CONTINUED.)

Prehistoric Cliff Dwellers. Several sections of prehistoric huts estimated to be from 1,200 to 1,500 years old have been unearthed in the Ozarks region of Missouri. These people were cliff dwellers, but they should not be confused with the cliff dwellers who lived high up on the faces of cliffs in Arizona and New Mexico. Many crude weapons and implements were found perfectly preserved in the dry soil under the overhanging cliffs.

THREE-PIECE SPORTS SUITS;

FOR ALL DAY AND EVERY DAY

Now there is nothing new in such an outfit but it is altogether satisfactory, just as a conservative, plain, tailored suit is satisfactory for growing. It means something to feel sure that every-day clothes for children are still simply made of familiar warm fabrics and that styles are little changed. This point settled, one may go ahead, employing the usual materials and the usual decorations of simple needlework, tucks, smocking and the like. But any details or variations that are new, and any inclination of the mode to favor certain fabrics, the coat is made to do double duty—sometimes worn with the knickerbockers and sometimes with the skirt, according to occasion. Every woman will see the advantages of this arrangement. The coat-and-knickers are equally adaptable to any sort of active sports wear. The head and feet must be suitably clothed, with smart and sturdy coverings. In the picture a plain soft felt hat, sport shoes and wool stockings will speak a trustworthy sense of clothes. Whatever her days may bring to pass this little maid is dressed to meet all the ordinary happenings that make that a strenuous life for a small girl, especially during the long vacation. The main business of life is always happening. Whatever it is, a little girl will not be taken unawares. Let both these fabrics and knickerbockers made of a cotton wash fabric, lined with crepe and trimmed for summer wear, but as far as fabric is concerned it is a case of 50-50. Buyers of the colonials will find that they are as well as fashionable next spring as they are now, so either seems a safe purchase as far as that consideration is concerned.

Both Practical and Smart

Both Practical and Smart
fies, colors or methods of decoration, proving interesting to the seamstress who makes children's clothes. As to colors, strong tones are liked, as bright yellow, rose, moss green, bright blue, deep pink, light brown. Very small checks in gingham divide honors with plain colors. Checks and plain goods are combined, the checked pattern making the frock with short yoke and wide hem set off by plain fabric's skirt. Quaint blossoms cut out from colored cotton and ap-

Little Maid Dressed for Any Occasion

plished with outline of black yarn are well, varied by butterflies and Japanese figures. Pinafore pockets, in which fruits or animals or birds are cut out of colored cottons and applied with cotton yarn outlining delight the hearts of the summer children. Some travel, and one is always obliged to run errands—the unexpected is always happening. Whatever it is, a little girl will not be taken unawares. Let both these fabrics and knickerbockers made of a cotton wash fabric, lined with crepe and trimmed for summer wear, but as far as fabric is concerned it is a case of 50-50. Buyers of the colonials will find that they are as well as fashionable next spring as they are now, so either seems a safe purchase as far as that consideration is concerned.

Matrimonial Adventures
The House Guest
BY Alice Duer Miller

When he came home that afternoon a note from Mary was lying on the hall table—a not unusual occurrence. She was questioning about the girl who had been in the house the afternoon of the children's dancing class. She was questioning about the girl who had been in the house the afternoon of the children's dancing class.

PERSONALITY OF ALICE DUER MILLER
Mrs. Miller smiled amiably over the photo which I called her up to see. She was smiling at me, but she was not smiling at the camera.

He had been married seven years—she the bride; but not bored with the temporary lagging that came over him of a Sunday afternoon when he was to go to church.

Dear Eliot: Something strange has happened. I am sure that you and I should be together again. I want to be alone for a few days and think over how I can arrange to do this.

Various Kinds of Ice
Experiments have shown that water can be made to solidify into five different kinds of ice, each of which at certain temperatures changes from one into another with explosive violence.

By morning, however, he had the candle as an excuse. The candle behind the words was there, however. It was steady. He would take it to church before he went and he had his high hat. He looked very well.

My morning, however, he had the candle as an excuse. The candle behind the words was there, however. It was steady. He would take it to church before he went and he had his high hat.

Increase Presenting Low Yield of Milk
Selection, Feeding and Breeding Would Double Average Production.

A study of dairy herds and income records of 1914 containing 100 cows for the year 1910 to 1920 showed that the cows giving 100 pounds of average milk per cow produced above feed cost of about \$10, a produced amount of butterfat a year the income of about \$75 and at 500 pounds of butterfat the average milk cow would about \$100 a year per cow.

Small Fruits Bring Best Price When Well Handled
It is considered advisable to pick strawberries, raspberries and other small fruits in the morning and to handle them in the coolest part of the day.

Sudan Grass Is Superior to Many Other Grasses
Because of its ability to withstand drought and hot weather during the summer months Sudan grass is superior to many other grasses.

Oilers Tend to Lessen Spread of Many Insects
Hog flies should not be depended upon to eradicate lice and mange or to prevent losses from gross infestation.

Honey Bees Important Factor in Pollination
Orchard owners should not overlook the importance of bees in the orchard. Fruit will not set unless proper conditions are maintained.

Phytoplants to Prevent Injuries by Insects
Watch Various Vegetable Crops for Numerous Pests.

Tons of food are lost annually in the thousands of home gardens in which the ravages of insect injurers are so common. Insects are the most serious pests of the vegetable garden.

Alfalfa Crops Requires Most Careful Handling
Alfalfa leaves which compose about 45 per cent of the hay crop and contain 10 per cent of the protein content in the hay, require careful handling if they are to be retained with the stalks in the harvesting of the hay.

Easy Method to Prevent Horns on Young Calves
Preventing the growth of horns on cattle, says the United States Department of Agriculture, is much more satisfactory than cutting them off later.

Black Raspberries Are Propagated From Tips
Black raspberries are propagated from rooted tips and this should be started in August, when the canes bend so that they touch the ground.

Dairy Cows Need Grain in Addition to Alfalfa
The feeding of alfalfa by three times a day and grain only once a day to dairy cows will not give the desired results in milk production.

GOVERNMENT OWNERSHIP
The proposal for government ownership and operation of railroads in the United States is a measure to be considered by the government.

EXPERIENCE OF CANADA
The Canadian government owns and operates the Canadian national railway system, comprising 27,500 miles of railroad. The expense of operation in 1921 exceeded the revenues by \$18,000,000.

EXPERIENCE OF ITALY
In 1920 the Italian government took over the ownership and operation of its railroads. It has lost heavily, and only occasionally has made small profit.

EXPERIENCE OF THE UNITED STATES
The actual and complete results of the operation of the United States government in operating the railroads commencing January 1, 1918, are not fully known as yet.

5 Pass Sedan \$860
The All-Year Car for Every Family
Chevrolet is leading in the great shift of public demand to closed cars because of their safety and protection from weather.

Yeast Foam assures a well-risen dough
Home baking is the first step in home making because the girl who knows how to make good bread is equipped to do most other cooking well.

AMERICA'S HOME SHOE POLISH
